Tanwin is represented by n, thus غرراً fauran. Alif-e maqsūra is represented by ā;—thus دعوى da'wā.

In the Arabic character, a final silent h is not transliterated,—thus it banda. When pronounced, it is written,—thus is gunāh.

Vowels when not pronounced at the end of a word, are not written in transliteration. Thus at ban, not bana. When not pronounced in the middle of a word or only slightly pronounced in the middle or at the end of a word, they are written in small characters above the line. Thus (Hindi) that $d\bar{e}kh^*t\bar{a}$, pronounced $d\bar{e}kht\bar{a}$; (Kāshmīrī) that is the first that it is the first th

- C.—Special letters peculiar to special languages will be dealt with under the head of the languages concerned. In the meantime the following more important instances may be noted:—
 - (a) The ts sound found in Marāṭhī (ব), Paṣḥtō (১), Kāshmīrī (৮, ব), Tibetan (১), and elsewhere, is represented by ts. So, the aspirate of that sound is represented by tsh.
 - (b) The dz sound found in Marāṭhī (\exists), Paṣḥtō ($\not\models$), and Tibetan ($\not\models$) is represented by dz, and its aspirate by dzh.
 - (c) Kāshmīrī ্ (স্) is represented by ñ.
 - (d) Sindhī &, Western Pahjābī (and elsewhere on the N.-W. Frontier) بن, and Paṣḥtō ن or ... are represented by به.
 - (e) The following are letters peculiar to Pashto:-

 ψ t; ψ ts or dz, according to pronunciation; ψ d; χ r; χ ψ or g, according to pronunciation; ψ ψ ψ or ψ , according to pronunciation; ψ ψ ψ or ψ .

(f) The following are letters peculiar to Sindhi:—

D.—Certain sounds, which are not provided for above, occur in transcribing languages which have no alphabet, or in writing phonetically (as distinct from transliterating) languages (such as Bengali) whose spelling does not represent the spoken sounds. The principal of these are the following:—

â, represents the sound of the a in all.

The semi-consonants peculiar to the Munda languages are indicated by an apostrophe. Thus k', t', p', and so on.

E.—When it is necessary to mark an accented syllable, the acute accent is used. Thus in (Khōwār) ássistai, he was, the acute accent shows that the accent falls on the first, and not, as might be expected, on the second syllable.

THE ERANIAN FAMILY.

INTRODUCTION.

When the speakers of the original Aryan language wandered forth eastwards from the centre of Indo-European dispersion, they are believed to have settled at an early period on the banks of the Jaxartes and of the Oxus, and we may with some probability name the oasis of Khiva on the latter river as one of their most ancient seats in the continent of Asia. Thence, still a united people, the Aryan tribes appear to have followed the courses of the two rivers into the high-lying country of Khokand and Badakhshan. It was here that there took place one of the great divorces in the world's history. For some unknown reason, the Aryans here divided themselves into two groups, and each went its separate way.1 One group filtered southwards over the Hindūkush into the valley of the Kābul, and thence into India, where its speech became the ancestor of the modern Indo-Aryan vernaculars. The other, or 'Eranian' group, and it is this with which we are immediately concerned,—gradually spread from Khokand and Badakhshan eastwards and westwards. Descendants of those who migrated towards the East are now found in the Pāmīrs and still speak Eranian languages, but this does not represent the limit of their ancestors' wanderings in that direction. Ancient documents discovered by Sir Aurel Stein in Central Asia, far to the East, are now being deciphered and are found to be certainly in a language of Eranian stock; and at the present day, even in Yarkand, we find tribes of Aryan build and complexion who have adopted the Turki speech of the nations that conquered them in later periods. Today, we may take the Sarikol country in the Taghdumbash Pāmīr as the eastern limit of the Eranian family of languages.

Those who migrated westwards,—say, about the middle of the second millennium before Christ,—gradually occupied what is now Merv and Eastern Persia, and thence their language spread over the whole of Persia, and over what are now Baluchistan and Afghanistan. In the latter tracts, the eastern limits of Eranian speech may now be looked upon as roughly coinciding with the River Indus, though here and there it has overstepped that boundary, and though the country west of the Indus was once occupied by Indo-Aryans and Indo-Aryan languages are still found there.

From the earliest times we find the Eranians divided into several tribes. The inscriptions of Darius (B.C. 522-486) mention at least twelve. These probably all spoke different dialects. It is at least certain that the Old Persian of these inscriptions,—the official language of the court at Persepolis and of the tribe inhabiting the province of Persis,—was different from that used in the Avesta, which was eastern in origin, and which many scholars consider to have been the dialect of Bactria. For our present purposes, it is sufficient to note that there was the Persic dialect, and other dialects which we may, for the nonce, call 'Non-Persic.'

² I spell the word 'Eranian,' not 'Iranian,' just as in India we say 'shēr,' not 'shīr' for 'tiger.' 'Īrān' is the quite modern Persian pronunciation of the original 'Ērān' (Old Persian Airyānām, Avesta Airyana-), and it is in this latter form that the word was introduced into India.

VOL. X.

It is not suggested that the division necessarily took place all at one stroke. Such ethnic movements are often slow and gradual in character, and this may well have lasted over a very long period. All that we can be certain of from philology is that the division actually occurred.

The Eranian and the Indo-Aryan branches of the Aryan language each developed on its own line. In the earliest stages of their separate growth they were very similar. There are passages in the oldest part of the Avesta that can be turned into good Vedic Sanskrit by the application of a few simple phonetic rules. As time went on, the two became wider apart, and Professor Geldner gives the following list of the common characteristics of all Eranian languages, which distinguish them from Sanskrit:—

- (1) Sanskrit s is represented by an Eranian h, as in Sanskrit sindhu-, Avesta hindu-, the Indus.
- (2) Sanskrit sonant aspirates (gh, dh, bh) are not aspirated in Eranian, as in Skr. gharma-, Av. garema-, heat.
- (3) A Sanskrit k, t, or p preceding a consonant, is represented in Eranian by the corresponding spirant $(\underline{kh}, \underline{th}, f)$, as in Skr. prathama-, Av. fratema-, first.
- (4) In certain cases, a Sanskrit h is represented by an Avesta z, as in Skr. bāhu-, Av. bāzu-, the arm.

These various changes came by gradual development, and the development in each case did not proceed at the same rate. In some instances the change is confined to particular Eranian dialects. For instance, the change of s to h is rare in the Non-Persic forms of Eranian. The unequal rate of development is well illustrated by the interesting case of the Dardic or Piśācha languages spoken in the country south of the Hindūkush and north-west of India proper, described in Vol. VIII, Part ii, of this Survey. As there explained (pp. 7ff.), these languages branched off from the Aryan stock after the Indo-Aryans had been finally severed from the Eranians, but before the Eranian languages had themselves developed all their characteristic peculiarities. They accordingly agree only partially with the latter in their finally developed form, and, occupying as they did an inhospitable and inaccessible country, have themselves developed in other respects on their own lines.

We have divided the Eranian languages into two groups,—'Persic' and 'Non-Persic' From the former is descended, through the Pahlavī of the time of the Sassanides (3rd to 7th centuries A.D.), the modern Persian language. The Non-Persic dialects are often classed together under the term 'Medic,' a convenient, but inaccurate name.² They were spoken in widely separated parts of Ērān. Media itself was in what at the present time is Western Persia, yet the Medic word for 'dog,' the $\sigma\pi\acute{a}\kappa a$ which has been preserved for us by Herodotus, can claim the Ōrmurī spuk and the Paṣḥtō spāe, both spoken nowadays in distant Afghanistan, among its descendants, while the corresponding Persic (Pahlavī and modern Persian) word is the much less closely connected sag. But the one literary monument of ancient 'Medic' that we possess, the

¹ Encyclopædia Britannica (11th ed.), Vol. xxi, pp. 246ff. (Art. 'Persia').

The characteristic features of the Non-Persic dialects were, and are, found not only in Media, which corresponds to the modern North-Western Persia and Kurdistan, but also in tracts far to the East. They are moreover characteristic of the language of the Avesta, which is East Eranian in origin. The term 'Medic' is, however, convenient as designating the language of the tribe which was most important politically amongst those which used the Non-Persian dialects. At the same time it should be carefully borne in mind that, although the Avesta was written in 'Medic,' that is no ground for assuming that its birthplace was Media or anywhere in the neighbourhood. This view, it is true, is held by some eminent scholars, but the question may not be begged by the wrong use of the term 'Medic.' On this point, see W. Geiger in pp. 412ff. of Vol. I, Part ii, of the Grundriss der iranischen Philologie.

3

Avesta, had, according to most modern authorities, its home, not in Media, but in East Erān. Its oldest parts, as we have them now, probably date from about the 6th century before our era, although no doubt much of these consists of survivals from earlier times. Other portions, it is true, belong to a period many centuries later, but nevertheless we have no documents sufficiently late in date to illustrate the 'Medic' in its mediæval stage, as Pahlavī represents mediæval Persian. In the presence of literary and official Persian, 'Medic,' as a literary language, died a natural death, and survived only in local dialects of which we have no mediæval literary records.

In course of time, these 'Medic' dialects developed into independent languages, some of which form the subject of the present volume. These are the Ghalchah languages of the Pāmīrs, Paṣḥtō, Ōrmurī, and Balōchī. To them may be added, as falling outside the limits of the present enquiry, a number of dialects,—the best known of which is Kurdish,—spoken nearly all over Persia and beyond, distinct from, and independent of, the literary Persian. As the most important of these languages, and, especially, all those dealt with in the present volume, are spoken in the eastern part of the ancient Ērān, they can, for the purposes of this Survey, be conveniently classed together under the name of the 'Eastern Group' of the Eranian languages.

The present volume therefore deals with the following Eranian languages:-

- (1) Pashtō.
- (2) Örmurī.
- (3) Balochī.
- (4) The Ghalchah Languages.

To these are added short, supplementary, accounts of two true 'Persic' dialects accidentally coming within, or approaching, the limits of our enquiries. These are Dēhwārī, spoken by immigrants from Persia into Baluchistan, and Badakhshī, spoken immediately to the west of the tract in which the Ghalchah languages are the vernacular.

Of these, Pashtō is the language of the greater part of Afghanistan and the neighbouring tracts. Ormurī is an interesting and almost unknown form of speech employed by scattered remnants of the Ormur tribe in Afghanistan. Balōchī is the language of Baluchistan, and the Ghalchah languages have their home in the Pāmīrs. With one exception, none of the languages composing the last-named group are spoken within the limits of British India. Some of them are spoken in Russian territory, and others in Afghan territory; but the one exception, Yüdghā, has crossed the Hindūkush, and is spoken in a valley in the Chitral country, and thus falls within the area of our investigations. In order to examine it properly, it was found necessary to describe, however cursorily, the remaining languages of the group.

The various languages are fully described in the sections devoted to each, and a repetition of what is there said is unnecessary. It will suffice to state here that no materials are available regarding the number of speakers of any of these languages except Paṣḥtō and Balōchī. Of the former there are about 4,000,000 speakers, and of the latter about 700,000.

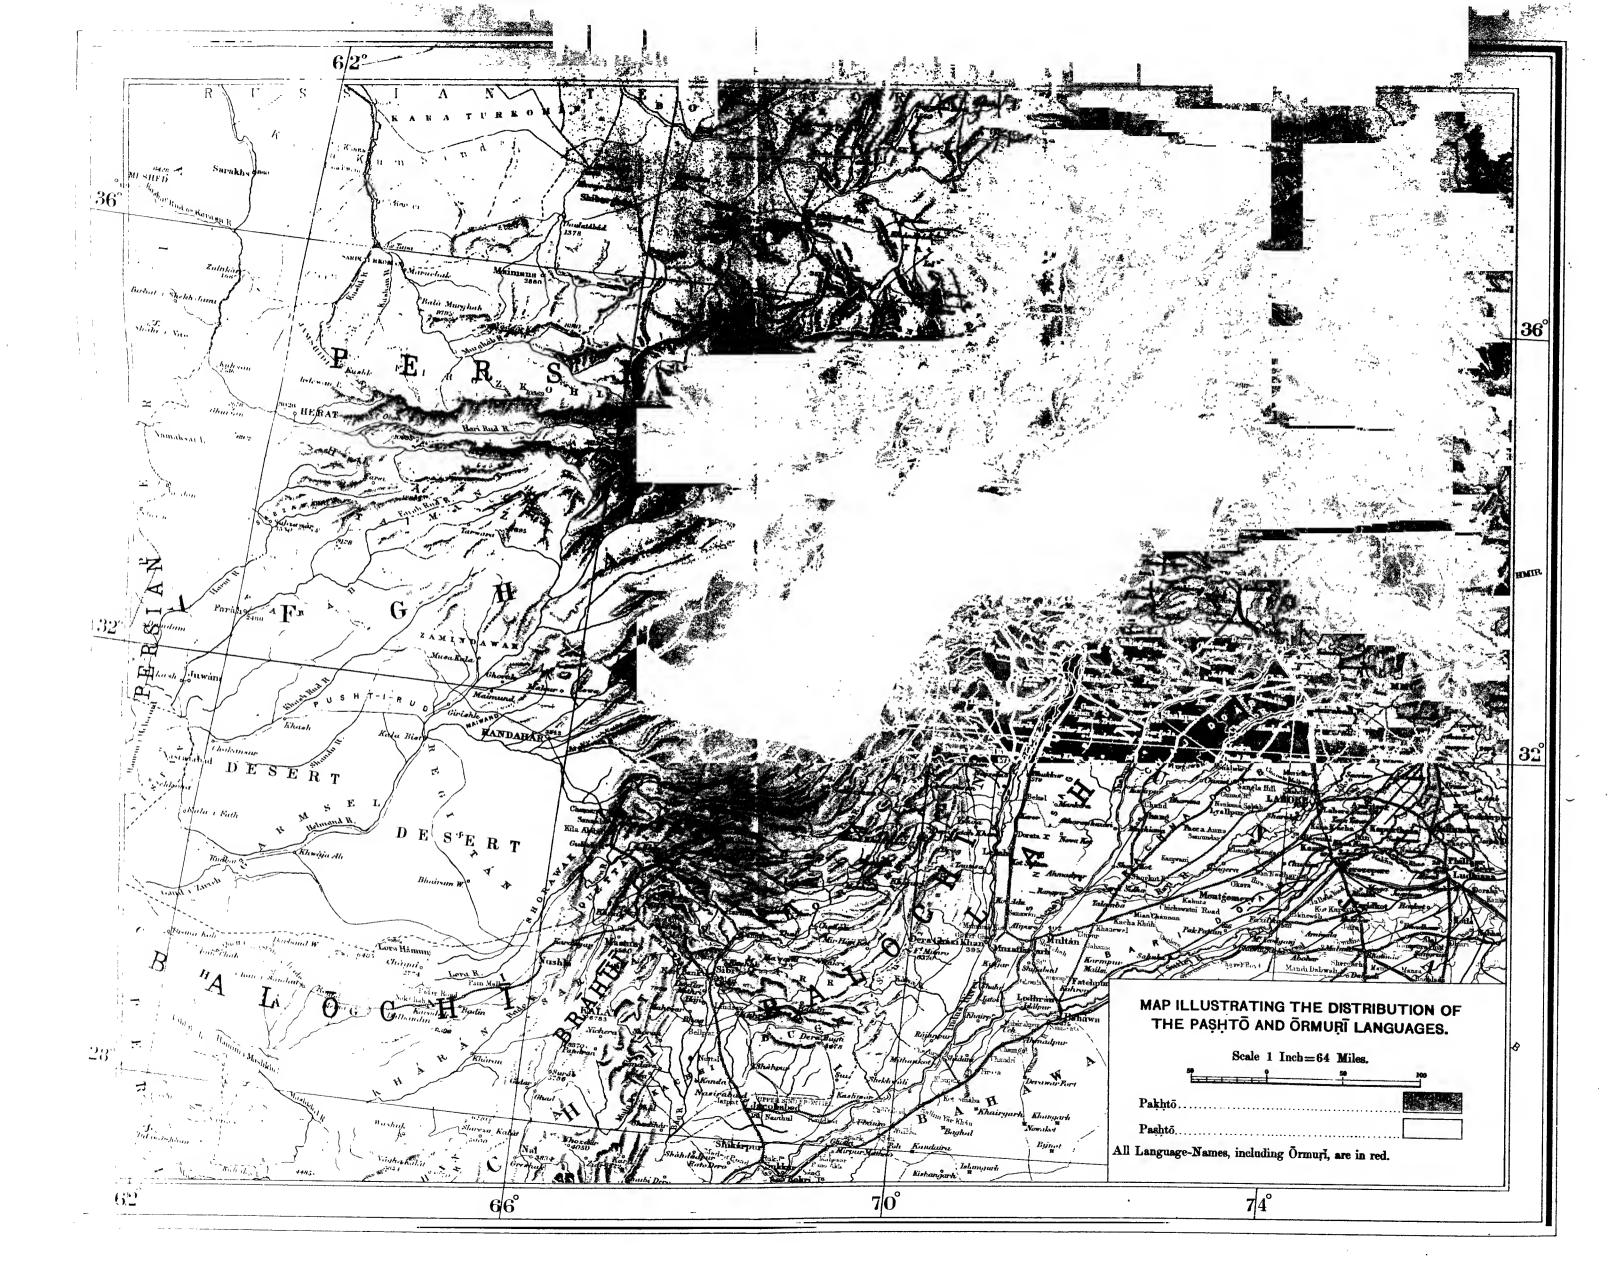

вψ

¹ The term 'Eastern' must be taken with the same reservation as that with which 'Medic' is employed. The minor dialects, not treated here, are spoken, not only in Central Persia, but even in the far North-West, on the shore of the Caspian.

The scale on which these languages have been described varies for each. As a rule, those languages for which well-known grammars are available, have been described most briefly. Thus, those Ghalchah languages which have received previous attention from Shaw and other writers have their grammars compressed into a page or two, while Zēbakī, Munjānī, and Yüdghā have been described as fully as my materials permitted, because no complete account of them has hitherto been written. Similarly, Örmurī, a language which has not yet been described by any European, and which is of great philological interest, is dealt with at considerable length, although it is spoken by very few people. Again, only some four pages have been devoted to Paṣḥtō grammar, on which there are several excellent works already in existence. On the other hand, although Balōchī has at least two complete grammars, they each represent a different dialect, and therefore I have devoted some space to describing its grammar in such a way that the two dialects have been brought into juxtaposition and can be compared.

The authorities on the various languages are enumerated in each section. For the general question of the history of the Eranian languages, which has been only slightly touched in the preceding pages, there are several works at hand to the student. For those not familiar with the subject, I. Darmesteter's *Etudes Iraniennes* (Paris, 1883), the *Grundriss der iranischen Philologie*, edited by W. Geiger and E. Kuhn (Strassburg, 1895-1904), and the article 'Persia' in the *Encyclopædia Britannica* (11th ed.), Vol. xxi (London, 1911), can be consulted with advantage.

PASHTŌ.

From the point of view of the people who speak it, Pashto is the language of the Afghāns. The name 'Afghān,' which is that given to them Name of Language. by the Persians, is not used by the people, who call themselves P^a shtūn or, in the plural, P^a shtāna, and who call their language P^a shtō or, in their North-Western dialect, $P^a kht\bar{o}$. In English, $P^a sht\bar{o}$ is generally written $Pasht\bar{o}$, and this spelling will be adopted in the following pages. In the North-Eastern dialect, P^a sh $t\bar{a}na$, the name of the people, is pronounced $P^akht\bar{a}na$, and this word has been identified, with considerable plausibility, as the same as the $\Pi \acute{a} \kappa \tau \nu \epsilon \varsigma$ mentioned by Herodotus, and as the Pakthas of the Rig-veda.

The word 'Afghān' is, as said above, a Persian one. Its etymology is unknown, though the people have a tradition that it is derived from the name of Afghana, who, they say, was grandson of Saul, King of Israel, and from whom they claim descent. The word is said to mean 'lamentations,' and various reasons are alleged for its application as a proper name. One is that the Afghans caused the devils to lament when they were converted to Islam. Another explanation is that their perpetual interpecine disturbances filled the land with lamentations. Yet another legend refers to the 'sigh' of relief uttered by the mother of Afghana when she was delivered of her son. Others have unsuccessfully connected the word with the Aśvakas of the Indian Purāṇas, or with the Άστακηνοί of Strabo. It has also, with more certainty, been identified as the Avagāņa or Avagāna of the Indian Astronomer Varāhamihira, who flourished in the 6th century A.D.

The Απάρυται of Herodotus are probably the same as the Afghan tribe of Afridis, or,

as they call themselves, Apridi.

Pashtō is the language of the greater part of Afghanistan. In the North-Western Frontier Province and the adjoining sphere of British influ-Where spoken. ence, i.e. in what we may call British Afghanistan, it is spoken in the Districts of Peshawar, Hazara, Bannu, Kohat, and Dera Ismail Khan, and in the region between them and the Afghan frontier. In British Territory. It is, moreover, the language of the independent Yūsufzai country which may conveniently be called the Yaghistan, situated to the north of these British districts, and including the countries of Swat, Buner, and Bajaur. The tract composed of these three countries,—the Afghan portion of Afghanistan, the British districts above mentioned, and the Yaghistan,—is known as the Roh, that is to say, the Hill Country. The $R\bar{o}h$ is defined by the historian Firishta as the country extending, from north to south, from Swat and Bajaur to Siwi and Bhakar, and, from east to west, from Hasan Abdul to Kabul. It includes Kandahar.3

¹ Brihat-samhita, xi, 61, and xvi, 38.

² The word 'Yaghistan' does not properly indicate any specific locality. It means simply a country without rulers. It has been used as above by M. Darmesteter.

³ See Elliot, History of India, vi, 560. The original language of the Yaghistan was not Pashto, but Köhistani, an Indo-Aryan form of speech, which still survives in a few localities, but has, in the main, been superseded by Pashto. The latter extends up the Indus Köhistan at least as far as Mirbat and is used as a lingua franca even further up that river.

In British territory the eastern boundary of Pashtō may be roughly taken as coin
Eastern Boundary.

ciding with the course of the Indus, although there are Pashtō-speaking colonies in the Hazara and Attock Districts on the Indian side of the river. After entering the district of Dera Ismail Khan the eastern boundary gradually slopes away from the Indus, leaving the lower parts of the valley in possession of Lahndā, and some thirty miles south of the town of Chaudhwan it meets Balōchī. The southern boundary passes south of Quetta and through Shorawak, till it is stopped by the desert of Baluchistan. This brings us to the Pashtō spoken outside British territory.

No facts have been collected for the purposes of this Survey in the dominions of His Highness the Amir of Afghanistan, and what follows has In Afghanistan and Baluchistan. been collected from various sources, official and unofficial, and should not be assumed to be necessarily accurate and complete. The localities in Afghanistan in which Pashto is spoken are shown in the map facing the first page of this introduction. So far as non-British Afghanistan is concerned it must be remembered that the whole of the population in any particular district is not Pashtō-speaking. There is a great mixture of races, viz. Tājiks, Hazārās, Qizilbāshīs, etc., who, according to their origin, speak Persian, Turki, Balochi, or one of the Kafir languages. The mapin many cases shows districts where only the majority of the inhabitants are Afghans and Pashto speakers. More particularly, in the country round Obeh in the Herat province, the inhabitants who speak Pashto are not in a majority even in the places marked. On the other hand, in every district of non-British Afghanistan villages of Pashtospeaking Afghans are constantly met with which are in localities not shown in the map as Pashtö-speaking, and this mixture is more than ever the case at the present time, as of late years a practice has grown up of deporting the people of one district to another. Round the large cities, Persian is generally the language spoken, even in a Pashtocountry, notably in the cases of Jalalabad and Ghazni.

Taking up the southern boundary of Pashto where we have left it, after passing through Shorawak, in the desert of Baluchistan, we find that Southern and Western Bounit follows the eastern and northern limits of that desert. with extensive colonies down the rivers which run south through the waste, to nearly the sixty-first degree of east longitude. It then turns northwards up to about fifty miles south of Herat, where it reaches its limit to the north-Northern Boundary. west. From here the northern boundary runs nearly due east to the Hazara country, in which tract the majority of the inhabitants do not employ Pashto but speak either Persian or a language of Mongolian origin. Skirting the west, south, and east of the Hazara country, and just avoiding the town of Ghazni, it thence runs northwards to the Hindūkush. Thence, leaving Laghman and Kafiristan to its east and north, the boundary roughly follows the Kabul river down to Jalalabad, whence it runs up the Kunar so as to include the Yaghistan as already explained. Speaking roughly, we may sum up the above irregularly shaped block of Pashto-speaking territory as including Southern and Eastern Afghanistan, the country to the west of the Indus in British territory, from its southward bend to Dera Ismail Khan, and a strip of Northern Baluchistan.

This will to some extent be evident from the specimens which follow. They do not, however, cover the whole Pashtō-speaking tract, as none have been obtained from the dominions of His Highness the Amir. Such as they are they show that, while, as we go from tribe to tribe, there are slight differences in pronunciation and grammar, the specimens are all written in various forms of what is one and the same language. Two main dialects are, however, recognised, that of the North-east, and that of the South-west. They mainly differ in pronunciation. The Afghāns of the North-east pronounce the letter in the letter in pronunciation. The Asghāns of the North-east pronounce the letter in pronunciation. The Asghāns of the North-east pronounce them sh and sh, respectively. The most important varieties of the North-eastern, or Pakhtō, dialect (excluding the standard form of speech) are the form of Pakhtō employed by the Ghilzais and the Afrīdīs, while that of the South-western, or Pakhtō, dialect (with the like exclusion) is the speech of the Wazīrīs.

Except as regards British territory, no very accurate information is available as to how the dividing line between the two main dialects runs. So far as our present information goes, we may take the southern limit of the great Ghilzai tribe as the line in Afghanistan proper, although the two dialects probably overlap to a certain extent owing to intermarriage and mixture of tribes on the boundary. Ghilzais speak the north-eastern dialect, while the south-western one is spoken by all Afghāns south of this line and westwards towards Herat. It is said to run from a stone bridge (Pul-e-Sang) at Asia Hazara, 12 miles south of Kalat-i Ghilzai, to just north of Maruf, and thence north of the Lowana country to the Kundil-Kundar confluence, and then along the Kundar to Domandi. In British territory, the Khōstwāls, Mangals, Jedrans and Jajis speak Paṣḥtō, the boundary line running in a north-easterly direction up to near Peshawar, so as to give the Wazīrīs and Khaṭaks to Paṣḥtō. In and around the city of Ghazni the people speak Persian, but the Afghān dialect of the neighbourhood is the North-eastern Paṣḥtō.

This is not the place to give a history of the Afghans, if, indeed, it can be said that a collection of tribes with no acknowledged head could The Afghans. have a connected history. The part they have taken in forming the history of India is well known. In the works of Muhammadan historians they first appear as inhabiting the Sulaiman mountains, and about the year 760 A.D. they fought with the Rājā of Lahore, who ultimately ceded to them a portion of Lamghan, as a kind of subsidy, on condition of their guarding the frontier, and preventing the armies of Islam from entering India. They then erected a fort in the Köhistan of Peshawar, which they called Khaibar, and took possession of the country of Roh. During the ascendancy of the Samanides, they prevented the latter from doing any injury to the territories of Lahore, and that is why the incursions of the Samanides from first to last were made by way of Sindh and Bhatiya.2 The Afghans accompanied Mahmud of Ghaznī on his various expeditions, and the historian Al 'Utbī tells us how in one of his attacks on India 'Nidar Bhīm, the enemy of God and chief of Hind, alarmed at this sudden invasion, summoned his vassals and his generals, and took advanced against them with his 'Satanic Afghan spearmen, and they penetrated the pass

¹ Raverty calls these the dialects of the East and West respectively.

² Elliot, loc. laud.

8

like gimlets into wood, ascending the hills like mountain goats, and descending them like torrents of water." The Ghōrī dynasty similarly utilised the Afghāns in their invasions of India. In 1265 A.D., the 'Slave King' Ghayaşu-d-dīn Balban established a military colony of Afghans near Delhi, and subsequently established garrisons of them on the main roads as far east as Bihar. In the invasion of India by Tamerlane, we find Afghans fighting on both sides. He had twelve thousand of them when he attacked Meerut, which was defended by the Afghan Ilyas. Timur's descendant Baber tells us himself how he waged war against the Afghans, and subdued them by terrible massacres. He marked his route to India from Kabul by pyramids of Afghan heads at each camp. Baber's son Humāyūn was in his turn conquered by one of the Afghān settlers in Bihār, Shēr Shāh, who founded the Sūr dynasty, which was subsequently destroyed by Humāyūn and Akbar. It is of interest to note that it was during Shēr Shāh's reign at Delhi, that the first epic poem in a modern vernacular of India was written in Hindī by a Musalman, and dedicated to that king. From the time of Akbar, to the invasion of Nādir Shāh, the Afghāns acknowledged the supremacy of the Mughul Emperors of Delhi, the only occurrence of note being the ineffectual rebellion of Khushhāl Khān, the Khān of the Khataks, against the tyranny of Aurangzeb.

It is said that about the middle of the 13th century, the Afghan tribe of Khakhais, not finding sufficient room in their home in the neighbourhood of Kandahār, emigrated with the Osmankhels and the Muhammadzais to the District of Kabul. There they multiplied and, according to tradition, gave birth to the three tribes of the Yūsufzais, the Gigianis, and the Tarklanis. The Yusufzais quarrelled with Ulugh Beg, the grandson of Tamerlane, who was then prince of Kabul, and he massacred seventy of their Maliks, sparing only Malik Ahmad on condition that the tribes should leave Kabul. The Yūsufzais departed with the Gigianis and Muḥammadzais, and went eastwards, ultimately finding themselves in the neighbourhood of Peshawar. There the Yūsufzais occupied the plain to the north of the River Kabul, and subsequently, continuing their forward march, conquered the country of Swat, under the leadership of Malik Ahmad, and of Shaikh Malih who organised the partition of the newly-acquired territory. This was in 1413-1424 A.D. Subsequently they spread over the hill country of Buner and the valley of Chamla. The original inhabitants of Swat, who were dispossessed by the Yusufzais, and who are now, under the name of Swatis, settled in the British District of Hazara. speak Pashtō, although they are not of Afghān origin, and have none of the distinctive marks of the race.

The history of Afghanistan subsequent to the time of Nādir Shāh, is well known to every reader of Indian History. Aḥmad Shāh, the Sadūzai (1747-1771), seized upon the Afghān throne which had been wrested from India by his patron. He plundered India no less than five times, made the Emperor of Delhi a prisoner, and by destroying the Marāthā power in 1761 at Panipat paved the way for the conquest of India by the English.

The Sadūzai dynasty disappeared in 1818, and was succeeded by that of the Bārakzais, which now holds the throne in the person of the present Amīr.

The decomposition of the Mughul empire in India gave opportunities to several adventurers. After the death of Aurangzeb, in 1707, the dissensions among the Hindus of Bareilly enabled 'Alī Muḥammed Khān, the leader of the Röhilā Paṭhāns, to obtain

possession of the country which is now called, after the name of the tribe, Rohilkhand. He was succeeded by the famous Hāfiz Raḥmat Khān, who was ultimately killed in battle by the Nawāb of Audh assisted by the English in 1774 A.D. It is hardly necessary to point out the connexion between Rōh and Rōhilā. The latter word means literally an inhabitant of the Rōh.¹

It has already been stated that the Afghans claim descent from one Afghana, who, they say, was grandson of Saul, the first king of Israel, and Origin of the Language. this tradition, coupled with one or two accidental coincidences in vocabulary, led people at one time to maintain that the Pashto language was derived from or closely connected with Hebrew. It has now long been admitted that the language belongs to the Aryan stock, but it was for some time a matter of dispute whether it belonged to the Eranian, or to the Indian, branch. As explained at length in the General Introduction to the languages of this sub-family, Eranian languages are divided into two main groups,—the Western and the Eastern. The principal example for the former is the modern Persian of Eran, which is descended from the Old Persian of the Achæmenides through the Parthian or Pahlavi of the Sassanides. The oldest form of the Eastern group with which we are acquainted is the so-called Zend. From it are descended, amongst others, the Ghalchah languages now spoken in the Balochi also belongs to this group, and, as will shortly be seen, Pashto. In the year 1862, Prof. Fr. Müller, in his 'Ueber die Sprache der Afghanen,' maintained for the first time that Pashto belonged to the Eastern group. Dr. Trumpp, in his Pasto Grammar, written in 1873, strongly maintained that the language did not properly belong to the Eranian, but was a member of the Indo-Aryan, family, and was closely connected with Sindhi. He added, however, that it was not a true member of the Indian family, but that it was rather an old independent language, forming the first transition from the Indo-Aryan to the Eranian family, and therefore participating of the characteristics of both, but still with predominant Prakrit, i.e. Indian, features. This theory was adopted by Professor von Spiegel in his Erânische Alterthumskunde and by Dr. Hoernle in his Grammar of the Gaudian Languages, and was at first accepted by M. Darmesteter in his Rapport sur une mission philologique dans l'Hindoustan, which was published in 1887. Three years later M. Darmesteter published his monumental Chants populaires des Afghans, in which he abandoned his former theory, and proved conclusively that Pashto must belong to the Eastern group of the Eranian family, and that it is derived from Zend or from a dialect closely allied to Zend. Practically, it bears the same relation to Zend that modern Persian does to the old Persian preserved in the cuneiform inscriptions of the Achæmenides. It has borrowed largely and freely from North-Western India, but, in its essence, it is an Eranian tongue.²

¹ The greater part of this sketch of the Afghans is based on M. J. Darmesteter's brilliant and learned Chants populaires des Afghans.

²As a language, Paṣḥtō delights in rough and hard combinations of consonants. The following popular stories illustrate this character. A certain king sent his wazīr to collect the vocabularies of all the dialects npon earth. On his return, he proceeded to quote specimens before his royal Master. When he came to the Afghān dialect he stopped, and producing a tin pot containing a stone, commenced to rattle it. The king in surprise asked the meaning of this proceeding. The wazīr replied that he had failed to get a knowledge of the Afghānī language, and could only describe it by rattling a stone in a pot. It is also said that Muḥammad gave it as his opinion that Afghānī was the language of the infernal regions, as Arabic was that. of heaven. In the comparison of languages, in which Arabic is called science, 'ilm; Turkish, accomplishment, hunar; Persian, sugar; and Hindōstānī, salt; Paṣḥtō is complimented with the appellation of the 'braying of an ass.' In spite of these unfavourable remarks, Paṣḥtō, though harsh sounding, is a strong, virile, tongue, which is capable of expressing any idea with neatness and accuracy.

Pashto has a fairly copious literature, partly original and partly translated. The first book written in the language is said to be a history of Literature. the conquest of Swat by the Yusufzais, but no copy of it is known to exist. The earliest books of which we have any knowledge are the Khairu-1-bayān, written in four languages, Arabic, Persian, Hindī and Paṣḥtō, and the Khōrpān, both composed by the heretical Bāyazīd Anṣārī, known to his friends as Pīr Rōshan or Master of Light, and to his orthodox opponents, as Pir Tārīk or Master of Darkness. He died in 1585 A.D. These works are not now available, but we have extracts from them in the works of his famous opponent, the great Doctor of the Afghans, the Akhūn Darweza. The latter's most renowned work, an unparalleled treasury of invective, is the Makhzan-e Islam, in which he attacked the heresies of Bayazid. He was the author of more than fifty other works, of which the most valuable is the Makhzan-e Afghāni, a history of the Afghāns from the most remote times. The earliest poet of whom we have any remains was Mīrzā Anṣārī, a grandson of Bāyazīd, who founded the school of mystic versification which has since monopolised the field of the religious poetry in Afghānistān. The most famous Afghān poet is Khushhāl Khān, the warrior prince of the Khataks (1613-1691). He is still the most popular of all the national writers of the Afghans, and his songs are in constant request. His Divan was published by Bellew in 1869. Amongst the authors who succeeded him and whose works form part of the national literature, may be mentioned his grandson Afzāl Khān who wrote a valuable history of the Afghans entitled the Tārīkh-e Muraṣṣa', and the Mohmand poets 'Abdu-r-rahmān and 'Abdu-l-hamīd. The popular poets of the present day are professional singers called dums who are principally Afghanised Indians, and whose poems have been collected by M. Darmesteter in his Chants populaires.

The number of speakers of Paṣḥtō can be given with approximate correctness only for British Territory, and even for portions of this no returns were available in the Census of 1891, on which the figures of this Survey were originally based. I therefore, for Paṣḥtō, take the latest figures available,—those of the Census of 1911, although they have the disadvantage that no dialect-figures can be obtained from them.

In British Territory, Paṣḥtō is spoken in the North-West Frontier Province, in Baluchistan, and in a couple of border tracts in the Panjab. In the North-West Frontier Province it is the principal language, being spoken by 1,229,599 people, out of a total population of 2,210,471. Most of the remainder speak some form or other of Lahndā. It is spoken in all the five cis-frontier districts, and the above figures also include 7,740 speakers who are found in trans-frontier posts. These last will be excluded from consideration for the present, leaving 1,221,859 to be dealt with. The North-Eastern dialect is spoken in the district of Hazara, and over the greater part of the districts of Peshawar and Kohat, but in the two latter the members of the Khaṭak tribe use the South-Western dialect. In the districts of Bannu and Dera Ismail Khan the South-Western dialect is universal.

In Baluchistan, Paṣḥtō, in the South-Western dialect, is spoken in the North-Eastern districts of Quetta-Pishin, Loralai, Zhob, and Sibi. It is also spoken in other parts of the Agency, but is here not the home language of the people, being used only by immigrants.

In the Panjab, Paṣḥtō is spoken by Paṭhān settlers in the border districts of Attock and Mianwali. In Attock, they inhabit the Chhachh tract close to the border of Hazara, where they speak the North-Eastern dialect, and the South-Western corner, near Makhad, where they speak the South-Western dialect. In Mianwali they inhabit that part of the district which lies west of the Indus, bordering on the North-West Frontier district of Bannu. Here they speak the South-Western dialect.

The following are the figures for the number of speakers who speak Paṣḥtō in those parts of British India in which it is a vernacular:—

									North-Eastern Dialect.	South-Western Dialect.	TOTAL.

It has been estimated that the number of speakers of the language in Yāghistān, and British and Independent Afghānistān is, inclusive of 400,000 independent vol. x.

Yūsufzais, about 2,359,000.¹ It is impossible to divide this according to dialect. The figures must be held to include the 7,740 Paṣḥtō-speakers mentioned above as inhabiting trans-frontier posts of the North-West Frontier Province. The following is therefore the total number of speakers of Paṣḥtō in the area in which it is the vernacular:—

					To	TAL		3,842,376
In Afghānistān, etc. (estimate)	•	•	•	•	•	•	•	2,359,000
In British Territory	•	•	•	•	•	•	•	1,483,376

In addition to the above, Paṣḥtō is spoken by temporary residents in the following provinces of British India. In the case of Baluchistan and the Panjab I mention separately those districts and states in which the number of speakers is more than 500.

¹ See Encyclopædia Britannica, 9th Edn., i, 227ff. This estimate was published in the year 1875, and I have found no better figure of later date.

We have seen that the number of Pashtō-speakers at home in British India is 1,483,376. Adding to this the total of 63,349 just obtained, we get 1,546,725 as the number of speakers of the language throughout British India, whether at home or abroad. If we again add to this 7,740 for the speakers of Pashtō in trans-frontier posts, we get 1,554,465, which is the total for the language in the Census records for 1911. So far, therefore, as we can estimate the number of speakers in India and in the countries beyond the North-Western Frontier, we may put the total number of speakers as follows:—

In British Territory	•					•	1,546,725
In Afghānistān, etc. (estimate)	•	•		•	•	•	2,359,000
			GRAI	ND TO	TAL		3,905,725

or, in round numbers, four millions of people.

PAȘȚTO GRAMMAR.

The arrangement of the following sketch of Pashto Grammar is based on that found in Major Raverty's well-known work. As regards the matter, it is partly taken from Major Raverty, partly from Dr. Trumpp, and partly from M. Darmesteter.

In transcribing the specimens into the Roman character, difficulty has been experienced in giving the vowel sounds correctly. They differ in every dialect. Every care has been taken, and, when possible, the proof-sheets have been, in each case, revised by the original translator.

SYSTEM OF TRANSLITERATION ADOPTED FOR PASHTO.

VOWELS.

a, a, ā, â, i, ī, u, ū, e, ē, o, ō, ai, au.

CONSONANTS.

```
m{\psi} b
                                                               kh, in the South-west sh.

     d
     ≈
ر
    į.
    zh
   g, in the South-west zh.
```

 \dot{z} has two sounds, a soft and a hard one. When transliterated by \dot{s} or \dot{z} , it has the sound of s in 'sin,' and z in 'zeal,' respectively. When transliterated by $\underline{t}\underline{s}$ or $\underline{d}\underline{z}$, as in the Buner version, it has the sound of ts or dz, respectively.

is pronounced like the s in 'pleasure' in the South-western dialect, and is then transliterated zh. Elsewhere it has simply the sound of the hard g in 'go,' and is then transliterated by g.

is pronounced as a hard guttural \underline{kh} , something like the ch in loch, only more rough, in the North-east. It is then transliterated \underline{kh} . In the South-western dialect it is pronounced like the sh in 'shine,' and is then transliterated \underline{sh} . The compound properly $k\underline{kh}$, or $k\underline{sh}$, is pronounced ke in the North-east and kshe in the South-west. The word is a preposition, and means 'in.'

j, is the equivalent of the Indian \mathfrak{A} , and is transliterated p. It should be remarked that the pronunciation of this letter is rather that of a nasalized p than of an p. Indeed the letter is sometimes pronounced as if it were a simple p.

The peculiar Paṣḥtō short a, I represent by a small a above the line, as in (Peshawar) $k^a \underline{s} h^a r$. Its use varies according to locality. In one place we have $k^a \underline{s} h^a r$, and in another $ka \underline{s} h^a r$. In writing in the vernacular, it is sometimes represented by zabar, sometimes by zar, and sometimes by $p\bar{e}\underline{s}h$. The peculiar Afrīdī \bar{a} is transliterated \hat{a} . It is pronounced like the a in all. A final i is often pronounced e, and a final u, o.

Zer stands for both i and e (short), and $p\bar{e}\underline{sh}$ for u and o (short).

I have throughout followed M. Darmesteter in omitting, in transliteration, a final h, except when it is clearly pronounced in words like $\frac{dis}{dt} gun\bar{a}h$, a fault, $\frac{dis}{dt} \frac{sh\bar{a}h}{sh}$, a king. All authorities agree that the h is not heard in the termination of feminine nouns, but they differ in regard to other words. For instance, Major Raverty writes $w\bar{a}shah$, grass, not $w\bar{a}sh^a$.

PASHTO SKELETON GRAMMAR.

I.—PRONUNCIATION.

The North-eastern Afghāns pronounce sh as a hard kh, like the ch in loch. The particle $ksh\bar{s}$ (often written ksh) is pronounced $k\bar{s}$ in the North-east. Zh is pronounced g in the North-east, like the g in $g\bar{s}$.

IV .- VERBS.

(1) Verbs whose infinitives end in "I may be either transitive or intransitive. Those in &d'I are intransitive and in w'I, transitive. Infinitives of causals end in a-w'l.

(2) Verb Substantive-

Sing. Sing. Plur. Plur. Fut. ba yam, etc. The 3rd Past Subj. ba www. person sing. and plur. is ba wi or ba wina, not ba (1) Pres. 10¥. Past Subj., Optional yaī or yāstaī. ane. mai. dai or shta wu ₩Ž. dai, etc. form. Pres. Subj. wi or wina for (masc.) wai or was through (masc.) di or shta. all persons and both numbers. da or <u>sk</u>ta we. out. (fem.)

- Pres. aosam, etc. Past Cond. aosēdam, etc. (2) aōsēdel, to exist.
- (3) kēdel, to become. Pres. kēzham, etc. Imperf. kēdam, etc.
- (4) shwel, to become (used to form Passive).

Sing. Plur. Sing. Plur. shwam or shwalam. (1) <u>sh</u>am. Imperf. shwü or shwalü <u>sh</u>ū. shwē or shwalē. sh (masc.) shwai or shwalai. shwu or shw'l (masc.) (2) <u>sh</u>ē. shaī. (2) (3) shī. shī. shwë or shwalë (fem.) ¿shwa or shwala (fem.)

Past Part. shawai. The rest is regular.

The Regular Verb.—There are two main tenses, the Imperfect and the Present. There are 37 classes of verbs, 13 Intransitive, 24 Transitive. These differ according to the rules for the formation of the Imperfect and Present. Specimens of each are given below. Of Intransitive verbs, the 1st, 2nd, and 8th classes form the 3rd sing. Imperfect by changing final 1 of the infinitives to silent h. Thus pohedel, pohedel. The 3rd, 4th, and 9th drop the final of the infinitive. Thus kehe-nastel, kehenast. The imperfects of the other classes are subject to special rules. The formation of the Present of Intransitive verbs differs in each class. As regards Transitive verbs, the Imperfect and all tenses derived from it, and from the Past Part., are passive, and use the passive construction,—the direct object being in the nominative, and the subject in the agent case. The 5th, 11th, 14th, 20th, and 21st classes form the 3rd sing. Imperf. by changing I of the Infinitive to silent A. Thus ārwēdel, ārwēd. Similarly the 1st, 2nd, 6th, 7th, and 12th classes, with lengthening of the root-vowel. Thus tar'l, tār. The 3rd, 4th, 9th, 10th, 15th, and 22nd classes drop the final of the Infinitive. Thus ghāṣḥto, ghōṣḥto. The imperfects of the other classes are subject to special rules. In nearly all verbs, the 3rd pl. masc. Imperf. is the same as the Infinitive. As regards the formation of the Present of Transitive verbs, the 1st, 2nd, 5th, 17th, 18th, 20th, 21st, and 24th classes simply drop the I of the Infinitive, and affix the necessary personal termination. For each of the other classes there are special rules.

The Irregular Verb .-- The irregularities consist either in the verb being defective, or in irregularities in the formation of the Imperfect and Past. See the list of classes below.

Formation of Tenses.—Pres. Part. 6 Forms, as follows:—

Infinitive. Pres. Part. Masc. Fem. (1) zghāstel, to run. zghāstan•. -ana. wul*l, to wash.
wat*l, to come out. wul". wula. wāt. vāta. taŗūna. (4) tar l, to bind. tarūn (5) dakēd l, to fill. (6) mātaw l, to break. dakūn. dakūna. mātāūn. mātāūna. Mascs, of Nos. 1, 2, and 3 belong to 6th declension, and of 4, 5, and 6 to the 9th; all fems. to the 3rd.

Past Part. 2 Forms, as follows: Plur. Infinitive. Masc. Fem. Masc. and Fem . (1) kṣḥē-yast*l, kṣḥē-yastalai. -alī. to insert. (2) āghūst*l, -tī. ăghūstai. -te. to clothe. Many verbs use both forms. There are also irregular formations. Thus, walārēdal, to stand. pp. walār. prē-wōt. prē-wat'l, to fall. nāstel, to sit.

Tenses based on the present-

(2) Pres. Subj.—Prefixes optionally wu to Present. Intransitive verbs, class 3, and Transitive, classes 5, 9, 17, and 20, always omit wu. Intransitive, classes 8, 11, 12, 13, and Transitive, classes 2, 15, 16, 18, and 19, are defective, and form the Pres. Subj. by means of a periphrasis, or with the aid of other verbs.

(3) Optative.—Identical with the Pres Subj., exc. that it adds de to the 3rd Sg. and Pl. When a personal pronoun is used, de precedes wu, otherwise wu

(4) Future.—Prefixes ba to the Pres. Subj. When a personal pronoun is used, ba precedes the wu. Otherwise wu precedes ba.

(5) Imperative.—The same as optative. Has no first person. The termination of 2nd sg. is a.

Noun of Agency. Formed thus Plur. Infinitive. Sing. Fem. Masc. and Fem. Masc. lwastel, to read. lwastunai or -ūnī or ūnkī. -ūne or lwastūnkai. This is commonly also used as a Present Participle.

Tenses based on Imperfect, and on Past Participle—

(2) Past.—Prefixes optionally wu to Imperfect. Intransitive verbs, classes 3, 11, and 13, and Transitive, classes 5, 9, and 2), always omit wu. Intransitive, classes 8, 10, and 12, and Transitive, classes 2 and 15-19, are defective, and form the Past by means of a periphrasis, or with the aid of other verbs.

(3) Habitual Imperfect.—Prefixes ba to Past.
(4) Perfect.—Past Participle + yam, etc. (pres. of Auxiliary).
(5) Pluperfect.—Past Participle + wum, etc. (past of Auxi-

liary). (6) Doubtful Past.-Past Participle + ba yam (Future of

Auxiliary) or + wī (Pres. Subj. of Anxiliary).

(7) Past Conditional.—Past Participle + wai or wāē (Past Subjunctive of Auxiliary).

Conjugation of Regular Intransitive Verb-zghalēd'l (Cl. 2), 'to run.' Infinitive, z*ghalēd*°l, 'to run.' Past Part. z<u>gh</u>alēdalai or zghalēdai, 'run.'

Plur. masc. and fem. Sing. masc. Sing. fem. zghalēdūnī or Noun of Agency, zghalēdūnai or zghalēdūnkai, 'a runner,' 'running.' zahalēdūne or zahalēdunke. zghalēdūnkī. Tenses based on the Present. (1) Pres., 'I run' (3) Optative, 'I should run '-(2) Pres. Subj., 'I may run

Plnr. Sing.

(1) zghalam (2) zghalē zghalū. zghalai. zghali. (3) zghalī

(wu) zghalam, etc.

Future, 'I shall run (wu) ba z<u>qh</u>alam or za ba (wu) z<u>gh</u>alam, etc.

1st and 2nd persons, same as

Pres. Subj.
3rd sg. and pl. (wu) de zghalī or
hagha de (wu) zghalī.

(5) Imperative, 'run thou'-lst Person, wanting. 2nd sg. (wu) zghala. 2nd pl. (wu) zghalai. 3rd Person, same as Optative.

Tenses based on Imperfect and on the Past Participle.

(2) Past, 'I ran'-(1) Imperf., 'I was running'-Sing. (1) z*gh*alēdam Plnr. (wu) zghalēdam, etc. ≰ghalēdū. zghalēdaī. zghalēdal or 3 Mas. zghalēdē (2) zghalēdē (3) Habitual Imperfect, I used to run 'zghalēd. (wu) ba zghalêdam or za ba (wu) zghalêdam, zghalēdē or (Fem. z<u>gh</u>alēda or z ghalēdala zghalēdalē.

(5) Pluperfect, 'I had run'-

Sing. Plar. Masc. and Fem. Fem. (1) (2) (3) zghalēdalai zghalēdale wum zghalēdalī wū. иē wai. ₽Dē ,, ,, ,, wū (fem. wē). wu wa

(4) Perfect, 'I have run'-

Sing. Plur. Masc. Masc. and Fem. zghalēdalī yū. zghalēdalī yaī. zghalēdalī dī. (1) zghalēdalai yam zghalēdale yam (2) z<u>gh</u>alēdalai yē zghalēdale yē z ghalēdale dai (3) z<u>ah</u>alēdalai dai

(6) Doubtful Part., 'I may have run'-

Sing. Plur. Fem. Masc. and Fem. Masc. (1) zghalēdalai ba yam, zghalēdale ba yam, zghalēdalī ba yū, and so on, or zghalēdalai (etc.) wī for all persons and numbers.

(7) Past Conditional, 'had I run'-M. zghalēdalai wai or wāē, and so throughout, the participle changing for gender.

Conjugation of Regular Transitive Verb-akhist (Cl. 4), 'to seize.'

Infinitive, ākhistel, to seize. Past Part., ākhistalai, 'seized.'

Sing. Masc. Noun of Agency, ākhistūnai or ākhistūnkai, 'a seizer.'

Sing. Fem. ākhistune or - unke.

Plur. Masc. and Fem. ākhistunī or -ūnkī.

(2) Pres. Subj. 'I may seize,' (wu) ākhlam (contracted to (3) Optative, 'I should seize.' 1st and 2nd persons, same as Tenses based on the Pre-(5) Imperative, 'seize thou.' 1st Person wanting. sent. wākhlam), etc. (4) Future, 'I shall seize,'
(wu) ba ākhlam or za ba
(wu) ākhlam (wākhlam), etc. 3rd sg. and pl. (wu) de ākhlī (1) Pres. 'I seize,' Sg. ākhlam, 2nd sg. (wu) akhla. or hagha de (wu) ākhlī (wākhlī). pl. $(wu) \bar{a} \underline{kh} l a \bar{i}$. 3rd Person, same as Optative. Pl. ākhlū, -aī, -ī.

Tenses based on the Imperfect and on the Past Participles .- These are all passive. The verb agrees with the object in Gender and Number, and the subject is put in the case of the agent. For the agent, either the full pronominal forms $m\bar{a}$, $t\bar{a}$, hagha, etc.) may be used or the contracted obl. forms (me, de, y\bar{e}, etc.).

(1) Imperfect, 'was being seized (by (2) Past, 'was seized (by me, etc.)' (mī, tā, hagha, etc.) wākhist or wu (me, de, yē, etc.) ākhist, and so on.
Note.—Full pronominal forms always me), etc. Obj. Sg. Masc. (mā or me, etc.) ākhist. Sg. Fem. ā<u>kh</u>ista or precede the wu and contracted forms follow it. ākhistala. ākhist or Pl. Masc. ā khist*l. Pl. Fem. *ā<u>kh</u>istē* or (3) Habitual Imperfect, 'used to be seized (by me, etc.)' (mã, tā, ha gha, etc.) ba wā khist or ba wu (me, de, ā khistalē. 'I was being seized,' ākhist-am. 'Thou . ākhist-ē, yē, etc.) ākhist. and so on.

Passive Voice.

This is formed by conjugating the Past Participle (which agrees with the subject in gender and number) with the auxiliary verb $\underline{sh} \underline{w}^a l$, to be.

Thus $\underline{a} \underline{k} \underline{h} \underline{i} \underline{s} \underline{h} \overline{l}$, he is seized; $\underline{a} \underline{k} \underline{h} \underline{i} \underline{s} \underline{h} \overline{l}$, she is seized; $\underline{h} \underline{a} \underline{h} \underline{a} \underline{h} \underline{a} \underline{b} \underline{a}$ $\underline{w} \underline{a} \underline{k} \underline{h} \underline{i} \underline{s} \underline{h} \underline{i}$, or $\underline{w} \underline{u} \underline{a} \underline{k} \underline{h} \underline{i} \underline{s} \underline{h} \underline{i}$, he will be seized; $\underline{a} \underline{k} \underline{h} \underline{i} \underline{s} \underline{h} \underline{a} \underline{h} \underline{a} \underline{h} \underline{a}$, he was seized; ākhistale shwa or shwala, she was seized.

- (4) Perfect, 'has been seized (by me, etc.) '(ma, $t\bar{a}$, $ha\underline{gha}$, etc., me, de, $y\bar{r}$, etc.) $\bar{a}\underline{kh}$ istalai dai. With the object fem., the verb would be ākhistalē da, and so on.
- (5) Pluperfect, 'had been seized (by me, etc.).' Similarly to perfect. ākhistalai wu, etc.
- (6) Doubtful Past, 'may have been seized (by me, etc.)' (mā, ta, hagha, etc.) ba ākhistalai wī, or ba (me, de, yē, etc.) ākhistalai wī. The participle agrees with object in gender and number.
- (7) Past Conditional, 'had (-) been seized (by me, etc.)' $n\bar{a}$, ta, $h\bar{a}\underline{g}ha$, etc., me, de, $y\bar{z}$, etc.) $\bar{a}\underline{k}h$ istalui wai or $w\bar{a}\bar{z}$, and so on.

PAȘȚTŌ.

NORTH-EASTERN DIALECT.

The North-eastern dialect of Pashtō is, so far as British territory is concerned, spoken in the north-western portions of the District of Hazara, in the Chhachh country of the District of Attock, by all the inhabitants of Afghān descent in the District of Peshawar, except the Akōrā Khaṭaks of the south-east of the District, and by, the Bangashes of the north-west, and north-centre of the District of Kohat.

The following figures show the number of speakers of the North-eastern dialect in Pashto-speaking Districts, in British territory:—

Hazara	•	•	•	•	•	•	•	•	•	•	•	•	•	29,151
Attock	•		•	•	•	•	•	•	•	•	٠.	•	•	15,391
Peshawar		•	•	•	•	• -	•	•	•	•	•	•	•	654,940
Kohat	•	•	•	•	•	•	•	•	•	•	• .	•	•	107,492
									•		To	TAL	•	806,974

The following specimen, a version of the Parable of the Prodigal Son, is in the North-eastern or Pakhtō dialect as spoken in the Peshawar District. Note that there is a tendency to substitute u for \tilde{a} . Thus, warkawul, for $war-kaw^{\tilde{a}}l$, it was given, in which an \tilde{a} has become u. The prefix of the genitive is $d\tilde{a}$, not $d\tilde{a}$. The letter \tilde{e} is substituted for ai, as in $r\tilde{a}ghal\tilde{e}$, for $r\tilde{a}ghalai$, he came. The past participle often ends in \tilde{o} , as in $k\tilde{o}$, he was made; $wul\tilde{a}d\tilde{o}$, he was seen. Note also the forms $n\tilde{e}$ (or $n\tilde{a}$) $m\tilde{a}$, I am not; $p\tilde{e}$, on him; and $t\tilde{e}-n\tilde{a}$, from it.

The specimen is from the pen of Mirza Sayyad Muhammad Khan, and has been revised by the late Mr. J. G. Lorimer, I.C.S., who was also kind enough to prepare the transliteration according to the system indicated in the preceding pages.

The following figures show the number of speakers of each dialect of Pashtō in Peshawar:—

North-eastern Dialect	•	•	•	•	•	•	•	•	•	654,940
South-western (Klatak) Dialect	•	•	•	•	•	•	•	•	•	54 ,525
		T	Total number of Pashtospeakers						•	709,465

BUNER DIALECT.

The next specimen comes from Buner. It differs very slightly from standard Pashtō. We may note that the genitive prefix is d^a and not da, and that a final short $z\bar{e}r$ is transliterated i and not e. The word for 'he was' is w^a , not wu, and for 'brother' is $r\bar{o}r$, not $wr\bar{o}r$.

¹ Made of dust of.

YUSUFZAI DIALECT.

The following specimen is in the dialect used by the Plains Yūsufzais, who inhabit the country to the north-east of Peshawar. Their number is included in the figures already given for Peshawar District. As there stated, 654,940 people speak the North-eastern dialect of Pashtō in the Peshawar District, and of these, according to the census of 1911, 113,465 are Yūsufzais.

A very similar dialect of Paṣḥtō is also spoken by 29,151 people in the north-west and south-west of the Hazara District, and the specimen here given will also do for that district.

Note that \underline{ts} and \underline{dz} are pronounced \underline{s} and \underline{z} , respectively. The letter, is often written $\underline{\smile}$. This, however, is merely a matter of spelling. As in Buner, a final $z\bar{e}r$ is transliterated \underline{i} , not \underline{e} ; the word for 'was' is \underline{w} , not $\underline{w}\underline{u}$; and the word for 'brother' is $r\bar{o}r$, not $wr\bar{o}r$.

Then by-him him-to 'zoya, t hamēsha mā sara yē, au wuwi har-s stā it-was-said that, 'son, thou always me with art, and thine my every-thing munāsib wū chi Dā mũg ķḥādī wukrū khushhala au shū, This is. meet was that merriment . may-make we and merry be, *ka-chi $d\bar{a}$ stā rōr WA, byā jwandai sh*wai m'ŗ au dai au ruk because this thy brother dead was, and again alive become isand lost w. mūnd*lai sh*wai dai.' au found and been is.' was.

SWAT DIALECT.

The next specimen is of the form of the North-eastern dialect spoken in the independent Swat Valley. Note that $\underline{t}s$ and $\underline{d}z$ are pronounced \underline{s} and \underline{z} , respectively. Also that the short $\underline{\bullet}$ is rarely used; a full a being used instead. In other respects the dialect is much the same as that of the Yūsufzais.

(Sir Harold Deane, K.C.S.I., 1898.)

Νo hagh* k sh'r khp'l De yau sari dwa samen wu. plär Of one man two sons were. Then by-that younger his-own father to 'plara, māla khp'la barkha d' na rākra.' No māl wuwayal chi, it-was-said that, 'father, me-to my-own share of property from give.' Then Yau so wrate pas khp'l bisāt p' dwārō wuyēsh'. by-him his-own means on both was-divided. A few days after by-younger son, au yau lirē m'lk ta yē wuk'r. jama'-kral, mazal every-thing was-collected, and one far country to by-him journey was-made. And wubās. Nō chi mål pa mastai khp'l there by-him his-own property on profligacy was-wasted. Then when all by-him no pa hagha malk bandi yau loe qahat raghai, au hagha was-finished, then on that country upon one great famine came, and he au d' hagh' watan yau mu'atabar sari sh. No hagh lar, straitened became. Then he went, and of that country one respectable man sara naukar sha. au haghe de khinzīrāno de sarawelo depāra khpelo pato with servant became, and by-him of swine of grazing for his-own fields p^a khushhālai sara p^a hagh^a būsō Au hagh ba · ta wuleg. pleasure with on those husks which And by-him would on to roas-sent. khō hèchā khp'la geda daka k're khinzīrāno khwār, by-swine were-eaten, his-own belly full been-made would-hape, but by-any-one wu-ya-way'l warkaw'l. Bya chi pa khud sh', nō not was-given-to-kim. Again when upon himself! he-became, then it-was-by-kim-said p* shan kh* chala mumi, chi, 't'mā d' plar ėomra naukaran in good manner food of father how-many servants z* d* lwege mrm. Z* ba pas*m, au khp⁻l plar ta ba warsh'm, and I of hunger die. I will rise, and my-own father to will d. Khudae gunah k're da au ba wäy m chi, " plāra, mā warta and him-to will say that, "father, by-me of God sin done is d* laviq n° y'm chi sta zõe khō dē sh'm, And of this scorthy not I-am that thy son I-become, but thine also. (in)naukarāno kķķ(ki) mi wugaņa."' plār Au hagha pāsēd, au khp*l me consider."' And rose, and his-own father to he servants among

Khō chi hagha lā byarta w, nö khp'l plār wulid, au But when he far was, then by-his-own father he-was-seen, and yet tars уē pri wukar. Au war wuzghaled, au war tar-gharawat, pity by-him on-him was-done. And at-him he-ran, and him embraced (him), au khkul ye kr. $\mathbf{A}\mathbf{u}$ zōe warta wuway1 chi, 'plāra, mā d' Khūdāe and kiss by-him done. And by-the-son him-to it-was-said that, 'father, by-me of God au stā gunāh ktre da, au d' dē lāyiq n' y'm chi stā zōe and thy sin committed is, and of this worthy not I-am that thy son I-may-become? ₩¹lē plār yē khp'lo naukarāno ta wuway'l chi, 'kha jāma rāwrai, But by-the-father his his-own servants to it-was-said that, 'good robe bring, ta yē wāghundawaī, au yawa guta yē p* lās and him to itclothe, and one ring his on hand do (put), and paņē warta pa khpō kraī. $\mathbf{A}\mathbf{u}$ rāżaī chi dodai wukhwrū, au khushhālī shoes him-to on feet do (put). And come that bread we-eat, Ż*ka-chi wukrū. dā ż^amā zõe $m^{a}r$ wa, au jwandai shawai dai; wruk do (make). Because this myson dead was, and alive become is; paidā sh'wai dai.' Au haghai khushhali au jora kra. was, and recovered become is.' And by-them merriment making was-done.

Us da hagha mashar zoe pa paţī kkh(ki) wa. $\mathbf{A}\mathbf{u}$ chi hagha raghai, him elder son in And when field inwas. he came, $\mathbf{d}^{\mathbf{a}}$ sarod d* kör ta nizdē sha, gadēdō nō au awāz уē of and of dancing sound and house tomusic near became, then by-him wawred. Nõ yau naukar ta · yē awāz wuk'r, au pūkhtana was-heard. servant to by-him calling was-done, and inquiry by-him Then one dai?' Nō hagh warta wukra chi, 'dā Š* chal from-him was-done that, 'this what matter is?' Then by-him him-to it-was-said 'stā di khairāt karai dai, żaka-chi wror raghalai dai. plār au come and by-father thy feast madethat, 'thy brotheris, because rogh . jor mandalai dai.' No hagha marawar sha, уē danana Then he he by-him whole well found is.' angry became, and inside wukar. No plar yē rāwuwat, au minat уē warta Nō not went. Then father his came-out, and entreaty by-him him-to was-made. Then jawāb kķķ(ki) plār chi, 'gōra, dōmra dēr ta wuway l father to it-was-said that, 'Lo! by-him in replyinmany years khidmat k^arai dai. hēchare mi hukum na mā au stā thy service done is, and ever by-me thy order not *i*8 chare mā-la yau warghūmai rāk-rai na māt-karai. Au byā hum tā dai, broken. And again even by-thee ever me-to one kidgiven not (is), pri da khpalo dostano khushhāli karai chi sara by-me on-it of my-own friends withmerriment made might-have-been. dā stā zõe, chi darta p' kachnō bāz'lai dai, Walē khō-chi māl уē But as-soon-as this thy son, by-whom wealth by-him thee-to on harlots wasted is,

rāghai, nō tä warta mēlmastyā warkra.' Nő hagh warta wuway l chi, came, then by-thee him-to feast was-given.' Then by-him him-to it-was-said that, 'zōya, hamēsha mā ż¹mā har-s stā dī. Dā sara yē, au ' son ! always thou me with art,andevery-thing thine This munāsib chi mũg khushhāla shū. wū ķḥādī wukṛū, au dā Z*ka-chi that merry meet we merriment make, and become. Because this jwandai stā m¹ŗ byā <u>sh</u>*wai dai; wruk wª, au brother thy dead and alive was, again become is : lost and was, mand^{*}lai sh wai dai. found become

GHILZAI DIALECT.

The next specimen is an example of the Pakhtō form of Paṣhtō spoken by the members of the great Ghilzai tribe, which extends from near Kandahar to near Jalalabad. Here \underline{ts} and \underline{dz} have their proper sounds. The prefix of the genitive is d° , not da. 'My' is $dim\bar{a}$, instead of $\underline{dzm\bar{a}}$, 'thy' is $it\bar{a}$, instead of $st\bar{a}$, and 'we' is mang, instead of $m\bar{u}g$. 'He was' is 'wa' instead of 'wu.' Note also that \bar{u} is sometimes changed to \bar{s} , as in $mind^{\circ}lai$ for $m\bar{u}nd^{\circ}lai$, found. This is a regular change in the Paṣḥtō of the neighbouring Wazīrīs. Instead of $dan^{\circ}na$, within, we have inana.

Khō chi harkala dā zōe di rāghai, chi māl yē dar ta pa kanchaniō barbād karai dai, nō tā pri khairāt wukar.' Nō hagha war-ta wuwayil chi, 'zōya, ta mudām la mā sara yē, au di mā har-tṣa itā dī. Dā munāsib wū chi mang khushḥālī wukrū, au khushḥāla shū, dzaka chi dā itā wrōr mar wa, au byā zhwandai shawai dai; au wruk wa, au mīnda shawai dai.'

AFRIDI DIALECT.

The next specimen is of the form of the North-eastern dialect spoken in the Afridiscountry. Note that \underline{ts} and \underline{dz} are pronounced \underline{s} and \underline{z} , respectively. The name of the tribe is an example of the inability of the Afghāns to pronounce the letter f. They always pronounce it as a p, and call Afrīdīs 'Aprīdīs.' They have by this peculiarity been identified with the $A\pi a \rho \nu r a \iota$ of Herodotus. The Afrīdī \hat{a} , pronounced like the $a \iota$ in 'all,' should also be noted. Regarding this sound, a note of Sir Harold Deane says, 'to quote a specimen, we find in our maps a place called "Esor," which is the Afrīdī equivalent of "Hisār."

Other vowels are also liable to change. Thus we have der for dar, to thee; wer for war, to him; wele for wale, but; nukar for naukar, a servant. 'We' is mu, 'my' de ma, and 'thy' de tâ. Instead of dan na, we have inana, within. As elsewhere, wa is used instead of wu, he was. The genitive prefix is de or do.

FREE TRANSLATION OF THE FOREGOING.

Last autumn I was in the fort at Landī Kōṭal. A great number of Afrīdīs appeared round about, and after a great struggle took the fort by storm, and destroyed and looted anything and everything they could find in the fort. I was led as a captive across the Tangī hills. When we reached the Bāzār valley it was a moonless night, and I passed the night there near a tank. We started again in the morning. On looking at the ground in the Bāzār valley, it seemed to be very rich and fertile. Then they took me across the Bāra through the Mangal Bāgh. The country watered by the Bāra river was very fertile—on either side of the Bāra were hills between which the river flowed, flanked on both sides by fields, mostly paddy-fields. A great quantity of Indian corn is procurable. Millet and rice-fields are scattered about here and there. I was taken to a place called by the Afrīdīs 'Dwatōi,' where we crossed the stream which was muddy. In front of us lay the ford, but we got into a quagmire before reaching it. Then I was taken to Tirah which was also fertile. The land is not irrigated, but is better than irrigated land; because of the rain falling every second or third day.

CHHACHHĪ PAŞḤTŌ.

The following version of the Parable of the Prodigal Son is in the corrupt dialect of North-eastern Paṣḥtō spoken by 15,391 people inhabiting about thirty villages in the tract called Chhachh, situated in the north of the Attock District, in the Province of the Panjab. It is closely connected with the dialect of the Plains Yūsufzais across the River Indus, but has many irregularities. There is one thing noticeable about this Chhachhī dialect, viz that the aspirated letters of borrowed Panjābī words, which, in pure Paṣḥtō are disaspirated, are retained in Chhachh. This does not appear in the present specimen. An example is the Panjābī word $bh\bar{u}s\bar{a}$, chaff, which in pure Paṣḥtō is $b\bar{u}s$, but in Chhachhī is $bh\bar{u}s$, $bh\bar{u}s\bar{a}$, etc.

Paṣḥtō is also spoken in the south of Attock District by about 6,500 Khaṭaks in a few villages of the Makhad area of the Pindigheb Tahsīl, close to the River Indus. The dialect there spoken is the South-western, and is closely allied to the dialect spoken by the Khaṭaks of Kohat District, with whom the Makhad Paṭhāns are connected.

In Chhachhī Paṣḥtō, the letter خ sometimes becomes ع sor j z. Thus, غغث tṣakḥa, with, is written غنه sakha; and غيد dzaka, because, becomes زكه zika. Also, the Urdū method of writing cerebral letters is frequently adopted in addition to the Paṣḥtō one. Thus, dēr, much, is written يغاره instead of يعاره.

I am indebted to Lieutenant A. J. O'Brien, Assistant Commissioner, Attock, for the following specimen.

The following figures show approximately the number of speakers of each dialect of Paṣḥtō in Attock:—

North-eastern dialect South-western (Khatak) dialect	•	•	•	•	:	•	•	•	•	15,391 6,500
		\mathbf{T}	OTAL I	umbe	er of F	așhtō	speak	cers	•	21,891

It may be noted here, that besides these Chhachh Paṭhāns and the Khaṭaks of Makhad, there are other speakers of Paṣḥtō in the Panjab Province. These inhabit that part of the Mianwali District which lies west of the Indus, and borders on Bannu, belonging to the North-West Frontier Province. They number 15,191, and their language is South-western Paṣḥtō, similar to that of the last named District.

BANGAȘH PAȘHTŌ OF KOHAT.

Paṣḥtō is the principal language of the Kohat District, except in Shakardarra and the tracts along the Indus. Over the greater part of the District the dialect is the North-eastern; only in the east and south, amongst the Khaṭaks, is the South-western dialect spoken. The boundary line between the two dialects passes through this District.

The first is a translation of the Parable of the Prodigal Son, and the other a short account of the Afghān tribes of North Kohat, and of their language. The principal tribe of North-West and North Central Kohat is that of the Bangaṣḥes, as that of the Khaṭaks is of the south and east. The language is much affected by that of the Hindūs who have settled among them. The boundary between the Bangaṣḥes who speak Northern Paṣḥtō and the Khaṭaks of the south of the District may be taken as passing through the town of Lachī. In the east of the District, the Akōrā Khaṭaks, who also speak South-western Paṣḥtō, run right up to the northern boundary of the District, and across it into the Khaṭak Pargana of Pēshāwar.

The following figures show the number of speakers of each dialect of Paṣḥtō in Kohat, according to the Census of 1911:—

North-eastern dialect (Bangaṣḥes)	•	•	•	•	•	•	•	•	107,492
South-western dialect (Khaṭaks)	•	•	•	•	•	•	•		85,891
	Manua 1 CT No. 1								700.000
		Total number of Pashto speaker							193,383

Besides Hindű inflections such as the termination $w\bar{a}l\bar{a}$ to form nouns of agency, it may be noted that the past participle ends in o, that the genitive prefix is d^a , and that there are a few other minor irregularities of pronunciation.

FREE TRANSLATION OF THE FOREGOING.

It is said that Köhāt belonged to a Rājā who had founded it. In early days, the Orakzais used to live on the springs. In winter, the Bangaṣḥes, who resided in Pēwār and Shālozān, always used to come here with their families and encamped on high ground in Jarwanḍā. The Bangaṣḥ women used to fetch water from the springs. One day when they went there, the Orakzais broke their pitchers with stones and arrows. On this, a disturbance ensued between these two tribes and several of them were wounded and some killed. The Bangaṣḥes received aid and consequently the Orakzais left Köhāt and went to the hills; and thus the Bangaṣḥes were left in the undisputed possession of the country.

2. In reality the language spoken by the Bangashes is Pashtō but they (Bangashes) called in the Awāns to their aid. These people still live in Kharmātū, Bilīṭang, Kōṭ and other villages, as the dependents and helpmates of the Bangashes, who have given them lands and holdings. They had conversation and dealings with one another, and thus Pashtō and Hindkō became mixed, and a new dialect was formed which was neither Pashtō nor Hindkō.

In reality four tribes are the real proprietors and owners of Kōhāt—(1) Bēzādī and (2) Malakmīrī who are real Bangaṣḥes. Both of these tribes speak Paṣḥtō and Hindkō mixed. (3) Jangal <u>Kh</u>ēl, and (4) Pīr <u>Kh</u>ēl. The latter two tribes speak Paṣḥtō only.

- 3. Four kinds of water are used at Köhāt, (1) water from a ravine which comes from Tīrāh and is called Tōī, (2) spring water, (3) well water, and (4) pump water.
- 4. Köhāt City is situated in a plain surrounded on all sides by hills which are at a distance of 2 or 3 miles. All the hill tribes speak Paṣḥtō.

Köhāt is noted for silken turbans which are eagerly bought by European Officers and others. Leather sandals (both embroidered and simple), both for men and women, are beautifully made.

In these days Köhāt is in a very flourishing state owing to the cantonments and troops.

The climate of this place is very good and healthy.

SOUTH-WESTERN DIALECT.

The most northern tribe of the Afghans which speaks the South-western dialect of Pashtō is that of the Khataks. They are strongest in the District of Kohat, but are also found in Peshawar and in Bannu. A settlement of the Saghri sept of this tribe is found near Makhad on the banks of the Indus in the south-west corner of the Attock District of the Panjab. These also speak the South-western dialect of Pashto, while the Chhachh Pathans of the same District speak the North-eastern dialect. The number of Khataks in the Panjab District of Attock, according to the census of 1911, is about 6,500. In the Peshawar District the Khataks occupy the greater part of the Pargana named after them. where they have 55 out of 83 villages. Their home is in the hills south of Naushera, in the south-east corner of the District. According to the census, out of 709,465 speakers of Pashto in the Peshawar District, 54,525 were Khataks. In Kohat, they occupy the east and the south of the District numbering 85,891, out of a total number of 193,383 speakers of Pashto. In the Panjab District of Mianwali, adjoining Bannu, probably all the 15,191 speakers of Pashto use the South-western dialect. The Khataks of the Isakhel Tahsil certainly employ it. The other main tribe of Kohat, the Bangashes, speaks the North-eastern dialect, but in Bannu and Dera Ismail Khan, the South-western dialect is spoken by all Pathans. The numbers of Pashto speakers, in the latter two Districts as distinct from the number of Pathans, are 218,845 and 70,995 respectively. Ismail Khan the language is spoken only in the North and West of the District, and is dying out, being supplanted by Hindko. We therefore get the following figures for the population speaking the South-western dialect in Pashto-speaking Districts, in British territory:-

Attock .			_				•	•		.•			6,500
Peshawar .		•			•			•		•		٠	54,525
Kohat .			•								•		85,891
Bannu .		•	•			•	•	•		•	•	•	218,845
Dera Ismail		•	•		•	•	•	•	•	•	•	•	70,995
Mianwali	•	•	•	•	•	•	•	•	•	•	•	•	15,191
	•	•								TOTAL			451,947

In Pashtō-speaking Baluchistan all the Pashtō is South-western, and, as shown in the introduction, the number of speakers is 224,455. Adding this to the above we get a total of 676,402 for the number of speakers of South-western Pashtō in territories directly or indirectly under British Government.

For extra British territory and for the Wazīrī territory no accurate figures are available.

1

KHATAK DIALECT.

South-western Pashto is spoken, first, by the Khataks. Of these there are two main branches, the Eastern, or Akora, Khataks, and the Western, or Teri, Khataks.

The Akora Khataks inhabit the Khatak country of Peshawar, and its continuation, the northeast corner of the Kohat along the west bank of the Indus. South of them, still along the Indus, are the Saghri Khataks, who are closely connected with the Akōras and who, as already stated, have crossed the Indus, and occupied some villages near Makhad in the Attock District. South of the Saghris, along the bank of the Indus, we find the Isakhel Tahsil of the Mianwali District. In the northern portion of this Tahsil, we have the Bhangikhël Khataks who are offshoots of the Saghris. The Western, or Tērī, Khataks occupy the south and centre of the Kohat District. About Lachi, in that District, they meet the Bangashes, who occupy the north-west and north-centre, and who speak the North-center (Pakhtō) dialect of Pashtō.

The following specimen is of the language used by the Akōrā Khaṭaks of the Péshawar District. It is a version of the Parable of the Prodigal Son, for which I am indebted to the kindness of the late Sir Harold Deane, K.C.S.I.

Regarding the Khatak pronunciation, note that t_2 and d_2 are pronounced t_3 and t_4 respectively. The letter t_4 sh is pronounced, as in other southern dialects, as if it were sh. Regarding the exact Khatak pronunciation of this letter, Sir Harold Deane, when sending the specimens, wrote to in a as fo'llows: -' the man I have got to help me differs from me as to whether, with the t_4 sh, the Khatak includes a faint pronunciation of t_4 . I think he does -my man says "no," -- O I have transliterated it by sh.'

I do not give an interlinear translation, as the Khafak dialect is not so typically south-western. Pashto as the specimens which are subsequently given of the Bannu dialects. Full translations are supplied to all the latter.

As for dialectic peculiarities, the past participle masculine singular usually ends in o. Note also forms like w' for wu; wer for war; di ta, of thee; y tyam, I will say.

BANNU DIALECTS.

Other speakers of the South-western dialect are the remaining Pāṭhān tribes of Bannu, among whom the principal are the Marwats, the Nyāzais, the Bannūchīs, and the Wazīrīs.

The two following specimens come from Bannu. It may be noted that they use here and there Hindkī idioms. Examples of these are the words, miliā, joined; and lagiā, begun. The dialect illustrated may be taken as an example of the elegant southern form of Paṣḥtō, as spoken by educated Pāṭhāns of Bannu. I am indebted for them to the late Dr. T. L. Pennell of the Afghan Medical Mission, Bannu. Specimens of dialects spoken by the uneducated members of various tribes will follow.

The only local peculiarities worthy of note are that zu is 'I,' and cha, not chi, the relative pronoun. There is a tendency to substitute $\bar{\imath}$ for \bar{e} or ai, as in $wu-w\bar{\imath}sh^{\imath}$, it-was-divided; $m\bar{u}ndal\bar{\imath}$, he was found.

BANNUCHĪ DIALECT.

The two preceding specimens are in the language used by educated Paṭhāns of Bannu. The following, which I also owe to the kindness of Dr. Pennell, is in the colloquial language used by the uneducated Bannūchīs or true inhabitants of the district. The principal peculiarities of this dialect are the following:—

The letters j z and غلی are frequently interchanged. Thus زئی zi \bar{e} or غنی غ $i\bar{e}$ or غنی غ $i\bar{e}$ or غنی a son.

The letter j is pronounced something like jh, but is still transliterated zh.

A long \bar{a} is pronounced as \bar{o} or \bar{u} , and a long \bar{o} or \bar{u} as \bar{e} or \bar{i} . A short a is often -changed to a short u or o, and a short u or i to a short i or e.

As in the other southern dialects, the letter ω is pronounced sh and not kh. Note $m\bar{u}$ or $m\bar{o}$, me, and $t\bar{u}$ or $t\bar{o}$, thee. Also $a\underline{kh}pul$, own; \underline{dz}^ane , from him.

FREE TRANSLATION OF THE FOREGOING.

Bannu was originally a wilderness, and was inhabited only in one place which is now known as Akra, and which was originally held by the Greeks. They were attacked by Bharata, the brother of Rāma-chandra, and by Kaikēyī, Rāma-chandra's mother, who captured the country. Some time after them the Chabūtrīs invaded the land, and they, in their turn, were attacked by two Paṭhān tribes, the Hīnīs and the Mangals. They were attacked by Shatīk. His wife was named Bānū, and they were descendants of the Kuruṣīs. Then Shatīk died, leaving only young sons, so the country became known by the name of his wife, Bānū.

Both the heat and the cold of this land are moderate. The drinking-water is that of the Kuram, or is drawn from wells, while the neighbouring peoples drink tankwater. All kinds of vegetables are abundant, but, specially, molasses, turmeric, Arumroots, dates, clover, and <u>Shīsham-trees</u>. The artizans make excellent sandals and bedstead-legs.

¹ Kaikēyi was Bharata's mother. She was Rama-chandra's step-mother.

MARWAT DIALECT.

The Marwats are a tribe inhabiting the south of the Bannu District, and the following are two specimens of the dialect spoken by them, for which I am also indebted to the kindness of Dr. Pennell.

In addition to those common to the Standard South-western Pashto Dialect, it has the following peculiarities:—

- 1. The letter wsh is pronounced s. Thus wsa, for sh sh, was.
- 2. The termination e^{-am} of the first person of the tenses formed from the present stem is changed to \tilde{u} .
- 3. The word $\int \bar{o}$, and, becomes $\int \bar{a}$.
- 4. Some consonants are omitted, as the letter of in مزدر mazdūr, a servant, which becomes مزدر mazūr. Consonants are often doubled, especially in the termination of the past participle. Thus مردد kh warulla, eaten.
- 5. The word for 'he' is often $d\bar{u}$. The genitive prefix is di. 'To him' is sour.

FREE TRANSLATION OF THE FOREGOING.

The Marwats and the Nyāzīs are fighting amongst themselves. A youth has called to me that their dust is rising up on the west of Tang Darrī. A Marwat shouts, and gives the battle cry. Great was the strength of the Marwats. When the sound of the war-drum was heard, they made their army ready by the afternoon. By evening were their camp-fires burning amongst the Nyāzīs of Isākhēl. Bright flash the swords of the Marwats, as they expel the Nyāzīs from their homes. But when Bēgū Khān, the son of Hātī Khān, attacks them, the Asikais¹ bring back to their homes a grey beard and a red sword. Instead of war, he made an onslaught like that of a falcon. Kalanda, the son of Maḥmūd, is the star of the morning. With his own spear so great destruction did he work that the Ādamzōes all were ready to be a sacrifice for his sake.

¹ Bêgü Khān was one of the chiefs of the Asikais, who are a Marwat clan. 'Grey beard' is used in the sense of 'honour.' The men were themselves uninjured but their swords were red with the blood of their enemies the Nyāzis. For another version of this song see Thorburn's Bannú, p. 227.

WAZĪRĪ PAŞḤTŌ,

I give four specimens of the south-western Paṣḥtō spoken by Wazīrīs. Two come from Bannu, and were provided, like the preceding ones, by Dr. Pennell. The other two I owe to the kindness of the late Mr. J. G. Lorimer, I.C.S., and come from Wazīristān itself.

Wazīrī Paṣḥtō is an important dialect, and is spoken over a large area. An excellent grammar of it has been written by Mr. Lorimer, which is mentioned under the head of authorities in the General Introduction.

The pronunciation of the vowels closely resembles that of Bannuchi Paṣḥtō, and the changes need not be again recorded here. In Bannu, the postposition kṣḥe is pronounced and written sḥē after a word ending in a consonant. In the same locality the word wa or wi is often used as a mere expletive, and is represented in the interlinear translation by the mark '...'. Note the tendency to change an f into a p, as is also the case in other dialects. Thus $pak\bar{\imath}r$, a faqīr. We may also note forms such as the following which do not occur in standard Paṣḥtō, but occur in other neighbouring dialects. $Z\tilde{u}$, I; di $m\bar{o}$, of me; di $t\bar{o}$, of thee; $d\tilde{u}$, by him; $dzin\bar{\imath}$, from him; yigh $kush^ar\bar{\imath}$, by that younger one; pu dughu mulk $sh\bar{e}$, in that country.

FREE TRANSLATION OF THE FOREGOING.

The story goes that Wazīr had four sons—Līlō, Mīsī, 'Ēsī, and Lāyiqō. Līlō committed murder, and fled to the White Mountain. Mīsī became a faqīr and had two sons, one named Aḥmad, and the other Atimun. 'Ēsī had one son named Mas'ūd, whose four sons were named Ālī, Bālī, Shāwūl, and Afrīd.

The Misī above mentioned was a Darwēsh. He followed vows of poverty and used to feed sheep. Once a sheep ran away from him, and he searched for it for many days and at last found it. When he found it, he raised it up, and kissed it on the feet. Then, for that reason, God increased his rank among the saints.

The above are specimens of the Wazīrī Paṣḥtō spoken in the District of Bannu. I am indebted to the late Mr. J. G. Lorimer, I.C.S., formerly Political Officer in Tochi, for specimens of the dialect as spoken by the Wazīrīs in Wazīrīstan. Regarding this form of the language, Mr. Lorimer (who is the author of a Grammar and Vocabulary of $Waz\bar{\imath}r\bar{\imath}$ Paṣḥtō), with the specimens, gave me the following information:—

'Wazīrī Paṣḥtō is the dialect (or rather, comprises the various dialects) of Paṣḥtō spoken in Wazīristan and part of the Bannu District, the boundaries of which can be seen in any map of the frontier.

'The Wazīrīs, or more properly Wazīrs, are divided into two main divisions, Mahsūds' (10,000) and Darwēsh Khēls (24,500). The Darwēsh Khēls again are divided into Aḥmadzais (12,000) and Utmānzais (12,500). The Utmānzais live in the Tochi and the hills adjoining it on both sides and extend on the north almost to Thal in the Kohat District. The Aḥmadzais live round Wana and in the western part of the Bannu District along the border. The Mahsūds inhabit the heart of Waziristan and are completely surrounded by the other Wazīrī tribes and by the Bittannīs. The dialects spoken by these tribes do not vary greatly from one another, but differ considerably in accidence, vocabulary, and even idiom, from the dialects spoken by the Paṭhāns on the Kohat and Peshawar frontiers, indeed an untravelled Northern Paṭhān and an untravelled Wazīrī meeting for the first time are scarcely intelligible to each other, and are certain to misunderstand one another to some extent. Each, however, rapidly becomes able to understand the other's language, but I know no instance of a northern Paṭhān who has learned to speak Wazīrī Paṣḥtō.

The meaning is that for this act of kindness and forgiveness, God made Misi the mest powerful intercessory saint of all the Waziri lalls; and now the Waziris hesitate to swear falsely on his name, much more than either on God's or the Qurān.

² The figures in brackets represent the estimated fighting strength of each tribe, and do not include women and children.

'The cultivated bed of the Tochi valley is inhabited by the Dawaris (perhaps 8,000) whose speech is not very different from that of their Utmānzai Wazīr neighbours. Other miscellaneous non-Wazīrī tribes, such as the Saidgīs and Gurbuz, speak the dialect of the Wazīrī section with which they have most intercourse.

'It would be impossible to give specimens of all Wazīrī dialects, which shade into each other imperceptibly and vary from tribe to tribe and even from section to section. The dialect of families of the same section which have been separated for some generations often is not the same. Pronunciation varies almost from village to village and so great is the confusion that even the same man will sometimes pronounce the same word differently. In spite of these differences any two Wazīrīs can converse freely.

'I have selected as a type the dialect of the Möhmit Khēls who are one of the three main divisions of the Utmānzai (or Tochi) Wazīrs and live for the most part in the neighbourhood of the Middle Valley. Territorially, and also perhaps in their characteristics and speech, they are intermediate between the other two divisions of the Utmānzais, the Walī Khēls and the Ibrāhīm Khēls. The story which forms specimen II was told by Malik Madd Akbar, the head of the Tōrī Khēls, but it has been revised and cast into the same Mōhmīt Khēl dialect as the other specimens.

'Wazīrī Paṣḥtō is seldom or never written. The Arabic character, especially in the matter of vowels, is quite inadequate to expressing it phonetically. The written correspondence of the people, which is very small, is carried on through letter-writers (chiefly Mullās' in execrable Persian.)

For this reason, Mr. Lorimer wrote the specimens only in the Roman character. The system of representing the sounds is the same as that used in this Survey, the only special letters being \ddot{a} , which serves to represent the sound of the e in 'there,' as pronounced in Scotland and North England, and \ddot{o} which represents the sound of eu in the French 'beurre.' In the specimens following, it only occurs before the letter r.

It will be seen that there is little difference between this form of the dialect and that spoken in Bannu.

A Story of Wazīrī Life.

Once, Sāhib, the Jānī Khēls and the Bakka Khēls took me away to arbitrate in some disputes which they had with other tribes. On that occasion a man said to me, 'I have been struck with a sword here, upon my forehead, by a person.' I asked him who had done it, and he replied that it was his wife. Then said I, 'why did she do it?' and he answered, 'this is how it happened. I had four cousins, and they gave me their sister to wife, so I began to live with her.

One night I happened to wake, and saw my wife open the door and go out. I suspected that she had some lover, and so I took my sword and followed her. It was pouring rain, and the night was intensely dark. She started from the village, and began to traverse a lonely, stony, plain. She went a long way. At a certain place there was a man seated, with his horse tied up (close by). She went up to him and said, "I have brought you something to eat, if you would like it." He answered, "my hands are unclean. There is a cup on the horse. Bring it here that I may wash them, and then eat." This had hardly happened, when she went off to fetch him water.

Now I, the husband, drew near to him as he remained seated, and struck his head off with my sword so that it rolled on the ground. When she came back with the water he was dead, but I, her husband, had withdrawn to a distance that she might not see me. When she came up to him and saw him there, lying dead, she cried out, "I adjure you by God, give one shout." I, the husband, gave no shout, for I thought she would kill me if I did so. Well, then, the woman tied the corpse on to the horse and started it off in the direction it chose for itself, while I, the husband, went back home, followed by her. I had hardly reached home, when she came in too. Enough, she arrived much worn out and sad.

Next morning I, the husband, set out to inquire if any man had been found dead in the lonely, stony, plain, and, if so, who he was, but I came back without finding any clue.

¹ The woman is addressing the unknown murderer of her lover. She wishes to recognise him by his voice.

I came back to the house and sharpened my spear: for I said, "I will now kill my wife." One night I asked her for some tobacco, and she answered, "inside the house it is too dark to find it." Then said I, "when thou wentest to the lonely, stony, plain, not only was it pouring rain, but it was also darker than it is now inside the house." Said she, "I never knew that my love was dead at thy hand," and scarcely had she spoken when she snatched up my, her husband's, sword. I, her husband, took up my position by the door and levelled my spear at her. I thrust it at her, and she rushed upon it, so that it struck her in the belly. When it had passed right through her, she forced herself with great exertion up the spear till she was within reach of me, and then she struck me on the forehead with the sword. I shouted out to her brothers, "Cousins, come. She has slain me." They came rushing in, and there she was caught upon the spear. Her brothers drew their swords and smote her and killed her. Then they asked of me, her husband, why she had been killed. Said I, "I saw her with a man on the lonely, stony, plain. I slew the man and I know not who he was."

SOUTH-WESTERN PAȘȚTŌ OF KANDAHAR.

For the following specimens of the Pashtō spoken round Kandahar and Pishin I am indebted to the kindness of the Agent to the Governor-General in Baluchistan. I only give them in transliteration. It will be seen that the language is very nearly standard Paṣḥtō. The main peculiarity is the preference for s instead of \underline{sh} (as in the Marwat dialect). Thus sam, not \underline{sham} , I am. The word for 'in' is $k\bar{e}$, not $k\bar{e}h\bar{e}$. The verbal prefix wu is pronounced wo, but this last sound is common all over the Paṣḥtō and Paṣḥtō speaking areas even when the syllable is written wu.

In preparing the specimens for the press I have made no distinction between a and a. The distinction no doubt exists, but was not indicated in the manuscript as received from Quetta. I have not ventured to supply the omission.

FREE TRANSLATION OF THE FOREGOING.

I have heard that Amīr Dost Muḥammad Khān was once proceeding in winter to Turkistān. When he reached the Hindū Kush it was dark and snow was falling. A loaded camel belonging to the infantry soldiers had slipped and its load fell off. The sepoys were tying up the load again and putting it on the camel, when one of them used some very abusive language about Amīr Dost Muḥammad Khān. The Amīr was passing, but was not noticed by them.

Both Amīr Dost Muḥammad! Khān and his son Wazīr Muḥammad Akbar Khān heard the abusive language. The Amīr turned a deaf ear to it, but the Wazīr could not tolerate it. He shouted (asking) who the dog was that had barked. The Wazīr's voice of thunder differed from (all) other voices and every one recognized it.

When the soldiers heard that strong resonant voice all changed colour, and kept their mouths shut. Amīr Dōst Muḥammad Khān drew rein and cried: 'Muḥammad Akbar, beware lest another sound escape your mouth. Behold their plight; instead of being annoyed at their abuse, your heart should suffer for them. Had you been in their place their plight would have been well known to you.'

The Amīr said this and proceeded. The Wazīr was silent and followed his father.

The sepoys recognized the Amīr too by his voice, and the foul-mouthed soldier cried, 'Amīr Ṣāḥib, you have not identified me. My name is Khaṭōl and I am the son of Marwand. I am an "Andar," and belong to the family of Bakhshī. I am the 30th man in the 5th Company of the Imperial Regiment. Please fully identify me and listen to me. If God gives me the opportunity and I do not die in your presence may I be (reckoned) of illegitimate birth.'

After some years, in a hard fight which occurred, a stalwart and burly chief among the enemy advanced against the Amīr. He drew his sword and, lifting it, was about to strike at the Amīr. The gallant soldier was close by. He hastily placed his body between the sword and the Amīr, and the sword (blow) which was aimed at the Amīr fell on the soldier. The latter laughed and cried: 'O God, thanks be to Thee that I have not died (still) owing to the Amīr the debt under which he laid me that night on the Hindū Kush.' As he uttered these words, he fell at the feet of the Amīr's horse and breathed his last.

OTHER BALUCHISTAN DIALECTS.

The Pashtō of Baluchistan varies from place to place, and from tribe to tribe, but the only specimens received from the Agency are those illustrating the dialect of Pishin and Kandahar given in the preceding pages. In order, therefore, to complete the information as far as possible, I supplement these specimens by the following account of the different forms of Baluchistan Pashtō, taken from § 227 of Mr. Denys Bray's Report on the Census of Baluchistan for 1911:—

'Chief among the many local dialects is Kākarī, one of whose pet peculiarities is the change of ē in standard Pahto to a : rasazham for rasezham, I arrive ; rapazham for rapezham, I tremble ; dars for ders, 30. is alwasht for is alwasht, 40. But the two idiosyncrasies that seem to strike non-Kakar Pathans more than any thing else are, first, the employment of the masculine vocative termination for the feminine gender also: vror-a oh brother! mor-a, oh mother! khor-a, oh sister!—and second, the childish regularisation of irregular plurals: zōeān, sariān, for zāman, sons, and sari, men. Perhaps the chief characteristic of the Luni dialect, which in general is very similar to Kākarī, is the softening of is to ch, as in chok for isok, who? The Shīrāni changes e sometimes to a, like the Kakar, and sometimes to e as in dres for dre, 3; another peculiarity of his is an occasional changing of w preceded by a consonant to b as in dba for dwa, 2. The Mandokhel is fond of lengthening short a, and of assimilating sh and sh to the harsher sh and sh : shpash for shpash, 6; he is also fond of changing a medial w to m: nimi for niwi, 90. But more important still is his conversion of the ancient z-sound in many words to d: de mā, my, instead of zmā; de mūzh, our, for zmūzh. These are of course but a few local dialects gathered from the bunch—just enough to show that grubbing into the Pashto dialects of Balüchistan would not be labour lost. But before I leave the subject, I cannot refrain from citing a bit of the Prodigal Son translated into a dialect that has earned a spurious local notoriety merely because it rejoices in the special names of Tarino or Chalgari :- yā sari gha dwa zōyê wi ; pa haghō chi warake wata wo wai, chi ē piyāra dagha tā māl chi mā barkha wīna, agha māta wala au hagha khpala duniā wawēshia ; . . . ha aha zrah da ahwasht sarkuze chi khwarah a gha cheqt wiya nas dak kare ; cha watah na lowrah ; biya hosh chi rāgha wēwai ; mā piyār gha dughumre mazdurān gha tsatta nori wiya au sah warzha ya mirēshi. But enough and more than enough of this jarring gibberish; it is less a Pashto dialect than a hotchpotch of execrable pronunciation and still more execrable grammar. It is spoken by the Vanschi and Makhiani of Shahrig and Duki, and it looks mighty like proof positive that these so-called Spin and Tor Tarin are not Tarin at all (and their Pathan origin is otherwise suspect) but Indians and possibly Jatt (as Chalgari, the name of their jargon, suggests) who have become affiliated to the Pathans, but have still to assimilate the language of their adoption.'

ORMURI OR BARGISTA.

Örmuri is the language of the tribe known to its neighbours as 'Örmur,' but called by its own members 'Baraki.' The latter name is said to be derived from that of one Mīr Barak whom they claim as their ancestor. For the same reason they call their language 'Bargistā,' or 'Bargastā.' According to Ghulām Muḥammad Khān,¹ they are said to have come at some unknown time from Ērān, and to have settled in the Lōgar Valley, south of Kābul. Subsequently they advanced to Kānīguram in Wazīristān, where they now occupy some four or five hundred houses. When the Afghāns, as described above (p. 7), occupied the country, the Örmurs fell under their domination. Taking to trade, they wandered to various distant places in pursuit of their calling, with the result that we find a few villages belonging to them in the Peshawar district. Here they have given up their own language and speak Paṣḥtō. In the Lōgar Valley, in some villages the Örmurs speak Persian, while in others,—Leech mentions the village of Barak,—they have retained their own form of speech, which is also the case in Kānīguram.

The above is the account given by Ghulām Muḥammad Khān. Two earlier writers agree on the whole with what he says, but state that the tribe is of Arab descent. Lieutenant R. Leech (JASB, vii, 1838, pp. 727ff.) gives a short Ōrmurī-English vocabulary and a few phrases in the language. He also remarks as follows:—

'The Barakîs are included in the general term of Parsîwan or Tajak; they are original inhabitants of Yemen whence they were brought by Sultán Mahméd, of Ghazni; they accompanied him in his invasion of India, and were pre-eminently instrumental in the abstraction of the gates of Somnath. There are two divisions of the tribe, the Barakîs of Rajan in the province of Lohgad, who speak Persian, and the Barakîs of Barak, a city near the former, who speak the language called Barakî; Sultán Mahméd, pleased with their services in India, was determined to recompense them by giving them in perpetual grant any part of the country they chose; they fixed upon the district of Kaniguram in the country of the Waziris, where they settled The Barakîs of this place and of Barak alone speak the Barakî language.

We receive a warning from the study of this vocabulary, not to be hasty in referring [? inferring] the origin of a people merely from the construction of their language; for it is well known that the one now instanced was invented by Mir Yúzúr who led the first Barakîs from Yemen into Afghanistan; his design was to conceal and separate his few followers from the mass of Afghans (called by them Kásh) who would no doubt at first look upon the Barakîs with jealousy as intruders. The muleteers of Cabúl, he ng led by their profession to traverse wild countries and unsafe roads, have also invented a vocabulary of pass-words.'

Whether Leech is correct or not in stating that Ormuri was once a secret language, it is certainly not an argot invented by a single man. It is without any doubt an Eranian language, and retains old Eranian forms that have become greatly altered in other members of the family.²

Major H. G. Raverty (JASB, xxxiii, 1864, pp. 267ff.) also gives a short list of 'Bárakai' words, and adds:—

'The Bárakais, who are not Afgháns, are included among the people termed Tájíks (supposed to be of Arab descent,) [and] dwell at. and round about, Kánígoram, and about Bárak in the province of Loghar, and But-khák on the road between Jalálábád and Kábul, south of the river of that name.'

VOL. X.

¹ P. 5 of the Qawaid-e-Bargista.

² For instance, Herodotus has recorded for us one Medic word used in his time. It is σ πάκα, a dog, which is preserved almost unchanged in the Örmurī spuk. On the other hand Persian has degraded this to sag, and other Eranian dialects to forms such as saba, espa, sipa, spai, or se.

It might seem waste of time to give an account of the language of so small, and insignificant a tribe. But it raises several most interesting philological and ethnological questions, and is moreover almost entirely unknown to all writers on Eranian subjects. Ormuri is a veritable fly in amber. Spoken in the Logar valley and in the heart of Wazīristān, it is in both localities surrounded by a Pashtō-speaking population, and yet bears only the most distant relationship to that language. It is true that its vocabulary borrows freely from Pashto, but this is borrowing and nothing more. Pashto is an East Eranian language. Ormuri is a West Eranian language, and its nearest relatives are the dialects of western Persia and Kurdish. Another interesting point is that Ormuri, although a West Eranian language, contains manifest evidence of contact with the Dardic languages whose present habitat is the hill-country south of the Hindū Kush. At the present day these languages are being gradually superseded by Pashto, and are dying out in the face of their more powerful neighbour. Those of the Swat and Indus Köhistans are disappearing before our eyes. There is reason to believe that this has been going on for several centuries. In historic times they were once spoken as far south as the Tirāh valley, where now the only language heard is Pashtō, and the fact that Ormuri shows traces of them leads to the supposition that there were once speakers of a Dardic language still further south in Wazīristān and, perhaps, the Logar country, before they were occupied by the Afghans. For all these reasons I have thought it right to include in these pages as full a grammar and vocabulary of Ormuri as I have been able to compile.

These are based on the information contained in a work written partly in Urdū and partly in Paṣḥtō entitled the Qawāid-ē-Bargistā. It was composed by Ghulām Muḥammad Khān, who was at the time District Inspector of Schools in the Dera Ismail Khan District, at the request of Major Macaulay, the Political Agent with the force that invaded Wazīristān in the year 1881. It is a full and carefully written work, containing a grammar, a vocabulary, and a collection of short sentences and stories in Ormurī. Unfortunately, being printed in the Persian character, the vocalization of many Ormurī words has been left doubtful, and this I have endeavoured to remedy, so far as was possible, by reference to other sources. These are the materials collected for this Survey, and, especially, a valuable list of Ormurī verbs written in the Roman character, kindly placed at my disposal by Mr. M. Longworth Dames. When these sources failed, I consulted the local officials, and am much indebted to Sir John Donald, K.C.I.E., the Resident in Wazīristān, for help ungrudgingly rendered to me in the midst of other pressing duties.

It should be understood that the following pages are in no way at mere translation of Ghulām Muḥammad Khān's work. The entire vocabulary is original. As for the grammar it is arranged on the English system, and this differs widely from that employed by Urdū and Persian grammarians, which is followed by him. Moreover, in some

¹ The question of the linguistic position of Ormuri in regard to other Eranian forms of speech is a matter too intricate for these pages. I therefore content myself above with stating the result of my investigations. The whole subject is discussed in detail in a paper entitled 'The Ormuri or Bargistä Language' published in the Memoirs of the Asiatic Society of Bengal [Vol. VII (1918), No. 1].

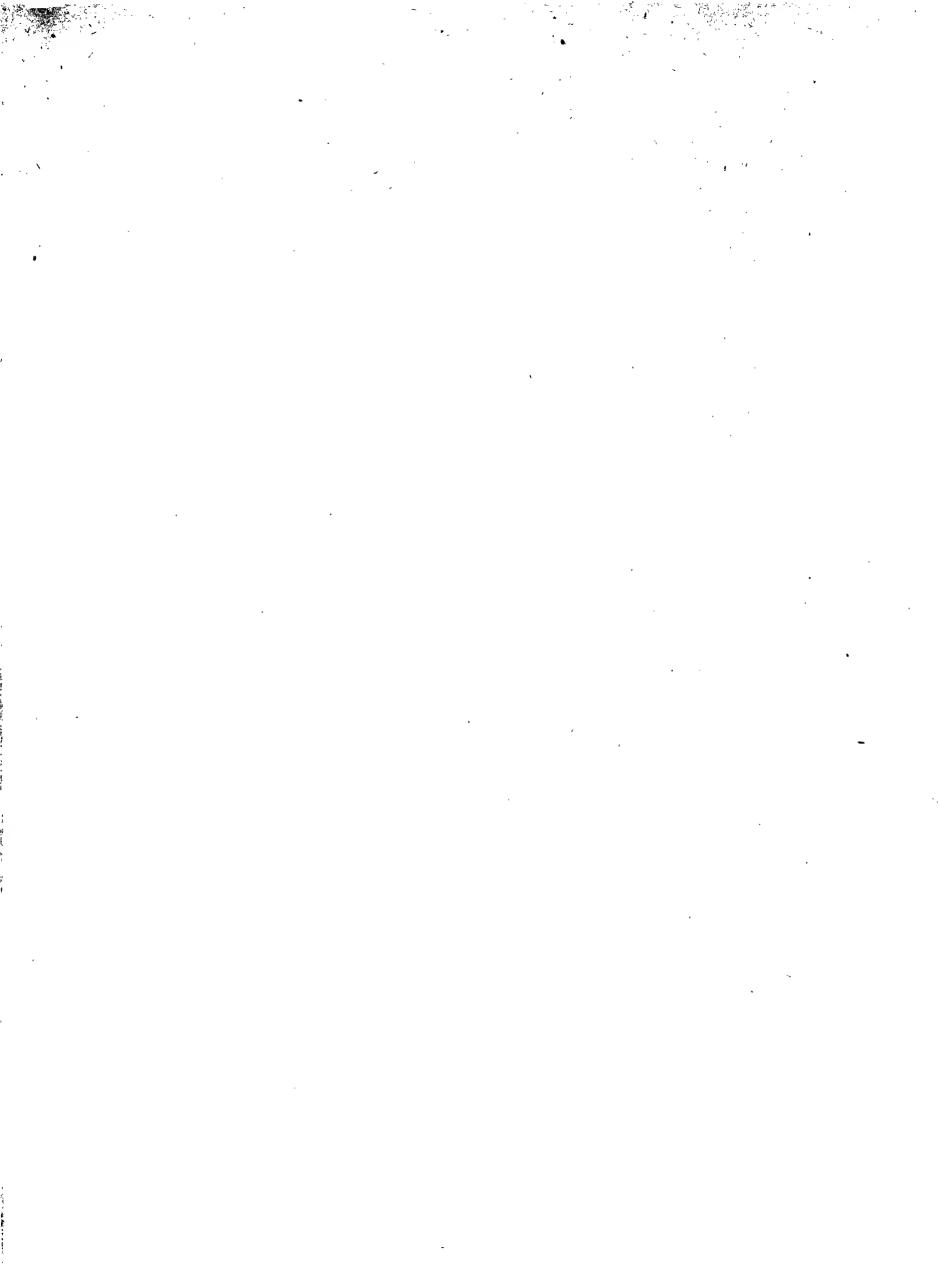

² Such are the frequent elision of intervocalic r; the common epenthetic changes of vowels and consonants in the formation of the plurals of nouns and of the masculine singular of past participles; the form of the second personal pronoun in the plural; and the characteristic ending of the infinitive in k.

125

important particulars I have found myself compelled altogether to abandon rules laid down by him, and to frame new rules based on the comparison of examples collected with some labour from widely separated pages of his book. As an example I may quote the Appendix to Chapter VII, on the particles $a\bar{\imath}$ and $d\bar{\imath}$. At the same time, as he has been in most cases my sole authority, I have, in each case, been careful to include within marks of parenthesis the number of the page and line in his book where the facts will be found on which my statements are based.¹

Beyond the two papers of Leech and Raverty, respectively, and Ghulām Muḥammad Khān's work, I know of no treatise dealing with Ōrmurī, and it is hoped that the following pages will be found useful, not only by officers on our Frontier, but also by students of Eranian languages in Europe.

¹ Thus, 'zark', woman (49,5)' means that the word will be found on line 5 of page 49. Occasionally words are quoted from other sources. The Specimens are indicated by Roman numerals. Thus, 'mradzī (I, 12)' means that the word will be found in the twelfth verse of Specimen I. Numbers with the sign § prefixed refer to sections of this grammar.

CHAPTER I.

WRITTEN CHARACTER.

1. The Örmuri language is not a written one, and, except for a few songs, possesses no literature. For written communications, the speakers generally employ either Paṣḥtō or Persian. It can be written in the Paṣḥtō alphabet, with one additional letter. Thus:—

1	alif	ش	sh
ب	b	ښ	ķķ
	p	ى بى ښو	sķ
ت	t	ص ض	
φ	<i>t</i>	ض	z
ن ن ن	<u>8</u>	Ь	ţ
*	ts	ظ	z
7	\boldsymbol{j}_{\perp}	ع	6
દ	ch	و کی و درخ ع ل می کی و	gh
	<i>ħ</i> .	ف	f
てさい	kh	ق	\boldsymbol{q}
ં	d	ک	\boldsymbol{k}
J	d	ى	g
Š	g.	J	\boldsymbol{l}
,	r	r	m
ر	<i>r</i>	⊌	n
ز	\boldsymbol{z}	پ or نړ	, ņ
ž	dz	ٔ ر	w
ノルラープラ	zh	٠	h
J	zh	ي	\boldsymbol{y}
سَ	8	••	

2. Of the above, the purely Paṣḥtō letters are \dot{z} , \dot{z} , \dot{z} , and \dot{z} . Of those, \dot{z} in Paṣḥtō represents the two sounds here represented by \dot{z} and \dot{z} , respectively. Ghulām Muḥammad Khān separates the two sounds, \dot{z} representing ts (or, as he puts it, j+s), and in alphabetical order following \dot{z} ; while \dot{z} represents dz (or, as he puts it, j+z), and in alphabetical order follows \dot{z} . The Paṣḥtō, \dot{z} is only required for borrowed Paṣḥtō words, and, as in South-Western Paṣḥtō, is pronounced like the Persian \dot{z} zh. The Paṣḥtō \dot{z} \dot{z} \dot{z} is also pronounced as in the South-Western dialect, something like the Persian \dot{z} $\dot{z$

Peculiar to Ōrmuṛī is the letter $\dot{\psi}$ \dot{s} \dot{r} . According to Ghulām Muḥammad Khān, who devised the Persian form of the character, its sound is a mixture of \dot{s} \dot{s} \dot{h} , and \dot{s} \dot{r} . Its correct representation has given much trouble to Paṣḥtō scribes. Thus, a report received from Bannu writes the Ōrmuṛī word \dot{s} \dot{r} , three, \dot{s} \dot{s} \dot{s} \dot{r} \dot{s} \dot{s} \dot{r} \dot{s} \dot{r} \dot{r} \dot{s} \dot{r} $\dot{r$

128

and adds in a footnote 'the word is written thus, but this does not represent the correct pronunciation. There is no exact equivalent to the opening consonant.'

3. In transliterating Ormuri words, I have followed the usual system of this Survey, except that I have omitted as surplusage the ligatures under kh ($\dot{\tau}$), k ($\dot{\tau}$), k ($\dot{\tau}$), and k ($\dot{\tau}$), and k ($\dot{\tau}$). k and k do not seem to come together in Ormuri, so that there is no danger of confusing k and k and k and k and k. Hence we have:—

$$egin{array}{lll} m{k}h &=& \dot{c} \ ts &=& \dot{c} \ dz &=& \dot{c} \ zh &=& \dot{j} \ sh &=& \dot{\omega} \ gh &=& \dot{c} \end{array}$$

4. As is customary in books lithographed in the Persian character, Ghulām Muḥammad Khān is very lax in his representation of the vowel sounds of the language. Herepresents the well-known fatha ĕ Afghānī by f, as in É ts, what? But the hamza is commonly omitted in the printing, so that we usually find É. He also, as often as not, represents it by kasra or by zamma. Thus the word É ts, today, is so written on p. 55, l. 8, but is f on p. 158, l. 4; and y wr (p. 157, 8), take thou, is y on p. 74, 6. I have endeavoured to correct these inconsistencies where they occur, but cannot hope that I have been uniformly successful. In transliteration this letter is represented by a small above the line. It has a very brief utterance, and is described as nearly mute (sākin, p. 12, 14; 85, 11).

Ghulām Muḥammad Khān is also most uncertain in his representation of majhūl and ma'rūf sounds of ω and ω and ω and ω if, indeed, he makes any attempt at all to distinguish them in writing. It is usually quite impossible to say whether he means \bar{e} or \bar{i} , or \bar{o} or \bar{u} , respectively. With the aid of information kindly supplied by the officials at Bannu,. I have done my best to give the right sounds in the transliteration.

ACCIDENCE.

CHAPTER II.

NOUNS SUBSTANTIVE.

i. The Article.

5. The definite article is a prefixed to the noun to which it refers (117, 10ff.). Thus, sarai, a man; a-sarai, the man; a-sarai mullak, the man died; a-sarai a-pandūk khwalak, the man ate the pomegranate. As a rule, it is not used before proper names or before pronouns, but it is sometimes used with the names of cities or the like, as in a-Lahōr aī sir dzāk hā, Lahore is a good place.

6. There is no regular indefinite article, but the indefinite pronouns kuk, someone, and ts^a , something, sometimes have this force. Thus, kuk sarai ai byok, there was a certain man; ts^a shai ai byok, there was a certain thing (p. 55).

The numeral $s\bar{o}$ or s^a (fem. $sy\bar{i}$), one, is also used in this sense. Thus, $haf\bar{o}$ pishtak ka, ' s^a sarai tar-mun i- $tsang^a$ $hany\bar{i}$,' he wrote (that), 'a man is sitting near me' (151, 13); $k\bar{u}$ -mun $lik\bar{i}$ $a\bar{i}$ s^a $kha\underline{t}\underline{t}$ $p\bar{i}s^a$ n, write a letter to me (256, 5); $sy\bar{i}$ $s\bar{a}$ 'at sabr $k\bar{e}w^a$ n, wait a moment (257, 10). Occasionally the definite article is prefixed, as in a- s^a sarai s^a $pand\bar{u}k$ khwalak, a certain man ate a pomegranate (110, 9); a- s^a sarai $sy\bar{i}$ $kharb\bar{u}z^a$ (fem.) $khw\bar{a}lk$, a certain man ate a musk melon (110, 10).

The syllables $a\bar{\imath}$ and $d\bar{\imath}$, which are used to indicate the subject of an intransitive verb and the object of a transitive verb, often serve to indicate that a noun is indefinite. This will be explained under the head of syntax (§§ 97, 99-101, 141ff.).

ii. Gender.

7. There are two genders,—masculine and feminine (p. 46). Nouns relating to beings with life generally follow their natural gender. There are often separate words for such masculines and feminines. Thus:—

Masculine.Feminine.sarai, a man. $zark^a$, woman (49, 5).kwalanak, a boy. $d\bar{u}k^a$, a girl (49, 6). $y\bar{a}nsp$, a horse. $m_{\bar{v}}\bar{a}nd\bar{e}n\bar{\imath}$, a mare (49, 6).

Other masculine nouns signifying living beings, and ending in consonants, form the feminine by adding ". Thus:—

dzawan, a youth.dzawan, a girl (49, 9).zal, an old man.zal, an old woman (49, 10).bani-adam, human beings.bani-adam (49, 11). $\bar{a}dam-z\bar{a}d$, a human being. $\bar{a}dam-z\bar{a}d$ (49, 11). $\bar{u}sh$, a camel. $\bar{u}sh$ (49, 12). $j\bar{o}ng$, a young camel. $j\bar{o}ng$ (49, 12).

When such a masculine noun ends in ai, this is changed to $\bar{\imath}y^a$ in the feminine. Thus:—

kharkhūnṭai, an ass's colt. kharkhūnṭīy* (49, 15). kūkrai, a puppy. kūkrīy* (50, 1).

Sometimes, however, $a\bar{i}$ is substituted for ai, as in:—

```
laka-shawai, a deer.
```

laka-shawai.

The word khwarkai, a nephew, has its feminine khwarkiyi (243, 12, 15).

When there is no distinction between the masculine and the feminine of nouns signifying living beings, then sex is distinguished by the use of the words $n^a r$ to indicate the male, and $shadz^a$ to indicate the female. Thus, $n^a r$ hins, a male bear; $shadz^a$ hins, a she-bear (50, 6).

- 8. Most names of things without life are masculine (50, 11). Prominent exceptions are wak, water; nar, a house; and $sh\bar{\imath}p\bar{\imath}$, milk, which are feminine. As there are many other exceptions to this general statement, the following rules are laid down to enable the student to recognize whether a noun is masculine or feminine.
- (1) A noun ending in any consonant except w or y is generally masculine (48, 10). Such are:—

```
gap, a stone (48, 11).

shōr, a city.

maindān, a plain.

dand, a pool in running water.

sīnd, ditto.

tāk, a mountain torrent.

ghār, a cave.

daryāb, a large river.
```

The following exceptions are feminine:-

```
sank, a rock (48, 14).

nar, a house.

dēgdān, a fireplace (220, 8).

sā'at, a moment (257, 10).

tkhan, wheaten bread.

pāts, bajrā bread (49, 1).

hanwalk, an egg.

syūgh, a grape, a mother-in-law.

matat, an apricot.

milīz, an apple.

waṭk, a walnut.

waṛk, a worm.

skhwandir (the masc. is skhwandar), a heifer.

Ghwats, a calf, is of common gender (227, 9).
```

(2) Nouns ending in ai (not ai) are masculine. Such are:

```
kandghōlai, a pit (47, 5).
laṣḥtai, a rivulet.
kūwai, a well.
ghūndai, a hillock.
pēchūmai, the slope up a mountain.
narai, a mountain pass.
raghzai, level ground at the foot of a hill.
```

```
The only exception is ghrai, a fireplace, which is feminine.
(3) Nouns ending in are feminine (46, 11). Thus:—
          zarka, a woman.
          mēwa, fruit.
          būmma, the earth.
          tânda, a relish eaten with bread.
          wana, a tree.
          kando, a watercourse.
          mirga, a sparrow.
But kulank, a kitten, is of common gender (229, 9).
(4) Nouns ending in \bar{a} are feminine (47, 2). Thus:—
          sirwā, soup.
          halwā, a certain sweetmeat.
          samyā, vermicelli.
          saudā, merchandise.
          saķrā, a desert.
          bēdiyā, a wilderness.
          surtā, a certain musical instrument.
But baurā, a humble bee, is masculine (235, 15).
(5) Most nouns in \tilde{\imath} are feminine. Thus:—
          khaī, a field (46, 14).
          kirmai, a hen (47, 12).
          s\bar{u}p\bar{i}, a monkey (47, 10).
          khiryāṇī, a gutter (id.).
          shīpī, milk (id.).
          my\bar{a}nd\bar{e}n\bar{\imath}, a mare (47, 11).
          biyanī, a filly (id.).
          murghāwī, a wild duck (id.).
          charmashkī, a chameleon (id., 234, 11).
          m^{a} s h \bar{i}, a fly (47, 12).
          myāsī, a mosquito (id.).
          nach\bar{\imath}, a white ant (id.).
          pisi, a firefly (id.).
          nori, bread.
The following are, however, masculine (47, 15):—
          grī, a mountain.
          hātī, an elephant.
          qumri, a turtledove.
          tūtī, a parrot.
          māhī, a fish.
```

(6) As regards words ending in $\bar{a}\bar{\imath}$ (also capable of being spelt $\bar{a}y$), $r\bar{a}\bar{\imath}$, a road, is feminine, while $sr\bar{a}\bar{\imath}$, a caravansarai, $g\bar{a}\bar{\imath}$, a bedstead, and $m\bar{a}\bar{\imath}$, a month, are masculine (48, 7).

VOL. X.

(7) Most nouns in \bar{u} (including those in \bar{o} and w) are feminine (48, 2). Thus:—

**shīnwū*, spinach.

**chīw*, a mountain cave, a roof.

**khrū* (masc. khar), a she-ass.

**shīw*, night.

But the following is masculine:—
wangū, a certain poisonous insect,

and the following are of common gender:—

lēwū, a wolf (48, 4; 229, 14).

gurū, a kid (48, 5).

iii. Number.

9. There are two numbers,—singular and plural. The following are the rules for the formation of the plural from the singular. They are based on those given by Ghulām Muhammad Khān, but considerable additions have been made:—

(1) Nouns ending in a consonant add i. Thus:-

Singular.

Plural.

dand, a pool in a river, gap, a stone,

 $\frac{dand\bar{i}}{dand\bar{i}} (52, 8).$ $\frac{dand\bar{i}}{dan\bar{i}} (52, 9).$

And so hundreds of others. Dissyllabic nouns ending in a followed by a single consonant generally drop the a in the plural, as in vidar, a jackal, pl. vidri (230, 2). Compare, however, No. 7, below. The word mekh, a locust, does not take i. Its plural is mekh (234, 14).

(2) Nouns ending in a also generally add i. Thus:

būmm^a, the ground,
dūb^a, a water-hole,
kund^a, a widow,
w^an^a, a tree,

 $b\bar{u}mm^a\bar{i}$ (51, 6; 53, 3). $d\bar{u}b^a\bar{i}$ (51, 6; 218, 3). $kund^a\bar{i}$ (260, 7). $w^an^a\bar{i}$, or $w^ann^a\bar{i}$ (51, 6; 53, 4).

But many of these nouns drop the final * before the i. Those noted by me are the following:—

bāṇa, an eye lash,
bāṣḥa, a sparrow-hawk,
dōpyāza, a kind of stew,
dra, a hair,
dūwa, a daughter,
girgiṣḥa, a centipede,
kharbūza, a musk-melon,
kanda, a water-course,
kaṇa-wragha, a kind of crow,
lōṛa, a torrent,
mirga, a sparrow,
but tāk-mirga, a wagtail,
mēwa, a fruit,

bāṇī (247, 9).

bāṣḥī (231, 13).

dōpyāzī (222, 3).

drī (245, 6; 247, 11).

dūwī (No. 115 in List of Words).

girgiṣḥī (234, 10).

kharbūzī (224, 3).

kandī (218, 2).

kaṇ²-wraghī (232, 3).

lōṛī (218, 7).

mirgī (232, 6).

tāk-mirdzī (232, 13).

mēwī (51, 3; 53, 3).

```
Singular.
                                                              Plural.
                 nāwa, a hill valley,
                                                          n\bar{a}w\bar{\imath} (220, 3).
                 parora, rice-straw,
                                                          parōrī (223, 13).
                 pūw, hollow ground,
                                                          p\bar{u}w\bar{\iota} (220, 4).
                 wrūdza, an eyebrow,
                                                          wr\bar{u}dz\bar{\iota} (247, 11).
                 uza, a nanny-goat,
                                                           wz\bar{\iota} (228, 7).
      So all feminine nouns in \bar{\imath}y^a.
                                         Thus:-
                 batkīya, a wild duck,
                                                           batk\bar{\imath}y\bar{\imath} (233, 4).
                 dodiya, maize bread,
                                                           dōdīyī (221, 12).
                 kharkhūntīy°, an ass's colt (fem.),
                                                           kharkhūnţīyī (51, 8; 52, 5).
                 kablīya, a female fawn,
                                                           kabl\bar{\imath}y\bar{\imath} (230, 13).
                 kilīya, a field-bed,
                                                           kil\bar{\imath}y\bar{\imath} (219, 5).
                 wrīya, a ewe-lamb,
                                                           wriyi (227, 15).
 and many others. See also No. 9 for further examples.
            but wrīy*, a kind of food,
                                                          wr^{a}i (222, 7).
       (3) Nouns ending in \bar{a} change the \bar{a} to a\bar{i}. Thus:—
                 buzwā, a spider,
                                                          buzwaī (235, 9).
                 baurā, a humble bee,
                                                           bauraī (235, 15).
                 sirwā, soup,
                                                          sirwaī (53, 6).
 and others.
                Marzā, a brother, is irregular. See No. 10, below.
      (4) Nouns ending in \bar{i} or \bar{e} do not change for the plural. Thus:—
                 grī, a mountain,
                                                          gri (51, 2, 11).
                 khaī, a field,
                                                          khaī (51, 13).
                pie, a father,
                                                          piē (No. 106 in List of Words).
 and others. Exceptions are ādmī, a man, and a few others, which are given below,
 under head 8. Also charmashkī, a chameleon, pl. charmashkaī (47, 11; 234, 11), and
myāsī, a mosquito, pl. myāsaī (235, 6).
       (5) I have noted four nouns in \bar{u}. Their plurals are made as follows:—
                gurū, a kid,
                                                          guraī (228, 6).
                 shīnwū, spinach,
                                                          shīnwaī (222, 6).
                 khrū, a jenny ass,
                                                          kharī (227, 5).
                 lēwū, a wolf,
                                                          l\bar{e}w\bar{u}\bar{\imath} (229, 14). See also No. 8, below.
      (6) Most nouns in ai change it to aī in the plural. Thus:
                ghūndai, a hillock,
                                                          ghūndaī (52, 1).
                lashtai, a drain,
                                                          lashtaī (51, 14).
                narai, a mountain pass,
                                                          naraī (51, 15).
                sarai, a man,
                                                          saraī (225, 14).
and others.
               Note:
                ghrai, a precipice,
                                                         ghr^{a}i (220, 7).
      Some of these nouns do not change in the plural. Those noted are the follow-
ing:-
                ghōlai, a courtyard,
                                                          ghōlai (220, 9).
                k^a lai, a village,
                                                          k^{a}lai (51, 12).
     VOL. X.
                                                                                             т 2
```

i

Singular.

kand-ghōlai, a chasm,

karbōṛai, a kind of lizard,

lyirai, a lamb,

milkhai, a kind of locust,

pēchūmai, the slope up a mountain,

z²ṇai, a young man,

Plural.

kand-ghōlai (218, 4).

karbōṛai (234, 12).

lyirai (227, 14).

milkhai (234, 15).

pēchūmai (51, 4, 12).

z²ṇai, a young man,

z²ṇai (226, 8).

(7) A long \bar{a} before a final consonant is usually shortened, and in such cases the final consonant is generally doubled. Probably the doubling occurs in every case; but, in Ghulām Muḥammad Khān's book, the mark $tashd\bar{\imath}d$ is used very capriciously. In the following examples, I have doubled the consonants only in those cases in which he has marked $tashd\bar{\imath}d:$ —

```
biyān, a colt,
                                                     biyan\bar{i} (227, 2).
           b\bar{a}z, a falcon,
                                                     baz\bar{\imath} (231, 12).
           bāzār, a market,
                                                     bāzarrī (220, 15).
           dodzār, maize,
                                                     d\bar{o}dzarr\bar{\iota} (223, 3).
           dēgdān, a fireplace,
                                                     dēgdaunī (220, 8).
           dökāu, a shop,
                                                     dōkannī (221, 2).
           dālān, a vestibule,
                                                     dālannī (220, 6).
           daryāb, a river,
                                                     daryabbī (218, 10).
           dīwāl, a wall,
                                                     dīwallī (220, 10).
           dzawāu, a youth,
                                                     dzwanī (226, 9).
           ghāv, a cave,
                                                     gharr\bar{\imath} (53, 8).
           kubūb, roasted meat,
                                                     kababb\bar{\imath} (148, 9).
           kirwās, a kind of lizard,
                                                     kirwasī (234, 8).
           kitāb, a book,
                                                     kitabbī (148, 9).
           kwalan, a son,
                                                     kwalanni (243, 6).
           maindan, a plam,
                                                     maindanī (53, 7).
           mar, flour,
                                                     marri (223, 9).
           murghān, a bird,
                                                     murghanī (233, 7).
           nādāu, a fool,
                                                     nādannī (144, 1).
           shuan, a kingerow,
                                                     shwanī (232, 11).
           tand, the stalk of Indian corn,
                                                     tandi (223, 14).
           zgān, the division of a field,
                                                     zgannī (219, 4).
           zurghāt, curdled milk,
                                                    zurghattī (225, 3).
Similarly rāt, a road,
                                                    raī (221, 4; 252, 13; 255, 1; 258, 9).
           srāi, a caravansarai,
                                                    sraī (220, 11).
```

Under head 1 it was stated that dissyllabic nouns ending in a followed by a single consonant generally drop the a in the plural. In the following words, however, the a is retained, and the consonant is doubled, as in the above examples:—

```
kamar, a precipice, kamarrī (219, 11).
matat, an apricot, matattī (224, 5).
rīdzan. rier, rīdzannī (222, 11).
```

```
Similarly, we have:

Singular.

w^a n^a, a tree,

khit, a sheet,

w^a n^a i \text{ or } w^a n^a i \text{ (217, 8)}. See No. 2.

khit i \text{ (238, 15)}.
```

When the final consonant is preceded by some long vowel other than \tilde{a} , this vowel undergoes changes, and the consonant is generally doubled. The following are the examples I have collected of such cases:—

```
injīr, a fig,
                                                 inj^a r\bar{\iota} (224, 4).
     bor, a kind of soup,
                                                 barri(222, 4).
     gön, a stick,
                                                 gannī (53, 11; 224, 11).
                                                 mangarī (230, 7).
     mangor, a snake,
     möt, vetch,
                                                 mați (223, 10).
                                                 panī (221, 6).
     pon, an upper terrace,
                                                 tsam\bar{\imath} (245, 3; 245, 2).
     tsom, an eye,
     shol, paddy,
                                                 shil\bar{\imath} (223, 4).
                                                 sh\bar{e}r\bar{\imath} (53, 9).
     shor, a city,
     syūgh, a grape,
                                                 saghī (53, 10).
but syūgh, a mother-in-law,
                                                 saghadī (224, 1).
     zēsk, a thorn,
                                                 zashshi (258, 9).
```

(8) Some words form the plural by adding anni or ganni. Those noted are:—

```
      ādmī, a man,
      ādamyannī (54, 10; 226, 5).

      hātī, an elephant,
      hātyannī (54, 11; 229, 3).

      lēwū or lēwa, a wolf,
      lēwūī or lēwyannī (54, 12; 229, 14).

      māhī, a fish,
      māhīgannī (234, 2).

      pērai, a demon,
      pēriyannī (260, 12).

      tūtī, a parrot,
      tūtyannī (54, 11; 233, 13).
```

(9) A final k becomes ch in the plural. Thus:—

```
ispēk, barley,
                                       ispichī (223, 2).
chauk, the yard of a village
                                       chauchī (220, 13).
     guest-house,
gilak, a rat,
                                       gilachchī (234, 7).
hanwalk, an egg,
                                       hēnlchī (222, 14).
kuch-mayak, a crab,
                                       kuch-mayachī (234, 4).
kwalanak, a boy,
                                       kwalanachi (226, 7).
mizdik, a mosque,
                                       mizdichī (54, 5).
                                       pischī (225, 4).
pisk, butter,
                                       pīkachī (225, 6).
pīkak, tyre,
pandūk, a pomegranate,
                                       pandūchī (223, 15).
                                       sanchī (51, 3; 54, 3; 217, 5).
sank, a rock,
spuk, a dog,
                                       spuchī (229, 5).
shak, a flea,
                                       strachī (235, 7).
tāk, a mountain torrent,
                                       tachi (with short a) (54, 4).
tsarwök, a goat or sheep,
                                      tsarwēchī (228, 8) (cf. No. 7).
watk, a walnut,
                                      watchi (224, 7).
```

```
Singular.
                                                                  Plural,
              wark, an insect,
                                                      warchi (224, 8).
               zwagh*k, a certain kernel,
                                                      zwagh*chī (225, 10).
     The only exception that I have noted is:—
              pingrak, a moth,
                                                      pingṛakī (235, 12).
     So, also, when a noun ends in k^*, the k becomes ch. Thus:—
              dūka, a girl,
                                                      dückī (226, 11).
              gāk, flesh;
                                                      gāchī (222, 12).
              kulanka, a kitten,
                                                      kulanchī (229, 9).
              parashka, a swallow,
                                                      prēshchī (232, 7).
    If a noun ends in g, the g becomes dz in the plural. The same is the case with
some nouns in g^* and in gh. Thus:—
              lwang, the slope down a hill,
                                                      lwandzī (219, 14).
              mrīk or mrīg, a slave,
                                                      mradzī (I, 12).
              ping, a cock,
                                                      pīndzī, or pindzī (54, 6).
              pröng, a leopard,
                                                      prandzī (229, 12).
              kṛāga, a hyena,
                                                      kṛātsī (sic, ? kṛādzī) (230, 6).
              tāk-mirg, a wagtail,
                                                      t\bar{a}k-mirdz\bar{i} (232, 13).
          but mirg, a sparrow,
                                                      mirg\bar{i} (232, 6) (cf. No. 2),
              krāgh, a crow,
                                                      kradzi (54, 7).
                                                      maryūdzī (234, 3).
              maryūgh, a frog,
    Finally, we have:—
              tsāts, a kind of partridge,
                                                      tsachī (54, 8).
    (10) The following come under none of the foregoing rules:—
                                                      chiai (221, 5).
              chīw, a roof,
                                                      chīwī (218, 9), (No. 1).
          but chiw, a mountain cave,
                                                      gawī (227, 8) or gwāī (No. 114 in-
              giyōy, a cow,
                                                           List of Words).
                                                      marzawi (242, 15).
              marzā, a brother,
              skhwandir, a heifer,
                                                      skhwandir^{a}\bar{i} (227, 12).
              syūgh, a mother-in-law,
                                                      saghadī (224, 1).
                                                      saghī (53, 10), (No. 7).
         but syūgh, a grape,
              tsalyēr, a water-hole,
                                                      tsalyarai (219, 9).
                                                      ts\bar{e}n\bar{i} (59, 1; 249, 13, 14).
              tsan, a year,
                                                      zark\bar{\imath} (226, 2) or z\bar{e}l\bar{\imath} (171, 12; 172,
              zarka, a woman,
```

iv. Case.

1).

10. The Ormuri noun does not change for case. There is nothing corresponding to the oblique case of Paṣḥtō or Balōchī. The only change undergone is that of number. The relations of case are indicated by the use of prepositions. Further refinements are indicated by the aid of postpositions used in conjunction with the prepositions. The accusative and agent cases are the same in form as the nominative. If it happens that

it is necessary to distinguish between the subject and the direct object of a sentence, this is done by the aid of special particles, as will be explained under the head of syntax. The use of these particles cannot be classed as a method of declension, as they do not indicate case.

If we consider that an unaltered noun governed by a preposition is in a certain case, we may say that (excluding the nominative, agent, and accusative) the Ormuri noun has three cases, viz. an Instrumental (not an Agent) formed by the preposition pa, a genitive formed by the preposition ta, and an on-Locative formed by the preposition i or $k\bar{u}$. In the Locative, $k\bar{u}$ is used before proper names of persons and before substantive pronouns indicating persons, and i before all other nouns substantive and before all other pronouns (p. 131, 8). Another form of $k\bar{u}$ is ku.

A Vocative (148, 11ff.) is formed by adding a or \bar{a} to masculine nouns and i or \bar{e} to feminine nouns, before which a final a is dropped. To this an interjection, such as $w\bar{o}$, O! may be prefixed. Thus, from $Khud\bar{a}\bar{e}$, God, we have $w\bar{o}$ $Khud\bar{a}\bar{e}$ -a or $w\bar{o}$ $Khud\bar{a}\bar{e}$ - \bar{a} , O God!; and from $d\bar{u}k^a$, a girl, $w\bar{o}$ $d\bar{u}ki$ or $w\bar{o}$ $d\bar{u}k\bar{e}$, O girl! When a word ends in \bar{a} or \bar{u} , no termination is added, as in $w\bar{o}$ $Mul\bar{a}$, O Mul \bar{a} ; $w\bar{o}$ $Hind\bar{u}$.

11. We thus get the following declension of sarai, a man.

Singular.

Nom. sarai, a man.

Instr. pa-sarai, by a man.

Gen. ta-sarai, of a man.

Loc. i-sarai, on a man.

Plural.

saraī, men.

pa-saraī, by men.

ta-saraī, of men.

i-saraī, on men.

Voc. vo saraia or wo saraia, O man! wo saraia or wo saraia, O men!

As an example of the declension of a proper name, we have:-

Singular.

Nom. 'Abdullāh, 'Abdullāh.

Instr. pa-'Abdullāh, by 'Abdullāh.

Gen. ta-'Abdullāh, of 'Abdullāh.

Loc. kū- (or ku)-'Abdullāh, on 'Abdullāh.

Voc. wō 'Abdullāha or wō 'Abdullāhā, O 'Abdullāh.

As an example of a feminine noun, we take $d\bar{u}k^a$, a girl.

Singular. Plural.

Nom. $d\bar{u}k^a$, a girl. $d\bar{u}ch\bar{\imath}$, girls.

Instr. pa- $d\bar{u}k^a$, by a girl. pa- $d\bar{u}ch\bar{\imath}$, by girls.

Gen. ta- $d\bar{u}k^a$, of a girl. ta- $d\bar{u}ch\bar{\imath}$, of girls.

Loc. i- $d\bar{u}k^a$, on a girl. i- $d\bar{u}ch\bar{\imath}$, on girls.

Voc. wō dūki or wō dūkē, O girl! wō dūchīi or wō dūchīe, O girls!

12. Other case-relations are indicated by postpositions. Every postposition governs either the genitive or the locative case.

Five postpositions govern the genitive case. The two most important of these are $p\bar{a}r^a$, for, and $in\bar{e}l^a$, in possession (of). Thus, ta-sarai $p\bar{a}r^a$, for a man; ta-sarai $in\bar{e}l^a$, in possession of a man.

The following postpositions govern the locative case:-

 $lik\bar{i}$, to, as in *i-saṛai likī*, to a man. $k\bar{i}$, to, as in *i-saṛai kī*, to a man.

lāst*, from, as in i-sarai lāst*, from a man. The syllable dī is often used pleon-astically with this, a-zlī dī i-ḥirṣ lāst* khālī kēw*n, make the heart free from greed.

inar, in, as in i-sarai inar, in a man.

izar, on, as in i-sarai izar, on a man; i.e. the same in meaning as i-sarai.

ta-mīnak or ta-mīnshak, up to, as in i-sarai ta-mīnak (or -mīnshak), up to aman.

gad, girad, or girgad, with, together with, as in i-sarai gad (or girad or girgad), with a man.

A full account of all these will be found in the sections dealing with postpositions (§§ 81ff.).

Note.—As already stated, the agent case is the same as the nominative. It is used, as in Pashtō, to indicate the subject of a transitive verb in a tense formed from the past participle. The verb in such cases agrees with the direct object, being really construed passively. Thus, a-saṛai ā nōṛī khwālk, the man ate bread, literally, by the man bread was eaten. As the direct object, nōṛī, is feminine, the verb khwālk (masculine, khwalak) is put into the feminine to agree with it.

On the other hand, the speakers of Ormurī appear to have lost all sense of the existence of the agent case, and I shall in future abandon all reference to it. What matters
to a speaker of the language is whether a noun is the subject or direct object of a sentence, and, as we shall see, he has many ways of distinguishing them. In employing
such devices, the fact that the subject is in the nominative or in the agent case makesno difference to him. It will hence be simplest to consider henceforth that the subject
of any verb, in whatever tense, is in the nominative case, but that if the verb is transitive, and is in a tense derived from the past participle, it then agrees with the directobject (which is also in the nominative case), and not with the subject. This course willtherefore be adopted in the following pages.

¹ As will be explained under the head of syntax. The syllable as here indicates that nors, and not sarai, is the object.

CHAPTER III.

ADJECTIVES.

13. Adjectives (30ff.) agree with the qualified noun in gender and number. They generally have special forms for the feminine singular and for the plural is always the same for both genders.

Some adjectives are immutable, i.e. they do not change for gender or number. Such are the following:—

```
ārat, wide (252, 13).

ghandz, bad (Nos. 129, 131, in List of Words).

khir, drab-coloured (31, 12).

land, short (31, 13).

plan, wide (31, 14).

stir, weary (239, 12).

tōk, hot (31, 14).
```

Thus, khir sarai, a drab-coloured man; khir zark*, a drab-coloured woman; land sarai, a short man; land zark*, a short woman.

For other adjectives, the feminine is formed as in the case of substantives, and ends in . Thus, $sp\bar{\imath}w$, white, fem. $sp\bar{\imath}w^{\circ}$ (31, 4): zwandai, alive, fem. $zwand\bar{\imath}y^{\circ}$ (242, 12, 13). 14. The plural is formed in one of two ways.

(1) With some adjectives, the plural is the same as the feminine singular. Thus:—

```
Masculine Singular.
                                      Feminine Singular.
                                                                      Plural.
ghūn, hidden,
                                ghūn°,
                                                              gh\bar{u}n^{a} (178, 8; 241, 10).
shīn, green,
                                shīno,
                                                             shīn* (171, 8).
spiw, white,
                                spīwa,
                                                              spiw^{s} (31, 4).
                                sir* (256, 8), or (usually) sir*, sr* (257, 9).
sir, good,
                                    sra (257, 11),
sush, red,
                                                              sush^a (31, 5).
                                 sūsha,
ziyar, yellow,
                                ziyara,
                                                              ziyar* (41, 12; 260, 4).
```

(2) Other adjectives form their plurals according to the rules for forming the plurals of substantives. Thus:—

```
Masculine Singular.
                                                 Feminine Singular.
                                                                                      Plural.
      bragai, spotted,
                                           bragīy°,
                                                                            bragaī (31, 9).
      ghrās, black,
                                           ghrāso,
                                                                            ghr\bar{e}s\bar{\imath} (31, 8).
      hond, blind,
                                           hŏnda,
                                                                            h\bar{e}nd\bar{i} (241, 6, 7).
      razghūn, green,
                                           razghūna,
                                                                            razgh\bar{u}n\bar{\imath} (31, 9).
      zāl, old,
                                           z\bar{a}l^{a} (49, 10; 253, 14),
                                                                            z\bar{e}l\bar{i} (226, 10).
Irregular is:-
      huṣḥyār, clever,
                                           hushyarrī (240, 1),
                                                                             hushyarrī (144, 1).
```

The above rules do not apply to past participles. These will be dealt with under the proper head. Here it will suffice to say that their feminines are formed under entirely different rules, and that the plural is the same as the feminine singular.

VOL. X.

15. Comparison.—The adjective has no comparative or superlative degree. Comparison is made as in India with the help of the postposition last* or last* dī, meaning Thus:-

> ustād aī i-piē lāsta ziyāt giņan, consider (i.e. honour) a teacher more than a father (139, 1).

 $h\bar{o}$ $d\bar{i}$ i-f° $l\bar{a}st^{a}$ plan $h\bar{a}$, this is wider than that (252, 1).

i-shustak lāsto dī a-sabr sir hā, patience is better than weeping (139, 4).

For the superlative we have:—

i-harr $l\bar{a}st^a$ $d\bar{i}$ sir $h\bar{a}$, it is better than all, i.e. it is the best (34, 4).

Or we may use inar, in, among, instead of last, as in :-

hā giyōy aī i-harra inar ghwa! hā, this cow is fat among all, i.e. is the fattest of

i-sir inar at sir ha, amongst good (things) it is good, i.e. it is the best (34, 5). Or we may use dzut, very, as in dzut sir hā, it is very good, i.e. it is the best (34, 3).

16. Numerals.—The following are the numerals. The ordinals are given up to the twelfth. The cardinals are more complete.

Cardinals (pp. 35ff.).

Ordinals (p. 38).

1. $s\tilde{o}$ or s^a (263, 10; 241, 1) (often—e.g. 151, 13 written ...), fem. syî (? saî, see next page).

2. dyō.

3. shē.

1. tsār.

5. pēndz.

6. sh'h.

7. hō.

S. hansht.

9. $n^{a}h$.

10. dus.

11. sandas.

12. dwas.

13. shēs.

14. tsurēs.

15. pandzēs.

16. shuwes.

17. awēs.

18. ashtēs.

19. unës.

20. jīstū.

21. sō-jīstū.

22. dū-jīstū.

23. shīw-jīstū

24. tsarī-jīstū.

25. panjī-jīstū.

awwal or i-mukh.

dim (265, 9).

shaim.

tsār m.

pandzam.

shaham.

hōm.

hashtam.

naham.

dasam.

sandasam.

dwāsam, and so on.

Cardinals-continued.

26. shō-jīstū.

27. hō-jīstū.

28. hashti-jistü.

29. no-jīstū.

30. sķīstū.

40. tsāshtū.

50. pandzāshtū.

60. shwaishti.

70. awāī.

80. hashtāi.

Cardinals-continued.

90. nawi.

300. shē soh.

100. sū.

400. tsār soh, and so on.

200. dū sõh.

1000. zār.

The only cardinal that changes for gender is $s\bar{o}$ (37, 7), one. Thus, $s\bar{o}$ sarai, one man (37, 8); $sy\bar{i}^1zark^2$, one woman (37, 8); but s,h^2h sarai, six men (37, 10); s,h^2h zēlī, six women (37, 10). Sō is often used as an indefinite article, see § 6. It has a plural, $sy\bar{i}$, used with $ts\bar{o}n$, some, to mean 'several,' like the Hindî $ka\bar{i}$ $\bar{e}k$ (30, 5).

The ordinals do not change for gender (38, 7).

The syllable gad added to a cardinal numeral makes it definite (37, 11). Thus, $dy\bar{o}$ -gad or $d\bar{u}$ -gad, the two, both; $s\dot{r}\bar{e}$ -gad, the three; $p\bar{e}ndz$ -gad, the five; $s\bar{u}$ -gad, the hundred; $z\bar{a}r$ -gad, the thousand.

The only fractional number is $n\bar{i}m$, half (37, 5). Other fractions are indicated by the word $bakhr^a$, a share. Thus, $shaim bakhr^a$, a third (38, 8).

A half added is indicated by suffixing $n\bar{\imath}m$ (38, 10), before which wa is generally, but not necessarily, added to a numeral ending in a vowel or h. Thus, $s\bar{o}$ $n\bar{\imath}m$, one and a half; $dy\bar{o}$ wa $n\bar{\imath}m$, or $dy\bar{o}$ $n\bar{\imath}m$ (List, No. 215), two and a half; $s\dot{h}\bar{e}$ wa $n\bar{\imath}m$, three and a half; $ts\bar{a}r$ $n\bar{\imath}m$, four and a half; $s\dot{h}^{a}h$ wa $n\bar{\imath}m$, six and a half, and so on.

¹ This word is nowhere clearly written in Ghulām Muḥammad Khān's book. It should perhaps be read sat. What is written is either مندي or مندي a few lines lower down.

WOL. X.

CHAPTER IV.

PRONOUNS.

17. The first two personal pronouns (20, 9ff.) are az (sometimes found as haz), I, and $t\bar{u}$, thou. The plural of az is $m\bar{a}kh$, we, and of $t\bar{u}$ is $ty\bar{u}s$ or $ty\bar{u}z$, ye. As these pronouns refer only to persons, they always employ the preposition $k\bar{u}$ or ku, instead of i, to form the locative (see § 10) (130, 8). Moreover, whenever az is governed by a preposition it is changed to mun in the singular (20, 9). It does not change in the plural nor does $t\bar{u}$ change in either number. The usual preposition of the genitive is ta, but with these two pronouns it is tar. Thus, tar-mun, of me, my; tar- $m\bar{a}kh$, of us, our; tar- $t\bar{u}$, of thee, thy; tar- $ty\bar{u}s$, of you, your (20, 12; 147, 6). The following, therefore, is the declension of these two pronouns:—

Sing.

Nom. az or haz (No. 14 in List of Words), I. $t\bar{u}$, thou. Instr. pa-mun, by me. pa- $t\bar{u}$, by thee. Gen. tar-mun, of me, my. tar- $t\bar{u}$, of thee, thy. Loc. $k\bar{u}$ -mun, on me. $k\bar{u}$ - $t\bar{u}$, on thee.

Plur.

18. For the pronoun of the third person (16, 10ff.), the demonstrative pronoun $haf\bar{o}$, $af\bar{o}$, haf^a , or af^a , is used to mean 'he,' 'she,' or 'it.' When referring to a woman or to a feminine thing, $haf\bar{o}$ and $af\bar{o}$ are not used, so that the feminine is haf^a or af^a , she or it (fem.). The plural is $hafa\bar{i}$, or $afa\bar{i}$, which is of common gender. When governed by a preposition, this pronoun drops the initial ha or a, as in paf^a , by him or by her; $pafa\bar{i}$, by them (19, 6; 129, 9). In the case of this pronoun the preposition of the genitive is the usual ta, not the tar used with the first and second persons. The preposition of the locative is $k\bar{u}$ or ku when referring to persons, and i when not referring to persons.

The following therefore is the declension of this pronoun when referring to persons (pp. 16ff.):—

Masculine.

Feminine.

Sing.

Nom. $haf\bar{o}$, $af\bar{o}$, haf^* (24, 2; 157, 6; haf^* or af^* , she. 175, 2; 180, 14; 254, 6), or af^* (177, 5), he.

Instr. $pa-f\bar{o}$ or $pa-f^*$, by him. $pa-f^*$, by her. Gen. $ta-f\bar{o}$ (238, 7), $ta-f^*$ (244, 3), $ta-f^*$ (238, 5, 6), of her, hers. of him, his.

Loc. $k\bar{u}-f\bar{o}$, $k\bar{u}-f^*$, on him. $k\bar{u}-f^*$, on her.

Common gender.

Plur.

Nom. hafaī or afaī, they. Instr. pa-faī, by them. Gen. ta-faī, of them.

Loc. $k\bar{u}$ -fa \bar{i} , on them.

When this pronoun does not refer to a person, it is thus declined. The only difference is in the locative. Thus:—

Masculine.

Feminine.

Sing.

Nom. $haf\bar{o}$, $af\bar{o}$, haf, or af, it. Instr. $pa-f\bar{o}$, ta-f, by it. Gen. $ta-f\bar{o}$, ta-f, of it. Loc. $i-f\bar{o}$, i-f, on it.

pa-f , by it.
 ta-f , of it.
 i-f , on it.

haf or af a, it.

Common gender.

Plur.

Nom. hafaī or afaī, they. Instr. pa-faī, by them. Gen. ta-faī, of them. Loc. i-faī, on them.

In the plural, instead of hafaī, afaī, and faī, we sometimes have hafāī, afāī, or fāī.

With all these pronouns, the ordinary postpositions can, of course, be used. Thus, kū-mūn lāsta, from me.

19. Contracted Pronouns.—As in Pashtō, there is a series of contracted forms of the Personal Pronouns (124, 2ff.; 132, 2ff.). They represent the dative and locative cases, and also, in the third person, the ablative. Each is both singular and plural. They are as follows:—

First Person. Second Person.

hir or ri. to me. to dal. to thee. to vo.

Third Person.

Dat. hir or ri, to me, to dal, to thee, to you.

us.

hal, to him, to her, to it, to them.

Loc. di or da (133, 10), in di or da (133, 10), in or on or on me, in or on thee, in or on you.

wi or wa (133, 11) or (often after a consonant) a, in or on him, her, it, or them.

Abl.

di, from him, her, it, or them.

Of the above, ri and dal correspond to the Paṣḥtō $r\bar{a}$ and dar, respectively. When hir or hal is not the first word in a sentence, it drops the h and is attached as an enclitic to the preceding word, the final consonant of which is doubled (124, 14). Thus, ts^an hir, today to me, becomes ts^ann -ir, and ts^an hal, today to him, becomes ts^ann -al. After a word ending in a vowel, not only is the h dropped, but also the vowel of hir and hal. Thus, $h\bar{o}$ hir, this to me, becomes $h\bar{o}$ -r (152, 9), and i- $d\bar{e}r^a$ $l\bar{a}st^a$ hal, from the camp to him, becomes i- $d\bar{e}r^a$ $l\bar{a}st^a$ -l (135, 12). The locative form wa, in or on him, etc., drops the w after a consonant. Thus, $t\bar{u}$ -wa (134, 9), thou in him, but az-a (134, 10), I in him. The other contracted pronouns do not change.

These pronouns are used in many idiomatic senses, which will be explained in the section dealing with syntax. As examples of the simplest method of their use, we have :—

hir ghwats or ri ghwats, say to me (124, 10).

dal bū ghwats^am, I say to thee (id.).

hal ghwats, say to him (id.).

 $di h\bar{a}$, it is on me, or on thee (133, 7).

wi byōk, it was on him (133, 2).

hir $d\bar{\imath}$ $dz\bar{o}k$, he came to me from him (136, 2).

- 20. Pronominal Suffixes.—Ōrmurī employs pronominal suffixes as freely as Pashtō. There are four sets, which are used as follows:—
- (a) Those used to indicate the subject of an intransitive verb in a tense formed from the past participle. They are by origin suffixes of the nominative. They are as follows (17, 8):—

am or (after a vowel) m, I.

yēn, we.

a or ē, thou.

aī, ye.

..., he, she, it.

in or en, they.

There is no suffix for the third person singular. Thus, to take the past tense $by\bar{o}k$, was, plural buk, were, we get (105, 6):—

byök-am, I was.

buk-yēn, we were.

byōk-a or byōk-ē, thou wast.

buk-aī, ye were.

byōk, he was.

buk-in or buk-en, they were.

The same suffixes are also used to indicate the object of a transitive verb in a tense formed from the past participle. The object in such a case is, of course, by origin a nominative, thus, khwalak-am, ate me, is literally 'I was eaten.' But in Örmuri, as has been explained in § 12, Note, it is most convenient to omit consideration of the original meaning, and to treat the subject, in the agent case, as a nominative, and the object as an accusative. The following are examples of this use of this group of suffixes. The verb used is khwalak, ate, plural khwālk, and it agrees in gender and number with the object. The examples are all in the masculine (17, 10; 77, 8ff.):—

khwalak-am, ate me.

khwālk-yēn, ate us.

khwalak-a or khwalak-ē, ate thee.

khwālk-aī, ate you.

khwalak, ate him.

khwālk-in or khwālk-ēn, ate them.

(b) The suffixes used to indicate the object of a transitive verb in a tense not formed from the past participle. These, on the other hand, represent an original accusative. They are as follows (18, 3, 5; 111, 12):—

am or (after a vowel) m, me.

an or (after a vowel) n, us.

at or (after a vowel) t, thee.

an or (after a vowel) n, you.

wa or (after a consonant) a, him, her, it. wa or (after a consonant) a, them.

The following are examples of these suffixes:—

From khura, he may eat, khura-m, he may eat me; khura-n, he may eat us or you. From khuram, I may eat, khuram-an, I may eat you; khuram-a, I may eat him or them. From khurī, thou mayst eat, khurī-wa, thou mayst eat him or them. Occasionally we find wa or awa used after a consonant (18, 11; 137, 10), e.g. khuram-wa or khuram-awa instead of khuram-a.

(c) The suffixes used to indicate the subject of a transitive verb in a tense formed from the past participle. These are by origin suffixes of the agent case, but are here treated as suffixes of the nominative. They are as follows (18, 3; 111, 9):—

```
am or (after a vowel) m, I.

at or (after a vowel) t, thou.

wa or (after a consonant) a or (after a vowel) n, you.

a consonant and before a vowel)

"w, he, she, it.

an or (after a vowel) n, you.

an or (after a vowel) n, they.
```

It will be noted that this differs from set (b) only in the third person plural. Examples are:—

khwalak-am, I ate.

khwalak-an, we ate, you ate, or they ate.

khwalak-at, thou atest.

khwalak-a, he ate.

Occasionally we find wa used after a consonant, as in khwalak-wa instead of khwalak-a (18, 8).

Note.—In all the above examples, the suffixes are appended to the verb, but their connexion with the verb is very loose, and we often find them attached to some other member of the sentence. Thus, in pa tur^a -wa $s\bar{u}$ wazn (137, 8), thou wilt slay him with the sword, the wa, meaning 'him,' is suffixed to the word $t\bar{u}r^a$, sword, and not to the verb $s\bar{u}$ wazn, thou wilt slay. This will be fully dealt with in the syntax.

Note also that there are no suffixes used to indicate the subject of any verb in any tense not formed from the past participle. In such cases, the termination of the verb is of itself sufficient to indicate the person.

If in the case of a transitive verb in one of the tenses formed from the past participle, it is desired to indicate both the subject and the object, both suffixes may be used at the same time. A suffix of group (c) is first added to indicate the subject, and then a suffix of group (a) to indicate the object. A few examples of this are here given. A more complete paradigm will be given under the head of verbs (§ 47). Examples are:—

khwalak-at, thou atest; khwalak-at-am, thou atest me.

khwalak-am, I ate; khwalak-am-a or khwalak-am-ē, I ate thee.

khwalak-a, he ate; khwalak-w-am, he ate me.

khwālk-a, he ate (with a plural object); khwālk-w-in or khwālk-w-ēn, he ate them.

In the last two examples, note that the suffix a becomes "w after a consonant and before a vowel.

(d) The suffixes used to indicate the genitive case. These are added to nouns substantive, not to verbs. They are the same as those given under head (c) (18, 11; 148, 7). Examples are:—

a-kitāb, the book; a-kitāb-am, the book of me, i.e. my book; a-kitāb-at, thy book; a-kitāb-a, his book; a-kitāb-an, our book, your book, or their book.

a-kitabbī, the books; a-kitabbī-m, my books; a-kitabbī-t, thy books; a-kitabbī-wa, his books; a-kitabbī-n, our, your, or their books.

When a word ends in a long \bar{i} , as in the above plurals and also occasionally in the singular, the \bar{i} may optionally be shortened to i before these suffixes, so that we may

also have a-kitabbi-m, a-kitabbi-t (247, 3), a-kitabbi-wa, and a-kitabbi-n. Similarly, from zlī, the heart, we have zli-m, my heart (253, 10).

Occasionally the suffix represents some case other than the genitive, as in khwash-am, pleasing to me (249, 15), where it represents the dative.

- 21. The Reflexive Pronoun.—The reflexive pronoun is khwai, own, equivalent to the Hindī $apn\bar{a}$ (21, 1). It does not change in declension. Thus, $khwai y\bar{a}nsp$, one's own horse (147, 11); $tar \ mun \ khwai \ \bar{u}sh \ by\bar{o}k$, it was my own camel (250, 5); $h\bar{o}$ $kulanak \ a-khwai \ sabaq \ y\bar{a}d \ d\bar{o}k \ h\bar{a}$, this boy has remembered his lesson (254, 12). From the last example we see that khwai, like the Hindōstānī $apn\bar{a}$, refers to the subject of the sentence. For 'self' (Hindī $\bar{a}p$), the expression $a-khwai \ dz\bar{a}n$, one's own soul, is employed, as in $a-khwai \ dz\bar{a}n-a \ khal\bar{a}s \ d\bar{o}k$, his own soul-he (-a) released made, i.e. he released himself (256, 15). Or $khwai \ may$ be omitted, as in $a-dz\bar{a}n-a \ l\bar{u}t \ d\bar{o}k$, he robbed himself (252, 6). Equivalent to the Hindī $\bar{a}pas-m\tilde{e}$, we have $i \ khwai \ inar$, mutually (21, 5; 141, 9). The phrase $(ha)l \ ts^{\bar{s}}\bar{e}k$ means 'he went away,' and pa $khwai-l \ ts^{\bar{s}}\bar{e}k$ is 'he went away of his own accord,' 'he went himself' (21, 3).
- 22. **Demonstrative Pronouns.**—There are two demonstrative pronouns, viz. $haf\bar{o}$, $af\bar{o}$, haf^a , or af^a , that, and $h\bar{o}$, \bar{o} , or $h\bar{a}$, this (21, 7).

The declension of $haf\bar{o}$, etc. has already been given under the head of personal pronouns (see § 18). As examples of its use as an adjectival demonstrative pronoun we can give $haf\bar{o}$ sarai, that man; haf^a zar k^a , that woman; $hafa\bar{i}$ sarai, those men; $hafa\bar{i}$ zēlī, those women; $if\bar{o}$ yānsp inar, on that horse; ta f^a zar k^a , of that woman; and so on. When used as a substantive demonstrative pronoun, there is no difference between it and the personal pronoun of the third person.

23. The pronoun $h\bar{o}$, $h\bar{a}$, or \bar{o} , this, has only $h\bar{a}$ or \bar{a} in the feminine singular. Its nominative plural $ha\bar{i}$ or $h\bar{a}\bar{i}$ is of common gender. It has two forms of declension (22, 6; 130, 6), (a) when it is used as a substantive referring to an animate being, and (b) when it is used as an adjective (whether referring to an animate being or not) or as a substantive referring to an inanimate being. In the former case its oblique form, used after prepositions, is r^a , plural $r^a\bar{i}$, both being of common gender (22, 6; 130, 6). In the second case, the oblique form is p^a instead of r^a (22, 3; 130, 2). The following is therefore the declension of $h\bar{o}$, when used as a substantive and referring to an animate being:—

```
Singular, common gender
                                                             Plural, common gender.
             except in the nominative.
Nom. h\bar{o} (242, 10), h\bar{a} (162, 7;
                                                     ha\bar{i} (21, 8) or h\bar{a}\bar{i}, these.
              176, 1; 244, 11; 249, 6),
              or \bar{o}; fem. h\bar{a} (244, 7, 11;
              250, 6), \bar{a}, this.
                                                     pa r^a \bar{\imath}, these.
          pa r^a, by this.
Instr.
                                                     taraī, of these.
           tara, of this.
Gen.
                                                     i raī, on these.
          i r^a, on this.
Loc.
```

The genitive is usually written as one word, as above, instead of $ta r^a$ (131, 5; 147, 9; 238, 8; 244, 11; 250, 4), $tara\bar{\imath}$ (238, 9). In the locative, if the animate being referred to is a person, then ku or $k\bar{u}$ must, as usual, be employed instead of i. Thus, $k\bar{u} r^a$, $k\bar{u} ra\bar{\imath}$ (22, 10; 130, 9).

When used as an adjective or as a substantive referring to an inanimate thing, the following is the declension:—

Singular, common gender

Plural, common gender.

except in the nominative. Nom. $h\bar{o}$ (21, 8), $h\bar{a}$, or \bar{o} ; fem.

hai or hai, these.

 $h\bar{a}, \bar{a}, \text{ this.}$

Instr. $pa p^a$, by this.

pa pai, by these.

Gen. $ta p^a$, of this (147, 8;

ta pai, of these (147, 9; 238, 11).

148, 1; 238, 10).

Loc. $i p^a$, on this.

i pai, on these.

Note.—In his grammar, Ghulām Muḥammad Khān does not mention $h\bar{a}$ as a masculine. He there confines it to the feminine. But his examples contain numerous examples of $h\bar{a}$ used as a masculine adjective. Thus:—

nāmī-m hā kār nak dōk hā, I have not done this deed at all (162, 7).

hā tar ākhṣḥai hā, this is his brother-in-law (244, 11).

hā māl aī tar-kuk hā, whose is this property? (249, 6).

 $k\bar{a}r$ and $m\bar{a}l$ are certainly masculine.

The use of $h\bar{a}$ as a masculine substantive is doubtful. See Vocabulary s.v. $h\bar{o}$ 1.

24. Relative Pronoun.—The relative pronoun is ka, who, which, what. It does not change for gender, number, or case (23, 11). Thus:—

haf's arai, ka-r $dz\bar{o}k$, $by\bar{o}k$ mullak, that man who came, had died, i.e. he died (24, 2).

afa, ka pōi bū awasa, bad kār aī bū nak ka, he, who understands, does not do a bad action (24, 3).

In the above, $r\bar{i}$, or hir (see § 19), $dz\bar{o}k$ means 'he came,' and $p\bar{o}\bar{i}$ $b\bar{u}$ awasa is the present of $p\bar{o}\bar{i}$ $agh\bar{o}k$, to understand.

haf, bū ka sir ba, t'l bū sir ba; haf, bū ka bad ba, t'l bū bad ba, he, who is (by nature) good, is always good; he, who is (by nature) bad, is always bad (151, 8, 9). hā aī, ka sr, buk, nak-a dal wrūk, thou didst not take this (woman), who was good (151, 12).

With kuk, anyone, or har kuk, everyone, ka means 'whoever'; and with ts, anything, or har ts, everything, it means 'whatever.' Thus:—

ka kukk-ir dī dza, wazn-a, whoever comes, slay him (24, 2).

har kuk aī bū ka nēk ba, i durust khalq izar aī bū sir awasa, whoever, or everyone who, is virtuous, seems good to (lit. on) just people (24, 6).

 ts^a -r $d\bar{\imath}$ $b\bar{u}$ ka w^arra , $lagaw\bar{\imath}$ -wa $b\bar{u}$, or har ts^a -r $d\bar{\imath}$ $b\bar{u}$ ka w^arra , $lagaw\bar{\imath}$ -wa $b\bar{u}$, whatever he brings, he spends it, *i.e.* he spends whatever he brings (24, 5, 6).

The interrogative pronoun $ts\bar{e}n$, what, is sometimes used as a relative, as in $ts\bar{e}n$ waqt ka $r\bar{i}$ $dz\bar{o}k$, azz-al $ghw\bar{e}k$, at what time that he came, I spoke to him, i.e. I spoke to him when he came (151,5). Here the ka is not the relative pronoun, but is the conjunction 'that.'

25. Interrogative Pronouns.—The usual interrogative pronouns are kuk, who?, which refers only to persons, and ts^a , what?, which refers to things and irrational beings.

As kuk refers only to persons, it takes ku or $k\bar{u}$, instead of i, in the locative. As in the case of the pronouns of the first and second persons, the preposition of the genitive is tar, not ta. Thus:—

kū-kuk likī bū ghwēk sa, to whom is it being said? (143, 8).

afō dī tū kū-kuk lāst şṛīyēk hā, from whom hast thou bought that? (No. 240 of List of Words).

kū-kuk lāst-wa dī wriyok, from whom did he take? (138, 9).

tar-kuk a-kwalān bū tar-tū i-pēts tsawa, whose son comes behind thee? (List, No. 239).

The neuter interrogative pronoun ts^a calls for no remarks. As an example we have:—

 $n\bar{a}m$ -at $a\bar{i}$ ts^{o} $h\bar{a}$, what is thy name? (248, 2).

Another word for 'what' is kwas. The following are examples of its use:—

Zaid kwas syōk, what has happened to Zaid? (Hindī Zaid kyā huā) (29,2).

kwas-a bū kēwī, what art thou doing to him? (29, 4).

kitāb-at kwas dok, what didst thou do with the book? (256, 4).

The word tsen is also used adjectively to mean 'what?' or 'what sort of?'. Thus:—

ta-tsēn k'lai mayā aī hā, of what village is it the flock? (259, 5).

tsen palau, in what direction? whither? (29,9; 30,1).

Interrogative pronouns are sometimes used interjectionally, as in ts^a sarai $h\bar{a}$, what a man he is! which may mean either how big a man he is! or what a little fellow he is! i.e. he is of no account (30, 9).

Tson is 'how much?', 'how many?' (29,7).

26. Indefinite Pronouns.—Interrogative pronouns are also used as indefinite pronouns. The only difference is the inflexion of the voice with which they are uttered (30, 2). Thus:—

kuk až byók, there was someone.

ts byok, there was something.

tson ar byok, there was some quantity.

tson di buk-in, there were some.

tson ryūz pēts, after some days (165, 10).

In the last examples, when the reference is to number, $sy\bar{\imath}$, the plural of the numeral $s\bar{o}$, one, may be added, as in $sy\bar{\imath}$ $ts\bar{o}n$ wa $d\bar{\imath}$ buk-in, there were several (Hindī $ka\bar{\imath}$ $\bar{e}k$ $th\bar{e}$) (30,5). In such cases, if human beings are referred to, the word $m\bar{a}l^a$ may be added, as in $sy\bar{\imath}$ $ts\bar{o}n$ $m\bar{a}l^a$, several men (30,7); $ts\bar{o}n$ $m\bar{a}l^a$ $b\bar{\imath}$, some other persons (248, 12).

Other indefinite pronominal forms are the following:—

 $b\bar{\imath}$, plur. $by\bar{\imath}$ (156, 4), other. $B\bar{\imath}$ kuk, anyone else, as in :—

kū-Zaid gaḍ dī bī makhlūq gaḍ buk-in, khō bī kukk-ir dī nak dzōk; Zaid aī rī dzōk, there were other people collected with Zaid, but anyone else did not come; Zaid alone came (Supplement, 2, 8).

az aī bū sakhkhal bē-parwā girz^am; bī kuk dī nak hā, I alone wander about so unconcerned; there is no one else (Suppl. 3, 5).

az aī bū tū zay m; bī kuk dī bū nak zay m, I long for thee alone; for no one else do I long (Suppl. 3, 13).

hīts, anything, something (62, 8). Hīts kuk, anyone (62, 9). Thus:

hīts dī nak hā, there is nothing (62, 8).

hīts aī bū nak kēwī, thou doest nothing (252, 4).

kū-hīts kuk lāst dī krik mak kēw n, do not make loathing from anyone, i.e. do not hate anyone (139, 5).

hīts gudā-m nak dzōk hā, I have never beaten him (62, 10).

kar, every, as in :--

i-har sarai kī-m ghwēk, I spoke to every man (61, 13).

kū-har kuk likī aī ras ēk, it (news) arrived to everyone (61, 14).

har kuk aī bū, ka sakhkhal kār kawī, bad-nām sa, everyone who, or whoever, does such a deed, becomes of bad reputation (62, 5).

a- $n\bar{e}k\bar{i}$ a \bar{i} $k\bar{u}$ -har kuk girad sir^a $h\bar{a}$, virtue is good with (i.e. in the opinion of) everyone (256, 7).

har ts mak khron, do not eat everything (62, 1).

har sō saṛai, each man. Sō is the numeral 'one.' Cf. Hindī har ēk ādm; (62, 2).

har kān, at every time, each time (62, 3).

har gudā, everywhere (62, 4).

While har means 'every,' harr' means 'all,' as in harr' sarai, all men (62, 6). So:—

i-harr dūmī lāst lāst lūst $d\bar{i}$ puṣht $d\bar{i}$, he made inquiry from all the singers (138, 7).

bē kū-tū harra rī dzāk-in, except thee, all came (158, 12).

27. Pronominal Adjectives and Adverbs.—The following are the more important pronominal adjectives and adverbs:—

Quantity.-

Adjectives: $-h\bar{o}n$ or $\bar{o}n$ (I, 19), this much, that much, this many, that many (22, 14); $ts\bar{o}n$, how much, how many? (29, 7). According to sentence No. 221 in the List of Words and Sentences, $h\bar{o}$ $y\bar{a}nsp$ $a\bar{\imath}$ $tar-ts\bar{o}n$ 'umr $h\bar{a}$, how old is this horse?, the genitive of $ts\bar{o}n$ is tar $ts\bar{o}n$, not ta $ts\bar{o}n$.

Manner.-

Adjectives: -sakhkhal or $sakhal^1$, such (22, 14); ts^skhal , of what kind? (29, 7; 251, 11); $sakhal...tsak^a$, such...as (245, 13).

Adverbs:— $pa-p^a$ rang, in this manner (22, 14); $pa-f^a$ rang, in that manner (22, 14); ts^a rang, how? (29, 7).

Cause or Reason.—

Adverbs:— $dzik^a$, for this reason, because (23,1); $ta-p^a p\bar{a}r^a$, for this reason (23, 3); $ta-f^a p\bar{a}r^a$, for that reason, therefore (23, 3); $ta-ts^a p\bar{a}r^a$, for what reason?, why? (29, 14; 248, 8); $k\bar{\imath}$ or $k\bar{\imath}y\bar{e}$, why? (29, 10).

¹ Ghulām Muḥammad Khān spells this word both ways. It is evidently a compound, and it and ts *khal should perhaps be spelt s*-khal and ts*-khal, respectively. On p. 29, l. 13, he writes the latter as a compound. Thus,

Place.

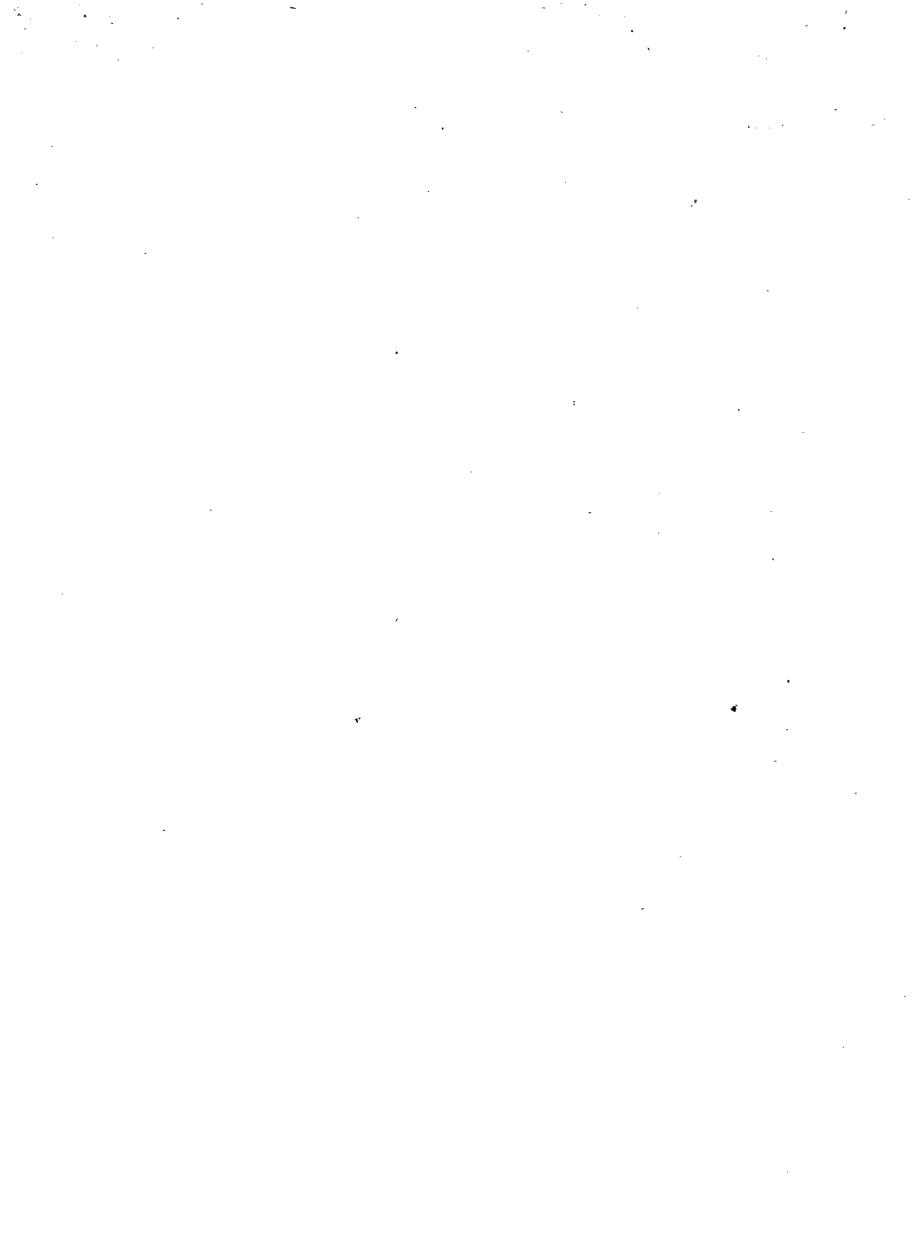

Adverbs:—*i*- d^a , here (23, 1); pa- p^a , here (23, 6); i- w^a , there (23, 1); pa- f^a , there (23, 7); $gud\bar{a}$, where ? (29, 7).

Time.

Adverbs:— $h\bar{o}$ waqt, now (23, 1); haf^a waqt, then (23, 1); ts^a waqt, when ? (29, 7); $k\bar{a}n$ or (I, 19) $g\bar{a}n$, when ? (29, 8).

Direction.—

Adverbs:—i- d^a , hither (257, 13); i- p^a palau, in this direction (23, 3); i- w^a , thither; i- f^a palau, in that direction (23, 3); t-s- \bar{e} n palau, in what direction ?, whither ? (29, 9; 30, 1).

CHAPTER V.

THE VERB.

28. In the general system of tense-formation, the Ormuri verb closely agrees with that of Pashtō. Each verb has two stems,—a past and a present. The past stem is the Past Participle, which is usually the same in form as the Infinitive. The Past tense is formed by adding pronominal suffixes to the past participle. An Imperfect is formed by adding the particle $b\bar{u}$ to the past, and, similarly, a Future Perfect, by adding $s\bar{u}$ instead of $b\bar{u}$. It will be observed that in Ormuri it is the imperfect which takes $b\bar{u}$, while the past does not. In Paṣḥtō, the reverse is the case. There it is the past that takes wu, while the imperfect does not. A Perfect is formed by conjugating the present tense of the verb substantive, and a Pluperfect by adding the past tense of the same, to the past participle. Other tenses, a Past Potential, a Conditional Present, and a Conditional Past are also formed from the past participle, according to rules that will be given subsequently.

From the present stem is first of all formed the **Aorist** tense, generally translatable as a present subjunctive, but sometimes as a simple present. Closely allied to the aorist is the **Imperative**. A **Present** is formed by adding the particle $b\bar{u}$ to the aorist, and a **Future** by adding $s\bar{u}$. In regard to the aorist and the present, we again see the Paṣḥtō system reversed. In that language, it is the aorist that takes wu, while the present does not.

The particles corresponding to the Ormuri $b\bar{u}$ and $s\bar{u}$ are the Paṣḥtō wu and ba, and the Persian $m\bar{i}$ and bi, respectively.

29. Derivative Verbs.—As will be seen hereafter, the infinitive of a verb ends in $\bar{e}k$, $\bar{o}k$, or ak. Verbs are quoted in their infinitive forms. Three verbs will be frequently quoted in the following pages, and they are mentioned here to enable them to be recognized when they occur. They are:—

byōk, to be, to become.syōk, to become.kayēk, to do, to make.

Verbs are freely derived from nouns (65, 10). We may either have an ordinary compound, such as $sp\bar{\imath}w$ $sy\bar{\imath}k$, to become white; $sp\bar{\imath}w$ $kay\bar{e}k$, to make white, or else a true derivative may be formed.

Such true derivative verbs may be either intransitive or transitive. Intransitive verbs are formed by adding ${}^{y}\bar{e}k$ to the noun.\(^{1}\) Thus, from $sp\bar{i}w$, white, we get $sp\bar{i}w{}^{y}\bar{e}k$, to become white (66, 6). Transitive derivative verbs are formed by adding $aw{}^{y}\bar{e}k$ or $ay\bar{e}k$ to the noun. Thus, from $\bar{a}b\bar{a}d$, inhabited, we get $\bar{a}b\bar{a}daw{}^{y}\bar{e}k$ or $\bar{a}b\bar{a}day\bar{e}k$, to make inhabited (66, 14).

We shall see that the past tense of these verbs in the third person singular is the same as the infinitive, and that the ordinary imperfect tense is formed by adding the particle $b\bar{u}$ to the past tense. But in the imperfect of these true derivative verbs the $b\bar{u}$

¹ The meaning of the small y in yek will be explained under the head of the infinitive (§ 32).

of the imperfect may be optionally omitted, so that the imperfect tense may, optionally, be the same in form as the past tense. Thus, $sp\bar{\imath}w^{\imath}\bar{e}k$ or $sp\bar{\imath}w^{\imath}\bar{e}k$ bū means 'he was becoming white,' while $sp\bar{\imath}w^{\imath}\bar{e}k$ may also have its proper meaning 'he became white' (66, 9).

30. Formation of Transitive Verbs from Intransitives, and of Causals from Transitives (67, 5; 107, 8).—In order to form transitive verbs from transitives, or causal verbs from transitives, it is generally sufficient to change the termination ${}^{3}\bar{e}k$ of the infinitive to $aw^{3}\bar{e}k$ or $ay\bar{e}k$. In practice, however, complications arise, and, moreover, the rule cannot apply to those verbs whose infinitives end in $\bar{o}k$ and in ak. It is therefore most convenient to make the necessary changes according to the following rule, which involves a knowledge of the formation of the agrist tense:—

Take the third person singular of the aorist of the verb to be operated on, and reject the final letter. Then:—

A. If the letter which now becomes the last is w, add the syllable ${}^{3}\bar{e}k$, and we get the infinitive of the transitive or causal required. Thus:—

Original Verb.	Aorist, 3 sing.	Transitive or Causal.
$k\bar{\imath}$ - $ts^{\imath}\tilde{e}k$, to call,	$k\bar{\imath}$ - $tsaw\bar{\imath}$,	$m{k}m{ar{\imath}}$ - $tsaw^yar{e}m{k}$.
mukhayēk, to knead,	mukhawi,	m ukha $oldsymbol{w}^{arphi}ar{e}oldsymbol{k}.$
$shi-ts^*\check{e}k$, to send,	ș ķi-t sa w i,	shi-tsawek.
wuzmayēk, to test,	wuzmawī,	wuzma w 'ēk.

B. If the letter which now becomes last is not w, add the syllables $aw^{g}\bar{e}k$ or $ay\bar{e}k$, and we get the infinitive of the transitive or causal required. Thus:—

Original Verb.	Aorist, 3 sing.	Transitive or Causal.
amar*ēk, to hear,	amara,	amaraw ⁱ ēk or amarayēk.
bash'ek, to grant,	baṣḥī,	başḥaw*ēk, başḥayēk.
ghaf *ēk, to weave,	ghaf i,	ghafaw [*] ēk, ghafa yēk.
$ga!^{v}\bar{e}k$, to defeat,	gati,	gaṭaw⁵ēk, gaṭayēk.
hanyék, to remain,	hanyī,	hanyaw'ēk, hanyayēk.
nastak, to sit,	na,	na w^{v} ēk, nayēk.
na-walak, to put out,	na-w°ra,	na-w [*] raw ^y ēk, na-w [*] rayēk.
parghūn ėk, to dress onesclf,	$parghar{u}nar{\imath},$	parghūnaw ^s ēk, parghūnayēk.
tsal'ck, to take away,	tsalī,	tsalawėk, tsalayėk.
wriyōk, to take,	10°17,	w ^a raw ⁱ ěk, w ^a rayěk.
yas'ēk, to boil (intransitive),	yasa,	yasaw⁵ēk, yasayēk.

C. For some transitive verbs the causal form is not used, or is rarely used. Such are the verbs $bash^*\bar{e}k$, $na-w^*lak$, and $wriy\bar{o}k$ in the above list. If it is desired to give the force of the causal to such verbs, a periphrasis is employed, as in $pa-ful\bar{a}nai-m$ $na-w^*lak$, by means of so and so I put him out, i.e. I caused so and so to turn him out.

We occasionally meet double causals, as in *chig*ēk*, to rise; causal *chigaw*ēk* or *chigayēk*, to raise; double causal *chigaaw*ēk* or *chigaayēk*, to cause to raise (195, 5, 6).

31. The Passive Voice (67, 13; 102, 9).—The passive voice is generally formed by conjugating the past participle, which is almost always the same in form as the infinitive, with the verb $sy\bar{o}k$, to become. Thus, from khwalak, to eat, or eaten, we get khwalak $sy\bar{o}k$, to be eaten, or he was eaten. The participle agrees in gender and

Ţ

number with the subject, but is not otherwise changed. Thus, $khw\bar{a}lk$ suk, she was eaten; $khw\bar{a}lk$ suk-in, they were eaten. The verb $sy\bar{o}k$ is conjugated throughout. Its forms will be found in § 41.

Some verbs, whose infinitives end in $ay\bar{e}k$, form their passives by dropping the letter a of this termination. Thus, from $hinlay\bar{e}k$, to grind, we have $hinl^j\bar{e}k$, to be ground. This is only a reverse way of putting the rule for the formation of transitive verbs from intransitives given in § 30.

32. VERBAL NOUNS AND ADJECTIVES (63, 2).—The Infinitive or Verbal Noun.—The infinitive always ends in k (64, 15). It is also used as a verbal noun. Thus, khucalak, to eat, or the act of eating. The majority of infinitives end in $y\bar{e}k$, which is added to the root direct. Thus, $ka-y\bar{e}k$, to do, to make. Most roots end in a consonant, and after this the y of $y\bar{e}k$ is very lightly pronounced, so as to be hardly audible (184, 6). In the Persian character, this y is as often as not omitted, so that, e.g. $brush^y\bar{e}k$, to glitter, is written either برشیات or برشیات. As shown in this example, in the Roman character I represent this half-pronounced y by a small y above the line.

These verbs, with infinitives ending in $y \in k$ or $y \in k$, form the first conjugation. The second conjugation contains about eighteen verbs whose infinitives end in o k, and about twenty verbs whose infinitives end in ak. Examples of verbs of the first conjugation are $ghaf^y \in k$, to weave; $wuzmay \in k$, to test; $kay \in k$, to do, to make; and $hany \in k$, to remain. In the last named verb the n is a mere nasal sound, so that it might be written $h \circ x \in k$, and therefore the $x \in k$ is fully pronounced. Examples of the second conjugation are $xy \in k$, or $xy \in k$, to become, and $xy \in k$, to eat.

- 33. The Verbal Noun of Agency (p. 42ff.).—There is no present participle, but, as in Paṣḥtō, some of the functions of the present participle are performed by this noun of agency. Its termination is wunkai. The rules for the addition of this termination are somewhat complicated, and require a knowledge of the formation of the agrist tense. Thus:—
- A. Take the third person singular of the aorist, and, after dropping the final vowel, add wunkai. Thus, $ghaf^{i}\bar{e}k$, to weave, aorist 3 sing., $ghaf^{i}$, noun of agency, ghafwunkai, one who weaves, a weaver.
- B. If, after the final vowel of the third person singular of the aorist has been rejected, the remainder ends in w, then unkai, not wunkai, is added. Thus, $sh\bar{i}-ts^y\bar{e}k$, to send, aor. 3 sing., $sh\bar{i}-tsaw\bar{i}$, noun of agency, $sh\bar{i}-tsawunkai$, a sender.
- C. Sometimes the termination is awunkai or awūnkai, as in $t^j \bar{e}k$, to stand still, aor. 3 sing., $t\bar{i}$, noun of agency, tawunkai or tawūnkai, one who stands still.
- D. Sometimes the termination is added to the feminine of the past participle, instead of to the aorist. (We shall see, under the head of the aorist, that the most convenient method of forming the aorist is to make it up from this feminine.) Thus, prawak, to sell, past participle feminine, prāk, noun of agency, prākawunkai, a seller.
- E. Sometimes, again, it is added to the second person singular of the imperative. (This, also, is closely connected with the aorist.) Thus, hatak, to abandon, aor. 3 sing., zha, imperative 2 sing., zhōn, noun of agency, zhōnawunkai.

¹ No doubt this nasal, or ghunna, n occurs in many words in Ormuri, and if it could be identified in Ghulam Muhammad Khān's writings, I should throughout have indicated it by the sign as in hāyēk. But, as he has nowhere indicated it, to avoid trusting to my inner consciousness, I have been compelled to represent every whether ghunna or not, by n. It happens that regarding the word hāyēk, I have special information as to its pronunciation.

These forms are seldom used (43, 15), it is much more common to borrow the corresponding Pashtō words in ūnkai or dūnkai. Such are the Pashtō words:—

khartsawūnkai, a spender.

rā-nīwūnkai, a buyer.

lēzhadūnkai, a sender.

āwrēdūnai or āwrēdūnkai, a hearer.

34. Gerund, or Adverbial Participle (45, 11).—There is no adverbial participle equivalent to the Hindī $j\bar{a}t\bar{e}$ $j\bar{a}t\bar{e}$, while going, or $j\bar{a}t\bar{e}-h\bar{i}$, immediately on going. These ideas are conveyed by an infinitive or other noun governed by a postposition. Thus:—

i-ts'ēk inar mullak, he died in going, i.e. while going.

pa-khanī bū ts'ēk, by means of laughters he was going, i.e. he was going along laughing.

i-f" murghān aī i-wust'ēk inar-wi gōlīy' aghak, on that bird, in flying up, a bullet hit in it, i.e. a bullet hit it as it flew away.

Or we may say:-

af murghān bū wust ēk, ka gōlīy wi aghak, that bird was flying up, when a bullet hit on it.

- 35. Conjunctive Participle (114, 6).—There is nothing in Ormuri corresponding to the conjunctive participle $(kh\bar{a}-k\bar{e})$, having eaten) of Hindi. The verbs are treated as independent, and are connected by the conjunction wa, and. Thus, $haf\bar{o}$ $k\bar{a}r$ $d\bar{o}k$ wa $ts^{\bar{o}}\bar{e}kk-al$, he did work and went away, equivalent to the Hindi woh $k\bar{a}m$ $kar-k\bar{e}$ $chal\bar{a}$ - $gay\bar{a}$, he, having done work, went away.
- 36. The Past Participle (45, 1; 68, 13).—Except in the case of two verbs, the masculine singular of the past participle is the same in form as the infinitive. The two exceptions are the verbs $kay\bar{e}k$, to do, to make, of which the past participle is $d\bar{o}k$ (71, 4), and $pakh^{g}\bar{e}k$, to cook, which has pakhak (71, 2).

In the case of transitive verbs, the past participle is by origin passive in signification. Thus, khwalak, the past participle of khwalak, to eat, properly means 'eaten,' and, if used as a past tense, we should have to express the phrase 'he ate' by 'eaten by him,' in which the subject 'he' or 'by him' would have to be put, as in Hindī or Paṣḥtō, into the agent case, and the participle would have to agree with the object, or thing eaten. But we have seen that Ormurī has lost the agent case, and uses the nominative instead, so that in the present work it has been found most convenient to omit consideration of the fact that the past participle of a transitive verb is passive, although, when used as a past tense, it still agrees with the object in gender and number.

The plural of a past participle is of common gender, and is always the same as the feminine singular. Thus, the feminine of *khwalak* is *khwālk*, and this, also, is the masculine and feminine plural.

37. The formation of the feminine of a past participle depends on the conjugation to which the verb belongs. We have seen (ante, § 32) that there are two conjugations, the first consisting of those verbs whose infinitive ends in $\bar{e}k$, and the second of those whose infinitives end in $\bar{o}k$ or ak.

In the first conjugation, the feminine of the past participle is formed by changing: the final $\bar{e}k$ of the past participle to ak (69, 7). Thus:—

```
Masculine.Feminine.t^y \bar{e}k, stood up,tak.wust^y \bar{e}k, risen,wustak.yas^y \bar{e}k, boiled,yasak.zisht^y \bar{e}k, rejected,zishtak.
```

If the past participle ends in $aw^j \hat{e}k$ or $ay\hat{e}k$, the feminine ends in awak or ayak. Thus:—

```
amaraw<sup>*</sup>ēk or amarayēk, to cause to amarawak or amarayak (70, 8). hear,
yasaw<sup>*</sup>ēk or yasayēk, to cause to boil, yasawak or yasayak (70, 9).
```

Of these two forms of the feminine, that in awak is much the more common, except in the case of verbs whose roots consist of a single syllable ending in a vowel, which use only the form in ayak. To this group also belong $hany\bar{e}k$, to remain, which we have seen (§ 32 n.) is really $h\bar{a}y\bar{e}k$, $n\bar{a}my\bar{e}k$, to name, contracted from $n\bar{a}may\bar{e}k$, and $pary\bar{e}k$. Thus:—

```
hanyēk, to remain,hanyak (214, 8).n\bar{a}my\bar{e}k, to name,n\bar{a}myak (213, 3).pary\bar{e}k, to fry,paryak (190, 8).pay\bar{e}k, to pasture,payak (70, 13).tray\bar{e}k, to fear,trayak (70, 14).ray\bar{e}k, to tear (transitive),rayak (71, 1).
```

Similarly other monosyllabic roots ending in vowels:—

```
p\bar{a}y\bar{e}k, to be durable, p\bar{a}yak (70, 14). piy\bar{e}k, to string, piyak (70, 13).
```

The following are irregular:-

Infinitive.	Past Pa	articiple.
	Masculine.	Feminine.
$b^{g}\bar{e}k$, to give,	$b^{y}ar{e}k,$	bayak (186, 8).
$d\bar{u}s^{\prime}\hat{e}k$, to milk,	$dar{m{u}}s^{m{v}}ar{m{e}}m{k},$	$d\bar{u}sak$ or $d\bar{u}k$ (197, 4).
$d^{\mathbf{y}}\bar{e}k$, to see,	$d^{y}ar{e}k$,	$d^{y}\bar{e}k$ (71, 3; 76, 6).
ghwêk, to say,	$ghwar{e}k,$	$ghw\bar{e}k$ (75, 11).
kayēk, to do,	$d ar{o} k,$	$d\bar{a}k$ (71, 4; 76, 4; 252, 12; 253, 15).
$lik^{s}\bar{e}k$, to ascend,	$lik^{y}ar{e}k$,	likayak (210, 4).
$pakh^y \tilde{e}k$, to cook,	pakhak,	$py\bar{u}khk$ (71, 2; 76, 5).
$pray\bar{e}k$, to beat,	pr ay ěk,	prawak (190, 10).
$r\bar{\imath}y\bar{e}k$, to shave,	rī y ē k ,	riyek (71, 5).
$r^{\mathbf{y}}\bar{e}\mathbf{k}$, to be torn,	$r^{y}ar{e}k$,	ryak (198, 3).
ṣḥa-syēk, to swell,	sha-syēk,	sha-suk (204, 5).
ṣḥīyēk, to buy,	ṣḥīyēk,	$sk\bar{r}iy\bar{e}k$ (204, 4).
sparayēk, to blink,	sparayēk,	sparak (201, 8).
$ts^{y}\bar{e}k$, to move,	$ts^y ilde{e}k,$	tsawak (69, 13).
X .		y 2

YZ

38. All verbs of the second conjugation are more or less irregular, and the formation of the feminine of the past participle cannot be brought under any general rules. As the irregularities are carried through to the aorist and the imperative, I give the following table, which includes all the verbs of this conjugation, with the feminines of their past participles, the third persons and second persons singular of their aorists, and the second persons singular of their imperatives (73, 11ff.). They are arranged in groups according to the formation of the feminine of the past participle:—

Infinite and Past Part. Masc.	Past Part. Fem.	Aorist, 3 sing.	Aorist, 2 sing.	Imperative, 2 sing.
aghōk, to reach (74, 11), to be born (185, 3),	aghak,	awasa,	aw as ,	awas.
na-ghōk, to come out (74, 10),	na-ghak,	nisī,	nis,	nis.
waghyčk, to enter (75, 10),	waghuk,	wēsa,	wēs,	wēs.
dzōk, to propel (201, 2),	dzak,	da,	$d\bar{\imath},$	don (247, 14).
$dz\bar{o}k$ or $z\bar{o}k$, to strike (75, 12),	dzak, zak,	dzana, zana,	dzan, zan,	dzan, zan.
$n\bar{o}k$, to seize (75, 9),	nak,	nisa,	nis,	nis.
$dz\bar{o}k$, to arrive (74, 8),	$dz\bar{a}k$,	dza,	dzai,	dzaī.
$ny\bar{o}k$ or $niy\bar{o}k$, to place (73, 12),	nāk,	กริเอริ,	nīw,	nīw.
$w\delta k$, to get $(75, 6)$,	wāk,	wawi,	wāw,	wāw.
$by\bar{o}k$ or $biy\bar{o}k$, to be, to become (187, 6),	buk,	ba,	bī,	bī.
hanzyāk or handzyāk, to remain over (76.7),	hanzuk or handzuk,	haznī,	hazn,	hazn.
$wa-zy\bar{o}k$, to slay (75, 14),	wa-zuk or wazzuk,	wazna,	wazn,	wazn.
syōk or siyōk, to become (74, 13),	suk,	sa,	st or sū,	sü or sun (167, 3)
shiyōk, to give (74, 9),	ṣḥūk,	skawi or skawwi,	șhērī (205, 6),	şha or şhêrī.
wriyō's, to take $(74, 6)$,	wrūk,	wart, warri,	wer,	war.
w ² lak, to bring (74, 4),	$w^a l k$,	w ^a ra, w ^a rra (24, 5, 6),	$w^a r$,	war.
$na-w^a lak$, to take out (74, 7),	na-walk,	na-wara,	na-war,	na-w*r.
khwalak, to est (74, 3),	khwālk,	khura, lkhra,	khuri,1 khri,	khrōn.
khanak, to laugh (265, 7),	?	khana (265, 8),	khan (264, 2),	khan,
dranak, to keep, to own (75, 5),	$drar{o}nk$,	darī,	dērī,	dēr.
hatak, to abandon (73, 13),	hōt k ,	zha,	zhī,	zhōn.
tatak, to drink (74, 2),	tōtk,	$trar{\imath},$	trī,	tron.
dilak, to reap (74, 5),	dalk,	$dir \bar{\imath}$,	dir,	dir.
gastak or glastak, to carry off (75, 13),	$gar{a}sk,$	$glar{\imath},$	glī,	glōn.

¹ The w is wāwu'l-ma'dūla, and is not pronounced (92, 7).

Infinite and Past Part. Masc.	Past Part. Fem.	Aorist, 3 sing.	Aorist, 2 sing.	Imperative, 2 sing.
ghwashtak, to fall (75, 15),	ghwāṣḥ k,	ghwaza,	ghwaz,	ghwaz.
mashtak, to break (transitive) (75, 7),	$m\bar{\imath}shk$,	mazī,	maz,	maz.
nastak, to sit (75, 4),	$nar{a}sk$,	na,	naī,	naī.
nwastak, to go to sleep (76, 3),	nwāsk,	nicī,	nwī,	nwōn.
brashtak, to burn (intr.) (76, 2),	brūṣḥk,	brasī,	bras,	bras.
brashtak, to burn (trans.) (76, 2),	$brar{u}$ ṣḥ k ,	brazī, brazzī,	brēzī,	brēz, brēzan.
pishtak, to write (75, 2),	piș hk ,	pisī,	pīs,	pīs, pīsan.
hishtak, to read (75, 3),	hīshk,	hawa,	wiw,	wīw.
kwulak, to copulate (74, 15),	kıvalak,	kina,	kinī,	kīn.
mulak or mullak, to die (75, 8),	malk,	$mr\bar{\imath}$,	$mr\bar{\imath},$	$mr\bar{i}$.
prawak, to sell (73, 14),	$prar{a}k,$	prā, pra,	prā, pra,	prā, pra.
shustak, to weep (74, 12),	shustak,	ṣḥawa,	șhīw,	șhīw.
rashtak or rōshak, to cause to spin,1	P	?	?	?

39. **VERBS SUBSTANTIVE AND AUXILIARY VERBS.**—Before describing the finite parts of the verb, it is necessary to discuss certain verbs that are used as auxiliaries.

The first is the verb substantive (172, 10). This verb is used as an auxiliary and also as a copula (as in 'Zaid is sick'). If it is used to postulate existence, as in 'Zaid is (i.e. exists),' then certain pronominal suffixes must be added to the subject. This will be explained under the head of syntax (§ 125). It is conjugated as follows in the present tense (173, 1). It does not change for gender:—

Singular.

Plural.

1. az ham, I am.

mākh hyēn, we are.

2. $t\bar{u}$ hai, thou art (79, 2).

tyūs haī, ye are.

3. hafō hā or hafō ha (78, 8), he is

hafai hin, they are.

In the Parable the initial h is sometimes dropped, as in $d\bar{a}k \bar{a}$, for $d\bar{a}k h\bar{a}$, (I) have done (I, 8), and nak am , I am not (I, 9).

This verb has no past tense. For 'I was,' etc. the past tense of $by\bar{o}k$, to be, to become, the next verb to be described, is employed.

40. The two following verbs are what Ghulām Muḥammad Khān (p. 176, l. 13) calls ' $n\bar{a}qis$,' or 'defective' (176, 10). They are not defective in our use of the word, having each a complete conjugation, but, according to his system, have not the full force of a complete verb. They correspond to what are called 'copulative verbs' in Latin grammar, and are $by\bar{o}k$ or $biy\bar{o}k$, to be, to become, and $sy\bar{o}k$ or $siy\bar{o}k$, to become. As stated above, the past tense of $by\bar{o}k$ is used as the past tense of the verb substantive.

¹ This verb is mentioned by Ghulam Muḥammad Khāu (198, 6) as the causal of rasyēk, to spin, but he does not give any of the principal parts.

² Often written ham (79, 13) or hum (239, 12). See § 1.

These two verbs are conjugated as follows in the past, aorist, and imperative tenses:— $by\bar{o}k$ or $biy\bar{o}k$, to be, to become (105ff.).

Past participle, byōk or biyōk, feminine and plural, buk.

Past, I was, I became, etc.

	Singular.	•	Plural.
	Masculine.	Feminine.	Masculine and Feminine.
1.	az byok-am.1	az buk-am.	mākh buk-yēn.
2.	tū byōk-a, or byōk-ē.	tū buk-a.	tyūs buk-aī.
3.	hafō byōk.	hafo buk.	hafaī buk-in, or buk-ēn.
this	tense the terminations an	e the pronominal	suffixes of the nominative, given

In this tense the terminations are the pronominal suffixes of the nominative, given under head (a) in § 20.

Aorist, I may be, I may become, etc.

Singular.	Plural
1. $az b^a m^2$	mākh byēn (84, 4).
2. $t\bar{u}$ $b\bar{i}$.	tyūs baī.
3. hafō, or haf*, ba (254, 7).	hafaī b in .

This tense does not change for gender, and the endings are real terminations, not pronominal suffixes.

Imperative, Let me be, let me become, etc.

<u> </u>	-
Singular.	Plural.
1. $az b^a m.^2$	mākh byēn.
2. tū bī.	tyūs baī.
3. hafo, or hafo, bon.	hafaī bōn.

This tense, also, does not change for gender, and the endings are real terminations, not pronominal suffixes.

The present conditional of this verb is byōkan, fem. and plur., bukan, (if) (I, etc.) should be (105, 12).

As usual, the present of this verb is formed by adding $b\bar{u}$ to the aorist, but, in this case, it has generally a special meaning. It is a habitual present (83, 12; 106, 3). Thus, $\sin b\bar{u}$ ba, he is habitually well, he keeps well; $kaif\bar{i}$ $b\bar{u}$ ba, he is habitually drunk, he is a drunkard.

41. The conjugation of $sy\bar{o}k$ or $siy\bar{o}k$, to become, is nearly the same as that of $by\bar{o}k$ (104). This verb is used to form the passive voice (§ 31) and also, with an adjective, to form a nominal compound verb, as in narm $sy\bar{o}k$, to become soft (see § 29).

Past participle, $sy\bar{o}k$ or $siy\bar{o}k$, feminine and plural, suk.

Past, I became, etc.

Singular.		Plural.
Masculine.	Feminine.	Masculine and Feminine.
1. $az sy \bar{o}k - am.^3$	az suk-am.	mākh suk-yēn.
2. tū syōk-a, syōk-ē.	$tar{u}$ suk-a, suk- $ar{e}$.	tyūs suk-aī.
3. hafō sy $ar{o}k$.	haf^a suk (255, 6).	hafaī suk-in.

¹ Or biyōk-am, and so throughout the masculine singular.

² Often written bim or bum. See § 4.

³ Or siyok-am, and so throughout the masculine singular.

Aorist, I may become, etc.

Singular.	Plural.
1. az s ^a m.¹	mākh syēn.
2. $t\bar{u} s\bar{i}$ (151, 15) or $t\bar{u} s\bar{u}$ (202, 5).	tyūs saī.
3. hafo, or haf a, sa (254, 9).	hafāī sin.
Imperative, Let me become	e, etc.
Singular.	Plural.
1. az s ^a m.¹	mākh syēn.
2. tū sū or tū sun (251, 2; 261, 8).	$tyar{u}s$ $saar{\imath}.$
3. hafō, or hafa, sōn. (259, 9).	hafaī son.

Note the forms of the second person singular of the Aorist and Imperative. Here The model of $by\bar{o}k$ is departed from.

42. The verb kayēk, to do, to make, is frequently used to make transitive nominal compound verbs. Its past is irregular, and so are some forms of the agrist and imperative (106; 107).

Past participle, $d\tilde{o}k$, feminine and plural, $d\tilde{a}k$.

Past, Made me, etc. (107, 5).

2. tū k	\bar{e} w \bar{i} (107, 6; 162, 1;	tyūs kawaī (107, 6) or kaī (161, 7).
207	7, 8) or ka.	
3. hafō,	or $h\bar{a}f^a$, $kaw\bar{i}$ (100, 6;	hafaī kawin or kin.
107	7, 6; 248, 10; 207, 8),	•
ka	(24, 4), or ki (100, 7).	
	Imperative, Let me do,	let me make, etc.

- 1. $az kaw^a m$ or $k^a m$. mākh kawyēn (107, 7) or kyēn. 2. $t\bar{u}$ $k\bar{e}w$, $k\bar{e}w^a n$ (100, 6, 7; tyūs kawai (107, 7) or kai. 107, 7), or ka. 3. hafo, or hafa, kawun or kawon hafaī kawun or kawōn (107, 7). (107, 7).
- 43. THE FINITE VERB.—As stated in § 28, the Ormuri verb has two stems,—a past and a present. From each is formed a group of tenses. The past stem is identical with the past participle. There are several ways of forming the present stem, which will be explained in the proper place.

¹ Often written sim or sum. Cf. § 4.

From the past stem are formed the following tenses:—

- (1) The Past.
- (2) The Imperfect.
- (3) The Perfect.
- (4) The Pluperfect.
- (5) The Future Imperfect.
- (6) The Future Perfect.
- (7) The Present Conditional.
- (8) The Past Conditional.

From the present stem are formed:—

- (1) The Aorist.
- (2) The Present.
- (3) The Future.
- (4) The Imperative.

44. TENSES FORMED FROM THE PAST STEM OR PAST PARTI-CIPLE.—The conjugation of the tenses formed from the past participle differs according to whether the verb is intransitive or transitive. In the case of intransitive verbs, the verb in these tenses agrees with the subject in gender, number, and person. In the case of a transitive verb in a past tense, it agrees with the object in gender, number, and person. For these tenses I shall therefore, throughout, give paradigms of two verbs, one intransitive, viz. wustek, to rise, and the other transitive, viz. khwalak, to eat.

45. The Past Tense (77).—The past participle is used for the past tense. The persons are formed by the addition of the pronominal suffixes given in § 20 (a) (17). These indicate the subject of an intransitive verb and the object of a traffsitive verb (77, 6). They are repeated here for ready reference. It will be observed that there is no suffix for the third person singular, and here the past participle is used by itself :-

am or (after a vowel) m, I.

yēn, we.

a or ē, thou.

αĩ, ye.

..., he, she, it.

in or en, they.

With transitive verbs, of course, these mean 'me,' 'us,' etc., not 'I,' 'we,' etc. The following therefore is the paradigm of the past tense of the intransitive verb *vust*ēk, to rise. Its past participle is wust*ēk, feminine and plural, wustak.

Masculine.

Feminine.

1. wust*ēk-am, I arose.

wustak-am, I arose.

2. $wust^{y}\bar{e}k-a$ or $wust^{y}\bar{e}k-\bar{e}$, thou

wustak-a or wustak-ē, thou

arosest.

arosest.

3. $wust^{g}\bar{e}k$, he arose.

wustak, she arose.

Plural.

Common Gender.

- 1. wustak-yēn, we arose.
- 2. wustak-aī, ye arese.
- 3. wustak-in or wustak-ēn, they arose.

46. The following is the paradigm of the past tense of the transitive verb *khwalak*, to eat (77, 8). The suffixes refer to the object, with which the participle agrees in gender and number. The past participle is *khwalak*, feminine and plural, *khwālk*.

Singular.

Masculine.

Feminine.

1. khwalak-am, ate me.

khwālk-am, ate me.

2. khwalak-a or khwalak-é, ate thee.

khwālk-a or khwālk-ē, ate thee.

3. khwalak, ate him.

khwālk, ate her.

Plural.

Common Gender.

- 1. $khw\bar{a}lk$ - $y\bar{e}n$, ate us.
- 2. khwālk-aī, ate you.
- 3. khwālk-in or khwālk-ēn, ate them.

47. In the above paradigm, the subject is not mentioned. It is not stated who did the eating. If the subject is mentioned in the sentence, this gives rise to no difficulty. For instance, if it was Zaid who did the eating, it is only necessary to say Zaid khwalak-am, for 'Zaid ate me,' if I am a man, or Zaid khwalk-am, if I am a woman. It is often, however, desired to indicate the subject also, by a pronominal suffix. For such a purpose, the suffixes mentioned in § 20 (c) are inserted between the participle and the suffix indicating the object. These suffixes are here repeated for ready reference:—

am	or (a	fter a	vowe	l) m, I.	an	\mathbf{or}	(after a	vowel)	n,	we.
at	or	,,	,,	t, thou.	an	or	,,	,,	n,	you.
a	or	,,	,,	wa or (after a	an	or	,,	,,	n,	they.
(onsor	nant a	nd be	fore a vowel or y)						
а	w, he	, she,	it.							

To use these suffixes, we take, first, the past participle khwalak, and add to it the case of the subject, say, at, and we get khwalak-at, thou atest. Then we add the suffix of the object, say, am, me, and we finally get khwalak-at-am, thou atest me. As before, the participle agrees with the object in gender and number. We thus get the following paradigm of the past tense with double suffixes, when the object is singular and masculine (112):—

-	I (ate).	Thou (atest).	He, she, or it (ate).	We, you, or they (ate).
khwalak-am, ate me	khwalak-am-am	khwalak-at-am	khwalak-*w-am	khwalak-an-am.
khwalak-a)	khwalak-am-a	khwalak-at-a	khwalak-*w-a	khwalak-an-a.
$ \begin{array}{c} \text{or} \\ khwalak-\bar{e}, \end{array} \} \text{ate thee} \left. \begin{array}{c} \\ \end{array} \right. $	khwalak-am-ë	khwalak-at-ē	khwalak-*w-ē	khwalak-an-ë.
khwalak, ate him	khwalak-am	khwalak-at	khwalak-a	khwala k- an.

In the above the object is in the masculine singular. If it is in the feminine singular, the feminine participle must be substituted. Thus, khwālk-am, ate me (a woman),

¹ This word is a good example for Ghulām Muḥammad Khān's system of spelling. On p. 77, l. 13, he says that the vowel of the last syllable is majhūl, but in the example given ou p. 78, l. 2, he writes distinctly

khwālk-at-am, thou atest me (a woman). So khwālk-am-ē, I ate thee (a woman), khwālk-am, I ate her. If the object is plural, in either gender, we get:—

	I (ate).	Thou (atest).	He, she, or it (ate).	We, you, or they (ate).
khwālk-yēn, ate us khwālk-aī, ate ye khwālk-in, ate them	khwālk-am-yēn khwālk-am-aī khwālk-am-in	khwālk-at-yēn khwālk-at-at khwālk-at-in	khwalk-w-yën khwalk-w-ai khwalk-w-in	khwālk-an-yðn. khwālk-an-ai. khwālk-an-in.

It must be remembered that the terminations in all the above paradigms are pronominal suffixes, and do not really form part of the verb. Hence they are readily detachable, and are often found attached to some other word in a sentence. Thus, the a, which is the pronominal suffix of the subject, in khwalak-a, means 'he' in 'he ate him' (or something masculine). The word pandūk, a pomegranate, is masculine. A-pandūk means 'the pomegranate,' and 'he ate the pomegranate' would not be a-pandūk khwalak-a, but a-pandūk-a khwalak, in which the pronominal suffix of the subject, a, is not suffixed to the verb, but to pandūk. Similarly a-pandūk-am khwalak, I ate the pomegranate; a-pandūk-at khwalak, thou atest the pomegranate, and so on. We shall see in the syntax (§ 98, 3), where all this will be explained at length, that the noun to which these suffixes are attached is thereby shown to be the object. A-pandūk in these sentences is known to be the object, because the suffix of the subject is attached to it. If none were attached, then pandūk itself would be the subject, and a-pandūk khwalak would mean 'the pomegranate ate' (something masculine).

When the subject and the object are both already mentioned in the sentence, then it is not necessary to repeat them by adding suffixes to the verb or elsewhere. Thus, it is sufficient to say a-gap a-gon mashtak, the stone broke the stick, without the use of any pronominal suffix at all.

48. The Imperfect (81, 6).—The imperfect is formed by adding the particle $b\bar{u}$ to the past. The $b\bar{u}$ sometimes precedes, and sometimes follows (see § 139), the verb. When it precedes, there is no change from the conjugation of the past. Thus:—

 $b\bar{u}$ wust^y $\bar{e}k$ -am, I (masc.) was arising; $b\bar{u}$ wustak-am, I (fem.) was arising; $b\bar{u}$ wust^y $\bar{e}k$ -a, thou (masc.) wast arising, and so on for an intransitive verb: $b\bar{u}$ khwalak-am, was eating me (masc.); $b\bar{u}$ khwālk-am, was eating me (fem.); $b\bar{u}$ khwalak-a, was eating thee (masc.), and so on for a transitive verb.

But when the $b\bar{u}$ follows the verb, the pronominal suffixes are added to it, after dropping the \bar{u} , and not to the verb (81, 14). Thus we get for an intransitive verb the following paradigm:—

Singular.

Masculine.

Feminine.

- 1. wust^yēk bam, I was arising.
- 2. wust ēk ba, or bē, thou wast arising.
- 3. wust ēk bū, he was arising.

wustak bam, I was arising.

wustak ba, or be, thou wast arising.

wustak bū, she was arising.

Plural.

Common Gender.

- 1. wustak byēn, we were arising.
- 2. wustak baī, ye were arising.
- 3. wustak bin, or $b\bar{e}n$, they were arising.

Similarly for a transitive verb we have:—

Singular.

Masculine.

Feminine.

- 1. khwalak bam, was, or were, eating me.
- khwālk bam, was, or were, eating me.
- 2. khwalak ba, or be, was, or were, eating thee.
- khwālk ba, or bē, was, or were, eating thee.
- 3. khwalak bū, was, or were, eating him.
- khwālk bū, was, or were, eating her.

Plural.

Common Gender.

- 1. khwālk byēn, was, or were, eating us.
- 2. khwālk baī, was, or were, eating you.
- 3. khwālk bin, or bēn, was, or were, eating them.
- 49. The Perfect (78, 5).—The perfect is formed by conjugating the present tense of the verb substantive (see § 39) with the past participle. The participle changes only for gender and number. Thus, for an intransitive verb we have:-

Singular.

Masculine.

Feminine.

- 1. wust ēk ham, I have arisen.
- 2. wust ek hai, thou hast arisen.
- 3. wust $\bar{e}k$ $h\bar{a}$, or ha, he has arisen.
- wustak ham, I have arisen. wustak hai, thou hast arisen.
- wustak hā, or ha, she has arisen.

Plural.

Common Gender.

- 1. wustak hyēn, we have arisen.
- 2. wustak hai, ye have arisen.
- 3. wustak hin, they have arisen.

For a transitive verb, we have:—

Singular.

Masculine.

- 1. khwalak h'm, has, or have, eaten me.
- 2. khwalak hai, has, or have, eaten thee.
- 3. khwalak hā, or ha, has, or have, eaten him.

- Feminine.
- khwālk ham, has, or have, eaten me.
- khwālk hai, has, or have, eaten thee.
- khwālk hā, or ha, has, or have, eaten her.

Plural.

Common Gender.

- 1. khwālk hyēn, has, or have, eaten as.
- 2. khwālk haī, has, or have, eaten you.
- 3. khwālk hin, has, or have, eaten them.
- 50. The Pluperfect (80, 1).—The Pluperfect is formed by conjugating the past tense of the verb substantive (see § 39 and § 40) with the past participle, which, VOL. X.

as in the perfect, changes only for gender and number. Thus, for an intransitive verb:—

Singular.

Feminine.

1. wust ēk byōk-am, I had arisen.

2. wustyēk byōk-a, or byōk-ē, thou hadst arisen.

Masculine.

3. wust ek byok, he had arisen.

wustak buk-am; I had arisen.
wustak buk-a, or buk-ē, thou hadst
arisen.

wustak buk, she had arisen.

Plural.

Common Gender.

- 1. wustak buk-yēn, we had arisen.
- 2. wustak buk-aī, ye had arisen.
- 3. wustak buk-ēn, they had arisen.

For a transitive verb, we have:-

Singular.

Masculine.

Feminine.

1. khwalak byōk-am, had eaten me.

2. khwalak byōk-a, or byōk-ē, had eaten thee.

3. khwalak byōk, had eaten him.

khwālk buk-am, had eaten me.

khwālk buk-a, or buk-ē, had eaten thee.

khwālk buk, had eaten her.

Plural.

Common Gender.

- 1. khwālk buk-yēn, had eaten us.
- 2. khwālk buk-aī, had eaten you.
- 3. khwālk buk-in, or buk-ēn, had eaten them.
- 51. The Future Imperfect (84, 5).—The future imperfect corresponds to the Hindi $mai \ kh\bar{a}t\bar{a} \ h\bar{u}g\bar{a}$, I shall be eating, or I may be eating, but, in Ormuri, it is formed with the past tense, not with the present participle. To this past tense the particle $s\bar{u}$ is added, in exactly the same way as that in which $b\bar{u}$ is added to form the imperfect. The $s\bar{u}$ sometimes precedes, and sometimes follows, the verb (see § 139). When it precedes, there is no change in the conjugation of the past tense. Thus:—

sū wust^sēk-am, I (masc.) shall be arising, or I (masc.) may be arising; sū wustak-am, I (fem.) shall be arising, or I (fem.) may be arising; sū wust^sēk-a, thou (masc.) wilt be arising, or thou (masc.) may be arising: sū khwalak-am, will be eating me (masc.), or may be eating me (masc.); sū khwalak-am, will be eating me (fem.), or may be eating me (fem.); sū khwalak-a, will be eating thee (masc.), or may be eating thee (masc.), and so on.

When the $s\bar{u}$ follows the verb, then, as in the case of $b\bar{u}$, the pronominal suffixes are added to it, after dropping the \bar{u} , and not to the verb (84, 8). We thus get the following paradigm for the intransitive verb. To save space, I have given only one meaning to each person, and therefore 'may' may be substituted throughout for 'shall' or 'will.'

Singular.

Mascaline.

- 1. wust ek sam, I shall be arising.
- **2.** wust $\bar{e}k$ sa, or $s\bar{e}$, thou wilt be arising.
- 3. $wust^y \bar{e}k \ s\bar{u}$, he will be arising.

Feminine.

wustak sam, I shall be arising. wustak sa, or sē, thou wilt be arising. wustak sū, she will be arising.

Plural.

Common Gender.

- 1. wustak syēn, we shall be arising.
- 2. wustak saī, ye will be arising.
- 3. wustak sin, or sen, they will be arising.

So also in the following paradigm of a transitive verb 'may' may throughout be substituted for 'shall', or 'will':—

Masculine.

Singular.

Feminine.

- 1. khwalak sam, shall, or will, be eating me.
- 2. khwalak sa, or $s\bar{e}$, shall, or will, be eating thee.
- 3. khwalak sū, shall, or will, be eating him.
- khwālk sam, shall, or will, be eating me.
- khwālk sa, or sē, shall, or will, be eating thee.
- khwālk sū, shall, or will, be eating her.

Plural.

Common Gender.

- 1. khwālk syēn, shall, or will, be eating us.
- 2. khwālk saī, shall, or will, be eating you.
- 3. khwālk sin, or sēn, shall, or will, be eating them.
- 52. Future Perfect (84, 14).—This tense corresponds to the Hindī $ma\tilde{i} \cdot n\bar{e}$ $kh\bar{a}y\bar{a}$ $h\bar{o}g\bar{a}$, I shall have eaten, or, with the signification of a past potential, I may have eaten. It is formed by conjugating the future of the copulative verb $by\bar{o}k$, to be, with the past participle of the main verb. The past participle changes only for gender and number. The future of $by\bar{o}k$ is formed by adding the particle $s\bar{u}$ to the aorist. The latter is conjugated in full in § 40. In the case of the future tense, we shall see (§ 63) that the $s\bar{u}$ remains unchanged, and does not take the verbal terminations when it follows the verb, as it does in the case of the future imperfect (see § 51). The following is the paradigm for the intransitive verb:—

Singular.

Masculine.

Feminine.

- 1. $wust^y \hat{e}k s \bar{u} b^a m$, I shall have arisen.
- 2. Wast on the one, I shall have dissent
- 2. $wust^y \bar{e}k \ s\bar{u} \ b\bar{\imath}$, thou wilt have arisen.
- 3. $wust^y \bar{e}k s\bar{u} ba$, he will have arisen.
- wustak s \bar{u} $b^a m$, I shall have arisen.
- wustak sū bī, thou wilt have arisen. wustak sū ba, she will have arisen.
- Plural.

Common Gender.

- 1. wustak sū byēn, we shall have arisen.
- 2. wustak sū baī, you will have arisen.
- 3. wustak sū bin, they will have arisen.

In the above, 'may' may be substituted for 'shall' or 'will.' For a transitive verb, we have:—

Masculine.

Singular.

Feminine.

- 1. $khwalak \ s\bar{u} \ b^a m$, shall, or will, have eaten me.
- 2. $khwalak \ s\bar{u} \ b\bar{\imath}$, shall, or will, have eaten thee.
- 3. khwalak sū ba, shall, or will, have eaten him.
- khwālk sū bam, shall, or will, have eaten me.
- khwālk sū bī, shall, or will, have eaten thee.
- khwālk sū ba, shall, or will, have eaten her.

Plural.

Common Gender.

- 1. khwālk sũ byên, shall, or will, have eaten us.
- 2. khwālk sū baī, shall, or will, have eaten you.
- 3. khwālk sū bin, shall, or will, have eaten them.

In the above, 'may 'may be substituted for 'shall' or 'will.'

53. Present Conditional (85, 8).—The present conditional is formed by adding an to the past participle. The latter changes for gender and number, but not for person. Thus, wust ēkan, (if) I (masc.), thou (masc.), or he should arise; wustakan, (if) I (fem.), thou (fem.), she, we, you, or they should arise; khwalakan, (if) so and so should eat me (masc.), thee (masc.), or him; khwālkan, (if) so and so should eat me (fem.), thee (fem.), her, us, you, or them.

This tense is also used as a present or future optative, as in khwalakan, would that so and so would eat me (masc.), etc.

54. Past Conditional (87, 4).—Similarly, the past conditional is formed by adding an to the base of the pluperfect, as in wust ēk byōkan, (if) I (masc.), thou (masc.), or he had arisen; wustak bukan, (if) I (fem.), thou (fem.), she, we, you, or they had arisen; khwalak byōkan, (if) so and so had eaten me (masc.), thee (masc.), or him; khwālk bukan, (if) so and so had eaten me (fem.), thee (fem.), her, us, you, or them.

This tense is also used as a past optative, as in khwalak byōkan, would that so and so had eaten me (masc.), thee (masc.), or him, and so on; armān ka azz-al tsēk byōkan, would that I had gone (164, 8).

55. TENSES FORMED FROM THE PRESENT STEM.—Four tenses are formed from the present stem,—the Aorist, the Present, the Future, and the Imperative. The present and future are the same as the aorist, except that they add to it, respectively, the particles $b\bar{u}$ and $s\bar{u}$. The Imperative, in its forms, agrees closely with the aorist.

The present stem occurs in its simplest form in the agrist tense, and it will be convenient to take the third person singular of that tense as the basis from which all the other forms are derived.

56. The Aorist.—The aorist is by origin an old present, and is, in fact, sometimes used in that sense. Thus:—

 $a-k^as\bar{\imath} \ sar^a \ hanyin$, the Wazīrs are seated together (137, 5). ' $agl \ a\bar{\imath} \ nak \ d\bar{e}r\bar{\imath}$, thou hast no sense (253, 1).

'arz aī dar'm, I have a petition (253, 12).

Generally, however, it has the force of a present subjunctive, thus following the example of Hindī, while in Paṣḥtō the corresponding tense has the force of a present.

In all the tenses derived from the present stem the personal terminations are true terminations (71, 8ff.), not pronominal suffixes, as is the case with tenses formed from the past participle. They hence cannot be detached from the verb to be attached to other words in the sentence. Moreover, none of these tenses change for gender. The only changes are those for person and number.

The agrist presents many irregularities in its formation and conjugation. It has two main types, in which the third persons singular end in $\bar{\imath}$ or a, respectively. The following are examples of typical conjugation:—

(1) \bar{i} -type. Verb $ghaf^{\bar{i}}ek$, to	o weave.
Singular.	- Plural.
1. ghaf'm, I may weave (136, 11; 141, 3;	ghafyēn, we may weave.
suppl. 3, 13).	
2. ghēfī, thou mayst weave.	ghafaī, ye may weave.
3. ghafi, he may weave.	ghafin, they may weave.
(2) a-type. Verb amar ³ ék	, to hear.
1. amar ^a m, I may hear.	amaryén, we may hear.
2 amār, thou mayst hear.	amaraī, ye may hear.
3. amara, he may hear.	amarin, they may hear.

The two important forms are the third person singular and the second person singular. The formation of each is subject to special rules. The first person singular and all the persons of the plural are formed by rejecting the final \bar{z} or a of the third person singular and adding the appropriate personal terminations (92, 3ff.).

These are as follows:-

	Singular.	Plural.
1.	$-^{a}m.^{2}$	$\cdot yar{e}n.$
2.	•••	-aī.
3.	4 • • • • •	-in.

57. Formation of the third person singular (71, 8ff.).—It is possible to give rules for the formation of the third person singular only for verbs of the first conjugation, i.e. for those whose infinitives end in $^{g}\bar{e}k$. Verbs of the second conjugation are in this respect quite irregular.

Most verbs of the first conjugation, including all causals and derivative verbs (67, 9), form the third person singular of the agrist by changing the final -ak of the feminine of the past participle to - \bar{i} (71, 8). Thus:—

Infinitive.	Past Part. Fem.	Aorist sg. 3.
$ghaf^{g}\bar{e}k$, to weave.	ghafak.	ghafi $(72, 4)$.
hanyēk, to remain, to be seated.	hanyak.	$hany\bar{\iota}$ (id.).
$nik\bar{\imath}z^{\imath}\bar{e}k$, to throw.	$nikar{\imath}zak.$	$nik\bar{\imath}z\bar{\imath}$ (id.).
platiek, to be upset.	platak.	platī (72, 5).
$s h \bar{i} - t s \bar{e} k$, to send.	s h $ar{\imath}$ - t s a w a k .	$sh\bar{i}$ - $tsaw\bar{i}$ (71, 11).
mukhaw ēk, to knead.	mukhawak.	mukhawi (72, 4).
wuzmayēk, to test.	wuzmawak.	wuzmaw $\bar{\imath}$ (72, 4).
chigayēk, to raise.	chigawak.	chiga $v\bar{\imath}$ (72, 4).

58. Certain verbs, however, form the third person singular of the agrist in a instead of in $\bar{\imath}$. Those of the first conjugation are the following:—

Infinitive.	Past Part. Fem.	Aorist sg. 3.
$amar^{y}\hat{e}k$, to hear.	amarak.	· amara (72, 8).
asht ³ ēk, to remain upright.	ashtak.	ashta (id.).

We often find forms corresponding to ghafam (152, 4; 248, 5), ghafim (249, 3), ghafum (248, 9), or even ghafim (120, 5) written instead of ghafem, and so amarim amarum, or even amarim written for amarem. These are probably mere matters of spelling. See § 4.

² Also written -im, -um, or -īm.

Infinitive.	Pest Part. Pest	April og. &
chal ^s ēk, to proceed.	chalak.	chale (195, 7).
dzaur ēk, to fret.	dzawrak.	dzaura (72, 12).
$ghap^y \bar{e}k$, to bark.	ghapak,	ghapa (205, 11).
ghar ēk, to have open eyes.	gharak.	ghara (205, 9) or gharra.
but ghir ek, to be concealed.	ghirak.	ghirī (205, 10).
ghōr ēk, to rain.	ghōrak.	ghāra (206, 4).
ghwaṣḥ•ēk, to fear.	ghwashak.	ghwaska (205, 6) or ghwaski.
gwash ek, to chide.	gwāṣḥak.	gwāṣḥa (208, 8).
$hin^y \bar{e}k$, to bray.	hinak.	hina (214, 12).
$lag^y \bar{e}k$, to be applied.	lagak.	laga (253, 4).
$lal^{g}\bar{e}k$, to hang.	lalak.	lala (210, 7).
$nar^{g}\hat{e}k$, to low (of a cow).	naŗak.	nara (212, 10).
pakhs'ēk, to pine.	pakhsak.	pakhsa (72, 11).
$p\bar{a}y\bar{e}k$, to last long.	pāyak.	pāya (72, 12).
$ragh^y \bar{e}k$, to amend.	raghak.	ragha (72, 12).
$rap^y \bar{e}k$, to tremble.	rapak.	rapa (198, 10).
rap'ēk, to make a splashing noise.	rapak.	rapa (72, 12).
$ras^y \tilde{e}k$, to arrive.	rasak.	rasa (198, 7).
but ras ēk, to spin.	rasak.	rasī (198, 6).
$sharm^{g}\bar{e}k$, to be ashamed.	sharmak.	sharma (72, 9).
shar ēk, to turn round.	şḥarak.	shara or sharra (203, 9).
shkār ek, to become manifest.	shkārak.	şhkāra (203, 6).
$tray\bar{e}k$, to fear.	trayak.	traya (192, 3).
ts'ēk, to move.	tsawak.	tsawa (69, 14; 70, 1) or tsa (III).
$yas^y \bar{e}k$, to boil.	yasak.	yasa (215, 5).
$zang^{v}\bar{e}k$, to swing.	zangak.	zange (199, 6).
$zhagh^{y}\bar{e}k$, to converse.	zḥaghak.	zhagha (201, 7).

Note the forms gharra and sharra, with doubled r and r.

59. The following verbs of the first conjugation are irregular:—

Infinitive.	Past Part. Fem.	Aorist sg. 3.
$b^{s}\bar{e}k$, to distribute.	bayak.	başhī (73, 1).
$d^{\mathbf{y}}\tilde{e}k$, to see.	$d^{g}ek$.	dzūna (73, 2).
ghamayēk, to be heavy.	ghamawak.	ghama (205, 8).
ghwék, to say.	$ghwar{e}k.$	ghwatsi (206, 7).
kayēk, to do, to make.	$d ilde{a}k.$	kawī (100, 6; 248, 10), kī (100, 7), or ka (24, 4).
$n\bar{a}my\bar{e}k$, to name.	nāmyak.	nāma (213, 3).
$pakh^y \bar{e}k$, to cook.	pyūkhk.	bizī or bizzī (72, 15).
$pray\bar{e}k$, to beat.	prawak.	prai (190, 10).
riyêk, to shave.	rīyēk.	rīna (198, 5).
shīyēk, to buy.	sķīvēk.	sħīna (73, 5).

The verbs $\bar{a}b\bar{a}d^{\prime}\bar{e}k$, to be inhabited (185, 6), $hinl^{\prime}\bar{e}k$ (214, 9), to be ground, and $r^{\prime}\bar{e}k$, to be torn (198, 3), form their agrists periphrastically with the agrist of the verb $sy\bar{o}k$, to become. Thus:—

ābād sū, thou mayst be inhabited.
ābād sa, he or she may be inhabited.

In the case of $\bar{a}b\bar{a}d^{y}\bar{e}k$, the word $\bar{a}b\bar{a}d$ remains unchanged throughout. In the case of $hinl^{y}\bar{e}k$ and $r^{y}\bar{e}k$ it is the past participle that is conjugated with the acrist of $sy\bar{o}k$. This participle, being an adjective, agrees with the subject in gender and number. Thus:—

hinl³ēk sa, he may be ground. hinlak sa, she may be ground. hinlak sin, they may be ground. Similarly for $r^3\bar{e}k$ (fem. ryak).

60. Verbs of the second conjugation are entirely irregular in the formation of the third persons singular of their agrists. A list of the forms will be found in § 38, and all the principal forms of this tense of these verbs will be found in § 62.

It may be noted that one verb of the second conjugation makes the third person singular of its aorist end in a or \bar{a} . This is prawak, to sell, 3rd sing. aorist pra or $pr\bar{a}$. For all other verbs the third person singular ends either in \bar{z} or in a.

61. Formation of the second person singular (92, 13).—There are many varieties of the form of this person, and it is difficult to compile a complete set of rules on the subject. The following rules are as complete as I can make them.

We have seen that the third person singular of this tense ends in $\bar{\imath}$ or in a, and that this division is carried through both the first and second conjugations. The forms of the second person fall into two main divisions based on this grouping. Here, the fact that a verb belongs to the first or second conjugation does not affect the matter, as it does in the case of the third person. We must take the third person singular, as it is formed under the preceding rules just given, and from it form the second person singular. If the third person singular ends in $\bar{\imath}$, the second person is formed in one way, and if it ends in a, the second person is formed in another.

- A. When the third person singular ends in \bar{i} .—In these verbs the stem of the verb is strengthened if possible in the second person singular. Thus, the stem of the verb $ghaf^{i}\bar{e}k$, to weave, is ghaf. The third person singular agrist is $ghaf\bar{i}$, and the second person singular is formed by strengthening the stem ghaf to $gh\bar{e}f$, so that we get $gh\bar{e}f$. We thus get the following rules:—
- (1) If the penultimate vowel of the third person singular is a, the second person singular is generally formed by changing this a to \bar{e} . Thus (93, 6):—

Infinitive.	Aorist. Third Person Sing.	
$gat^y \bar{e}k$, to defeat.	$gat\bar{i}$.	Second Person Sing. $g\tilde{e}t\tilde{\iota}$.
$ghaf^{y}\bar{e}k$, to weave.	ghaf i.	$ghar{e}far{\imath}.$
hanyēk, to remain.	$hany \bar{\imath}$.	$har{e}nyar{\imath}.$
$k\bar{\imath}$ - $ts^{\imath}\bar{e}k$, to summon.	$kar{\imath}$ - $tsavar{\imath}$.	$kar{\imath}$ - $tsar{e}war{\imath}$.
$kay \tilde{e}k$, to do, to make.	$kaw\bar{\iota}, ka.$	kēwī, ka.

VOL. X.

Infinitive.

	rd Person Sing.	Second Person Sing.
		mukhéwi.
		ahrī-tačioi.

also :		,
$t^y \bar{e}k$, to stand still.	tī.	tī.
The following are irregular:	-	
-		ka (also remiles)
$lik^{y}\bar{e}k$, to ascend.	likayī (pp. f. likayak,	
	§ 37) .	
prayēk, to beat.	§ 37). praī.	prīva.
* ·	$pra\bar{\imath}.$	prīw. skērī! (96.4)
prayēk, to beat. shiyōk, to give. tūmb'ēk, to thrust into.	• ,	prīw. ṣḥērī¹ (96, 4). ṭūmbēwī.
	mukhawèk, to knead. shē-ts'ēk, to send. tsal'ēk, to take. wuzmayēk, to test. Sometimes, also a penultimate sāt'ēk, to keep. spar'ēk, to cook. Sometimes the final ē is droppe ghwēk, to say. nim'ēk, to descend. n'ōk, to place. wust'ēk, to fly. these we may add the following. baṣḥ'ēk, to give. wōk, to obtain. zbuṣḥ'ēk, to suck. following, in which it has been sūl'ēk, to become abraded. When the final ē of the third in d person singular is usually the gastak or glastak, to take away. tatak, to drink. mullak, to die. also:— t'ēk, to stand still. The following are irregular:— kayēk, to do, to make.	mukhawék, to knead. shī-ts'ēk, to send. shī-tsawī. tsal'ēk, to take. wuzmayēk, to test. Sometimes, also a penultimate ā or ī is similarly chan sāt'ēk, to keep. sātī. spar'ēk, to cook. bizī or bizzī. Sometimes the final ī is dropped, and no other change ghwēk, to say. nim'ēk, to descend. nimī. nivī. wustēk, to fly. hese we may add the following, in which the stem-voluslyēk, to suck. bash'ēk, to suck. bash'ēk, to suck. bashī. wokī, to obtain. zbush'ēk, to suck. collowing, in which it has been shortened:— sūl'ēk, to become abraded. sūlī. When the final ī of the third person singular is preed person singular is usually the same as the third (94 gastak or glastak, to take away. tatak, to drink. mullak, to die. hrī. mullak, to die. ka or kī (also regular).

¹ We should expect عَابِّةُ سَوَّ for the Aorist 2nd Singular, and Imperative 2nd Singular, but wherever the word occurs (e.g. p. 145, l. 5; 204, l. 6) Ghulām Muḥammad Khān has quite clearly شريوي and mot شريوي . But in speci-

men II, he gives a 2nd person plural imperative *hawaī. Shērī is evidently *kē-rī, i.e. thou mayst give to me, for *shēwī-rī, but the indirect object need not be in the first person, e.g. in *sazā-l aī gunāh gad barābar *kērī, give to him punishment corresponding to the fault (145, 5), it is in the third person.

THE STREET, A LT. LANS IN THE ST. LANS IN THE ST. T. LANS IN THE ST. LANS IN T

B. When the third person singular ends in α .—

(1) The final a is often simply dropped (94, 12). Cf. A. 3. Thus:—

Infinitive.

Acrist.

Third Person Sing. Second Person Sing. $na-w^alak$, to take out. $na-w^ara$. $na-w^ara$. $yas^y\bar{e}k$, to be boiled. yasa. yas.

(2) In such cases, the penultimate vowel is sometimes strengthened by changing it to \bar{a} or \bar{i} (95, 2). Cf. $bash^{y}\bar{e}k$ and $w\bar{o}k$ under head A. 3. Thus:—

 $amar^s\hat{e}k$, to hear.amara. $am\bar{a}r$. $asht^s\hat{e}k$, to remain upright.ashta. $\bar{i}sht$.shustak, to weep.shaua.shaua. $ts^s\hat{e}k$, to go.tsaua. $ts\bar{i}w$.

(3) Sometimes \bar{i} is substituted for the final a (95, 12). Thus:—

 $by\bar{o}k$, to become, to be. ba. hī. hatak, to abandon. zha. $zh\bar{\imath}$ (99, 2). khwalak, to eat, khura, khra. khurī, khrī. rīyēk, to shave. rina. $r\bar{\imath}n\bar{\imath}$. skīnī. shīyēk, to buy. shīna. sī or sū (95, 8). but syōk, to become. 8a.

(4) In two cases the vowel substituted is $a\bar{\imath}$, not $\bar{\imath}$, viz.:—

 $dz\bar{o}k$, to arrive. dza. $dza\bar{i}$ (96, 1). nastak, to sit. na. $na\bar{i}$ (96, 1).

(5) The following are altogether irregular :--

hīshtak, to read.hawa.wīw (96, 4).prawak, to sell.pra or prā.pra or prā (95, 11).paṛyēk, to fry (§ 37).paṛyī.paṛṛaī (190, 8).ghwaṣḥyēk, to fear.ghwaṣḥa or ghwaṣḥī.ghwaṣḥ (205, 6) or ghwāṣḥī (Suppl. 3, 8).

Aorist, second conjugation.

62. As the formation of the agrist in the second conjugation is so irregular, there is here given a table of all the verbs of the second conjugation conjugated in the agrist singular. The plural forms can easily be ascertained from the analogy of the first person singular. Before setting out the table, the whole of the agrist of the verb *khwalak*, to eat (92), is here given, so as to make all plain:—

Singular. Plural.

khur^am or khr^am.
 khuryên or khryên.
 khura or khra.
 khura or khra.
 khura or khra.

In the following table are given, first, those verbs whose third persons singular end in $\bar{\imath}$, and then those whose third persons end in a. In each group the verbs are arranged in alphabetical order.

VOL. X.

A. Verbs whose third persons singular aorist end in t-

Infinitive.		Aorist Siagular.	
	First Person.	Second Person.	Third Person.
brashtak, to burn (intransitive).	bras m.	bras.	brasī.
brashtak, to burn (transitive).	brazam.	brēzī.	brazī or brazzī.
dilak, to reap.	diram.	dir.	dirī.
dranak, to keep, own.	$dar^{a}m.$	dērī.	darī.
gastak or glastak, to carry off.	gl^am or g^al^am .	glī.	$m{gl}m{ar{\imath}}.$
hanzyōk or handzyōk, to remain over.	hazn ^a m.	hazn.	haznī.
maṣḥtak, to break.	$maz^{a}m.$	maz.	mazī.
mullak, to die.	$mr^{a}m$.	mri.	mrī.
na-ghōk, to come out.	nis ^a m.	nis.	nisī.
nwastak, to go to sleep.	nup^am .	nıoī.	ทเงริ.
nyōk, to place.	$n\bar{\imath}$ $u^{\sigma}m$.	nīw.	nīicī.
pishtak, to write.	pis m.	pis.	pisī.
sķiyōk, to give.	shawam.	șķērī.	skawi or skawwi.
tatak, to drink.	$tr^am.$	$trar{\imath}.$	trī.
wōk, to get.	$waw^a m$.	wāw.	icaroi.
wriyōk, to take.	$v^{a}r^{a}m$.	w.	wri or wrri.

B. Verbs whose third persons singular agrist end in a.-

Infinitive.	Ac	rist Singular.	
	First Person. Se	econd Person.	Third Person.
$agh\bar{o}k$, to reach, to be born.	$awas^am$.	aurs.	awasa.
$by\bar{o}k$, to be, to become.	$b^a m$.	$bar{\imath}.$	ba.
$dz\bar{o}k$, to arrive.	$dz^{\alpha}m$ or $dzaw^{\alpha}m$ (152, 4).	$dzaar{\imath}.$	dza.
$dz\bar{o}k$, to propel.	$d^{a}m$.	$dar{\imath}.$	da.
$dz\bar{o}k$ or $z\bar{o}k$, to strike.	dzan°m, zan°m.	dzan, zan.	dzana, zana.
ghwaṣḥtak, to fall.	$ghwaz^{a}m$.	ghwaz.	ghwaza.
hatak, to abandon.	$zh^a m$ or $zhay^a m$,	$zhar{\imath}.$	zha.
hishtak, to read.	$haw^a m$.	เงเิง.	hawa.
khanak, to laugh (265, 7).	$khan^{a}m$ (264, 2).	khan (264, 2).	khana (265, 8).
khwalak, to eat.	khur'm or khr'm.	khurī or khrī.	khura or khra.
kwulak, to copulate.	$k \bar{\imath} n^a m$.	$k\bar{\imath}n\bar{\imath}.$	$k\bar{\imath}$ na.
nastak, to sit.	$n^{a}m$.	$naar{\imath}.$	na.
$na-w^a lak$, to take out.	na - v^ar^am .	na-war.	na-wara.
$n\bar{o}k$, to seize.	$nis^a m$.	nis.	nisa.
prawak, to sell.	$prar{a}w^am$.	pra or prā.	pra or prā.
shustak, to weep.	sḥaw ^a m.	ṣḥīw.	șķawa.
$sy\bar{o}k$, to become.	$s^a m$.	sī or sū.	8a.
waghyōk, to enter.	$war{e}s^am.$	wēs.	$oldsymbol{var{e}}oldsymbol{s}a$.
walak, to bring.	$w^a r^a m$.	$w^{a}r$.	wara or warra.
$wa-zy\bar{o}k$, to slay.	$wazn^a m.$	wazn.	wazna.

Tenses formed from the Aorist.

63. Omitting, for the present, the consideration of the imperative, two other tenses are formed from the aorist. These are the present and the future. The former is made by adding the particle $b\tilde{u}$, and the latter by adding the particle $s\tilde{u}$, to the aorist.

It will be remembered that these particles are also used with the past participle to form the imperfect and the future perfect, respectively. The various persons of the past tense are formed by the addition of pronominal suffixes to the past participle. These suffixes are moveable, and are attached, not to the past participle, but to $b\bar{u}$ or $s\bar{u}$, when either of these follows the verb (see § 48 and § 51).

With the tenses formed from the agrist this is not the case. The persons of the agrist are indicated by real verbal terminations, and not by pronominal suffixes. These terminations are not detachable, and hence are never added to $b\bar{u}$ or $s\bar{u}$, when either of these follows the agrist (82, 13; 84, 12).

The $b\bar{u}$ or $s\bar{u}$ may either precede or follow the agrist. The order in which they stand in reference to other particles is described in § 139.

64. The Present.—The present is formed by prefixing or suffixing $b\bar{u}$ to the agrist (100, 10). Thus:—

Singular.				
	~•		•	
		20.07	m I	a T

Plural.

1. bū gho	fam, I weave.	$b\bar{u}$ ghafy $\bar{e}n$, we weave.
2. bū ghē	fi, thou weavest.	$b\bar{u}$ ghafa $\bar{\imath}$, ye weave.
3. bū gha	$f\bar{\imath}$, he weaves.	bū ghafin, they weave.

This tense is also used with the meaning of a present definite, 'I am weaving,' etc.

This tense is also used (83, 1; 106, 3), in the case of verbs that are not nominal compound verbs, as a habitual present, as in af^a sarai $b\bar{u}$ hamēsha $g\bar{a}k^a$ khura, that man habitually eats meat. If the verb is a nominal compound, formed with a copulative verb and a noun, then the present tense of the verb $by\bar{b}k$, to be, to become, is used as the copula, to give the force of a habitual present. Thus, af^a sarai $b\bar{u}$ hamēsha randz $\bar{u}r$ ba, that man is habitually sick.

65. The Future.—The future is formed by prefixing or suffixing $s\tilde{u}$ to the agrist .(101, 6). Thus:—

Singular.

Plural.

1. $s\bar{u}$ ghaf m, I shall weave.	sū ghafyēn, we shall weave.
2. $s\bar{u}$ $gh\bar{e}f\bar{\imath}$, thou wilt weave.	sū ghafaī, ye will weave.
3. sū ghafī, he will weave.	sū ghafin, they will weave.

66. Aorist with Pronominal Suffixes.—The aorist of a transitive verb may take pronominal suffixes to indicate the object, and must take one if the object itself is not otherwise indicated in the sentence. The suffixes added are those given in § 20 (b), and are here repeated for ready reference:—

```
am or (after a vowel) m, me.
at or (after a vowel) t, thee.
an or (after a vowel) n, us.
an or (after a vowel) n, you.
a (after a consonant) or wa, him, her, it.
a or (after a vowel) wa, them.
```

The following table gives all the forms of the aorist of the verb $ghaf^{\bar{j}}\bar{e}k$, to weave, with these suffixes (113). The present and future are, of course, the same, with the addition of $b\bar{u}$ or $s\bar{u}$, respectively.

	me.	thee.	him, her, it, or them.	us, you.
ghaf'm, I may weave.	ghaf am-am.	ghafam-at.	ghafam-a, or ghafam-wa.	ghaf ^a m-an.
ghēfī, thou mayst weave.	ghēfi-m.	ghēf i -t.	ghēfī-wa.	ghēfī-n.
ghafi, he may weave.	ghafī-m.	ghafi-t.	ghafi-wa.	ghaf ī- n.
ghafyēn, we may weave.	ghafyēn-am-	ghafyēn-at.	ghafyēn-a, or ghafyēn-wa.	ghafyēn-an
ghafai, ye may weave.	ghafaiy-am.	ghafaiy-at.	ghafaī-wa, or ghafaiy-a.	ghafaiy-an.
ghafin, they may weave.	ghafin-am.	ghafin-at.	ghafin-wa.	ghafin-an.

The second person plural should be noted, as the forms are slightly irregular.

Imperative.

67. In the imperative, the first person singular and plural and the second person plural are the same as in the agrist (99, 7-11). There are special forms for the second person singular and for the third person. In the third person, the singular and the plural are the same. The following is an example of the conjugation of the imperative. The verb taken is ghaf'ēk, to weave:—

Singular.

Plorel

- 1. ghaf om, let me weave.
- ghafyēn, let us weave.
- 2. ghēf or ghēf on, weave thou.
- ghafai, weave ye.

3. ghafun or ghafon, let him weave. ghafun or ghafon, let them weave.

The only forms that present difficulties are the second person singular and the third person.

68. A. Formation of the second person singular (96, 9).—

(1) When the second person singular of the aorist ends in $\bar{\imath}$ preceded by a consonant, and is of two or more syllables, the second person singular of the imperative is formed by dropping the $\bar{\imath}$. Thus, from $gh\bar{e}f\bar{\imath}$, thou mayst weave, we get $gh\bar{e}f$. To this the letters ^{o}n may be added (96, 13), as in $gh\bar{e}f^{o}n$. This form with ^{o}n is the more usual of the two, and with some verbs appears to be the only one used. The following are examples:—

 1		
Infinitive. man ^y ēk, to obey. mukhaw ^y ēk, to knead. wuzmayēk, to test. pakh ^y ēk, to cook. kayēk, to do, to make.	Aorist, sing. 2. mēnī. mukhēwī. wuzmēwī. bēzī. kēwī or ka.	Imperative, sing. 2. mēn, mēn ^a n (249, 2). mukhēw, mukhēw ^a n (97, 3). wuzmēw, wuzmēw ^a n (97, 4). bēz ^a n (97, 5). kēw (97, 6), kēw ^a n (97, 6; 100, 6; 162, 6; 248, 4; 252, 15;
$d^{g}\hat{e}k$, to see.	$doldsymbol{z}ar{u}nar{\imath}.$	253, 11), or ka. (See No. 3, below.) dzūnon (76, 6).

Infinitive.	Aorist, sing. 2.	Imperative, sing. 2.
Irregular is:—		
<i>sķiyōk</i> , to give.	șķērī.	sha (246, 15; 261, 6), or shērī
		(145, 5).

(2) When the second person singular of the agrist consists of one syllable only, and ends in a vowel, the second person singular of the imperative is generally formed by substituting $\bar{o}n$ or un for the final vowel. Thus:—

$dz\bar{o}k$, to propel.	$dar{\imath}.$	$d\bar{o}n$ (247, 14).
gastak or glastak, to carry off.	$m{g}m{l}ar{\imath}.$	glon (99, 5).
hatak, to abandon.	$zhar\iota.$	$zh\bar{o}n$ (99, 5).
khwalak, to eat.	khurī or khrī.	khurön (166, 9) or khrön (99, 5).
mullak, to die.	mri.	$mr\bar{o}n \ (99, 5) \text{ or } mr\bar{i} \ (75, 8).$
tatak, to drink.	$trar{\imath}.$	$tr\bar{o}n$ (99, 5).
$sy\bar{o}k$, to become.	$sar{u}.$	$sun\ (251,\ 2).$
:But :		•
$by\bar{o}k$, to be, to become.	$bar{\imath}.$	$b\bar{\imath}$ (105, 8).

In other words, these verbs make the second person singular the same as the third person.

(3) In all other cases, the second person singular of the imperative is the same as the second person singular of the agrist (97, 7). Thus:—

Infinitive.	Aorist, sing. 2.	Imperative, sing. 2.
dilak, to reap.	dir.	dir.
$ghw\bar{e}k$, to say.	ghwats.	ghwats.
kayēk, to do, to make.	ka.	ka (100, 7; 248, 4; 250, 8).
		(See, also, No. 1.)
nastak, to sit.	naī.	naī (100, 3).
$ny\bar{o}k$, to place.	$nar{\imath} vo.$	$nar{\imath}w$.
prawak, to sell.	$prar{a}.$	$m{prar{a}}.$
$ri-dz\bar{o}k$, to come.	$rar{\imath}$ - $dzaar{\imath}$.	$r\bar{\imath}$ -dza $\bar{\imath}$ (100, 3).
welak, to bring.	$w^a r$.	$w^a r$.
wriyōk, to take.	$w^a r$.	$w^a r$.

69. B. Formation of the third person singular and plural (98, 2).—The plural of the third person is the same as the singular. The third person is formed from the third person singular of the agrist by substituting the syllable un or $\bar{o}n$ for the final i or a. Thus:—

Infinitive.	Aorist, sing. 3.	Imperative, sing. and plur. 3.
$amar^y \tilde{e}k$, to hear.	amara.	amarun or amarōn.
$kay\bar{e}k$, to do, to make.	kaīcī.	kawun or kawon.
khwalak, to eat.	khra.	khrun or khr $\bar{o}n$ (62, 1).
$mukharo^y \bar{e}k$, to knead.	$mukhaw\overline{\imath}.$	mukhawun or mukhawōn.
$ny\bar{o}k$, to place.	$n\bar{\iota}w\bar{\iota}.$	nīwun or nīwōn.
$w^a lak$, to bring.	$w^a ra.$	warun or waron.
$wuzmay\bar{e}k$, to test.	wuzmawī.	wuzmawun or wuzmawōn.
For prawak, to sell, we have:		
prawak, to sell.	pra or $prar{a}$.	prāwun or prāwon.

178

70. Other persons of the Imperative.—As already stated, the other persons follow the acrist. There are a few exceptions. Viz.:—

The verbs $dz\bar{o}k$, to arrive, and nastak, to sit, form the second person plural either regularly, as in $dza\bar{\imath}$ and $na\bar{\imath}$, which happen to be the same in form as the second person singular, or else optionally lengthen the a, so that we get $dz\bar{a}\bar{\imath}$ and $n\bar{a}\bar{\imath}$, so as to distinguish them from the singular (100, 4).

The verb $kay\bar{e}k$, to do, to make, has a polite second singular imperative $k\bar{i}$, as in $gh\bar{u}n k\bar{i}$, please make hidden, i.e. please hide (100, 9).

Imperative, second conjugation.

71. As the formation of the imperative of the verbs of the second conjugations presents difficulties owing to the irregular formation of the aorist, there is here given a table of all the verbs of the second conjugation, arranged in alphabetical order, and conjugated in the imperative singular. The first and second persons plural may easily he ascertained from the analogy of the first person singular, and the third person plural is the same as the third person singular. Before setting out the table, the whole imperative of the verb khwalak, to eat, is here given, so as to make all plain:—

Singular.

Plural.

1. $khur^a m$ or $khr^a m$.

khuryën or khryën.

2. khurön or khrön.

khuraī or khraī.

3. khurun, khurōn, khrun, or khrōn. khurun, khurōn, khrun, or khrōn.

In the following table, in the column for the third person, only the form in $\bar{o}n$ isgiven. The form in un can be obtained by substituting u for \bar{o} .

Infinitive.	IMPERATIVE SINGULAR.			
	First Person.	Second Person.	Third Person	
$agh\bar{c}k$, to reach, to be born.	awas ^a m.	awas.	awasōn.	
brashtak, to burn (intransitive).	$bras^a m$.	bras.	brason.	
brașhtak, to burn (transitive).	braz*m.	brēz, b r ēz ^a n.	brazōn.	
byōk, to be, become.	$b^a m$.	b₹.	bōn.	
dilak, to reap.	diram.	dir.	diron.	
dranak, to keep, own.	$dar^a m$.	dēr.	darōn.	
$d_{oldsymbol{z}ar{o}}k$, to arrive.	$dz^a m$ or $dzaw^a m$.	dzaī (plural dzaī or dzāī).	dzōn.	
dzāk, to propel.	$d^{a}m$.	$dar{o}n$.	dōn.	
dzōk or zōk, to strike.	$dzan^a m$ or $zan^a m$.	dzan, zan.	dzanōn, zanōn.	
gastak or glastak, to carry off.	$gl^a m$ or $g^a l^a m$.	$gl\bar{o}n$.	$glar{o}n$.	
ghwa sh tak, to fall.	ghwaz ¹ m.	ghwaz.	ghwazōn.	
hanzyōk or handzyōk, to remain over.	$hazn^am.$	hazn.	haznōn.	
hatak, to abandon.	zham or zhayam.	zhōn.	zhōn.	

Infinitive.	IMPREATIVE SINGULAR.			
Inhitive	First Person.	Second Person.	Third Person.	
hīshtak, to read.	haw ^a m.	wiw.	hawōn.	
khanak, to laugh (265, 7).	khanam (264, 2).	khan (264, 2).	khanōn.	
khwalak, to eat.	khuram or khram.	khurōn, khrōn.	khurōn, khrōn.	
houlak, to copulate.	kīnam.	kīn.	kīnōn.	
mashtak, to break.	$maz^am.$	maz.	mazōn.	
mullak, to die.	mr^am .	mrī.	$mr\bar{o}n$.	
na-ghōk, to come out.	nis*m.	nis.	nisōn.	
nastak, to sit.	$n^a m$.	nai (plural nai or nāi).	nōn.	
na-welak, to take out.	na-w ram.	na - $w^a r$.	na-w ^a rōn.	
nōk, to seize.	nisam.	nis.	ท เร อีก.	
nwastak, to go to sleep.	nwam.	nwōn.	nwōn.	
$ny \delta k$, to place.	n ī w ^a m.	nīw.	nīwōn.	
pishtak, to write.	pisam.	pīs, pīsan.	pisōn.	
prawak, to sell.	prāwam.	pra or prā	prāwōn.	
shustak, to weep.	ṣḥaw ^a m.	ṣḥīw.	skawon.	
shiyōk, to give.	ṣḥaw ^a m.	ṣḥa or ṣḥērī.1	skawōn.	
syōk, to become.	$s^a m$.	sũ or sun.	sōn.	
tatak, to drink.	$tr^{a}m.$	trōn.	tron.	
waghyōk, to enter.	w ēs ^{a}m .	wēs.	wēsān.	
walak, to bring.	$w^a r^a m$.	$w^a r$.	$w^a r \bar{c} n.$	
wa-zyōk, to slay.	wazn ^a m.	wazn.	waznōn.	
wōk, to get.	waw ^a m.	wāw.	wawōn.	
wriyōk, to take.	$w^a r^a m$.	$w^a r$.	$w^a r \bar{o} n$.	

¹ 2nd pers. pl. skawai (II). Skārī is literally 'give to me.' See § 61 note. Ska is spelt ra in the List of Words. Nos. 84 and 234. See the remarks on the letter sk in § 2.

^{72.} Imperative with pronominal suffixes.—As in the acrist, the imperative of a transitive verb may take pronominal suffixes to indicate the object, and must take one if the object is not otherwise indicated in the sentence. The suffixes added are those given in § 20 (b), and also in § 66 dealing with the acrist with suffixes. Thus, $gh\bar{e}f$, we are thou; $gh\bar{e}f$ -a, we are thou him or it. The conjugation of the imperative with suffixes presents no difficulties, and it is unnecessary to set it out in full. The principle is the same as that indicated in § 66 for the acrist, the forms of the imperative being used instead of those of the acrist.

CHAPTER VI.

INDECLINABLES.

Adverbs.

```
73. The following are Adverbs of Manner:—

pa p<sup>a</sup> rang, in this manner, thus (22, 14).

pa f<sup>b</sup> rang, in that manner (id.).

ts<sup>a</sup> rang, how? (29, 7).

kundak, perhaps (164, 5).

kaska, perhaps (164, 5).

har ka, God knows (164, 10).

har kēw<sup>a</sup>n, God knows (164, 10).

wār ka, God knows (164, 10).

gudz, only (162, 9).

sa, for no particular reason (166, 11).

gōyā, as though (163, 7).

tsak<sup>a</sup>, as (163, 13).
```

Of the above, kundak and kaska indicate hope or uncertainty (164, 2), as in:— kundak (or kaska) rī Māshk dza, perhaps Māshk may come, or there is a hope that he may come (164, 6).

The words har ka, har kēw^an, and wār ka indicate doubt or ignorance, as in:—
har ka ka ṣāḥibb-ir sū dzök ba ka nakk-ir sū dzök ba, God knows whether the
Sāhib will have come or whether he will not have come (164, 12).
har kēw^an ka ts^a rī sū ghwatsī, God knows what he will say to me (165, 1).

Similarly war ka.

 $\dot{G}udz$ is employed to particularize a condition. Thus, $b\bar{u}$ nastak ba, he is $(b\bar{u}\ ba)$ seated, but $gudz\ b\bar{u}$ nastak $ba\ (162, 11)$, he remains seated and does nothing else (Hindī, $baith\bar{u}-h\bar{\iota}\ raht\bar{u}\ hai$). So, $gudzdz-al\ b\bar{u}\ dza\bar{\iota}\ (162, 12)$, it is thou who must go (and not anyone else), Hindī $t\bar{u}-h\bar{\iota}\ j\bar{u}$.

Sa is used like the Hindī $ais\bar{e}-h\bar{\imath}$, $y\bar{u}-h\bar{\imath}$. Thus, sa nastak-am, I just sat down (166, 13), i.e. I did not sit for any particular purpose, but sat doing nothing=Hindī $y\bar{u}-h\bar{\imath}$ bai $th\bar{a}$. Sa hany (167, 1), I am just sitting, Hindī $y\bar{u}-h\bar{\imath}$ bai $th\bar{a}-h\bar{u}$.

 $G\bar{o}y\bar{a}$ comes at the beginning of a sentence, as in $g\bar{o}y\bar{a}$ hits-at and $d\bar{o}k$, as though thou didst nothing (164, 2).

An example of $tsak^a$ used as an adverb is $tsak^a$ mzarai $a\bar{\imath}$ ba, as is a tiger (163, 13). $Tsak^a$ is also used as a preposition, see § 80.

```
74. The following are Adverbs of Place:—
i-d<sup>a</sup>, here (23, 1; 55, 11), hither (257, 13).
i-d<sup>a</sup>-l, here to it, in this direction, hither (257, 12).
pa-p<sup>a</sup>, here (23, 6).
i-w<sup>a</sup>, there (23, 1; 55, 11), thither.
i-w<sup>a</sup>-l, there to it, in that direction, thither (160, 10).
```

```
pa-f^{*}, there (23, 7).
gudā, where? (29, 7; 55, 13).
i-nar, at home, inside (55, 7).
winar, inside (56, 5).
i-bēzh, up, above, outside (id.).
pa-b\bar{e}zh^a, upwards, to above, to outside (id.).
i-nīshta, outside (id.).
pa-nisht, to the outside (56, 7).
i-mukha, in front (id.).
pa-mukha, to the front (id.).
i-p\bar{e}ts^{o}, behind (56, 9).
pa-p\bar{e}ts^a, to behind (56, 7).
i-dz\bar{e}m^{\circ}, below (56, 9).
pa-dzēma, to below, downwards (id.).
palau, in the direction of (id.).
i-pa palau, in this direction (23, 3).
i-f' palau, in that direction (id.).
tsēn palau, in what direction? (29, 9; 30, 1).
pa-tsat, afterwards, behind (56, 11).
i-teanga, near (id.).
bōī, near (56, 13).
pēts, far (id.).
in\bar{e}l^{o}, in possession (56, 11).
pa-sa, hither (56, 11), in this direction (167, 2), behind (167, 2).
mukh pa-mukh, face to face, facing (56, 13).
i-khwarints, on the right (id.).
pa-khwarints, towards the right (57, 1).
i-tsēlo, on the left (id.).
pa-tsēla, towards the left (id.).
i-mandz inar, in the middle (57, 3).
pa-porkai, with, together with (id.).
sar, together, in one place (137, 4).
```

Of the above, pa sa is used in sentences such as pa-sa sun, come up here, or go behind and follow me (167, 2), equivalent to the Hindi pichhē hō or idhar hō. Pa sa is also used as a postposition, meaning 'except' (§ 88).

It will be observed that many of the above are nouns in the locative or instrumental case, governed by the prepositions i or pa respectively. Without the prepositions, these are nouns of place. Thus, $b\bar{e}zh$, the place above; $n\bar{i}sht^a$, the place outside. So, $b\bar{e}zh$ sir $h\bar{a}$, the place above is good; but haf^a sarai i- $b\bar{e}zh$ sir $h\bar{a}$, that man is good on the top, i.e. is good externally (57, 10).

As examples of the use of sar^a , we can quote $a-k^as\bar{\imath}$ sar^a hangin, the Wazīrs are sitting together (137, 5).

```
75. The following are Adverbs of Time:
hō waqt, now (23, 1).
pērī, now (58, 11).
```

```
haf waqt, then (23, 1).
  ts waqt, when? (29, 7).
  ka, when, ka haf's norī khwālk, mun azz-al dzōk-am, when he ate, then I went to
       him (88, 11). Also used in conditional sentences.
  k\bar{a}n, when ? (29, 9).
  ta, then (59, 1). Also used in conditional sentences.
  ts'n, today (58, 2), ts'n-a nōṛī khwālk, he ate bread today (178, 10).
  prān, yesterday (58, 2).
  indzān, the day before yesterday (id.).
  indzān ta-mīn bī ryūz, two days before yesterday (id.).
  sabā, tomorrow (58, 4).
  bī şabā, the day after tomorrow (id.).
  m\bar{i}n şabā, two days after tomorrow, in future (id.).
  For 'night,' the word show is added to the foregoing.
                                                            Thus,—
       tsan shāw, tonight (58, 6).
       prān shīw, yesterday night, last night, and so on (id.).
   w\bar{e}g\bar{a}, tonight (58, 7).
  pa-ryūz, by day (58, 9).
  pa-shīw, by night (id.).
   asal, this year (id.).
  parsal, next year (id.).
   indza sal, next year but one (58, 11).
   ka sē, since (165, 4).
   tson ka, as long as (165, 5).
   mīn, yet, yet more, still more (58, 11; 165, 13).
   t^al, always (151, 8).
Examples of the use of the last four are:—
   ka sẽ tũ bādshāh syōk-a, i-mund-ghal inar aī ghwar nak handzyōk hā, since thou
        becamest king, no fat has been left on even the tail of the fat-tailed sheep
        (165, 6; 264, 3).
   tson ka az bam, tū ga bī, as long as I remain, do thou also remain (165, 7).
   m\bar{\imath}nn-ir nak\ dz\bar{o}k\ h\bar{a}, he is not yet come (166, 1).
   mīn wīrān syōk, nay, he became still more sick (166, 2).
   haf a bū ka sir ba, tal bū sir ba, he who is (by nature) good, is always good
   hafa sarai naukar nak syök, mīn jurmāna ga syök, that man did not become a
        servant (i.e. get employment), nay rather, a fine even was imposed upon him
        (166, 4).
76. The following are Adverbs of Cause or Reason:
   dzik^a, for this reason, because (23, 1; 248, 9).
   ta-p^a p\bar{a}r^a, for this reason (23, 3).
   ta-f^a par^a, for that reason (id.).
   ta-ts^a p\bar{a}r^a, for what reason?, why? (29, 14; 248, 8).
 k\bar{\imath} or kiy\bar{e}, why? (29, 10).
```

77. The following are Adverbs of Negation and Affirmation:---

```
nak, not (102, 3).

mak, not.

ma, not.

nahī, not (102, 8).

na . . na, neither . . . nor.

hā, yes.

hō ya, yes.

na, no.

na a, no.

sir, good.

bē-shaki, without doubt.

a-rākh², the truth, it's true.
```

Of these, nak is the ordinary negative (102, 4), as in nak khwalak, he did not eat; nak bū khura, he does not eat. With the imperative, mak is used instead of nak, as in har ts^a mak khrōn, do not eat everything (62, 1). Ma occurs only once instead of mak, viz. in a-zbān ma khwurtēw^an, do not wag (your) tongue (246, 2). It is borrowed from Paṣḥtō. On p. 102, l. 8, Ghulām Muḥammad Khān states that nahī is used with the imperative, but he gives no example, and I have not met the word elsewhere. In negative phrases, na is only used when repeated, as in na 'Amr rī dzōk, na Bakr, neither 'Amr came, nor Bakr (156, 12).

The preceding negatives can be strengthened by the addition of the word hargiz or $n\bar{a}m\bar{i}$. Thus, hargiz $a\bar{i}$ sakhal $k\bar{a}r$ mak $k\bar{e}w^a n$, on no account do such an action; $n\bar{a}m\bar{i}-m$ $h\bar{a}$ $k\bar{a}r$ nak $d\bar{o}k$ $h\bar{a}$, I did not do this deed at all (162, 4).

The words for 'yes' and 'no' (160, 7) require no explanation. As an example, we have the question $t\bar{u}$ -l ga i- w^a -l $dz\bar{o}k$ $by\bar{o}k$ -a, hadst thou also gone to it there, i.e. thither? The answer might be $h\bar{a}$ or $h\bar{o}$ ya, yes; or it might be na or na a, no (160, 10). Sir (160, 12), $b\bar{e}$ -shaki (161, 2), and a- $r\bar{a}kh^a$ (161, 2), as their meanings shew, are emphatic affirmatives.

These words are often repeated, as in $h\bar{a}$ $h\bar{a}$, yes, yes; na na, no, no; sir sir, very good, and so on (160, 13).

78. Adverbs of Emphasis.—The particles $a\bar{\imath}$ and $d\bar{\imath}$ are mainly employed to distinguish the subject of a sentence from the object, and in this connexion are dealt with at length in the syntax (see § 100). They are also used as emphatic or discriminating particles. In order to discriminate or emphasize a singular word, $a\bar{\imath}$ is used. If the word is plural, $d\bar{\imath}$ is used.

In the first place they are used to discriminate between a number of contrasted actions. Thus:—

kū-Zaid gaḍ dī bī makhlūq ga buk-in; khō bī kukk-ir dī nak dzōk, Zaid aī rī dzōk, on the one hand, other persons also were with Zaid; but, on the other hand, no one else came; Zaid alone came (suppl. 2, 8). Here the plural noun makhlūq (it is a borrowed word, already in the plural) is discriminated by the particle dī, which is translated 'on the one hand.' The fact that all the people were there, is contrasted with the fact that all did not come. The

indefinite pronoun $b\bar{\imath}$ kuk, anyone else, is here looked upon as a plural, although grammatically in the singular, and therefore also takes $d\bar{\imath}$, which is here translated 'on the other hand,' the fact that no one else came being contrasted with the fact that other people were there. Again, the fact that no one else came is contrasted with the fact that Zaid did come, and hence the singular noun Zaid is discriminated by the particle $a\bar{\imath}$, which indicates that it was Zaid, and not anyone else, that came.

When there is no contrasting, then the presence of $a\bar{\imath}$ or $d\bar{\imath}$ is not required. For instance, in the sentence, Zaid wa az $r\bar{\imath}$ -dzāk-in; hafo nastak wa az $r\bar{\imath}$ -dzōk-am, Zaid and I came; he sat down, and I came on (suppl. 2, 1). Here although the fact that Zaid sat down is discriminated from the fact that I came on, there is no emphatic contrast between the two actions, both of which have the connecting link of the fact that both Zaid and I came, even if we did not come together. Hence here $a\bar{\imath}$ is not used.

Other examples of this use are:—

- haf sr hā; hafō aī sir nak hā, she is good; on the other hand, he is not good (239, 10, 11).
- hō aī tar-mun marzā hā; hā aī ta-fⁿ khwār hā, on the one hand, this is my brother; on the other hand, this is his sister (242, 10, 11).
- marzawī-t tsōn hin? dyō-m marzā hin; sa-m aī tarbūr hā, how many brothers hast thou? I have two brothers, and, as for cousins, I have one (242, 15; 243, 1, 2).
- ghrās aī hā, ka ziyar aī hā? Sūṣḥ aī hā, is it black, or is it yellow? (nay) it is red (250, 13, 14).
- 79. The same two words are also used as pure particles of emphasis, much like the Hindī hī. This, in fact, has already appeared in the last clause of the first sentence above quoted,—Zaid aī rī dzōk, it was only Zaid that came, or, in Hindī, Zaid-hī āyā. So we have:
 - az aī bū sakhkhal bē-parwā girz^am; bī kuk dī nak hā, I alone (Hindī maĩ hī) wander about thus unconcernedly; on the other hand, there is no one else (who does so) (suppl. 3, 5).
 - tū aī bū sakhal ghwāṣḥī; bī kuk-a aī bū spuk ga nak giṇī, thou alone fearest such a man; on the other hand, no one else considers him to be even a dog (suppl. 3, 8).
 - mākh dī sakhkhal hyēn, ka kū-tū kī bū hīts nak ghwatsyēn, we alone are such that we say nothing to thee (suppl. 3, 11).
 - az aī bū tū zay m; bī kuk dī bū nak zay m, I long for thee alone; on the other hand, for no one else do I long (suppl. 3, 13). Note that aī and dī here refer to the objects of the two phrases.
 - saṛai kī aī zarka pakār hā, it is a wife that (or only a wife) is necessary to a man (suppl. 4, 1).
 - ka i-maṣḥī izar aī ga ikhtiyār nak dērī, mun kū-tū lāsta dī tsa zayam, if thou possess no authority even over flies, then what may I ask from thee? (141, 2).

ta-randzūr pār aī a-pētsuf zarūr hā, abstemiousness is necessary only for the sick (145, 11).

ka sẽ tũ bādshāh syōk-a, i-mund-ghal inar aĩ ghwar nak handzyōk hã, since thou becamest king, no fat has been left even on the tail of the fat-tailed sheep (165, 6; 264, 3).

az aī pa-khwai hā kār dōk, it was I who did this deed by myself (176, 1).

tū aī hushyār hai, it is thou who art intelligent (239, 15).

az aī khēla ham, it is I who am ignorant (240, 3); but

az stir h*m, I am weary (239, 12).

a-kulannī-t tson hin? so-m aī kulān hā; syī-m dūwo hā, how many sons hast thou? I have only one son; I have a daughter (243, 6-8).

 $h\bar{a}$ $d\bar{u}k^a$ $a\bar{i}$ $tar-t\bar{u}$ $d\bar{u}w^a$ $h\bar{a}$, is this the girl that is thy daughter? (243, 9). $h\bar{o}$ kulanak $a\bar{i}$ $tar-t\bar{u}$ kulān $h\bar{a}$, is this the boy that is thy son? (243, 10).

Prepositions and Postpositions.

80. Prepositions.—The prepositions pa, ta (or tar), and i (or $k\bar{u}$), forming respectively the instrumental, genitive, and locative cases, have already been dealt with in § 10. Other prepositions are:—

bē, without, except.baghair, without, except.tsak^a, like.

The preposition be is generally prefixed to the governed noun direct. Thus:

bē sarai rī harr dzāk-in, all came except the man (159, 11).

bē gap har ts di dī hin, there is (lit., are) everything except a stone (159, 11).

If a demonstrative pronoun follows, it is put into the oblique form. Thus, $b\bar{e}$ f, without that; $b\bar{e}$ p^a , without this (159, 3). But if a personal pronoun follows, it is put into the locative, as in—

bē kū-mun, without, or except, me (159, 5). bē kū-mākh, without, or except, us (159, 6).

bē kū-ra, without, or except, this (person) (id.).

bē kū-tū harr rī dzāk-in, all came except thee (158, 12).

The preposition baghair always governs the locative case (159, 1). Thus:

baghair i-f", without, or except, that (159, 6).

baghair i-pa, without, or except, this (id.).

baghair kū-tū, without, or except, thee (159, 7).

baghair kū-mun, without, or except, me (id.).

baghair i-sarai, without a man (159, 1).

baghair i-gap, without a stone (159, 2).

The preposition $tsak^a$, like, governs the genitive (163, 7), as in $tsak^a$ ta-marzā, like a brother (163, 12); $tsak^a$ ta-mērsh, like the sun (163, 12). $Tsak^a$ is also used as an adverb, see § 73.

```
81. Postpositions.—The following postpositions govern the genitive:—
       ghondak, like (163, 7).
       pa-rang, like (id.).
       para, for (145, 8).
       in\bar{e}l^a, in possession of, equivalent to Hindi p\bar{a}s.
       i-tsanga, near.
    Thus:-
       ta-marzā ghōndak, like a brother (163, 11).
       ta-mērsk pa-rang, like the sun (163, 11).
       ta-falānai pāra bū kayam, I make for so and so (145, 9).
       ta-randzūr pār aī a-pētsuf zarūr hā, abstemiousness is necessary only for an in-
            valid (145, 11).
       kwalanak-am ta-adab p\bar{a}r^a dz\bar{o}k, I beat the boy for the sake of politeness, i.e. to
            teach him manners (179, 4).
     The word inela means 'from him,' 'from her,' 'from it,' or 'from them' (134,
15), and will be further discussed under the head of the syntax of pronouns (§§ 117, 120).
It also means 'in his, her, or its possession,' as in inel^a h\bar{a}_r it is in his possession.
From this is developed its use as a postposition, as in:—
       ta-sarai inēla, in possession of the man.
       tar-mun inēl<sup>a</sup> hā, it is in my possession (146, 1).
       tar-kuk inēla hā, to whom does it belong? (250, 3).
       tar^a inēl^a hā, it belongs to this man (250, 4).
     In this meaning it also takes the pronominal suffixes of the genitive (see § 20 (d)).
Thus:
       inel<sup>a</sup>-m hā, it is in my possession (135, 7).
       inel-t ha, it is in thy possession (135, 7).
       inel<sup>a</sup>-wa hā, it is in his possession (135, 5).
     If the particle di, used in ablatival sentences (see §§ 83, 126), is added, then these
mean 'from me,' 'from thee,' 'from him,' etc. Thus:-
        inēl<sup>a</sup>-mm-al d\bar{\imath} ts<sup>z</sup>ēk, he went away (hal ts<sup>z</sup>ēk) from me (136, 4).
        inēla-tt-ir dī dz\bar{o}k, he came (hir dz\bar{o}k) from thee (136, 4).
     For i-tsang we have hafo pishtak ka sa sarai tar-mun i-tsang hanyi, he wrote-
that 'a man is sitting near me' (151, 13).
     82. The following postpositions govern the locative:—
        liki, to, into, for.
        k\bar{\imath}, to, into, for.
       lāst, from.
        i-rāsta, beginning from.
        ta-minak or ta-minshaka, up to.
        inar, in.
        izar, on.
                                                                                         2 c
    VOL. X.
```

gad, girad, or girgad, with, together with. pa-sa, without, except.

Examples of the use of the above postpositions are the following:-

likī and kī.—In the following kī may be used throughout instead of likī and vice versâ:—

 $i-d\bar{e}r^a$ likī-l (or $k\bar{\imath}$ -l, 144, 9) $ts^a\bar{e}k$, he went (hal $ts^a\bar{e}k$) to the camp (143, 5; 179, 1).

i-jallād likī-wa ḥukm dōk, he made (i.e. gave) an order to the executioner (143, 9).

i-qāzī likī-wa hāzir dōk, he made him present to the Qāzī, i.e. he brought him before the Qāzī (143, 10).

kū-kuk likī bū ghwēk sa, to whom is it being said? (143, 8).

 $k\bar{u}$ - f^a lik $\bar{\iota}$ ghwats, say to him (143, 7).

kū-mākh kī ghwats, say to us (144, 10).

 $k\bar{u}$ -mun $k\bar{\imath}$ sha, give to me (144, 10; 177, 13).

i-kūwai likī-l ghwashtak, he fell into the well (179, 1).

i-huṣḥyarrī likī a-bēdārī sra hā, i-nādannī likī a-khwāw, to the intelligent wakefulness is (seems) good, to the foolish the dream (144, 1).

i-dīndār likī aī a-dīn sir hā, i-bēdīn likī aī a-dunyā, to the religious man, on the one hand, religion seems good; to the irreligious man, on the other hand, the world (seems good) (143, 10).

i-randzūr likī aī a-pētsuf zarūr hā, abstemiousness is necessary only for an invalid (144, 3). Cf. the similar example of the use of pār in the preceding section.

i-vēgā likī, at night (144, 6). Cf. Hindī rāt-kō.

With $k\bar{\imath}$, sometimes i, the preposition of the locative, is omitted. Thus:— $saṛai k\bar{\imath} a\bar{\imath} zark^a pak\bar{a}r h\bar{a}, \text{ it is a wife that is necessary to a man (suppl. 4, 1).}$ $mihm\bar{a}n k\bar{\imath} a-n\bar{o}r\bar{\imath} n\bar{\imath}w, \text{ set the bread for the guest (261, 10).}$

83. $l\bar{a}st^a$.—Whenever this postposition is used in a finite sentence, the particle $d\bar{\imath}$, indicating the ablative case, is almost always used in connexion with the verb (135, 10) (§ 126). This $d\bar{\imath}$ is quite distinct from the emphatic particle described with $a\bar{\imath}$ in § 78, and should not be confused with it. As an example we may quote the words i- $d\bar{e}r^a$ $l\bar{a}st^a$, which mean by themselves 'from the camp' (129, 2). But if we have a finite sentence, such as 'he went $(hal\ ts^a\bar{e}k)$ from the camp,' we must say i- $d\bar{e}r^a$ $l\bar{a}st^a$ - $l\ d\bar{\imath}$ $ts^a\bar{e}k$ (135, 12). The $d\bar{\imath}$ in such cases need not precede the verb immediately, but may come in some other place in the sentence, though it must appear somewhere. The word $d\bar{\imath}$ may even be used by itself, to indicate an omitted ablative, as a kind of pronominal ablative. Thus, we have $k\bar{u}$ - $Mak\bar{a}l\bar{\imath}$ $Sahib\ l\bar{a}st^a$ - $r\ d\bar{\imath}$ $dz\bar{o}k$, he came $(hir\ dz\bar{o}k)$ from Mr. Macaulay (135, 15). If we omit the words 'Mr. Macaulay,' we may say $hir\ d\bar{\imath}$ $dz\bar{o}k$, he came from him (136, 2). $L\bar{a}st^a$ is used with various shades of meaning, as will appear from the following examples:—

 $k\bar{u}$ -mun $l\bar{a}st^a$ $d\bar{\iota}$ $z\bar{e}y^an$, ask from me (138, 10).

 $haf\bar{o} \ a\bar{i} \ ga \ i$ - $fa\bar{i} \ l\bar{a}st^a \ h\bar{a}$, that also is from among them (139, 15).

i-harr $d\bar{u}m\bar{i}$ $l\bar{a}st^a$ -wa $d\bar{i}$ puṣḥ t^an^a $d\bar{a}k$, he made inquiry from all the singers (128, 7).

i-dzut gham läst^a-m dī a-zlī kaṛtsī syōk, my heart became torn from excessive grief (138, 4).

a-zlī $d\bar{\imath}$ i-hirş lāst khālī kēw, make the heart empty from (i.e. of) greed (139, 7).

a-tama'dī i-zlī lāsta i-pētsa kēwan, put away greed from the heart (139, 8).

i-dera lasta i-ghūnd ta-mīnak, from the camp to the hill. This is not a finite sentence (139, 10).

haf sarai-l $d\bar{\imath}$ i-hadd $l\bar{a}st^a$ tar $sy\bar{o}k$, that man has passed from (i.e. beyond) the boundary (140, 2).

kū-hīts kuk lāsta dī krik mak kēwan, do not make aversion from anyone, i.e. do not hold anyone in aversion (139, 5).

kū-tū lāsta dī marawur hā, he is angry with thee (260, 5).

i-dzut fikr lāsta i-pēts, after much thought (138, 12). Not a finite sentence.

 $i-f^a l\bar{a}st^a r\bar{i}$ mukh^a $dz\bar{o}k$, he came $(r\bar{i} dz\bar{o}k)$ before that (138, 13).

From the last example we see that words signifying 'after,' 'before,' or 'behind' govern a noun with $l\bar{a}st^a$, and that in such cases $d\bar{a}$ is not used.

As in other Indian languages, this postposition is used for comparison. Several examples will be found in § 15, under the head of adjectives. In one example the particle $d\bar{\imath}$ is omitted, viz. in $ust\bar{a}d$ $a\bar{\imath}$ i- $pi\bar{e}$ $l\bar{a}st^a$ $ziy\bar{a}t$ gin^an , honour a teacher more than a father (139, 1), but all the other examples have $d\bar{\imath}$.

84. i-rāsta.—This postposition signifies 'from,' in the sense of 'beginning from,' as in:—

i-nmā-ṣḥām i-rāsta i-saḥar ta-mīnak, from evening to morning (139, 13).

ta-mīnak or ta-mīnshak^a.—This is the complement of i-rāst^a or of lāst^a, more usually the former, and means 'up to.' Either ta-mīnak or ta-mīnshak^a may be used without change of meaning. Examples are:—

i- $d\bar{e}r^a$ ta-minak, up to the camp (140, 6).

i-nmā-shām i-rāsta i-saḥar ta-mīnak, from evening up to morning (139, 13).

i-dēra lāsta i-ghūnd ta-mīnak, from the camp to the hill (139, 10).

85. inar.—This is by origin the locative of nar, a house, and means literally 'in the house.' It is still occasionally used in the sense of 'at home,' as in haf's sarai i-nar mullak, that man died at home (55, 7). Compare the phrase i-nar inar, in the house (21, 5; 141, 9). Examples of its use are:—

i-Kābul inar hā, he is in Kābul (141, 6).

haf sarai i-dēr inar wīrān syōk, that man became sick in the camp (180, 7).

i-nar inar ghūn syōk, he became (i.e. was) hidden in the house (178, 8).

As explained under the head of adjectives, inar is sometimes used to indicate the superlative degree, as in :—

hā giyōy aī i-harra inar ghwaṭa hā, this cow is fat among all, i.e. is the fattest of all (250, 6).

i-sir inar aī sir hā, amongst good (things) it is good, i.e. it is the best (34, 5).

When this postposition, and also when izar, govern the pronoun of the third person, the contracted form of the locative wi or wa (see § 19) is generally used instead of the full vol. x.

locatives $(k\bar{u} - f\bar{o}, k\bar{u} f^{\circ}, \text{ and } k\bar{u} - fa\bar{i})$ (133). The wi or wa may then be compounded with the inar or izar, so as to form, respectively, one word; thus, winar or wizar. We shall here confine ourselves to the consideration of winar. Wizar will be considered under the head of izar.

It will be remembered that wi or wa stands for both genders and for both numbers, and that it means 'in or on him, her, it, or them.' Winar therefore means, primarily, 'in him, her, it, or them.' Thus, winar nastak hā, he is seated in it (132, 14).

The next stage of the development of this form is that it has come to be used as an adverb, meaning simply 'inside.' Thus, hafo winar hā means not only 'he is in it,' but also, generally, 'he is within' (141, 8).

For the first and second persons, the contracted locatives are di or da, which means in or on me, us, thee, or you, the same form being used for either the first or second person. When these are governed by inar they never coalesce with it, as is done by wi or wa. Instead of this, winar has further developed into a preposition itself, equivalent to inar, and also meaning in. If we wish to say in me, or in us, in thee, or in you, we add di or da, as a suffix, to winar, and we get winar-di or winar-da.

So completely, in these two last instances, has winar lost its original meaning and become a mere preposition, that, under the influence of analogy, wi or wa may also be suffixed to winar, although it is there already in the first syllable. We thus get winar-wi or winar-wa, in him, her, it, or them.

To sum up,—the following are the various forms taken by wi or wa in conjunction with inar:—

wi or wa, in him, her, it, or them.
winar, in him, her, it, or them.
winar-di or winar-da, in me or in us.
winar-di or winar-da, in thee or in you.
winar-wi or winar-wa, in him, her, it, or them.

Besides the above, di or da, and wi or wa, may be suffixed to the plain inar, instead of to winar, with the same respective meanings; so that we may have:—

inar-di or inar-da, in me or in us.
inar-di or inar-da, in thee or in you.
inar-wi or inar-wa, in him, her, it, or them.

Thus:-

i-fa murghān aī i-wust ēk, inar-wi gōlīy aghak, on that bird, on flying up, a bullet hit on it, i.e. a bullet hit it as it flew away (46, 4).

Finally, it may be noted that, although the di or da, wi or wa, is usually suffixed to the winar or inar, it sometimes appears in some other part of the sentence. An example of this will be found in the next section, which deals with izar.

86. izar.—This also is probably by origin a locative of the word zar, but I have not come across the latter word standing alone. Its primary meaning is 'on,' but it also has secondary meanings founded on this idea. These will appear in the following examples:—

 haf^a sarai i-takht izar nastak, that man sat on the throne (180, 4). i-grī izar nastak $h\bar{a}$, he has sat down on the mountain (132, 9).

```
i-f^a izar lāzim hā, it is incumbent on it (140, 10).
```

i-hukmī izar 'amal kēwan, do carrying out on orders, i.e. obey orders (140, 13).

i-lawanai izarr-al dzōk, he went $(hal\ dz\bar{o}k)$ on a madman, *i.e.* he came across a madman (141, 1).

ka i-m^aṣḥī izar aī ga ikhtiyār nak dērī, mun kū-tū lāst^a dī ts^a zay^am, if thou possess no authority even over flies, then what may I ask from thee? (141, 2; 153, 3).

i-pa ghnwāin izar top ka, jump over this canal (250, 8).

kū-kuk izar thumat mak ghwats, do not speak calumny against anyone (257, 8).

hō i-fāī dyō kullān izar a-khwai guzāra bayak, he divided his property on (i.e. between) those two sons (I, 2).

i-fa izar pa-qahr syōk, he became angry (lit. by anger) with (lit. on) him (178, 5).

Just as wi or wa is prefixed to inar, so it may be prefixed to izar, and we get wizar, meaning 'on him, her, it, or them.' So also the forms di or da and wi or wa may be suffixed, exactly as in the case of winar. We thus get the following set of forms:—

wi or wa, on him, her, it, or them.

wizar, on him, her, it, or them.

wizar-di or wizar-da, on me or on us.

wizar-di or wizar-da, on thee or on you.

wizar-wi or wizar-wa, on him, her, it, or them.

So also, as in the case of inar, we have:-

izar-di or izar-da, on me or on us.

izar-di or izar-da, on thee or on you.

izar-wi or izar-wa, on him, her, it, or them.

Although the di or da, wi or wa, is usually suffixed to the winar or inar, as above, it sometimes appears in another part of the sentence. Thus:—

a-khalq da sū ta-kōṭwāl gumān wizar kawin, the people will make consideration of Kōṭwāl on me (da.....wizar), i.e. they will take me for a Kōṭwāl (140,11).

Wizar is also used to represent the instrumental case of a pronoun of the third person, and then means 'by him,' 'by her,' 'by it,' or 'by them.' Thus, the instrumental of $t\bar{u}r^a$, sword, is $pa-t\bar{u}r^a$, and we have $pa-t\bar{u}r^a-wa\ s\bar{u}\ wazn$, thou wilt slay him with a sword; but with a pronoun of the third person we have $wizar-a-wa\ s\bar{u}\ wazn$, thou wilt slay him (-a-) with it (wizar-wa) (137, 10).

Words indicating kindness, tyranny, or rage take izar after them, but in such cases the izar may govern the instrumental with pa instead of the locative with i or $k\bar{u}$. Thus:—

 $k\bar{u}$ -mun izar-a $mihrb\bar{a}n\bar{i}$ $d\bar{a}k$, he showed kindness to me (178, 3). pa- $f\bar{o}$ izar-a zulm $d\bar{o}k$, he tyrannized over him (178, 4). i- f^{a} izar pa-qahr $sy\bar{o}k$, he became angry with it (178, 5).

87. gad, girad, or girgad.—The primary meaning of this postposition is 'together with,' but, as will be seen from the following examples, it has developed other shades of meaning. Any of the three words may be used in place of either of the other two:—
i-sarai gad, with the man (137, 2).

i-yār gaḍ aī muṣluḥt dāk, he made consultation (i.e. consulted) with (his) friend (145, 1).

- i-dost i-dushman girad a-p*t run der*n, keep the forehead bright before both friend and foe (145, 3).
- sazā-l aī gunāh gaḍ barābar ṣḥērī, give to him punishment equal with (i.e. corresponding to) the fault (145, 5). In this the preposition i of the locative has been dropped.
- a-kharts i-khwai hāṣil girad barābar kēw'n, make expenditure equal with (i.e. in accordance with) your own income (145, 6).
- a-nēkī aī kū-har kuk girad sr hā, only virtue is good with every one (i.e. in everyone's opinion) (256, 7).

88. pa-sa.—This generally means 'except.' Thus, *i-saṛai pa-sa*, except the man (159, 2); *i-gap pa-sa*, except, or without, a stone. It is often combined with the preposition $b\bar{e}$ (§ 80), as in $b\bar{e}$ Khudā \bar{e} pa-sa, except God (159, 13); $b\bar{e}$ kū-mun pa-sa, except, or without me (159, 14).

CONJUNCTIONS.

89. The following are Copulative Conjunctions:—

wa, and.

ga, also, even.

bī, bihē, or biyē, in the second place, and also, moreover.

The following are examples of their use:-

wa. - Zaid wa 'Amr nāsk-in, Zaid and 'Amr sat down (154, 4).

Zaid wa 'Amr malk-in, Zaid and 'Amr died (153, 8).

Zaid mullak, wa 'Amr mullak, wa Bakr mullak, Zaid died, and 'Amr died, and Bakr died (155, 6).

Zaid mullak, wa 'Amr, wa Bakr, Zaid died, and 'Amr, and Bakr (155, 9).

Zaid mullak, wa 'Amr zakhmī syōk, Zaid died, and 'Amr was wounded (155, 6).

Zaidd-al ts'ēk, wa 'Amr-ir dzōk, Zaid went away, and 'Amr came (153, 9).

Zaid-am dzōk, wa a-piē-wa asht'ēk, I struck Zaid, and his father was standing, i.e. when I struck him, his father was standing at the time (158, 8).

Wa is employed idiomatically to indicate remoteness, as in tū wa sakhal kār, thou and such a deed! i.e. there is a great difference between thee and such a deed, thou art incapable of it (158, 5).

ga.—Zaid mullak, 'Amr ga mullak, Zaid died, 'Amr also died (154, 8).

Zaid mullak, wa 'Amr 'ga mullak, Zaid died, and 'Amr also died (154, 9).

Zaid ga mullak, 'Amr ga mullak, Zaid also died, 'Amr also died (154, 11).

Zaid mullak, 'Amr ga, Zaid died, also 'Amr (154, 13).

'Amr ga mullak, 'Amr also died (155, 1).

ka i·m^aṣḥī izar aī ga ikhtiyār nak dērī, mun kū-tū lāst^a dī ts^a zay^am, if thou possess no authority even over flies, then what may I ask from thee? (141, 2).

bī.—Zaid rī-dzōk, bī 'Amr, Zaid came, also 'Amr (155, 12).

s² Zaid rī-dzōk, bī 'Amr, in the first place Zaid came, and in the second place 'Amr (156, 1).

```
hā bihē aī khwāṣḥ hā, this too is sweet (251, 9).

mullak byōk, wa biyē zwandai aī syōk, he was dead, and again he became alive
(I, 14).
```

90. The following are Disjunctive Conjunctions:

```
y\bar{a}, or.

y\bar{a} kh\bar{o}, or.

y\bar{a} . . . y\bar{a}, either . . . or.

y\bar{a} kh\bar{o} . . . y\bar{a}, either . . . or.

ka, or.

ka . . . ka, whether . . . or.

ka na\bar{i}, or otherwise.
```

The following are examples of their use:-

```
y\bar{a}, y\bar{a} kh\bar{o}.—Either of these may be used instead of the other. Thus:—h\bar{a} dal w^{a}r, y\bar{a} (or y\bar{a} kh\bar{o}) h\bar{a}, take this or this (157, 8).
```

 $y\bar{a}$. . . $y\bar{a}$, $y\bar{a}$ $kh\bar{o}$. . . $y\bar{a}$.— $y\bar{a}$ haf^{b} -l $ts^{y}\bar{e}k$ $by\bar{o}k$, $y\bar{a}$ -l $t\bar{u}$, either he had gone, or thou (157, 6).

yā-r dī wak war, yā-r dī sharbat war, bring either water or sherbet (157, 9).

yā khō bū ts^a nak darī, yā-r dī nak ṣḥawī, either he does not own anything, or he does not give to me (157, 11).

ka.—This is principally used in questions. Thus:—

Zaidd-ir dzōk ka 'Amr, did Zaid come, or 'Amr? (158, 3).

ts'nn-ir dzōk, ka prān, did he come today, or yesterday? (158, 4).

ghrās aī hā, ka ziyaṛ, is it black or yellow? (250, 13).

hō aī sir hā, ka hafō, is this good, or is that? (253, 8).

Note.—Ka is also used as a relative pronoun (see § 24), as an adverb of time (§ 75), and as a conditional or as a final conjunction (§§ 92, 94).

ka . . . ka.—ka haf^a dal $b\bar{u}$ $w^a r$, ka $h\bar{a}$, whether dost thou take that or this? (157, 13).

ka naī.—hā dārū khurōn, ka naī panḍūk dal aī sū nak ṣḥawam, eat this medicine, or else I will not give thee a pomegranate (166, 9).

91. The following are Adversative Conjunctions:

```
balki, nay rather, moreover; but, on the contrary. lēkin, but.
magar, but.
khō, but.
```

The following are examples of their use:—

balki.—dzōk-a nak hā, balki wazyōk-a hā, he has not beaten him; nay rather he has killed him (156, 8).

Zaidd-ir nak dzōk, balki 'Amrr-ir dzōk, Zaid did not come, but (or on the contrary) 'Amr came (156, 9).

lēkin, magar, khō.—Any of these may be used for the others. Thus:—

harr rī-dzāk-in, lēkin (or magar or khō) Zaidd-ir nak dzōk, all came, but
Zaid did not come (160, 5).

 $Kh\bar{o}$ is sometimes used like the Hindî $t\bar{o}$, and is then hardly translatable into English. Thus:—

azz-al khō nak dzōk-am, as for me, I did not go = Hindī maĩ tō nahĩ gayā (162, 12).

92. The following are Conditional Conjunctions:

ka, if; when.

hargāh ka, if.

mun ka, if.

agar ka, although.

The following are examples of their use:-

ka.—ka bārān aī syōk, mun ghwāsī dī sū sa, if it rained, then the grass will become (i.e. will grow) (150, 13).

ka haf $r\bar{\imath}$ -dza, mun azz-al a $\bar{\imath}$ s \bar{u} s \dot{p} aw m, if (i.e. when) he come, then I will give (it) to him (150, 14).

ka rī dza, mun sha-l-a, when he comes, then give it to him (151, 3).

Note that ka is also used as a relative pronoun (§ 24), as an adverb of time (§ 75), and as a disjunctive or as a final conjunction (§§ 90, 94).

Further particulars regarding the use of ka in conditional sentences will be found under the head of syntax (§ 136).

Ka is also used with a relative pronoun, without materially affecting the sense, as in $ts\bar{e}n$ waqt ka $r\bar{i}$ $dz\bar{o}k$, azz-al $ghw\bar{e}k$, at what time that he came, I spoke to him, i.e. I spoke to him when he came (151, 5). Similarly, har waqt ka $r\bar{i}$ $dz\bar{o}k$, at every time that he came, i.e. whenever he came, or when he came (Hindī jis waqt $\bar{a}y\bar{a}$ (151, 6)).

hargāh ka, mun ka.—Either of these may be used instead of ka, with the meaning of 'if.' Thus:—

hargāh (or mun) ka i-m^aṣḥī izar ga ikhtiyār nak dērī, mun kū-tū lāst^a dī ts^a zay^am, if thou dost not possess authority even over flies, then what may I ask from thee? (153, 3). In this example ka alone may be used instead of hargāh ka or mun ka, as is the case with the same passage quoted under the head of copulative conjunctions (§ 89).

agar ka.—agar ka haf sarai zahr khwalak, khō nak mulak, although that man ate poison, nevertheless he did not die (152, 8).

agar ka hō-r dī ghandzī ghwēk-in, azz-al ts' nak ghwēk-in, although he spoke abuses to me, I said nothing to him (152, 9).

As in the first of these two examples, the apodosis of a conditional sentence commencing with $agar \ ka$ is introduced by $kh\bar{o}$, and not by $mun \ (152, 11)$.

93. The following are Concessive Conjunctions:—

mun, then.

khō, still, nevertheless.

Both of these are used to introduce the apodosis of a conditional sentence. Mun is used if the conditional particle is ka, $harg\bar{a}h$ ka, or mun ka, and $kh\bar{o}$ is used if the

conditional particle is agar ka. Examples of both of these particles will be found in the preceding paragraph (§ 92). The following are additional examples of the use of mun:—

ka haf $r\bar{i}$ $dz\bar{o}k$, mun h \bar{o} $k\bar{a}r$ $s\bar{u}$ sa, if he came, then this work will be (done) (152, 3).

ka tū ghwats, mun azz-al sū dzaw^am, if thou say (it), then I will go to him (152, 4).

94. The following is a Final Conjunction:

ka, that, in order that.

The following are examples:-

'adl kēw'n, ka nēknām sī, do justice, that thou mayst have a good name (151, 15). ts'n khwārī kēw'n, ka ṣabā-t pakār sa, labour today, that it may be useful to thee tomorrow (254, 10).

hir tsīw, ka hisāb kayēn, come here, that we may make an account (257, 15).

Ka is also used, in a Consecutive sense, to mean 'so that.' Thus:—

nōṛī di nak buk, ka tū khwālk bukan, there was (di buk) no bread, so that thou mightest have eaten, i.e. there was none for you to eat (88, 3).

In this meaning ka sometimes is used to give the force of the imperative, as in ka nakk-al $dza\bar{\imath}$, (beware) that thou go not, i.e. do not go (162, 2).

Or it may be used in a Causal sense, as in:-

khūn aī mak kēwan, ka 'umr-at sū lanḍ sa, do not commit murder, as (or because) thy life will become short (thereby) (254, 8).

Ka is also used like the Greek on and the Persian ki to introduce a quotation in direct oration, instead of employing oratio obliqua. Thus:—

hafo piṣḥtak ka 's sarai tar-mun i-tsang hanyī,' he wrote that 'a man is sitting near me' (151, 13).

INTERJECTIONS.

95. The ordinary interjection used to call attention is $w\bar{o}$, O!. Examples of its use will be found under the head of the vocative case (§ 10).

The following are Interjections of warning or reproof:

wah!

han!

As in:

who tso-t dok, Ah! what didst thou do? (161, 7).

 $h^{a}n \ ts^{a} \ b\bar{u} \ ka\bar{\imath}$, Ah! what are you doing? (id.).

These are sometimes repeated, so that we may say $h^a n h^a n t s^a b \bar{u} k a \bar{\iota}$!

 $Dz\bar{u}sh$, the imperative of $dz\bar{u}sh^s\bar{e}k$, to look, means 'take care!' as in $dz\bar{u}sh$, $h\bar{o}$ $k\bar{a}r$ nak $k\bar{e}w\bar{i}$, beware! that thou do not this deed (161, 11). We see from this example that it is followed by the acrist.

Armān ka indicates regret, as in armān ka.azz-al ts'ēk byōkan', would that I had gone! (164, 8).

vol. x.

haī haī and ō hō hō, alas! are used in grief, as in haī haī pērī ts kay m, alas! what am I to do now! (149, 13); ō hō hō ts bad kār syōk, alas! what evil deed has occurred! (149, 13).

 $w\bar{a}$, $w\bar{a}$, ah! indicates joy or surprise, as in $w\bar{a}$ $w\bar{a}$ ts^a sir $k\bar{a}r$ $a\bar{i}$ $sy\bar{o}k$, ah! what a good deed has occurred! (150, 3).

 $w\bar{a}\bar{e}$, $w^a\bar{e}$, or $w^a\bar{e}$ $w^a\bar{e}$, alas! is used in time of trouble, in sickness, or among beggars, as in $w^a\bar{e}$ $w^a\bar{e}$ mullak, alas! he is dead! (150, 8).

ai, O! calls attention, as in ai lawanai-a, O madman (II).

ē, O! ditto, as in ē piē, O father (I, 2).

CHAPTER VII.

SYNTAX.

96. The following is not a complete syntax of Ormuri. It pretends to be only a collection of notes on those syntactical points that have attracted my attention in reading Ghulām Muḥammad Khān's grammar. Some of these points are of considerable importance, and deserve special study.

97. The Definite Article.—As already explained (§ 5), the definite article is not used before words that are themselves definite in signification, such as proper names or pronouns.

When a noun preceded by the definite article follows the genitive of a demonstrative pronoun, the noun is the governing word, otherwise it is not. Thus, $ta-p^a$ a-dist, his hand; but $ta-p^a$ dist, of this hand.

In dealing with the subject and object of a sentence we shall have occasion to discuss the use of the particles $a\bar{\imath}$ and $d\bar{\imath}$. Here it should be mentioned that these particles cannot be employed to indicate any word which is preceded by the definite article (118, 8). Thus, a-sarai mulak, the man died; but sarai $a\bar{\imath}$ mulak, a man died. We cannot say a-sarai $a\bar{\imath}$ mulak. In this way we see that $a\bar{\imath}$ and $d\bar{\imath}$ sometimes have the force of an indefinite article, for one or other of them almost always appears in a sentence, if the noun to which it would refer has not the definite article. Again, if there are two nouns in a sentence, one of which is the subject and the other the object of a transitive verb, then, if one noun has the definite article, and if there is also $a\bar{\imath}$ or $d\bar{\imath}$ in the sentence, we know at once that the noun with the definite article must be the subject; for, as we shall see, if the verb is transitive, the $a\bar{\imath}$ or $d\bar{\imath}$ must refer to the object, and as it cannot refer to a noun that has the definite article, that noun cannot be the object, and therefore must be the subject. Thus, in the sentence:—

a-sarai ai pandūk khwalak, the-man (indicates object) pomegranate ate,

we know that a-sarai is the subject, because $a\bar{i}$ cannot refer to it, and therefore must refer to $pand\bar{u}k$, which is accordingly the object, and that therefore the sentence means 'the man ate a pomegranate.' On the other hand sarai $a\bar{i}$ a- $pand\bar{u}k$ khwalak would mean 'the pomegranate ate a man.'

- 98. The Subject and the Object (114, 11ff.).—As stated in § 10, there is no distinction in form between the nominative (or agent) and accusative cases. Theoretically, the subject of a verb may be in some circumstances in the nominative, and in other circumstances in the agent case, but for practical purposes all consideration as to whether a noun is in the nominative, agent, or accusative case may be abandoned. In Ormuyi, the only point to determine is whether a particular noun is the subject or the object of the verb. There are various ways of ascertaining this.
- 1. The fact is usually indicated, if the sentence is complete, by the order of the words, which is subject, object, verb (175, 6). Thus, a-sarai a-pandūk khwalak means 'the man (a-sarai) ate the pomegranate (a-pandūk)' (174, 6), and does not mean 'the pomegranate ate the man.' If the sentence consists merely of two nouns united by a

copula, as 'Zaid is sick,' the order is subject, complement, copula (173, 12); thus, Zaid (subject) bīmār (complement) kā (copula). Here, from the order of the words we know that the subject is Zaid.

2. When it is required to distinguish between the subject and the object, the verb must necessarily be transitive, as intransitive verbs have no objects. In the case of the agrist tense and the tenses formed from it,—which in future we shall call for shortness 'the agrist-tenses,'—the verb agrees with the subject in number and person. As the termination of the verb shows the number and person of the subject, the subject need not always be separately expressed. Thus, if we express the subject, we have Zaid bū khura meaning 'Zaid eats.' On the other hand, if the subject is not separately expressed, we have bū khura, he eats, or, if we wish to express the subject, we may say hafo bū khura, which has the same meaning. But none of these sentences is complete. In each of them the object, -the thing eaten, -is wanting. If hafo bū khura is a complete sentence, then, as the object is necessary to complete the meaning, we must search for both a subject and an object in the three words. Now, the subject may be either hafo or it may be the 'he' of khura, he eats, but the only possible object is hafo. There is no object concealed in the khura. Hence, if hafo bu khura is a complete sentence, we must take hafo as representing the object, and the sentence must mean 'he eats (bi khura) him (hafō).'

We thus arrive at the following rule:—if a complete sentence consists of one of the aorist tenses of a transitive verb and of a single noun or pronoun, the latter is the object, not the subject. Thus, a-mzarai bū khūra, as a complete sentence, means 'he eats the tiger.' If we wish to say 'the tiger eats him,' we must insert the word 'him,' and this may be done either by mentioning the 'him' in full, or by using a pronominal suffix. If the object is written in full, then the question falls under the first rule dealt with above, and the subject and object are determined by the order of the words. If the object is indicated by a pronominal suffix, this must be a suffix of the accusative, i.e. one of those given in § 20 (b). They are here repeated for ready reference:—

am or (after a vowel) m, me.

at or (after a vowel) t, thee.

an or (after a vowel) n, us.

an or (after a vowel) n, you.

an or (after a vowel) n, you.

wa or (after a consonant) a or awa,

him, her, it.

These are added to the noun that we wish to make the subject, so that we get, for instance, a-mzarai-m bū khura, the tiger eats me; a-mzarai-wa bū khura, the tiger eats him, and so on. We thus arrive at the following additional rule:—if a complete sentence consists of one of the acrist tenses of a transitive verb and of a noun or pronoun to which is attached one of the pronominal suffixes of the accusative, then the noun or pronoun is the subject, and the pronominal suffix represents the object (115, 14ff.). In other words, if the noun or pronoun has no suffix, it is the object; and if it has a suffix, it is the subject.

3. In the case of the past tense of a transitive verb and the tenses formed from it,—which in future we shall call for short 'the past tenses,'—the conditions are exactly reversed, and the verb agrees with the object in gender, number, and person. Here the termination of the verb shows the number and person of the object, but no information is given regarding the subject. For instance, khwalak-am means ate me (masc.);

khwālk-yēn, ate us; khwalak, ate him; and khwālk-in, ate them; but nowhere are we told who ate. Hence, if only one noun or pronoun is expressed with the verb in one of these tenses in a complete sentence, it must be taken to represent the subject. Thus, a-pandūk khwalak, as a complete sentence, can only mean 'the pomegranate ate him.' If we wish to say 'he ate the pomegranate,' we must either say the 'he' in full, or else use a pronominal suffix. If we say the 'he' in full, we get hafō a-pandūk khwalak, he ate the pomegranate, which falls under the first rule, depending on the order of the words. If we wish to indicate the subject by a pronominal suffix,—which is the usual method,—this suffix must be one of those given in § 20 (c), i.e. one of those used to indicate the subject of a transitive verb in a past tense. They are here repeated for ready reference:—

```
am or (after a vowel) m, I.

at or (after a vowel) t, thou.

wa, or (after a consonant) a, or

(after a consonant and before
a vowel) w, he, she, it.
```

an or (after a vowel) n, we. an or (after a vowel) n, you. an or (after a vowel) n, they.

These are added to the noun that we wish to make the object, so that we get, for instance, a-pandūk-am khwalak, I ate the pomegranate; a-pandūk-at khwalak, thou atest the pomegranate; a-pandūk-a khwalak, he ate the pomegranate; a-pandūk-an khwalak, we, you, or they ate the pomegranate. We thus see that, with the past tenses of a transitive verb, if a complete sentence contains only one noun or pronoun, that noun or pronoun represents the subject, unless a pronominal suffix is attached to it, in which case it represents the object (115, 4ff.).

99. The Particles $a\bar{i}$ and $d\bar{i}$.—In §§ 78, 79 the use of these particles as adverbs of emphasis has been discussed at some length.¹ This closely corresponds to the use of the Hindōstānī particle $h\bar{i}$. They are employed to discriminate between a number of contrasted actions, or else as particles of emphasis, as in $k\bar{u}$ -Zaid gad $d\bar{i}$ $b\bar{i}$ makhlūq ga buk-in; $kh\bar{o}$ $b\bar{i}$ kukk-ir $d\bar{i}$ nak $dz\bar{o}k$, Zaid $a\bar{i}$ $r\bar{i}$ $dz\bar{o}k$, on the one hand, other persons also were with Zaid; but, on the other hand, no one else came, Zaid alone (= Zaid-h \bar{i}) came (suppl. 2, 8).

In these cases, $a\bar{\imath}$ or $d\bar{\imath}$ always refers to some particular noun or pronoun. Thus, in the above example, $d\bar{\imath}$ is used to discriminate the words $makhl\bar{\imath}q$, people, and kuk, anyone, and $a\bar{\imath}$ is used to discriminate the proper name Zaid. This leads us to the only point of difference between these two particles. When the noun referred to is singular, then $a\bar{\imath}$ is used, and when it is plural, $d\bar{\imath}$ is used. But if the noun indicates a species, or is a noun of multitude, or indicates a thing consisting of a number of particles or drops,—such as 'ashes,' 'sand,' 'wheat,' 'water,' or 'milk,'—then $d\bar{\imath}$ is used, even if the word is singular and governing a singular verb (50, 12; 123, 12). So also, the indefinite

¹ Ghulām Muḥammad Khān's account of these particles is contained in pp. 119-123 of his Grammar, and also in a four-page supplement following p. 127. It is evident that he himself was not at all clear as to their use, and in his account he contradicts himself in more than one particular. On one point he is certainly wrong. He says (p. 119 and elsewhere) that, with certain specified exceptions, one or other of these particles must invariably appear in every sentence involving the third person. Nevertheless, in all parts of his grammar he gives numerous instances in which neither appears, although his rules as regards exceptions are not in these cases applicable. I have therefore myself collected and examined every Örmurī seutence in his book, classifying and arranging them according to the presence or absence of $a\bar{i}$ and $d\bar{i}$. From the facts so collated I have tentatively formulated the rules contained in § 78 and in the following pages. A more detailed examination will be found in the Appendix in pp. 219ff.

pronouns $b\bar{\imath}$ kuk, anyone else; har kuk, everyone; and kar $t\bar{\imath}$, everything, usually take $d\bar{\imath}$, not $a\bar{\imath}$. Thus, $d\bar{\imath}$ is used in the following sentences:—

```
gunum dī braṣḥtak syōk, wheat became burnt (123, 15).

sag<sup>a</sup> dī khwā suk, sand (fem.) fell (123, 15).

shippī dī khwālk, he ate (i.e. drank) milk (fem.) (124, 1).

i-ghrai inar dī yānak dzut hā, in the fireplace there is much ash (257, 3).

gāk<sup>a</sup> dī bēz<sup>a</sup>n, cook flesh (259, 3).

yā-r dī wak w<sup>a</sup>r, yā-r dī sharbat w<sup>a</sup>r, either bring water, or bring sherbet (157, 9).

bī kukk-ir dī nak dzōk, no one else came (suppl. 2, 8).

bī kuk dī nak hā, there is no one else (suppl. 3, 5).

bī kuk dī bū nak zay<sup>a</sup>m, I long for no one else (suppl. 3, 13).

bē gap har ts<sup>a</sup> di dī hā, there is (di hā) everything (har ts<sup>a</sup> dī) except a stone (159, 11).
```

This $d\bar{\imath}$ must be distinguished from $d\bar{\imath}$, the sign of the ablative (see § 83), and from da or di, the contracted pronoun meaning 'in or on me, us, thee, or you' (§ 19).

100. So far, we have been dealing with $a\bar{i}$ and $d\bar{i}$ as marks of emphasis, and with the distinction between the two particles. But they have a much wider use than that of emphatic particles. In many cases they simply deny definiteness, whether the word is emphatic or not. Hence they are rarely used in reference to a noun with the definite article (see §§ 5, 97), or to a proper name, or to a personal or substantival demonstrative pronoun. As particles of emphasis they are freely employed with such words (see several examples in §§ 78, 79), but not in this wider use.

In the wider use they also indicate the subject or object of the sentence. If the verb is transitive, then they refer to and point out the object. The transitive, verb may be in an acrist tense or in a past tense, but this makes no difference. In either case it is the object that is referred to. Thus:—

sarai aī nōrī khwālk, a man ate bread. Here, according to § 98, 1, sarai, the first word in the sentence, is the subject, and therefore nōrī is the object. The particle aī is used because nōrī is singular, and because it is not definite. We cannot have aī a-nōrī, the bread (119, 5).

sarai di pandūchī khwālk-in, a man ate pomegranates (119, 6). Here, because pandūchī is plural and is not definite, dī is used, not aī.

Similarly:—az aī pandūk khwalak, I ate a pomegranate (122, 14).

az di pandūchi khwālk-in, I ate pomegranates (122, 14).

 $m\bar{a}kh$ $a\bar{i}$ pand $\bar{u}k$ khwalak, we ate a pomegranate (122, 15).

hafo di pandūchī khwālk-in, he ate pomegranates.

In all these the subjects are personal pronouns, but $a\bar{\imath}$ and $d\bar{\imath}$ refer not to them, but to the objects $pand\bar{\imath}k$ and $pand\bar{\imath}k$, which are indefinite.

Even if the object of a transitive verb is not expressed, $a\bar{\imath}$ or $d\bar{\imath}$ may be used to indicate some thing or things that are referred to indefinitely. The khur \bar{m} bū means 'I eat,' and khur \bar{m} aī bū is 'I eat something indefinite' (120, 5), and khur \bar{m} dī bū is 'I eat some indefinite things.' Similarly khur yēn dī bū, we eat indefinite things (120, 14); and khur in dī bū, they eat indefinite things (120, 13); and so on. If the object is a personal pronoun expressed by a suffix, of course we cannot use $a\bar{\imath}$ or $d\bar{\imath}$. Thus, khur \bar{m} -at $b\bar{u}$ is

- 'I eat thee,' but we cannot say $khur^am$ -at $a\bar{\imath}$ $b\bar{u}$ with this meaning. Such a phrase would mean 'I eat something indefinite belonging to thee' (120, 8), and the pronominal suffix at would not be a suffix of the object, but would represent the genitive (§ 20 (d)). Similarly, with the past tenses, we have phrases such as az $a\bar{\imath}$ khwalak, I at something indefinite (122, 5); $haf\bar{o}$ $a\bar{\imath}$ khwalak, he at something indefinite (122, 5); az $d\bar{\imath}$ khwalak-in, I at some indefinite things (122, 7); and so on.
- 101. If, however, it so happens that $d\bar{\imath}$ is put after the verb in the past tense, we do not say khwālk-in $d\bar{\imath}$. In such cases,—as in the case of $b\bar{\imath}$ of the imperfect (§ 48) or $s\bar{\imath}$ of the future perfect (§ 52),—the termination is transferred from the verb to the $d\bar{\imath}$, so that we get, e.g. az khwālk din, I at some indefinite things; hafō khwālk din, he at some indefinite things (123, 7). This does not happen in the case of $a\bar{\imath}$, or, of course, with the terminations of the aorist tenses, which are inseparable.
- 102. So far we have dealt only with transitive verbs. If the verb is not transitive, then $a\bar{\imath}$ and $d\bar{\imath}$ refer, not to the object, but to the subject. Thus, we have sarai $a\bar{\imath}$ nastak, a man sat down (119, 4); sara $\bar{\imath}$ d $\bar{\imath}$ nask-in, men sat down (119, 5); but a-sarai nastak, the man sat down (117, 12); a-sara $\bar{\imath}$ nask-in, the men sat down.

Further remarks on the use of these particles will be found in the Appendix on pp. 219ff.

- 103. Verbs with two objects.—Verbs relating to the senses take two objects, corresponding to the Latin double accusative after factitive verbs. Thus, with $gin^y \hat{e}k$, to consider, we have az $b\bar{u}$ haf adanā $gin^y \hat{e}k$, I was considering him wise (175, 1). Cf. Latin puto te doctum et prudentem. So $d^y \hat{e}k$, to see, in az haf wir $and d^y \hat{e}k$, I saw him sick (175, 5).
- 104. Instrumental.—As stated in § 10 the instrumental is formed with the aid of the preposition pa, as in pa-tūr-wa dzōk, he struck (him) with a sword (129, 6; 141, 12; 179, 9). It gives the sense of an instrument, not of an agent, and is therefore never used to indicate the agent case.

This preposition is, however very loosely used to indicate various other meanings, and corresponds generally to the Persian ba and the Hindī $s\bar{e}$. Thus:—

```
pa-f° sā'at-a wa-zyōk, he killed him there and then, lit. by that time (142, 1).

mīn° pa-'ibādat kēw°n, feel affection for piety, 'ibādat-sē muḥabbat rakh (142, 3).

pa-f° qiṣṣ khabar hai, art thou acquainted with that story? tū us bāt-sē wāqif

hai? (142, 4).

pa-a-rākh°, in the truth, truly (142, 6).

pa-mukhkh-al ghwaṣḥtak, he fell on his face (142, 7).

pa-tsaṭṭ-al ghwaṣḥtak, he fell flat on his back, lit. on the nape of his neck (142, 8).

pa-pēts pa-tsaṭ, backwards and forwards (142, 9).

pa-nisht°-l tsawak-in, they went outside (1±2, 10).

pa-shīw, by night (178, 12).

shīw pa-shīw, night by night, every night (142, 12).

pa-ryūz, by day (178, 12).

ryūz pa-ryūz, day by day (142, 13).

pyūz pa-pyūz, face to face, face against face (142, 14).

sā'at pa-sā'at, at every moment (142, 14).
```

tū dī pa-khabar hai, dost thou know about him? (249, 4).

az aī pa-khwai hā kār dōk, it is I who did this deed by myself (176, 1).

i-f^{*} izar pa-qahr syōk, he became angry (lit. by anger) with him (178, 5).

After words expressing kindness, tyranny, or anger, the postposition izar may govern the instrumental, instead of the locative. See § 86.

- 105. Dative.—The Dative is formed by the postpositions ki and liki, both of which govern the locative. For examples, see § 82.
- 106. Ablative.—The Ablative is formed by the postpositions last* and irast*, both of which govern the locative. For examples, see §§ 83, 84.
- 107. Genitive.—As stated in § 10, the genitive is formed with the aid of the preposition ta, corresponding to the Pashto da. Thus:—

ta-kūwai a-wak, the water of a well (238, 3). Cf. ta-kūhai wak (146, 10). ta-pandūk a-wan, the tree of a pomegranate, a pomegranate tree (238, 1). Cf. ta-pandūk wan (146, 10).

ta-sarai dist, a man's hand (146, 11).

ta-Zaid ta-yānsp ghilāmī, the bridle of Zaid's horse (170, 10).

It will be noticed that the genitive precedes the governing noun (146, 7).

When to forms the genitive of a pronoun of the first or second person, it is changed to tar. Thus, tar-mun, of me, my; tar-mākh, of us, our; tar-tū, of thee, thy; tar-tyūs, of you, your. According to Ghulām Muhammad Khān (130-1), this change does not occur in the case of other pronouns, but in the list of words and sentences received from Bannu, it is used with tsōn, how much? and kuk, who? Thus:—

hō yānsp aī tar-tsōn 'umr hā, this horse is of how much age, i.e. how old is this horse? (No. 221).

tar-kuk a-kwalān bū tar-tū i-pēts tsawa, whose boy comes behind thee? (No. 239).

Ghulām Muḥammad Khān (see p. 131, 10) himself uses tar with kuk, who?, in:—
tar-kuk kulān aī hai, whose son art thou? (248, 3).

hā māl aī tar-kuk hā, whose is this property? (249, 6).

On the other hand he uses ta with tson in:-

ta-tson tsan at ha, of how many years (i.e. how old) is he? (249, 13).

When the postposition $in\bar{e}l^a$ is used with the genitive, it enforces the idea of possession, as in ta-sarai $in\bar{e}l^a$, in possession of a man. For further examples see § 81.

108. Locative.—As stated in § 10, the Locative is formed with the aid of the preposition i, meaning 'on.' Thus:—

i- $b\bar{u}mm^a$ nastak, he sat on the ground (129, 7; 140, 10).

i-zli-m nak hā, it is not on my heart, i.e. I do not remember (253, 10).

pagṛīy i-sar tēṛ n, bind a turban on (thy) head (256, 3).

Most often this locative is governed by a postposition, such as *izar*, on; *inar*, in, and so on. See §§ 82ff., and especially 85, 86.

The locative, by itself, without a postposition appears most often in adverbial expressions, such as i-nar, in the house, at home, in; i- $b\bar{e}zh$, outside; i- $n\bar{s}sht^a$, outside, and so on. Several examples will be found in § 74.

109. Adjectives.—An adjective precedes the noun it qualifies, and agrees with it in gender and number. If the noun is governed by a preposition, the preposition precedes the adjective. Thus:—

```
shīn gōn, a green stick (171, 8).
sh\bar{\imath}n^a w^a n^a, a green tree (171, 8; 239, 1).
sh\bar{\imath}n^a w^a n^a \bar{\imath}, green trees (239, 2).
shīn khit, a green sheet (238, 14).
shīna khittī, green sheets (238, 15).
ghrās sarai, a black man (171, 11; 239, 3).
ghr\bar{a}s^a zark^a, a black woman (171, 11; 239, 4).
ghrēsī saraī, black men (171, 12; 239, 5).
ghrēsī zēlī, black women (171, 12; 239, 5).
spiw sarai, a white man (172, 1).
spiw^a zark^a, a white woman (172, 1).
sp\bar{\imath}w^a sara\bar{\imath}, white men (172, 1).
sp\bar{\imath}w^{a} z\bar{e}l\bar{\imath}, white women (172, 1).
sir yānsp, a good horse (238, 12).
tōk wak, hot water (238, 13).
drāgh gon, a long stick (239, 7).
dr\ddot{a}gh^a qiss^a, a long story (239, 8).
ta-sir yansp, of the good horse.
i-dzut gham läst, from excessive grief (138, 4).
i-harra dūmī lāsta, from all the singers (138, 7).
```

- 110. Regarding comparison of adjectives, see § 15. Regarding numerals, see § 16.
- 111. When an adjective is the predicative complement of the subject of the verb substantive or of a copulative verb, it agrees with the subject in gender and number. Thus:—

```
Zaid sir hā, Zaid is good (173, 8).

zark<sup>a</sup> sir<sup>a</sup> hā, the woman is good (173, 8).

saraī sir<sup>a</sup> hin, the men are good (173, 9).

a-sarai wīrān syōk, the man became sick (177, 1).

haf<sup>a</sup> zark<sup>a</sup> hōnd<sup>a</sup> suk, that woman became blind (241, 6).

hafaī hēndī suk-in, they (masc. or fem.) became blind (241, 8).
```

112. A numeral adjective may agree with a singular noun. Thus, the plural of $marz\bar{a}$, a brother, is $marzaw\bar{\imath}$, and in the following sentence 'two brothers' is $dy\bar{o}$ $marz\bar{a}$, not $dy\bar{o}$ $marzaw\bar{\imath}$:—

marzawī-t tsōn hā? dyō-m marzā hin, how many brothers hast thou? I have two brothers (242, 15; 243, 1).

113. PRONOUNS.—The following are examples of the use of the Nominative case of Personal and Demonstrative Pronouns:—

```
az stir hom, I am weary (239, 12).
mākh hairān hyēn, we are worried (240, 4).
```

¹ The copulative verbs are byōk, to be or become, and syōk, to become.

 $t\bar{u}$ st^ar $sy\bar{o}k$ -a, thou becamest great (241, 9). $ty\bar{u}s$ $gh\bar{u}n^a$ suk- $a\bar{\iota}$, you became hidden (241, 10). $haf\bar{o}$ $r\bar{\iota}$ - $dz\bar{o}k$, he came (241, 13). huf^a $r\bar{\iota}$ - $dz\bar{a}k$, she came (241, 14). $hafa\bar{\iota}$ $n\bar{a}sk$ -in, they sat (241, 15).

114. Accusative.—When the object of a transitive verb is a personal pronoun, it is usually indicated by a pronominal suffix, as explained in the section dealing with the Subject and the Object (§§ 98ff.).

115. Instrumental.—The instrumental case of a personal pronoun rarely occurs.

We have one example in pa-mun-a dzok, he struck by means of me (131, 6).

For the instrumental of the third person wizar is commonly used, as explained in § 86.

116. Dative.—The following are examples of the dative:—

 $k\bar{u}$ -mun $k\bar{\imath}$ sha, give to me (144, 9; 177, 13). $k\bar{u}$ -mākh $k\bar{\imath}$ ghwats, say to us (144, 10). $k\bar{u}$ - f^a lik $\bar{\imath}$ ghwats, say to him (143, 7).

117. Ablative.—Examples will be found in § 83.

The usual word for 'from him, her, it, or them' is $in\bar{e}l^a$ (19, 9; 135, 2). Being an ablative form, $d\bar{\imath}$ must also come into the sentence, as explained in §§ 12, 81, 83. Thus, $in\bar{e}l^a-l$ $d\bar{\imath}$ $ts^a\bar{e}k$, he went from him (135, 13). In this, l $ts^a\bar{e}k$, for hal $ts^a\bar{e}k$, means 'he went' (see § 122). By itself, $in\bar{e}l^a$ is used for the third person, but it may also be used as a postposition governing the genitive or a pronominal suffix. In this case it means 'in possession of,' and will be dealt with under the head of the genitive in the next section; but if $d\bar{\imath}$ is added, then it has the ablative meaning of from (see § 81). Thus, with the pronominal suffix am, my, we get $in\bar{e}l^a-m$, in my possession, but $in\bar{e}l^a-m$ $d\bar{\imath}$, from me. Similarly, $in\bar{e}l^a-t$ $d\bar{\imath}$, from thee. Thus:—

 $in\bar{e}l^a$ -tt-ir $d\bar{i}$ $dz\bar{o}k$, he came from thee (135, 8). $in\bar{e}l^a$ -mm-al $d\bar{i}$ $dz\bar{o}k$, he went from me (135, 8). For 'from him' we already have $in\bar{e}l^a$ $d\bar{i}$ given above.

118. Genitive.—The genitives of the personal pronouns may be either the full form, or may be expressed by suffixes. By the full forms are meant tar-mun, of me, my; tar-mākh, of us, our; tar-tū, of thee, thy; tar-tyūs, of you, your; ta-fō or ta-fo, of him, his; ta-fo, of her, her; ta-fa \bar{t} , of them, their; and the various similar forms. Regarding the use of tar for ta in the first and second persons, see the remarks in § 107. The following are examples of the use of the pronominal genitives in their full forms:

tar-mun a-dist, my hand (147, 10). tar-mun a-yānsp, my horse (237, 14).

 $h\bar{o}$ $a\bar{i}$ tar-mun $marz\bar{a}$ $h\bar{a}$; $h\bar{a}$ $a\bar{i}$ ta- f^a $khw\bar{a}r$ $h\bar{a}$, on the one hand, this is my brother; on the other hand, this is his sister (242, 10, 11).

 $tar-t\bar{u}$ a-dist, thy hand (147, 9). $tar-t\bar{u}$ a-piē zwandai hā, is thy father alive? (242, 12).

 $h\bar{a}$ $d\bar{u}k^a$ $a\bar{i}$ tar- $t\bar{u}$ $d\bar{u}w^a$ $h\bar{a}$, is this the girl that is thy daughter? (243, 9). $h\bar{o}$ kulanak $a\bar{i}$ tar- $t\bar{u}$ kulān $h\bar{a}$, is this the boy that is thy son? (243, 10). tar- $ty\bar{u}s$ a-nar, thy house (238, 4).

```
SYNTAX, PRONOUNS, GENITIVE SUFFIXES.
        ta-fo a-dist, his hand (238, 7).
        ta-fa a-myāndēnī, his mare (237, 15).
        ta-f° a-nāk malk, his wife died (244, 3).
        ta-f^{\circ} a-dist, her hand (147, 7).
        ta-f^a a-kulān, her son (238, 2).
        ta-f^a a-marzā, her brother (238, 5).
        ta-f^a a-khibar, her sister (238, 6).
        h\bar{a} at ta-f^* zark* wan h\bar{a}, it is she that is that woman's co-wife (244, 7).
        ta-faī a-dist, their hand (147, 8).
        tar a-kulān, his (this person's) son (238, 8).
        hā tara ākhshai hā, this is his brother-in-law (244, 11).
        taraī a-kār, their (these persons') work (238, 9).
        ta-pa a-rang, the colour of this (thing) (238, 10).
        ta-paī a-bai, the price of these (things) (238, 11).
        tar-kuk kulān aī hai, whose son art thou? (248, 3).
        hā māl aī tar-kuk hā, whose is this property? (249, 6).
     119. The governing noun of the genitive of a pronoun of the third person must have
the article a. Thus, ta-f^a a-g\bar{o}n, her stick; ta-f\bar{o} a-dist, his hand. ta-f\bar{o} dist would
mean 'of that hand' (147, 12). This is Ghulam Muhammad Khan's rule, but khwar
in the third sentence above has no article.
     120. Genitive Suffixes.—The pronominal suffixes of the genitive given in \S 20 (d)
are very frequently used instead of the full genitives. The following are examples of
their use:-
        a-p\bar{\imath}\bar{e}-m mulak h\bar{a}, a-m\bar{a}w^a-m zwand\bar{\imath}y^a h\bar{a}, my father has died, my mother is living
             (242, 13).
       marzawī-t tson hin? dyō-m marzā hin, s'-m aī tarbūr hā, how many brothers has
             thou? I have two brothers, (and) only one cousin (242, 15; 243, 1).
        a-zalpiē-m malk hin, my grandparents have died (243, 5).
        a-kulannī-t tson hin? sa-m aī kulān hā, syī-m dūwa hā, how many sons hast thou?
            I have only one son, I have a daughter (243, 6-8).
       a-r\bar{a}s\dot{r}ai-m-al\ i-nar-k\bar{\imath}\ ts^{\imath}e\bar{k}, my brother's son went to the house (243, 13).
       a-r\bar{a}_s h^a-m i-nar h\bar{a}_s, my brother's daughter is at home (243, 14).
       h\bar{a}-m a\bar{i} ta-khwark\bar{i}y\bar{i} nar h\bar{a}, it is this that is my sister's daughter's house (243, 15).
       ts^a n-am r\bar{i} a-tror dz\bar{a}k h\bar{a}, today my aunt has come (244, 1). Note here that the
            suffix is not added to the word for 'aunt,' but, as in the preceding example,
            to the first word in the sentence.
       a-niyāk-am-al i-grī kī ts'ēk, my maternal uncle went to the mountain (244, 2).
       a-windzōk-am rī dzōk, the son of my co-wife came (244, 8).
```

a-khṣḥīnī-m rī mēmnī dzāk hā, my wife's sister has come on a visit (244, 14). a-sar-am $b\bar{u}$ $d\bar{u}m\bar{\iota}$, my head aches (245, 1).

i-zli-m nak $h\bar{a}$, it is not on my heart, i.e. I do not remember (253, 10). Here the \bar{i} of $zl\bar{i}$, heart, has been shortened.

nwasai-t di hā, does a grandson exist of thee, i.e. hast thou a grandson? (243, 11). a-khwarkai-t-al gudā-kī ts'ēk, whither did thy sister's son go? (243, 12). a-nzhōr-at gudā hā, where is thy daughter-in-law? (241, 6).

a-syūgh-at bū tar-tyūs i-nar hanyī, thy mother-in-law dwells in your house (244, 9). anguṣḥti-t tsōn hin, how many fingers hast thou? (247, 3).

a-khsir-a zwandai hā, a-wrandēr-a bū mrī, his father-in-law is alive, his sister-in-law is dying (244, 4, 5).

a-syūgh-a handzuk, a-zūmm-al-a (for zūm-a-l) ts'ēk, his mother-in-law remained, his son-in-law went away (244, 12, 13).

a-disti-wa tēran, bind his hands (247, 1).

I have not noted any examples of the plural pronominal genitive suffixes.

It will be observed that in the above examples the governing word is always either a noun of relationship or a part of the human body. Whether the use of these suffixes is confined to such nouns, I cannot say. We can certainly say a- $kit\bar{a}b$ -am, my book, see § 20 (d).

In the section (§ 117) dealing with the ablative, reference has been made to the use of the word *inēl*, from him, etc. As explained in § 81, this word is also used as a post-position governing the genitive, and meaning 'in possession (of so and so).' By itself, it is used to mean 'in his possession,' and it is also freely used with pronominal suffixes of the genitive. Thus:—

 $in\bar{e}l^a$ -m, in my possession (135, 7). $in\bar{e}l^a$ -t, in thy possession (135, 7). $in\bar{e}l^a$ -wa, in his possession (135, 5).

121. Locative.—The full forms of the locatives of the personal pronouns are not used so much as the contracted forms described in § 19. These latter will be further dealt with in § 123. As examples of the full locatives, we have:—

i- f^a izar lāzim hā, it is incumbent on him (140, 10).

i-fa girgad rī dzōk-am, I came with him (144,13).

122. Contracted Pronouns.—The contracted pronouns described in § 19 play a very important rôle in Örmurī, and their use should be thoroughly understood. Each person has different forms according as it represents the dative or the locative, and, in addition, the third person has a contracted form for the ablative. We shall take each case in order.

Contracted Pronouns of the Dative (124, 2ff.; 136, 6ff.).—These are:—

hir or ri, to me, to us.

dal, to thee, to you.

hal, to him, to her, to it, to them.

It will be observed that each form represents both the singular and the plural. They are used only as substantives, never as adjectives (136, 6). In the first person, either hir or ri may be used without affecting the meaning, as in hir ghwats (124, 10) or ri ghwats (124, 12), say to me.

As stated in § 19, when hir or hal is not the first word in a sentence, it drops the initial h, and is attached as an enclitic to the preceding word, the final consonant of which is doubled (124, 14). Thus, $ts^an\ hir$, today to me, becomes ts^ann -ir, and $ts^an\ hal$, today to him, becomes ts^ann -al. After a vowel, not only is the h dropped, but also the vowel of the hir or hal. Thus, $h\bar{o}\ hir$, this to me, becomes $h\bar{o}$ -r (152, 9), and i- $d\bar{e}r^a$ $l\bar{a}st^a$ hal, from the camp to him, becomes i- $d\bar{e}r^a$ $l\bar{a}st^a$ -l (135, 12). $R\bar{\imath}$ and dal are not used enclitically in this way.

These dative contracted pronouns are very often used with verbs of motion, and in such cases sometimes alter their meaning. Thus, with $dz\bar{o}k$, to arrive, we have:—

```
hir dz\bar{o}k or r\bar{i} dz\bar{o}k, to arrive to me, hence, to come.
  dal dzōk, to arrive to thee, hence, to go to you.
  hal dzok, to arrive to him, hence, to go to him, and hence, to go away. Thus, we
        have (125, 2ff.):—
   ts^a nn - ir dz\bar{o}k or ts^a n r\bar{i} dz\bar{o}k, he came today.
   ts^a n \ dal \ dz\bar{o}k, today he went to you.
  tsann-al dzōk, today he went to him, or today he went away.
These datives are commonly used with the following verbs (125, 6):—
   dzay\bar{e}k, to bring or to take away (something animate).
   dz\bar{o}k, to arrive (pah\bar{u}chn\bar{a}).
   dz\bar{u}sh^y\bar{e}k, to see, to look (at).
   gastak or glastak, to bring or to take away (something inanimate).
   ghwashtak, to fall.
   ghwēk, to say.
   lik^{y}\bar{e}k, to ascend.
   naghōk, to come out.
   nim<sup>y</sup>ēk, to descend.
   shiyok, to give.
   tsal'ēk, to bring or to take away (something animate).
   ts^{y}\bar{e}k, to come or to go (chaln\bar{a}).
   waghy\bar{o}k, to enter.
   walak, to bring or to take away (something inanimate).
   The verb sy\bar{o}k, to break a rope, always takes hal (202, 5).
The following are examples of their use with some of these verbs:—
   Baksh r\bar{i} dz\bar{o}k, Bakhsh came (242, 7).
   ts\bar{\imath}v, dz\bar{e}w^a n-a r\bar{\imath}, go, bring him here (258, 15).
   b\bar{o}i \ r\bar{i} \ dza\bar{\iota}, come near (258, 12).
   i-d^a r\bar{\imath} dz a\bar{\imath}, come here (257, 13).
   i-d^a-l \ r\bar{\iota} \ dz a\bar{\iota}, come here to it, i.e. in this direction (257, 12).
   ka tū ghwats, mun azz-al sū dzaw<sup>a</sup>m, if thou say (it), then I will go (152, 4).
   khwāww-al gastak-a, he has taken sleep away, i.e. he has fallen asleep (259, 12).
   pa-mukhkh-al ghwashtak, he fell on his face (142, 7).
  i-kūwai liki-l ghwashtak, he fell into the well (179, 1).
   hafō dal bū du'ā salām ghwēk-in, he was saying salutations to thee (259, 7).
  m\bar{a}khkh-al dī (from here) b\bar{u} nisyēn (from nagh\bar{o}k), we are coming out from here
        (242, 4).
   a-distt-ir sha, give me the (i.e. your) hand (246, 15).
   tson dal di shawam, how many may I give to thee? (261, 5).
   h\bar{o}nn-ir d\bar{i} sha, give me so many (261, 6).
   k\bar{u}-f^a liki-l-a sha, give it to him (143, 8).
  sazā-laī gunāh gad barābar shērī, give him punishment corresponding to the
         fault (145, 5).
```

ka haf rī dza, mun azz-al aī sū sḥ aw m, if he come, then I will give to him (150, 14).

az dal bū tsawam, I am coming to thee (242, 3).

pa-nīsht²-l tsawak-in, they went outside (142, 10).

hā rāī sīkh i-k*lai kī-l tsawak hā, this road has gone (i.e. leads) straight to the village (255, 1).

In the following five further examples of $dz\bar{o}k$ and $ts^{\prime}\bar{e}k$ with these datives, $d\bar{i}$ is the ablative particle, and $in\bar{e}l^a-m$ $d\bar{i}$ means 'from me' and $in\bar{e}l^a-t$ $d\bar{i}$, 'from thee.' See §§ 81,... 126.

i-dēr lāst-l dī ts ēk, he went from the camp (135, 12).

 $k\bar{u}$ - $Mak\bar{a}l\bar{\iota}$ $S\bar{a}h\bar{i}b$ $l\bar{a}st^a$ -r $d\bar{\iota}$ $dz\bar{o}k$, he came from Mr. Macaulay (135, 15).

 $k\bar{u}$ - $t\bar{u}$ $l\bar{a}st^a$ -r $d\bar{\iota}$ $dz\bar{o}k$, he came from thee (135, 11).

 $in\bar{e}l^2$ -tt-ir $d\bar{i}$ $dz\bar{o}k$, he came from thee (136, 4).

inēla-mm-al dī tsēk, he went from me (136, 4).

123. Contracted Pronouns, Locative.—The locative forms of these contracted pronouns are as follows:—

di or da, in or on me, in or on us.

di or da, in or on thee, in or on you.

wi or wa, or (often after a consonant) a, in or on him, her, it, or them.

It will be observed that the forms for the first and second persons are the same. The forms ending in i (di and wi) are sometimes written with long $\bar{\imath}$, thus, $d\bar{\imath}$, $w\bar{\imath}$.

These pronouns can be employed in almost any locative sense. Thus (133, 2ff.), $di\ h\bar{a}$ may mean 'he is in me,' or 'he is on me,' or 'he is near me,' or similar locative meanings for 'us,' 'thee,' or 'you.' They are frequently combined with postpositions, as in $ga\dot{q}$ -da, with me, with us, with thee, or with you, or $ga\dot{q}$ -wa, with him or with them (137, 2). This is especially common with winar and wizar, as in winar-di or winar-da, in me, in us, in thee, in you; winar-wi or winar-wi or wizar-wi or him, her, it, or them; wizar-di or wizar-da, on me, on us, on thee, on you; wizar-wi or wizar-wa, on him, her, it, or them. Full particulars regarding these forms will be found in §§ 85, 86. Similar to this union of these pronouns and a postposition are the adverbs i- d^a , here, and i- w^a , there, in which they are added to a preposition, and the final a is shortened. The word i- d^a means literally 'on me,' and i- w^a , 'on him.' With this change of meaning we may compare the use of $r\bar{\imath}$ and hal described in the preceding section.

As an example of the use of these contracted locatives by themselves, we may quote:—
a-khalq da sū kōṭwāl gumān wizar kawin, the people will make consideration of a
kōṭwāl upon me (da wizar), i.e. they will take me for a kōṭwāl (140, 11).

So far for the use of di or da and wi or wa in a locative sense, but these words have also a much wider employment.

124. In the first place they are used after regular locatives to emphasize the subject of a following verb (133, 14). Thus:—

i-ghānd inar da hai, it is thou who art on the hill.

i-ghūnd inar wi hā, it is he who is on the hill.

125. The verb substantive in Ormuri is used only as a pure copula or as an auxiliary verb (§ 39). It never by itself postulates existence. Using it as a copula, we can say

Zaid nā-jōṛai hā, Zaid is sick, but we cannot say Zaid hā for 'Zaid exists.' If it is required to postulate existence, or to postulate presence in a certain place, then di, wi, or wa (but not da in this idiom, 134, 14) must be used with the verb substantive (134, 4ff.). In such a case, as already stated, wa often becomes a after a consonant and also in the third person plural (237, 11). We thus get, for instance, the following conjugation of the verb 'to be' in the present tense (237, 2ff.):—

Singular.

Plural.

1. az-a ham, I am.

mākh-a hyēn, we are.

2. tū-wa hai, thou art.

tyūs-a haī, ye are.

3. $haf\bar{o}$ -wa $h\bar{a}$, he is.

hafaī-wa (or hafaī-a) hin, they are.

In the above, the verb is not a copula,—it predicates existence. If it is a copula, the enclitics wa and a are not used. We have az (not az-a) stir h^am , I am weary (239, 12); $m\bar{a}kh$ (not $m\bar{a}kh$ -a) $hair\bar{a}n$ $hy\bar{e}n$, we are troubled (240, 4); $haf\bar{o}$ (not $haf\bar{o}\cdot wa$) sir $h\bar{a}$, he is good (239, 9). Similarly, for the past, we have az-a $by\bar{o}k$ -am, I was, i.e. I existed (237, 6), and so on.

Similarly di (not da, 134, 13) is used to postulate existence, but generally with the idea of presence superadded, although wa and wi are also used with this shade of signification. Thus, di $h\bar{a}$ means 'there is,' and di $by\bar{o}k$, 'there was.' They could be used in cases like the following:—Suppose a number of people are seated together. Someone might ask 'falānai sarai di $h\bar{a}$,' is so and so here (di)?' The answer would be 'hafōwa $h\bar{a}$,' 'he is.' If a plural answer were required, the answer would be 'hafaī-wa hin,' they are;' or the answer might be in the second person, ' $t\bar{u}$ -wa hai,' 'thou art,' quasi,' there's you.' This use of di and wa to postulate existence frequently corresponds to the English indefinite verb substantive, 'there is,' 'there was.' Thus (134, 11ff.), while $haf\bar{o}$ di $by\bar{o}k$ means 'he was,' we may also have sarai di $h\bar{a}$, there is a man; sarai di $by\bar{o}k$, there was a man. In this use, indicating presence in a certain place, da is not used, but only di (134, 14). This di, although sometimes written $d\bar{i}$, should not be confused with the plural emphatic particle $d\bar{i}$ (§§ 78, 99), or with $d\bar{i}$, the contracted pronoun of the ablative. Other examples of the use of these contracted pronouns or the locative are:—

hits di (written di) nak hā, there is nothing (62, 8).

 $h\bar{\imath}ts kuk di (d\bar{\imath}) nak h\bar{a}$, there is no one (62, 9).

 $b\bar{e}$ gap har ts^a di $d\bar{\imath}$ (particle of emphasis) $h\bar{a}$, except a stone there is everything, or everything is here (159, 11).

nwasai-t di hā, is there a grandson of thee? *i.e.* hast thou a grandson? (243, 11).

dist-am di nak $h\bar{a}$, in my hand there is not, i.e. it is not in my power (251. 7). i-nas-a di (written $d\bar{i}$) $lik^a h\bar{a}$, there is a pain in his belly (255, 5).

syī tsōn-wa dī (emphatic particle) buk-in, there were several. Here the w of wa has been preserved after a consonant (30, 6). For syī tsōn, see § 26.

a-gunum tson ser-a hā, how much seer (i.e. how many seers) is the wheat? (250,

11). This example is doubtful.¹

¹ The a of ser-a is perhaps the pronominal suffix of the genitive, 'how many seers of it? In 252, 7, we have a-kaf seven man ha, how many mannds is the chaff? Here there is no a attached to the man.

ta-spuk ghap-wa hā, there is the barking of a dog (252, 11). Here, again, the w of wa is preserved after a consonant.

126. Contracted Pronoun, Ablative.—This occurs only in the third person. The form is $d\bar{\imath}$, meaning 'from him, her, it, or them.' Its independent use seems to be somewhat rare. We have $hir\ d\bar{\imath}\ dz\bar{\imath}k$, he came from him, in 136, 2. It corresponds to the Hindī us- $s\bar{\imath}$ in:—

tū dī pa-khabar hai, lit. art thou by knowledge regarding him? i.e. dost thou know anything about him? (249, 5); Hindī tujhē us-sē wāqfīyat hai?

az dī khabar nak h^am, I do not know about him (249, 6). Hindī maī us-sē vāqif nahī hū.

So, $m\bar{a}khkh-al\ d\bar{i}\ b\bar{u}\ nisy\bar{e}n$, we go out from here $(yah\tilde{a}-s\bar{e})\ (242,\ 4)$.

With this contracted pronoun, we may compare the Pashto da, de, this.

Much more common is its use as a pleonastic ablative particle. Whenever an ablative appears in a finite sentence, this $d\bar{\imath}$ must also be used with the verb. This is fully explained in §§ 81 and 83. A few further examples are here given:—

kū-tū lāsta-r dī dzōk, he came from thee (135, 11). Here, dī has altogether lost its pronominal force. All that it does is to reduplicate the force of lāsta, from. We may put it this way, hir dī dzōk means 'he came from him.' Then who the 'him' is is explained by the ablative kū-tū lāsta to be 'you,' so that the force of the third personal pronoun has disappeared from the dī, and it means only 'from.' Other examples are:—

i-der läst-l dī tsek, he went from the camp (135, 12).

kū-Makālī saḥib lāsta-r dī dzōk, he came from Mr. Macaulay (135, 15).

Sometimes it is doubtful whether a particular form is in the ablative or not, and the doubt is always removed by the presence or absence of this $d\bar{\imath}$. Thus, $in\bar{e}l^a$ means both 'from' and 'in possession (of).' If it has the former meaning, then $d\bar{\imath}$ must also appear in the sentence (see §§ 81, 117), as in:—

inēlo-tt-ir dī dzōk, he came from thee (135, 8). inēlo-mm-al dī dzōk, he went from me (135, 8).

In two passages, $d\bar{\imath}$ is used with the verb $kap^{\imath}\bar{e}k$, to cut, in a manner which I am unable to explain. They are:—

marīy^a-l-a dī kapak, he cut his (someone else's) throat (246, 7). a-maghzai-l-a dī kap^şēk syōk, his neck (throat) was cut (246, 8).

This $d\bar{\imath}$ should be distinguished from the plural emphatic particle $d\bar{\imath}$ (§§ 78, 79), and from di, the contracted pronoun of the dative (§§ 123ff.).

- 127. **Pronominal Suffixes.**—The use of pronominal suffixes has been dealt with in the preceding pages. Those referring to the subject and the object of a sentence are dealt with in § 98, and those referring to the genitive in § 120.
- 128. Other Pronominal Forms.—These require no special treatment under the head of syntax. Various minor points are referred to in the sections dealing with the particular pronouns (§§ 21-27).
- 129. Verb Substantive.—The verb substantive (§ 39) is used only as a copula, as in Zaid sir hā, Zaid is good, or as an auxiliary verb to form the perfect (§ 49) and

pluperfect tenses (§ 50). It does not, by itself, predicate existence. If it is necessary to do this, one of the contracted pronouns of the locative must be added, as explained in § 125.

The present tense, $az h^a m$, etc., agrees with the subject in number and person, and does not change for gender. The past tense, $by\bar{o}k$ -am, etc., is a participal tense, and agrees with its subject in gender also, as well as in number and person. Thus:—

```
hafō saṛai nā-jōṛai byōk, that man was sick (240, 9).
hafa zarka jōṛ buk, that woman was in good health (240, 11).
hafaī hēndī buk-in, they (masc. or fem.) were blind (240, 12). In the plural, of course, the masculine and the feminine are the same.
```

The following are examples of the use of the verb substantive as a copula. If the predicative complement is an adjective, it agrees with the subject in gender and number (§ 111). Examples of its use in predicating existence will be found in § 125.

```
hafo sir hā, he is good (239, 9).
haf^a sr^a h\bar{a}, she is good (id. 10).
hafo at sir nak ha, it is he that is not good (id. 11).
az stir hom, I am weary (id. 12).
hafaī lawanaī hin, they (masc.) are mad men (id. 13).
hafaī lawanīyī hin, they (fem.) are mad women (id. 14).
tū ai huṣḥyār hai, it is thou (masc.) who art intelligent (id. 15).
tū aī huṣḥyarrī hai, it is thou (fem.) who art mad (240, 1).
tyūs hushyarrī haī, ye (masc. or fem.) are intelligent (id. 2).
az aī khēla ham, it is I who am ignorant (id. 3).
mākh hairān hyēn, we are perplexed (id. 4).
h\bar{o} a\bar{i} sir h\bar{a}, it is this (masc.) that is good (id. 5).
h\bar{a} a\bar{i} sr^a h\bar{a}, it is this (fem.) that is good (id. 6).
h\bar{a}i (or hai) sr^a hin, these are good (id. 7).
tū khafa byōk-ē, thou wast angry (id. 13).
tyūs khwash buk-aī, ye were happy (240, 14).
az gōṣḥai byōk-am, I was alone (id. 15).
mākh i-sa dzāk buk-yên, we were in one place (141, 1).
tū aī tsālāk byōk-ē, it is thou who wast clever (id. 3).
tyūs grēnī buk-aī, ye were important (id. 4).
sakhal sūṣḥa sūnḍī-a buk-in, tsaka ta-pēla ta-tār, so red were her lips, as a
     thread of silk, i.e. they were as red as a thread of silk (245, 13).
angushti-t tson hin, how many fingers hast thou? (247, 3).
```

In the sentences with $by\bar{o}k$, the verb may mean 'became,' as well as 'was.' It depends, in each case, on the context.

130. Copulative Verbs.—The copulative verbs $by\bar{o}k$, to become (§ 40), and $sy\bar{o}k$, to become (§ 41), require a few remarks. The past tenses, being participial, agree with the subject in gender, as well as in number, and person. The past tense of $by\bar{o}k$ is also used as the past tense of the verb substantive. $Sy\bar{o}k$ is used to form nominal compound verbs (§ 29) and passives (§ 31). In conjugating the regular verb, $by\bar{o}k$ is used to vol. x.

form the pluperfect (§ 50), the future perfect (§ 52), and the past conditional (§ 54).

When an adjective is the predicative complement of a copulative verb, it agrees with the subject in gender and number. Thus:—

haf sarai hond syok, that man became (or was) blind (241, 7).

haf zark hond suk, that woman became (or was) blind (241, 6).

hafui hēndi suk-in, they (masc. or fem.) became (or were) blind (241, 8).

If the complement is a noun substantive, and if it is of a gender different from that of the subject, then, if the copulative verb is in a past tense, it may agree with either the subject or the complement. Thus:—

af sarai zark syōk or af sarai zark suk, that man became a woman (177, 5).

Examples of the use of $by\bar{o}k$ will be found in the preceding section. The following are further examples of the use of $sy\bar{o}k$:—

tū st^ar syōk-a, thou becamest great (241, 9).

tyūs ghūn^a suk-aī, ye became hidden (241, 10).

az stir syōk-am, I became weary (241, 11).

mākh stir suk-yēn, we became weary (241, 12).

ta-sar a-drī-wa khwā suk-in, the hairs of his head became fallen (245, 6).

- 131. The Active Verb.—It will be convenient to take the tenses formed from the agrist first, and then to consider those formed from the past participle.
- 132. The Aorist Tenses.—Whether a verb is transitive or intransitive, these tenses follow the same rules. None of them change for gender, and in each case the verb agrees with its subject in number and person. For the method of distinguishing the object of a transitive verb, and of using pronominal suffixes of the object, see § 98, 2.

The following are examples of the use of the tenses formed from the aorist, except the imperative:—

```
tyūs bū tsawaī, ye are going (242, 2).

mākhkh-al dī bū nisyēn, we are going out from here (242, 4). Cf. § 126.

az bū nōrī khuram, I am eating bread (242, 6).

tsabū ghwats, what art thou saying? (242, 8).

sakhal bū ghwatsam, I am saying this (lit. such) (242, 9).

tā aī dērī, dost thou own a paternal uncle? (243, 3).

zalpiē aī dērī, hast thou a grandfather? (243, 4).

a-wrandēr-a bū mrī, his sister-in-law is dying (244, 5).

a-syūgh-at bū tar-tyūs i-nar hanyī, thy mother-in-law dwells in your house (244, 9).

a-sar-am bū dūmī, my head aches (245, 1).

a-gōy-am bū dūmī, my ear aches (245, 4).

a-pundīyam bū dūmī, my heel aches (247, 15).

sar bū galam, I am arranging my hair (lit. head) (245, 8).
```

133. Imperative.—The following are examples of the use of the imperative:—

tsamī gharēwan, open (your) eyes (245, 2).

tsōm gharēwan, open (your) eye (245, 3).

kū-har kuk likī a-paṭ rūn dēran, for everyone keep (your) forehead shining, i.e.

before everyone preserve a cheerful countenance (245, 9).

```
a-ninī sūņ ka, blow (your) nose (245, 12).
a-zbān ma khwurtēwan, do not wag (your) tongue (246, 2).
ghūn kī, please make hidden (100, 9). See § 70.
```

134. Past Tenses of Intransitive Verbs.—The past tenses are formed from the past participle. In the intransitive verb they agree with the subject in gender, as well as in number and person. The persons are indicated by the addition of the nominative pronominal suffixes described in § 20 (a). The following are examples:—

azz-al tsan dzut pēts tsaēk byōk-am, I had walked a long way today (List of Words, No. 224).

 $t\bar{u} \; lik^{g}\bar{e}k$ -a, thou didst ascend (242, 1).

hafō $r\bar{\imath}$ $dz\bar{o}k$, he came (241, 13).

haf ri dzāk, she came (241, 14).

hafai nāsk-in, they (masc. or fem.) sat (241, 15).

bakhsh rī dzōk, Bakhsh came (242, 7).

a-khwarkai-tt-al gudā-kī ts'ēk, whither did thy nephew (sister's son) go? (243, 12).

a-rāṣkai-mm-al i-nar kī ts'ēk, my nephew (brother's son) went home (243, 13).

tsan-am rī a-tror dzāk hā, today my aunt has come (244, 1).

ta-fa a-nāk malk, his wife died (244, 3).

a-syūgh-a handzuk, a-zūmm-al-a ts'ēk, his mother-in-law remained, his son-in-law went away (244, 12).

a-gas-a māshk, his tooth (fem.) broke (246, 1).

135. Past Tenses of Transitive Verbs (110, 7ff.).—As frequently stated in the preceding pages (§§ 12, Note; 20 (c); 36; 46; 98, 3), the past participle of a transitive verb is by origin passive in signification. Thus, khwalak means 'eaten,' not 'having We should therefore expect that, as in Pashto or Hindostani, the subject should be put into the case of the agent; but we have seen that, in Ormuri, there is no distinction in form between the agent and the nominative, so that we get, not only Zaid mullak, Zaid died, in which Zaid is in the nominative, but also Zaid khwalak, by-Zaid (something masculine) was-eaten, i.e. Zaid ate (something masculine), in which Zaid is the agent. While therefore the subject of a transitive verb in a past tense is apparently in the nominative, the verb itself agrees with the object, and not with the subject, in gender, number, and person. Thus, panduk, a pomegranate, is masculine singular, and is in the third person, and if we wish to say 'Zaid ate a pomegranate,' we must put the verb into the third person masculine singular to agree with pandūk, and say Zaid aī pandūk khwalak, lit. by-Zaid a pomegranate was-eaten. If we wish to say that Zaid ate pomegranates, then as pandūchī, pomegranates, is plural, we must put the verb into the third person plural,—there being no distinction of gender in the plural,—and say Zaid dī pandūchī khwālk-in, lit. by-Zaid pomegranates were-eaten-they. Again, if we wish to say that Zaid ate bread, then, as nori, bread, is feminine singular, and is in the third person, the verb must be in the third person singular feminine, and we must say Zaid at norī khwālk, lit. by-Zaid bread was-eaten.

Similarly, in such cases, the termination of the verb must refer to the object, and not to the subject. We have seen that this was the case in pandūchī khwālk-in, where vol. x.

the object was in the third person plural, and it is the same for the other persons. Thus, khwalak-am means 'ate me (a man),' and khwālk-am means 'ate me (a woman).' In neither case does it mean 'I ate.' So Zaid khwalak-am means 'Zaid ate me,' not 'I ate Zaid.'

The agent-subject may also be expressed by a pronominal suffix, as shown in § 47; but this need not be dealt with here, as the manner of the use of these suffixes of the agent-subject is fully described in § 98, 3.

The following are further examples of the use of these tenses. It should be remembered that there is no distinction of gender in the plural:—

A. Object masculine singular:-

az aī pandūk khwalak, I ate a pomegranate (122, 14).

hīts gudā-m nak dzōk hā, I have never beaten him (62, 10).

khwāw-am aī nak dōk hā, I have not made sleep, i.e. have not slept (252, 3).

 $m\bar{a}kh \ a\bar{i} \ pand\bar{u}k \ khwalak$, we ate a pomegranate (122, 15).

tū aī khwalak, thou atest something indefinite (122, 5).

hafō aī pandūk khwalak, he ate a pomegranate (122, 14).

agar ka haf sarai zahr khwalak, khō nak mullak, although that man ate poison, still he did not die (152, 8).

a-khwai dzān-a wazyōk, he slew his own life, i.e. he killed himself (252, 2).

 $a-dz\bar{a}n-a\ l\bar{u}t\ d\bar{o}k$, he robbed himself (252, 6).

a-khwai dzān-a khalāṣ dōk, he released himself (256, 15).

 $h\bar{o}$ kulanak a-khwai sabaq yād dōk hā, this boy has remembered his lesson (254, 12).

B. Object feminine singular:—

nīyat-am dāk, I made a resolution (252, 12).

 $a-z\bar{e}n\bar{\imath}-wa$ $i-z\bar{a}n\bar{s}/\bar{r}ak$ izar $n\bar{a}k$, he put (his) chin on (so-and-so's) knee (246, 3).

marīy'-l-a dī kapak, he cut his (someone else's) throat (246, 7) (see § 126).

nyūw nar-a aī jör dāk hā, he has built a new house (253, 14).

ishārat-a dāk, he made a sign (261, 4).

C. Object plural:—

az dī pandūchī khwālk-in, I ate pomegranates (122, 14).

agar ka hō-r dī ghandzī ghwēk-in, azz-al ts nak ghwēk-in, although this (person) spoke abuses to me, I did not say any (words) to him (152, 9).

tsakhal-a bū ghwēk-in? sakhal-a bū ghwēk-in, what sort (of words) was he saying? He was saying this sort (of words) (253, 2, 3).

hafaī $b\bar{u}$ ts^a $ghw\bar{e}k$ -in, what (words) were they saying? (254, 14).

136. Conditional Sentences.—The usual conditional particle is ka, if, with mun, then, in the apodosis. Other similar words will be found in §§ 92, 93. These can apparently be used with any tense. If the condition is one that has not occurred, then the present conditional (§ 53) or the past conditional (§ 54) tense is employed. The following are examples of conditional sentences:—

A. Aorist, i.e. present subjunctive (see § 56), in the protasis:— ka khura, if he eat (88, 8).

ka haf a rī dza, mun azz-al aī sū sḥaw m, if (i.e. when) he come, then I will give (it) to him (150, 14).

ka, tū ghwats, mun azz-al sū dzaw²m, if thou say (it), then I will go to him (152, 4).

B. Present in protasis:-

ka bū khura, if he is eating (88, 9).

C. Past tense in protasis:—

ka haf khwalak, mun az sū khur m, if he ate, then I shall eat (89, 10).

ka bārān aī syōk, mun ghwāsī dī sū sa, if it rained, then the grass will grow (150, 13).

ka $haf^a r\bar{\imath} dz\bar{o}k$, $mun h\bar{o} k\bar{a}r s\bar{u} sa$, if he came, then this work will become (i.e. will be done) (152, 3).

Sometimes this tense is idiomatically used in the sense of the present subjunctive, as in:—

ka khwalak, mun sū mullak, if he ate, then he will have died, i.e. if he eat, then he will die (88, 14).

D. Imperfect in protasis:-

ka haf bū khwalak, mun khwalakan (or mun khwalak by ōkan), if he was eating, then he would have been eating (or would have eaten) (with your permission) (87, 2, 13).

E. Perfect in protasis:-

The perfect (49) is formed by conjugating the past participle with the verb substantive; thus, $khwalak\ h\bar{a}$, has eaten him. In the protasis of a conditional sentence, the agriculture of $by\bar{o}k$ is substituted for the verb substantive. Thus:—

ka khwalak ba, if (he) has eaten him (89, 7).

F. Present conditional in protasis:-

ka khwalakan, if (he) should eat, or should have been eating him (89, 5).

ka haf jōr byōkan, mun ts ēkk-al sū byōk, if he had been well, then he would have gone (89, 13).

In the above, the verb in the apodosis is in a kind of future of the pluperfect; but if the verb is itself $by\bar{o}k$, then the future perfect tense is used, as in:—

ka $t\bar{u}$ by $\bar{o}kan^a$, mun haf \bar{u} by $\bar{o}k$, if thou hadst been, he would have been (90, 2). This is evidently done to avoid the repetition of $by\bar{o}k$.

Sometimes the future perfect itself indicates a condition, without the use of ka.

Thus:—

 $af^a s\bar{u} i-w^a by\bar{o}k$, $k\bar{\iota} r\bar{\iota} dz\bar{o}k$, had he been there, why did he come? (90, 3).

G. Past conditional in protasis:—

ka khwalak byōkan*, if (he) had eaten, or been eating him (89, 5).

In this connexion, we may draw attention to phrases such as:-

nōṛī di nak buk, ka tū khwālk bukan, there was no bread, that thou mightest have eaten it, i.e. there was no bread for thee to eat (88, 3).

137. Potential Compound Verbs.—As in Paṣḥtō, the only compound verbs are potential. The verb $hints^{g}\bar{e}k$ means 'to be able to do,' as in af^{a} $hints^{g}\bar{e}k$, he could do; af^{a} $hints\bar{e}k$, she could do; af^{a} $b\bar{u}$ $hints\bar{e}$, he can do (113, 11). With the past participle of

another verb, it means 'to be able to,' 'to can.' If the main verb is transitive, the past participle agrees in gender and number with the object, but otherwise the participle is not changed. If the main verb is intransitive, then the participle agrees with the subject. Thus, bū khwalak hintsī, he can eat something masculine; bū khwalk hintsī, he can eat something feminine, or he can eat a number of things, either masculine or feminine (113, 14).

138. Order of Words in a Sentence.—The order of words in a sentence is usually Subject, Object, Verb (173, 12; 175, 6). Thus, Zaid sir hā, Zaid is good (173, 9); a-saṛai a-panḍūk khwalak, the man ate the pomegranate (174, 6); az haf wīrān dāk, I saw him sick (175, 5). Ghulām Muḥammad Khān gives no rules for the position of the indirect object, or other members of the sentence, nor have I been able to discover any special rule myself. Generally speaking, the order of Paṣḥtō and Hindōstānī seems to be followed.

The order of words in a sentence is also considered in § 98, 1.

- 139. Order of Particles.—The particles here dealt with are the following:—
 - A. Pronominal suffixes indicating either the subject or object of a verb, or thegenitive of a personal pronoun, such as am, at, wa, etc. (§§ 20; 98, 2, 3; 120).
 - B. Contracted pronouns of the dative, hir, dal, hal, etc. (§§ 19; 122).
 - C. The particles $a\bar{i}$ and $d\bar{i}$ (§§ 78, 79; 99-102).
 - D. The particles $b\bar{u}$ and $s\bar{u}$. Of these, $b\bar{u}$ indicates the imperfect (§ 48) and present (§ 64), and $s\bar{u}$ indicates the future imperfect (§ 51), the future perfect (§ 52), and the future (§ 65). It naturally follows that both of these cannot appear in the same clause (127, 10).
- (1) Of the above, we may dismiss the pronominal suffixes of the genitive with the remark that they are always suffixed to the governing noun. Thus, a-sar-am bū dūmī, my head aches (245, 1).

As regards the others, the first thing to remark is that (except those under head B)none of them can begin a clause or sentence.

- (2) If more than one of them appear in a clause, then they all come together, after the same word, and this word must be one of the principal members of a sentence,—subject, object (direct or indirect), or verb (126, 9).
- (3) The order amongst themselves, in which they occur, is that given above, viz. first one of the group A. Then one of group B. Then either $a\bar{\imath}$ or $d\bar{\imath}$. And then either $l\bar{u}$ or $s\bar{u}$. Thus:—

saṛai-m-al aī bū $tsal^y\bar{e}k$, I (am) was $(b\bar{u})$ taking $(tsal^y\bar{e}k)$ a man $(saṛai a\bar{\imath})$ away (hal) (127, 13).

This rule of order is broken in one case. When the contracted pronoun hal follows a noun ending in a consonant, it becomes al. Thus, $a-z\bar{u}mm-al$, the son-in-law to him. If it follows a vowel, it becomes l, as in s!ra-l, give to him. Now, if a is added first, and then hal, it is evident that, as hal will then become l, there will be no difference in sound between $a-z\bar{u}mm-al$, the son-in-law to him, and $a-z\bar{u}m-a-l$, the son-in-law of him to him. In such cases, therefore, the order is reversed for the sake of clearness, and we have $a-z\bar{u}mm-al-a$ instead of $a-z\bar{u}m-a-l$. Thus:—

 $a-z\bar{u}mm-al-a$ $ts^y\bar{e}k$. his (a) son-in-law went away (hal) (244, 13).

 $k\bar{u}$ - f^a $lik\bar{\imath}$ -l-a $s\not ha$, give it (a) to him $(k\bar{u}$ - f^a $lik\bar{\imath}$ hal) (143, 8). $s\not ha$ -l-a, give it to him (151, 3).

marīy²-l-a dī kapak, he (a) cut for him (hal) the throat, i.e. he cut his (someone else's) throat (246, 7). See § 126.

a-maghzai-l-a dī kap*ēk syōk, his (a) throat was cut for him (246, 8).

140. The question arises as to which member of the sentence these particles should follow. If one of the particles belongs to group A, then the question is at once solved by the rules laid down in 98, 2, 3. According to these rules, if the verb is a transitive verb in one of the acrist tenses, then the pronominal suffix represents the object, and is attached to the subject. But, if the verb is a transitive verb in one of the past tenses, then the pronominal suffix represents the subject, and is attached to the object. The other particles then fall into their regular places, as in sarai-m-al aī bū tsal ēk, above quoted.

If there happen to be no pronominal suffix of the object or subject, then the particles usually follow the first main member of the sentence, which is usually the subject. Thus, to follow the fate of $b\bar{u}$ in the sentence sarai $b\bar{u}$ pand $\bar{u}k$ khwalak, a man was $(b\bar{u})$ eating a pomegranate (126, 14). Here, $b\bar{u}$ follows the subject sarai. But if the subject, sarai, is omitted, the $b\bar{u}$ must follow the next principal member of the sentence, viz. pand $\bar{u}k$, the object, and we get, with the subject supplied by a pronominal suffix, pand $\bar{u}k$ -a $b\bar{u}$ khwalak, he (a) was $(b\bar{u})$ eating a pomegranate. Finally, if the object is also omitted, we must place the $b\bar{u}$ after the next principal member of the sentence,—the only word now left,—viz. the verb khwalak, indicating also in this case the subject, by a pronominal suffix (see § 47). Thus, we have khwalak-a $b\bar{u}$, he (a) was $(b\bar{u})$ eating it, there being no pronominal suffix of the object available in this case (§§ 20, 1; 47). If there had been a pronominal suffix of the object, it would have been added, however, not to the verb, but to the $b\bar{u}$, as explained in § 48. Similarly for $s\bar{u}$ (§ 51).

Again with the particle $d\bar{\imath}$, if in such cases we wish to use a suffix of the object, it is added to the $d\bar{\imath}$. For instance, the suffix of the object in the third person plural is (§§ 20, 1; 47) an, and 'he ate certain indefinite things' is $khw\bar{a}lk-a$ di-n, in which the a represents the subject, and n represents the object (§ 101).

This adding of the suffixes to $b\bar{u}$, $s\bar{u}$, and $d\bar{\iota}$ occurs only when the verb is in one of the past tenses. It does not occur when it is in one of the agrist tenses (§§ 63, 101).

As another example of the changing position of these particles we may take the sentence $k\bar{u}$ - f^a $lik\bar{\iota}$ -l-a s/ka, give to him (143, 8). Here the subject is omitted, and the first principal member is the indirect object $k\bar{u}$ - f^a $lik\bar{\iota}$. Hence the particles hal, to him (repeating pleonastically the indirect object), and a, it, are appended to it. If we now omit the indirect object $k\bar{u}$ - f^a $lik\bar{\iota}$, these two particles must be appended to the next principal member, the verb s/ka, give, and we get s/ka-l-a, give it to him (151, 3), with identically the same meaning as $k\bar{u}$ - f^a $lik\bar{\iota}$ -l-a s/ka. Regarding the order of the suffixes in these two phrases, see the preceding section.

APPENDIX TO CHAPTER VII.

On the use of $a\bar{i}$ and $d\bar{i}$ (see §§ 99ff.).

141. As explained in the footnote to § 99, Ghulam Muhammad Khan's account of the use of the particles $a\bar{i}$ and $d\bar{i}$ is far from clear. Indeed, his main rule that, with certain specified exceptions, one or other must appear in every sentence involving the third person, is contradicted by numerous sentences from his own pen. I have therefore collected in the following pages every example in which, according to his rules, they should appear, as well as every other sentence in which they do appear, and have endeavoured, without much success, to discover the circumstances under which they are employed. As none of the sentences have any context, it is often quite impossible to discover the exact shade of meaning that each is intended to convey. After giving a few examples of the kinds of sentences in which $a\bar{i}$ and $d\bar{i}$ may not be used,—on this point there is no doubt, and complete examples are unnecessary,—I give all the sentences occurring in Ghulam Muhammad Khan's grammar, in which, according to him, they should be used, and also those in which they are used, but in which, according to him, they should not be used. In each case I give a reference to the page and line in which the sentence is to be found.

142. Aī and dī may not be used to refer to a noun with the definite article, or to proper names, personal pronouns, or substantival demonstrative pronouns. Thus:—

'(a) Nouns with the definite article:—

a-distt-ir stra, give me the (i.e. thy) hand (246, 15). Here the object of the transitive verb is a-dist, with the definite article.

a-piē-m mulak hā, a-māw²-m zwandīy² hā, my father is dead, my mother is living (242, 13). Here the subjects of the verb substantive hā, viz. a-piē and a-māw², have each the definite article.

a-pattī ziyar suk-in, the leaves became yellow (260, 4).

a-ṣḥwānn-al ta-ram^a i-pētsa ts^{a} ēk $h\bar{a}$, the shepherd has gone after the flock (260, 13).

But, in the following three cases, $a\bar{i}$ is used, apparently against the rule, with the definite article. I am unable to explain its presence:—

a-göy-a aī kūn hā, his ear is deaf (251, 10).

tar-tū a-nar aī tang hā, thy house is confined (252, 14).

ta-Bragistă a-zbān aī grān hā, the language of Bragistā is difficult (258, 6). Here possibly the aī is a particle of emphasis, and we should translate 'it is the language (and only the language) of Bragistā that is difficult.'

(b) Proper Names:-

Bakhsh rī dzōk, Bakhsh came (242, 7).

Zaid, tar- $t\bar{u}$ marz \bar{a} , $r\bar{\iota}$ $dz\bar{\iota}k$, Zaid, thy brother, came (175, 14).

(e) Personal Pronouns:—

az stir $h^a m$, I am weary (239, 12).

mākh hairān hyēn, we are perplexed (240, 4).

tū khafa byōkē, thou becamest angry (240, 13).

[§ 143.

tyūs huṣḥyarrī haī, you are intelligent (240, 2). hafō rī dzōk, he came (241, 13). hafaī hēndī buk-in, they were blind (240, 12).

The same is the case if the object of a transitive verb is a personal pronoun, indicated by a pronominal suffix. Thus:—

pa-galgh-a $w^a r$, carry him (or it) upon the shoulder (247, 8). az-a $b\bar{u}$ nak man^am, I do not heed him (249, 3). $ts\bar{v}w$, $dz\bar{e}w^a$ n-a $r\bar{v}$, go, bring him here (258, 15).

(d) Substantival Demonstrative Pronoun:—

 $h\bar{o}$ wa $h\bar{a}$, this exists (237, 4).

 $haf^a sr^a h\bar{a}$, that (woman) (or she) is good (239, 10).

hā tar ākhshai hā, this is this man's brother-in-law (244, 11).

 $h\bar{o} d\bar{i} i-f^a l\bar{a}st^a plan h\bar{a}$, this is wider than that (252, 1). Here $d\bar{i}$ is the sign of the ablative.

143. The particles $a\bar{\imath}$ and $d\bar{\imath}$ can, however, be used with any of the above as particles of emphasis. Several examples have been given in §§ 78, 79. The following are additional to those there given:—

 $h\bar{o}$ $a\bar{i}$ sir $h\bar{a}$; $h\bar{a}$ $a\bar{i}$ sr^a $h\bar{a}$, it is this (m. or f.) that is good (240, 5, 6). But $ha\bar{i}$ sr^a hin, these are good (240, 7).

tū aī tsālāk byōkē, it is thou who wast clever (241, 3).

hā-m aī ta-khwarkīyī nar hā, it is this that is my niece's house (243, 15).

 $h\bar{a}$ $a\bar{i}$ $ta-f^a$ $zark^a$ wan $h\bar{a}$, it is she that is that woman's co-wife (244, 7).

a-pārī-wa aī zarī hā, it is his foot that is small (247, 2).

kuk aī hai, who on earth art thou? (248, 1).

 $h\bar{a}$ -wa $a\bar{i}$ $m\bar{a}w^a$ $h\bar{a}$, this person (to whom I point) is his mother (250, 2).

 $h\bar{a} bih\bar{e} a\bar{i} khwash^a h\bar{a}$, this too is sweet (251, 9).

 $h\bar{o}$ ar sir $h\bar{a}$, ka hafo, is it this that is good, or that ? (253, 8).

a-nēkī aī kū-har-kuk girad sir hā, only virtue is good with everyone, i.e. in everyone's opinion (256, 7).

a-dunyā aī tōṣḥa ta-ākhirat hā, the world is only a preparation (lit. viaticum) for the future (256, 9). Here, be it observed, the aī refers to the complement, tōṣḥa, of the verb substantive, and not to the subject.

a-b'l srat at ta-Khudāē ni'mat hā, the condition of good health is only the favour of God (258, 2). Here the same remark applies.

tar-tū a-naṣīb aī sir hā, it is thy luck that is good (258, 7).

It must be confessed that, owing to the shortness of the sentences and the absence of context, in some of the above the use of $a\bar{\imath}$ as an emphatic particle is doubtful. On the other hand, I am unable to suggest any other reason for its presence.

144. As regards transitive verbs, $a\bar{i}$ or $d\bar{i}$ is used to refer to the object in the following sentences:—

af ka põi awasa, bad kār aī bū nak ka, he who understands does not do a bad action (24, 3).

hā aī, ka sra buk, nak-a dal wrūk, thou didst not take this (woman), who was good (151, 12).

agar ka hō-r dī ghandzī ghwēk-in, although this man spoke abusive words to me (152, 9).

 $y\bar{a}$ -r $d\bar{\imath}$ wak $w^{\circ}r$, $y\bar{a}$ -r $d\bar{\imath}$ sharbat $w^{\circ}r$, either bring water, or bring sharbat (157, 9).

ka sakhal kār aī nak kēwī, (see) that thou do not such a deed (162, 2).

tā aī dērī, dost thou possess an uncle? (243, 3).

zalpiē aī dērī, hast thou a grandfather? (243, 4).

ōzḥ aī gardan ka, put a necklace (on) the neck (245, 6).

khwāw-am aī nak dōk hā, I have not made sleep, i.e. I have not slept (252, 3).

hīts aī bū nak kawī, he does nothing (252, 4).

'aql aī nak dērī, thou hast no sense (253, 1).

'arz aī daram, I have a petition (253, 12).

 $ny\bar{u}w^a$ nar-a $a\bar{i}$ $j\bar{o}r$ $d\bar{a}k$ $h\bar{a}$, he has built a new house (253, 15).

khūn aī mak kēwan, do not commit murder (254, 8).

tēṣḥa kharbūza aī mak ṣḥīnan, do not buy a bitter musk-melon (256, 14).

ta-khalq i-rāī inar dī zaṣḥī mak kēwan, do not make (i.e. put) thorns on the way of people (i.e. on the public road) (258, 9).

 $g\bar{a}k^a d\bar{\imath} b\bar{e}z^a n$, cook flesh (259, 3).

tson dal dī sḥaw m? hōnn-ir dī sḥa, how many may I give thee? give me somany (261, 5, 6).

145. If the object of a transitive verb is not expressed, then ai and di are not used. Thus:—

hīts gudā-m nak dzök hā, I have never beaten (him) (62, 10).

 $pa-dy\bar{o}$ $z\bar{a}m^a$ $b\bar{u}$ $kh\psi ur\bar{a}k$ ka, he eats $(kh\psi ur\bar{a}k$ $kay\bar{e}k$, to eat, is a compound verb) with both jaws (246, 5).

sakhal mak kēwan, do no act thus (254, 3).

i-khalq girad sir kēwan, act well with people, i.e. behave well (260, 3).

146. But also, they are omitted in many cases in which I can trace with certainty no difference in meaning resulting from their use or disuse. Probably, as Ghulām Muḥammad (supplt. p. 1) implies, the aī and dī gives a tinge of indefiniteness to the word to which it refers. In this case tā aī dērī would mean 'dost thou possess any uncle at all?' but tā dērī would mean simply 'dost thou possess an uncle?' So, khūn aī mak kēwon (254, 8) would mean 'do not commit any murder,' while kōr mak kēwon (253, 11) would mean 'don't make anger,' i.e. 'don't be angry now.' Possibly, too, others are treated as compound verbs expressing one compound idea, like khwurāk kayēk, to eat, above. Such, for instance, may be tōp kayēk, to jump (250, 8); khwārī kayēk, to work (254, 10); sabr kayēk, to wait (257, 10); and others in the following list. The whole question is, however, very doubtful. The following are the sentences given by Ghulām Muḥammad in which neither aī nor dī is used with the object of a transitive verb:—

hō kulanak bū tsēk lupī, this child sucks the breast (246, 11).

rawan bal ka, light a fire (248, 4; 259, 15).

kār bū nak kawī, he does not do work (248, 10). Cf. 162, 2, in the examples with aī.

.L . F

```
hai bū ts kawin, what are these doing? (250, 1).
         i-p° ghnwāin izar top ka, make a leap over this canal (250, 8).
         nīyat-am d\bar{a}k, I made a resolution (252, 12).
         ts khal-a bū ghwēk-in? sakhal-a bū ghwēk-in, what sort of (words) was he say-
              ing? He was saying such (words) (253, 2, 3).
         kor mak kewan, do not make anger, i.e. do not be angry (253, 11).
         ts'n khwārī kēw'n, ka sabā-t pakār sa, today do work, that it may become useful
              to thee tomorrow (254, 10).
         hafaī bū tsa ghwēk-in? hīts-an bū nak ghwēk-in, what were they saying? they
              were saying nothing (254, 14, 15).
         angushtrī dist kēwan, put a ring on the hand (255, 7).
         ta-piē qiṣṣa mēnan, heed the words of the father (255, S).
         pagrīya i-sar tēran, bind a turban on (thy) head (256, 3).
         t\bar{t}ng^a-wa grany\bar{t} k\bar{e}w^an, make the knot tight on it (257, 1).
         i-hīts kār inar sustī mak kēwan, in any work do not do laziness (257, 6).
         kū-kuk izar thumat mak ghwats, do not speak calumny against anyone
              (257, 8).
         syī sā'at sabr kēwan, wait a moment (257, 10).
         hir tsīw, ka hisāb kayēn, come to me, that we may make an account (257, 15).
         i-kund i izar rahm këw n, show mercy on widows (260, 7).
         wyūk giyōy mak shīn n, do not buy a dry cow (260, 8).
         darēṣḥī mak ghwats, do not speak lies (260, 14).
         ghaibat mak kēwan, do not do backbiting (260, 15).
         ishārat-a dāk, he made a sign (261, 4).
    147. If the verb is not transitive, then a\bar{i} and d\bar{i} refer to the subject. Thus:—
       (a) Intransitive Verbs:—
         kū-har-kuk likī aī ras'ēk, he arrived (i.e. came) to everyone (61, 14).
         i-f " murghān aī, i-wust"ēk, inar-wi gōlīy" aghak, a bullet (gōlīy" aī) hit that bird
              as it flew away (cf. \S 34) (46, 4).
         b\bar{a}d \ a\bar{i} \ b\bar{u} \ laga, wind is blowing (253, 4).
         d\bar{u}n a\bar{i} b\bar{u} chigi, smoke is rising (258, 13).
    But, in the two following instances, at is not used:—
         a-zalpië-m malk hin, my grandparents have died (243, 5).
         hā rāi sikh i-k"lai kī-l tsawak hā, this road has gone (i.e. leads) straight to the
              village (255, 1).
    148. (b) Verbs Substantive. With these the aī or dī almost always refers to the
subject, but sometimes it refers to the complement. In the following it refers to the
subject:-
         n\bar{a}m-at a\bar{i} ts^a h\bar{a}, what is thy name? (248, 2).
         tar-kuk nar aī hā, whose house is it? (248, 11).
         tar-kuk khwār ai hā, whose sister is she? (249, 1).
         hā māl aī tar-kuk hā? ta-Khān aī hā, whose is this property? It belongs to
```

the Khān (249, 6, 7). Note that in the second clause we have at, although

the subject is omitted.

ta-tsōn tsān aī hā? ta-ṣḥ^ah tsān aī hā, of how many years is he? he is of six years (249, 13, 14). Here again the subject is omitted.

khwaṣḥ-am aī nak hā, it is not pleasing to me (249, 15). Here again the subject is omitted.

 $h\bar{a}$ giyōy a \bar{i} i-harr^a inar ghwa \dot{t}^a h \bar{a} , this cow is the stoutest of all (cf. § 15) (250, 6).

hō sarai aī chig hā, this man is tall (250, 7).

sir shai aī hā, this is a good thing (250, 12). Subject omitted.

hō bār aī haluk hā, this load is light (250, 15).

kuk aī khafa hā, who is angry? (251, 5).

tsakhal rang-a aī hā, what sort is its colour? (251, 11).

hō sarai aī badē-khōr hā, this man is a bribe-taker (251, 12).

zāl sarai aī hā, he is an old man (253, 13). Subject omitted.

zāla zarka aī hā, she is an old woman (253, 14). Subject omitted.

 $h\bar{o} p^{o}rai a\bar{i} tar-kuk h\bar{a}$, whose is this rope? (254, 5).

yār aī haf sir hā, ka pa-tsaṭ aī ga yār ba, that friend is good, who is also a friend behind one's back (254, 6).

hō karal aī mahīn hā, this mat is fine (256, 1).

sir dzawān aī hā, he is a good youth (256, 10). Subject omitted.

 $h\bar{a} t\bar{u}r^a a\bar{i} ta-p^a dzaw\bar{a}n h\bar{a}$, this sword belongs to this youth (256, 11).

 $h\bar{a}$ wz^a až tar-kuk hā, whose is this she-goat? (256, 12).

shāista yānsp ai hā, it is a pretty horse (257, 4). Subject omitted.

a-tōb* aī har waqt sra hā, contrition is at all times good (257, 11).

hō kār aī kharāb hā, this action is bad (258, 1).

tar-kuk mrīk aī hā, whose slave is he? (258, 8).

 $h\bar{a}$ gon at zēṣḥan $h\bar{a}$, this stick is thorny (258, 11).

ta-lak^a-ṣḥ^awai kanḍak aī hā, it is a herd of deer (259, 4). Subject omitted.

ta-tsēn k'lai mayā aī hā, of what village is it a flock? (259, 5).

ta-nāwyī marzā aī hā, he is the bride's brother (259, 8). Subject omitted.

hō kūwai aī kṛum hā, this well is deep (259, 10).

 $h\bar{a}$ kūts $a\bar{a}$ tang $h\bar{a}$, this lane is narrow (259, 11).

ta-pēriyannī aṣar aī hā, it is a trace of demons (260, 12). Subject omitted.

ta-nmāz waqt aī hā, it is the time of prayer (261, 7).

asal aī wadānī dzut hā, this year the harvest is plentiful (261, 9).

149. In the following example the $a\bar{i}$ must refer to the complement, and not to the subject, for the subject is the pronoun of the second person contained in the verb substantive:—

tar-kuk kulān aī hai, whose son art thou? (248, 3).

The probable explanation is that, in the case of the verb substantive, the $a\bar{\imath}$ or $d\bar{\imath}$ refers to the subject when that is expressed, but when the subject is not expressed it refers to the complement. It will have been noticed that in several of the above examples the subject is not expressed. In such cases I have classed them as examples of $a\bar{\imath}$ referring to an omitted subject, but in each case they could also be taken as examples in which, in the absence of the subject, the $a\bar{\imath}$ referred to the complement.

```
150. In the following examples, at or di is not used with the verb substantive:
        haī sra hin, these are good (240, 7).
        marzawi-t tson hin, how many brothers hast thou? (242, 15).
        dyō-m marzā hin, I have two brothers (243, 1).
        syi-m dūw hā, I have a daughter (243, 8).
       mwasai-t di hā, is there (di hā) a grandson of thee, i.e. hast thou a grandson?
            (243, 11).
       angushti-t tson hin, how many fingers hast thou? (247, 3).
       min shiw hā, it is still night (248, 15).
       tar-kuk inēlo hā? taro inēlo hā, in whose possession is it? It is in his possession.
            (250, 3, 4).
       dzut bad-khōi sarai hā, he is a very ill-mannered man (250, 10).
       dist-am di nak hā, there is (di h\bar{a}) no hand of me, i.e. I have no hand (251, 7).
       ta-spuk ghap wa hā, there is (wa hā) the barking of a dog (252, 11).
       h\bar{a} \ r\bar{a}\bar{i} \ \bar{a}rat \ h\bar{a}, this road is wide (252, 13).
       yād-am nak hā, I have no memory (253, 9).
       harra saraī hin, all are men (254, 2).
       dzut ghamjan hā, he is much grieved (255, 14).
       harre sre hin, all are good (257, 9).
       hā wak khwash hā, this water is sweet (259, 1).
       sāl dzut hā, there is great cold (259, 13).
    151. (c) With the copulative verbs by\bar{o}k and sy\bar{o}k, a\bar{i} and d\bar{i} also refer to the subject:
when it is expressed. When it is not expressed, they probably refer to the complement.
Thus :-
       kuk až byok, it was someone (30, 3). Subject omitted. But ts byok, there was
            something (30, 4). Subject also omitted.
       tson ar byok, it was to some extent (30, 4). Subject omitted.
       syī tsōn wa dī buk-in, there were (wa buk-in) several (30, 6). Subject omitted.
       tsak^{\circ} mzarai aī ba, he is by nature (Hindī h\bar{o}t\bar{a} hai=ba) like a tiger (163, 13).
            Subject omitted.
       ta-malik yansp ar byok, it was the horse of the chief (249, 8). Subject omitted.
       ka bārān aī syōk, mun ghwāsī dī sū sa, if rain became (i.e. if it rained), then the
            grass will grow (150, 13).
     152. But in the following examples a\bar{i} or d\bar{i} is not used with copulative verbs:—
       hafō sarai nā-jōrai byōk, that man was sick (240, 9).
       hafō kār wīrān syōk, that business became ruined (241, 5).
       haf^a zark^a h\bar{o}nd^a suk, that woman became blind (241, 6).
       s-wa hō byōk, wa tsōn māl bī buk-in, that person, for one, was (there), and some-
            other persons were also (there) (248, 12).
       sahar syök, it became morning (248, 14).
       tar-mun khwai ūṣḥ byōk, it was my own camel (250, 5).
      skramöt-am syök, he forgot me (251, 1).
```

 $d\bar{u}b$ syōk, he sank (251, 3).

jōr byōk? hā, jōr byōk, was he in good health? Yes, he was in good health (251, 13, 14).

hō faṣl ṣḥī-būk syōk, that crop became rotten (252, 9).

gap sū nōrṣḥ nak sa, a stone will not become soft (258, 3).

dushman sū dost nak sa, an enemy will not become a friend (258, 4).

 $s\bar{a}l^a$ -m $b\bar{u}$ sa, there is cold to me, i.e. I am cold (259, 15).

garmī suk, tētsan-am bū sa, it became warm, there is heat to me, i.e. I am hot (260, 1).

153. (d) With a Passive verb $a\bar{\imath}$ and $d\bar{\imath}$ also refer to the subject. Thus:—

saṛai aī wazyōk syōk, a man was killed (121, 11).

saṛai dī wazzuk suk-in, men were killed (121, 12).

154. If the subject of an intransitive verb is not expressed, $a\bar{\imath}$ and $d\bar{\imath}$ are omitted. This does not apply to verbs substantive. We have seen above (§ 149) that in their case, if the subject is omitted, $a\bar{\imath}$ and $d\bar{\imath}$ are sometimes used to refer to the complement. So also with copulative verbs. The following are examples of intransitive verbs with the subject not expressed:—

i-ṣḥōr likī-l ts'ēk, he went to the city (251, 15).

tar-tū i-ghōlai inar hanyī, he is sitting in thy court-yard (255, 9).

prān hanyēk, yesterday he was seated (255, 13).

CHAPTER VIII.

DERIVATION OF WORDS.

155. The formation of the Infinitive or Verbal Noun has been described in § 32, and that of the Verbal Noun of Agency in § 33. Besides these, there is an Abstract Verbal Noun, formed as follows:—

Abstract Verbal Noun (39, 10ff.).—The usual way of forming this from verbs of the first conjugation is to drop the final ${}^{g}\bar{e}k$ or $ay\bar{e}k$ of the infinitive, and to substitute for it $\bar{a}\bar{o}$. Thus:—

Infinitive.

Verbal Noun.

 $\frac{1}{2} h \bar{i} - t s^{y} \bar{e} k$, to send. $\frac{1}{2} m u k h a y \bar{e} k$, to knead. $\frac{1}{2} d a z h^{y} \bar{e} k$, to load.

shī-tsāō, sending.
mukhāō, kneading.
dazḥāō, loading.

Verbs whose infinitives end in $w^{j} \tilde{e} k$ change the final $^{j} \tilde{e} k$ to in^{s} , and other verbs sometimes do the same. Thus:—

mukhaw ēk, to knead. ghaf ēk, to weave. skī-ts ēk, to send.

mukhawin, kneading. ghafin, weaving. shī-tsawin, sending (40, 3).

Verbs of the second conjugation, whose infinitives end in $\bar{o}k$ or ak, rarely form abstract verbal nouns. When they do it is generally by adding $\bar{a}\bar{o}$ to the infinitive. Thus:—

 $wriy\bar{o}k$, to take.

wriyōkāō, taking.

In other cases, when no special verbal noun is in use, the infinitive is itself used a a verbal noun.

156. Abstract Nouns.—These are formed with the following terminations:—

ī.
wālai.
tōb.
wālī.
gīrī.
gālī.
āwī. Thus:—

i (41, 9).

From grān, dear, difficult, we have grānī, dearness, difficulty.

garm, hot, nēk, good, bad, bad, garmī, heat. nēkī, goodness.

badī, badness.

khpal, own,

khpalawi, relationship.

VOL. X.

These are generally borrowed from Persian or Pashtō. wālai (41, 13).

spīw, white, ghrās, black, ziyar, yellow, spīwwālā, whiteness. ghrāswālai, blackness. ziyarwālai, yellowness.

These are commonly abstract nouns indicating colour (42, 1). tōb (42, 2).

marzā, a brother, zarka, a woman, (?) barwā, a pimp,

marzatōb, brotherhood, brotherliness.
zark*tōb, womanhood.
barwītōb, pimping.
sp*ktōb, lightness.

(?) sp*k, light, not heavy,

I have no authority for the last two words in the first column. What are written are the corresponding Paṣḥtō words. $w\bar{a}l\bar{\imath}$ (41, 3).

mrīk, a slave, wīnz, a slave-girl, dāī, a nurse, mrīkwālī, slavery.

wīnz wālī, the condition of a slave-girl.

dāīwālī, the condition of a nurse.

 $g\bar{\imath}r\bar{\imath}$ (42, 4).

khwai, own, mullā, a priest, munshī, a clerk, khwaigīrī, relationship.

mullāgīrī, priesthood.

munshīgīrī, the profession of a clerk.

 $g\bar{a}l\bar{i}$ (42, 6).

pazanyek, to recognize,

pazangālī, recognition.

 $\bar{a}w\bar{i}$ (42, 8).

 $d\bar{a}ragh$, long, $ts\bar{a}k$, sour, Note khwash, sweet,

dāraghāwī, length. tsākāwī, sourness. khwāzḥāwī, sweetness.

157. Nouns of Agency.—Nouns of Agency may be formed from verbs, and are then called verbal nouns of agency, or may be formed from nouns, and are then called nominal nouns of agency. The formation of verbal nouns of agency has been already described in § 33. The following remarks deal only with nominal nouns of agency. These generally signify a profession or occupation, and the terminations are borrowed from Paṣḥtō or Persian (44, 8ff.). Thus:—

lau-garai, a reaper.

madat-garai, a helper.

randar-garai, a mill-worker (44, 13. Note the cerebral r).

bagar-wāl, a horse impetuous for the mare.

bēgār-wāl, a forced labourer.

zar-gar, a goldsmith.

saudā-gar, a merchant.

dōkān-dār, a shopkeeper.

158. Nouns of Instrument (26, 10ff.).—There are very few of these in Ormuri. When required, they are borrowed from Pashto or Persian, such as the Pashto ghāshtumbūnai, a toothpick. The following two Ormuri words have been noted:—

sar-tarwung, a band for the head, a headcloth.

parawak, a broom (from parayek, to sweep).

159. Nouns of Place.—These also are rare in Ormuri, and are generally borrowed from Pashto or Persian. Thus (27, 3):-

dēg-dān, a fireplace.

pand-ghōlai, a cattle-yard.

kand-ghōlai, a chasm.

tahārat-khāna wa āwrīz, bathroom and privy.

160. Compound Nouns.—Compound nouns are common. Several examples will be found in the preceding sections. Here we may mention one that does not fall under any of the preceding heads, viz. sarai-khōr, a man-eater, cannibal (44, 15).

In this connexion we may mention the 'jingles' which are a prominent feature in all the languages of India. The one example given by Ghulam Muḥammad Khan is sarai-harai, men etcetera (176, 7).

161. Onomatopæa.—The following onomatopæa are given by Ghulam Muhammad Khān (27, 6ff.):-

dang, a single beat of a drum.

tang, the noise made by striking a metal cup once.

ghap, a single bark of a dog.

From these verbs are formed, such as dang'ek, to give forth the sound of a drum. So, tangiek, ghapiek.

Transitive verbs would be dangawek, tangawek, and ghapawek.

tinau or tirkau, the noise of earthen vessels or bottles colliding.

takau, the noise made by striking wood or stone.

jinau, the tinkling of ornaments.

162. Diminutives.—Diminutives are generally formed as in Pashto (25, 2). Thus :--

Diminutive. Noun. tūtkai. tūt, a mulberry. gurūkai. gurū, a kid. skhwandar, a steer, a calf. skhwandarkai. law'r, a bludgeon. lawarkai. ghrāsakai. ghrās, a black man. dīwāl, a wall. dīwālgai, or dīwālgōţai. shor, a city. shorgai. miltagh, a gun. miltaghgai. sarīgai. sarai, a man. hhar, an ass. khargai.

Others follow Persian or Hindostani (25, 10). Thus:—

bar, a door.

barkak.

mizdik, a mosque.

mizdkak, contracted from mizdikkak.

VOL. X.

2 B 2

Noun.

tukṛa, a piece.

tukṛa, a book.

kitābak.

dēg, a cauldron.

yānsp, a horse.

tūt, a mulberry.

bāgh, a garden.

Diminutive.

tukṛakak.

kitābak.

dēgṛai.

yānspkiṛai.

tūtkiṛai. Cf. above.

bāghgiṛai.

These are all masculine. If it is desired to form a feminine of any diminutive ending in ai, the ai is changed to $\bar{\imath}y^a$. Thus, the feminine of skhwandarkai, a little calf, is skhwandark $\bar{\imath}y^a$ (26, 6).

The diminutive of $d\tilde{u}k^a$, a girl, is $d\tilde{u}kar\tilde{v}y^a$ (26, 9).

163. Adjectives of Origin, etc.—These generally end in i (34, 7). Thus:—

Kābulī, of Kābul.

Logari, of Logar.

Balkhī, of Balkh.

Bukhārāī, of Bukhārā.

Or (34, 10) in imitation of other languages, wal may be added, as in *Pērawāl*, of Pēra.

Or (34, 13) the genitive may be used, as in ta-grī, of the mountain (=pahārī).

Sometimes (35, 5) the Paṣḥtō taṣḥtan, master, is added to the genitive, as in ta-yānsp taṣḥtan, a horseman; ta-pagrīy taṣḥtan, one who wears a turban (=pagrīwālā); ta-sāng taṣḥtan, a javelin-man. In such senses, wāl is also used, but not so frequently, as in pagrīwāl, one who wears a turban.

On p. 33, Ghulām Muḥammad Khān gives a number of relative adjectives borrowed from Persian and Paṣḥtō. It is unnecessary to quote them all. The following Paṣḥtō examples will suffice:—

khīrai, dirt.
waswās, doubt.
saudā, madness.

khīran, dirty. waswāsī, doubtful. saudāī, mad.

164. Compound Adjectives.—Persian and Pashto compound adjectives, made up of an adjective and a noun, are freely borrowed in Örmuri (32, 8). Thus:—

Persian sufid-chashm, Pashto spin-stargai, white-eyed.

Persian syāh-chashm, Pashtō tor-stargai, black-eyed.

More common are the numerous adjectives formed by prefixing a negative, such as $b\bar{e}$ or $n\bar{a}$. These too are all borrowed. Examples (163, 4) are:—

bē-'aql, stupid.
bē-gham, without sorrow.
nā-jōr, unwell.
nā-tars, fearless.
nā-dān, ignorant.
nā-fahm, unintelligent.

nā-fahm, unintelligent

nā-mard, unmanly.

In Ōrmurī adjectives with $b\bar{e}$ generally add a short i to the termination of the main word (32, 4). Thus:—

bē-fikri, without anxiety.
bē-raḥmi, merciless.
bē-waki, waterless.
bē-ḥāṣili, fruitless.
bē-bari, doorless.
bē-shaki, without doubt (161, 2).

CHAPTER IX.

ORMURĪ TIMES AND SEASONS.

165. Calendar.—The Ormuri months are those usual Musalman countries, but the names vary in some respects. In the following list the Arabic names are compared with the Ormuri (59, 3).

Arabic. Ormuri. Möharram. ta-Hasan Husain a-māī. Safar. ta-Safar (sic) māī. $Rab\bar{\imath}$ 'u'l-annual. Awwal Khwar. Rabī'u's-sānī. Dim Khwār. Jumādu'l-awwal. Shaim Khwar. Jumādu's-sānī. Tsāram Khwār. Rajab. Rajab. Sha'bān. Sha'bān. Ramazān. Ramazān.

Shavovāl. Zarī 'Id ('the little 'Id').

Zi'l-qa'da. $Kh\bar{a}l\bar{\imath}$.

Zi'l-hijja. Stor 'Id ('the big 'Id').

The following are special seasons or days (59, 9):—

Shē mogh, the three months Rajab, Sha'bān, and Ramazān.

Sra shīw ta-imāmyīyī, the Ashūrā, or first ten days of the Möḥarram.

Daya, the first ten days of Ṣafar.

Wi māi chār shamba, the last Wednesday of each month.

Yād o is m ta-Rasūl, the Bārah Wafāt, or last twelve days of Muḥammad's fatal illness.

Shakh Barāt, the Shab-ĕ-barāt, or 14th day of the month of Sha'bān, on which Musalmāns make oblations to the names of deceased ancestors. (Paṣḥtō ṣḥakh, buried.)

166. Days of the Week.—The following are the days of the week (60, 3):—

Saturday, hafta.

Sunday, yak samba (sic).

Monday, $d\bar{u}$ samba.

Tuesday, shē samba.

Wednesday, tsār samba.

Thursday, pāz samba.

Friday, jum'a.

167. Times of the Day.—These are as follows (60, 7):—

mērsh prēts, sunrise.

sūrī mahal barī zar, 8 or 9 A.M.

Hindū sūrī māl klak barī zar, 10 or 11 A.M.

gharma, midday.

zawāl gatēs, 12-30 P.M. rawāl, 1 P.M. awwal nim-ryūz, 2 P.M. nim-ryūz, about 3 P.M. tūt nim-ryūz, about 3-30 P.M. chig dyō shutī, about 4 P.M. $dy\bar{o}$ shut \bar{i} , 4-30 or 5 P.M. qazā dyō shutī, about 5-30 p.m. avvval nmā-shām, after sunset. nmā-shām, evening. awwal khutan, early bedtime. khutan, bedtime. dzūnī khutan, sleeping time. awwal pahar, the first watch of the night. nīm shīw, midnight. pīnga, the end of night. saḥar, dawn.

§ **168.**] 235

CHAPTER X.

FREE TRANSLATION OF THE FOREGOING.

Sultan Mahmud once said to a madman, 'for what doth thy heart long?' The madman replied to him, 'my heart longeth for the tail of a fat-tailed sheep.' The Sultan made a sign with his eyes to one of his men, and told him to give the madman a radish. When they brought the radish and gave it to him, the madman began to eat it, shaking his head and laughing the while. Said the Sultan to him, 'O madman, why dost thou laugh?' He replied, 'this is why I am laughing, that since thou becamest king, there has been no fat left even on the tail of a fat-tailed sheep.'

FREE TRANSLATION OF THE FOREGOING.

A certain ignorant fellow found a mirror lying on the road. Now he had never in his life seen a mirror before. He became much pleased, and laughed. When he looked at the mirror, he saw that his own form was reflected in it, and that it was laughing. He imagined that this was another man, who was the owner of this article. So he nodded his head to the other fellow (saying), 'it is thee to whom this thing belongs; so I'll leave it to thee.' Then he left it where he found it, and went his way.

B ٠, .

VOCABULARY.

In the following Vocabulary words are arranged in the order of their consonants without any regard to their vowels. The latter come into consideration only in cases in which the same consonant or consonants are followed or separated by different vowels. Thus the different words containing the consonants tr will be found in the succession $tr\bar{\imath}$, tar,
The vocabulary contains all the words found in the preceding grammar, and also all those mentioned in Ghulām Muḥammad Khān's Qawā'id-ē-Bargistā. A reference is given to every place in which each word occurs. An Arabic number, by itself, indicates a section of the grammar. Thus, for a-nasīb, in article a-, we have 'luck, fortune, 143, 169 (145).' This indicates that the word, with these meanings, will be found in sections 143 and 169 (sentence 145) of the grammar. A Roman numeral indicates the number of a specimen. Thus (see i-do, under i, 1) I (7), III, indicates that the word is found in the 7th verse of the first specimen, and in the third specimen. If an Arabic numeral is preceded by 'No.,' the reference is to the List of Words and Sentences on pp. 247ff., the numeral being the number in that list. If an Arabic numeral is preceded by "Gh.," the reference is to the page and line of Ghulām Muḥammad Khān's Qawā'id-ē-Bargistā.

So far as is possible, I have stated the gender and have given the plural of every substantive and adjective noun quoted, and have given the principal parts of every verb. As regards transitive verbs ending in $aw^j\bar{e}k$ or $ay\bar{e}k$ (see Grammar, §§ 29, 30) the feminine of the past participle ends in awak or ayak. In his list of Verbs on pp. 184ff. of his $Qaw\bar{a}'id$, Ghulām Muḥammad Khān gives only the feminine forms in awak. For the sake of completeness I have throughout added the forms in ayak, though it should be remembered that these latter are rarely used (see Grammar, § 37). Also, as authorized by Ghulām Muḥammad Khān (p. 184, 1.9) when he gives only one form in $aw^j\bar{e}k$ or $ay\bar{e}k$, I have added the corresponding alternative form in $ay\bar{e}k$ or $aw^j\bar{e}k$ respectively.

A large portion of the Vocabulary of Örmurī is common to it and to Paṣḥtō. Those words that also occur in the latter language I have indicated by the letter P. It is not to be inferred that words so marked are necessarily Paṣḥtō in origin. For instance, the letter P. after the word qalam indicates merely that the word also occurs in Paṣḥtō and has been borrowed from that language, although, of course, it is Arabic in its ultimate origin.

The following is a list of the principal contractions employed in the following pages:—

ab., above. abl., ablative. adj., adjective. adv., adverb. aor., aorist. Ar., Arabic. bel., below. card., cardinal numeral. cf., compare. com. gen., of common gender. cond., conditional. conj., conjunction. def., definite. dim., diminutive. f. or fem., feminine. fut., future. gen., genitive. Gh., reference to page and line of Ghulam Muhammad Khan's Qavā'id-ĕ-Bargistā. imperf., imperfect. impve., imperative. interj., interjection.

intr. or intrans., intransitive. loc., locative. m. or masc., masculine. No., number in the List of Words and Sentences on pp. 247ff. onomat., onomatopæa. ord., ordinal numeral. P., Pashto. pass., passive. perf., perfect. pers., person. pl., plural. plup., pluperfect. postpos., postposition. p.p., past participle. prepos., preposition. pres., present. pron., pronoun. pronom., pronominal. Prs., Persian. sg., singular. s.v., under such and such a word. s.vv., under such and such words. tr. and trans., transitive.

Words beginning with a vowel or 'ain.

a, in na a, no, see na, 1.

interrog., interrogative.

- a-, the prefix of the definite article, 5, 97, et passim. For its force when used with the genitive of a demonstrative pronoun, see 97. Used with sō or so, one, 5, IV. Used with names of cities, 5. This article is often employed with abstract nouns, and is then usually not translated in English. Thus, a-bēdārī, wakefulness, 82; a-kharts, expenditure, 87; a-nēkī, virtue, 26, 87, 143, 169 (116); a-nasīb, luck, fortune, 143, 169 (145); a-pētsuf, abstemiousness, 79, 81, 82; a-rākho, the truth, truth, 77, 104, 169 (185) (see, however, rākho); a-tōbo, contrition, 148, 169 (134); a-tamao, greed, 83.
- -a, 1, for wa after a consonant, postulates existence, see wi or wa.
- -a, 2, or -ē, pronominal suffix of the second person singular, indicating the subject of the past tense of an intransitive verb, or the object of the past tense of a transitive verb, 20a, 45, 46, et passim.
- -a, 3, or, after a vowel, wa, pronominal suffix of the 3rd person singular, see wa, 2.
 -a, 4, or $-\bar{a}$, suffix of vocative, 10, 95.

- \bar{a} , for $h\bar{a}$, 3, q.v.
- $-\bar{a}$ or -a, suffix of vocative, 10.
- ai, interj. calling attention. ai lawanai-a, O madman, 95, II. Cf. ē, 2.
- with plural nouns and singular nouns of multitude being dī, passim. For the rules as to the use of these particles, see 78, 79, 99-102, 141-154. Used by itself, aī represents an indefinite object (of a transitive verb) not mentioned, 100, 125A.
- past tense of an intransitive verb, and the object of the past tense of a transitive verb, 20a, 45, 46, et passim.
- $-\dot{e}$ or -a, see -a, 2.
- ē, 1, interj. calling attention, O! 95, I (2, 8, 11, 21). Cf. ai, 2.
- \vec{e} , 2, or i, suffix of vocative of feminine nouns, 10.
- with proper names of persons, or with substantive pronouns indicating persons. In such cases ku or $k\bar{u}$ is used instead, 10, 17, etc.

With a noun the preposition often forms an adverb or a postposition. Such are i- $b\bar{e}zh$, up, above, 74; outside, externally, 74, 108; i-d, here, 27, 74, 122, 123, 169 (136), I (7), III; hither, 27, 74; i-d-l, here to it, in this direction, 74, 122, 169 (135); i- $dz\bar{e}m$, below, beneath, 74, 230; i-khwarints, on the right, 74; i-mukh, first, 16; in front, 74; before, Nos. 90, 238; i-mukh inar, before, I (8, 11); i-nar, in the house, at home, 74, 85, 108, 120, 132; inside, in, 74, et passim; i- $n\bar{e}sht$, outside, 74, 108; i palau, in such and such a direction, 27, 74; i- $p\bar{e}ts$, after, behind, 25, 74, 83, 107, 142a, 169 (180), I (3), No. 91, No. 239; i- $r\bar{e}st$, beginning from, 82, 84; i-tsang, near, 6, 74, 81, 94; i-w, there, 27, 74, 123, 136F, I (3); thither, 27, 74, 169 (110); i-w-l, there to it, in that direction, thither, 74, 77.

- \vec{a} , 2, or \vec{e} , see \vec{e} , 3.
- \tilde{o} , 1, see $h\tilde{o}$.
- ō, 2, in ō-hō-hō, interj. used in grief, alas! 95.
- $ab\bar{a}d$, adj. inhabited, 29. P.
- 'Abdullāh, m. N.P. 11.
- 'ibādat, piety; mīn' pa-'ibādat kēw'n, feel affection for piety, 104. P.
- ābādawēk or ābādayēk (p.p. f. ābādawak or ābādayak), to make inhabited, to populate, 29.
- $\bar{a}b\bar{a}d^{y}\bar{e}k$ [p.p. f. $\bar{a}b\bar{a}dak$; aor. 3, $\bar{a}b\bar{a}d$ sa (59)], to be inhabited, 59.
- ābādayēk, see ābādaw'ēk.
- 'id, a festival; zarī 'id, the little 'id, N. of the Arabic month Shawwal, 165; str 'id, the great 'id, N. of the Arabic month Zi'l-hijja, 165. P.

- i-d*, see i, 1; i-d*-l, here to it, in this direction, 74, 122, 169 (135); i-d* last*, from here, No. 222.
- adab, politeness, manners. ta-adab $p\bar{a}r^s$, for the sake of politeness, in order to teach (so and so) manners, 81. P.
- 'adl, justice, 94. P.
- $\bar{a}dm\bar{i}$, m. (pl. $\bar{a}damyann\bar{i}$), a man, 9 (8). P.
- $\bar{a}dam$, m., in $\bar{a}dam$ - $z\bar{a}d$ (f. $\bar{a}dam$ - $z\bar{a}d^a$), a human being, P.; $ban\bar{a}$ - $\bar{a}dam$ (f. $ban\bar{a}$ - $\bar{a}dam^a$), human beings, men. P.
- afa, afaī, afāī, see hafō.
- aghōk (p.p. f. aghak; aor. sg. 2, awas; 3, awasa; impve. sg. 2 awas, 38,62B, 71), to adjoin, to reach, 38,62B, 71; (of a missile), to hit (the mark), 34,85, 147; to be born, 38,62B, 71; pōī aghōk, to understand, 24,144; sir aghōk, to seem good (to), to be pleasing to (Hindī achchhā lagnā), 24. This verb, in its various uses, closely follows the use of the Hindī lagnā. Gh. 74 (11), 185 (4); pōī aghok, Gh. 73 (15), 189 (9). Cf. na-ghōk, waghyōk.
- agar, conj. if, No. 97. (Usually agar ka, 92, also 135A, 135C, 144.) P.
- ākhir, adv. lastly, finally, III. P. ākhiran.
- ākhirat, futurity, the future state, the next world, 143, 169 (117). P.
- ākhṣḥai, m. a brother-in-law, a wife's brother, a sister's husband, 23, 118, 142d. Cf. khṣḥānī. P.
- ikhtiyar, m. authority, power, 79, 86, 89, 92. P.
- akhwara-nak, adj. hungry, 169 (77). Cf. tra-nak.
- -al, used instead of hal, q.v., when following a word ending in a consonant, which consonant is then doubled, 19, passim.
- ^{a}m , for $h^{a}m$, I am, see $h\bar{a}$, 3.
- -am, pronominal suffix of the first person singular indicating the subject of an intransitive verb in the past tense, the subject or object of a transitive verb in the past tense, or, when suffixed to a noun, the genitive, 20, 45, 46, 98, 120. It can also indicate the dative, as in khwash-am, pleasing to me, 169 (28).
 - After a vowel, the vowel a is omitted, as in a-piē-m, my father.
- $\bar{\imath}mb\bar{a}\bar{\imath}$, pl. friends, I (19). The nominative singular of this word is not found in any of the materials. It is probably $\bar{\imath}mb\bar{a}$.
- ambār, a pile, heap. $kay\bar{e}k$, to pile up, Gh. 185 (12). P.
- 'amal, action, act, carrying out, effect. i-hukmī izar 'amal kēw'n, do carrying out on orders, obey orders, 86. P.
- imāmyīyī, in sr^a shīw ta-imāmyīyī, the good night of the imāmyīyī, N. of the āshūrā, or first ten days of the month Muḥarram, 165.
- 'Amr, m. N.P., 77, 89, 91. P.
- 'umr, age, life. pa-'umr, (never saw) in his life, IV; 'umr-at, thy life, 94, 169; tar tson 'umr, how old? 27, 107, No. 221. P.

- amaraw⁵ēk or amarayēk, (p.p. f. amarawak or amarayak, 37), to cause to hear, 30B, 37.
- amar*ēk (p.p. f. amarak, 58; aor. sg. 2, amār, 61B2; 3, amara, 30B, 58, 61B2, 69; entire aor. conjugated, 56), to hear, I (15), Gh. 185, 5 (where the aor. sg. 3 is written amarra). P. awrēd*l.

amarayēk, see amarāwiēk.

-an, pronominal suffix of any person in the plural. It is used to indicate (1) the object of a transitive verb in an aorist tense, but in this case only in the first or second person, 20b, 66, 98 (2); (2) the subject of a transitive verb in a past tense, in this case for all three persons, 20c, 47, 98 (3), 169 (97); or, when added to a substantive, the genitive, in this case also for all three persons, 20d. If this suffix is attached to a word ending in a vowel, it becomes n.

āina, f. a mirror, IV. P.

ēn, see in.

in or ēn, pronominal suffix of the third person plural, indicating the subject of an intransitive verb in a past tense, or the object of a transitive verb in a past tense, 20a, 45.

ōn, see hōn.

indza, in indza sal, adv. next year but one, after two years, 75.

indzān, adv. the day before yesterday, 75; indzān ta-mīn bī ryūz, two days before yesterday, 75.

angusht (pl. angushtī), a finger; angushti-t, thy fingers, 120, 129, 150, 168 (26).
P.

angushtrī, f. a ring, a finger-ring, 146, 169 (103), I (12). Prs.

injīr (pl. $inj^ar\bar{\imath}$), m. a fig, 9 (7). P.

inēl^a, postpos. governing gen. (use of, 81, 117, 120), in possession (of), belonging (to), 12, 74, 81, 107, 126, 150, 169 (31, 32); inēl^a-m, in my possession, 81, 117, 120; inēl^a-t, in thy possession, 81, 117, 120; inēl^a-wa, in his possession, 81, 120.

(With $d\bar{\imath}$, 1) from him, from her, from it, from them, 81, 117; hence, from, 81, 117, 126; $in\bar{e}l^a-m$ $d\bar{\imath}$, from me, 81, 117, 122; $in\bar{e}l^a-t$ $d\bar{\imath}$, from thee, 81, 117, 122.

inar (for i-nar, see i, 1), adv. in the house, at home, within (85).

Postpos. governing loc. in (use of, explained, 85), 12, et passim; used to form a superlative, 15, 148, 169 (34). It sometimes means 'on,' as in i-rāī inar, on the road, 144, 169 (147), IV; esp. in forming a gerund, as in i-wust ēk inar, on flying, 34; i-ts ēk inar, on going, 34. Other idiomatic uses are i-mukh inar, before, I (8, 11), cf. i-mukh , s.v., i, 1; i-mandz inar, in the middle, 74; i-khwai inar, mutually, 21; inar-di or inar-da, in me, in us, in thee, or in you, 85; inar-wi or inar-wa, in him, in her, in it, or in them, 85; on it, 85, 147. Cf. winar.

unës, card. nineteen, 16.

ORMURĪ anyī, ēnyī, anyēk, see hanyēk. 'aql, sense, wisdom, 56, 144, 169 (73), P.; bē-'aql, stupid, 164. P. -ir, used instead of hir, q.v., when following a word ending in a consonant, which consonant is then doubled, 19, et passim. arākha, see rākha. armān, m. sorrow, regret. Used as interj. armān, alas! 100; armān ka, would that! 54, 95. P. i-rāst, postpos. governing loc. from, beginning from, 82, 84. See i, 1. $\bar{a}rat$, adj. (f. the same), wide, broad, 13, 150, 169 (70). — $kay\bar{e}k$, to loosen, make wide, expand, Gh. 185 (14). P. arat (pl. aratī), m. a Persian wheel (for irrigation), Gh. 218 (14). , P. arhat. 'arz, a petition, 56, 144, 169 (83). P. \bar{u}_{sh} , m. pl. $u_{sh}\bar{i}$; f. \bar{u}_{sh} , pl. \bar{u}_{sh} , a camel, 7, 21, 152, 169 (33). ashnā, m. an acquaintance, friend, 169 (151). P. ishārat, f. a sign, wink, hint, signal, 135B, 146, 169 (186). P. īsht, see asht'ēk. ashtēs, card. eighteen, 16. asht'ēk (p.p. f. ashtak; aor. 2 and impve. 2, īsht, 61B2; aor. 3, ashta, 58), toremain standing, to be standing, to stand, to be upright, 89, Gh. 158, 9. asal, adv. this year, 75, 148, 169 (191). āsmān, m. the sky, heaven, I (8, 11). P. ispēk (pl. ispichī), m. barley, 9 (9). asar, m. a mark, sign, trace, indication, 148, 169 (179). P. asrīk, adj. fresh, freshly made (of ghī), 169 (121). (The meaning of this word is doubtful.) ustād, m. a teacher, a preceptor, 15, 83. P. -at, pronominal suffix of the second person singular, indicating (1) the object of a transitive verb in an agrist tense, 20b, 66, 98 (2); (2) the subject of a transitive verb in a past tense, 20c, 47, 98 (3); or (3), when added to a substantive, the genitive (20d). Passim in all three uses. If the suffix is added to a word ending in a vowel it becomes t. atāl. adj. unemployed, out of work. - kayēk, to stop a person at work, Gh. 185 (13). P. awa, occasionally used for a, 3, instead of wa, 2, after a consonant, 20b. $aw\bar{a}\bar{\imath}$, card. seventy, 16. $i-w^a$, see i, 1. $i-w^a$ $k\bar{i}$, thither, 169 (110); $i-w^a-l$, there to it, in that direction, thither, 74, 77. awrēdūnkai or awrēdūnai, m. a hearer, 33E. P. āwrīz, ? m. a privy, 159.

awas, awasa, see aghōk.

awēs, card. seventeen, 16.

awwal, ord. first. awwal khwār, N. of the month Rabī'u'l-awwal, 165. awwal nim-ryūz, a certain time of the day, 2 p.m., 167; awwal nmā shām, the hour after sunset, 167; awwal khutan, early bedtime, 167; awwal pahar, the first watch of the night, 167. P.

az or haz, pron. 1st pers. I, passim. Declined, 17. Sing. instr. pa-mun; loc. kū-mun, 17, 80, 88; kū-mun girgaḍ, with me, I (21); kū-mun izar, on me, 86; kū-mun likī, for me, 6, 169 (114); (angry) with me, 169 (62); kū-mun kī, to me, 82, 116, I (19); kū-mun lāst, from me, 18, 83; gen. tar-mun, of me, my, 6, 17, 78, 81, 94, 107, 118, I (2, 7, 21); tar-mun khwai, my own, 21, 152, 169; pl. nom. mākh, we, 17, 39, 79, 100, 113, 122, 125, 126, 129, 130, 132, 135A, 142c; loc. kū-mākh kī, to us, 82, 116; bē kū-mākh, except us, 80; gen. tar-mākh, 107, 118. The genitive preposition of this pronoun is tar, not ta, and the locative preposition is kū, not i, 1.

ōzh, f. a necklace, a necklet, 144, 168 (15). P

azhan (pl. azhanī), m. a certain millet, chīnā, Gh. 223 (6).

izar, postpos. governing loc. (use explained, 86), on, passim. izar-di or izar-da, on me, on us, on thee, or on you, 86. izar-wi or izar-wa, on him, on her, on it, or on them, 86. Cf. wizar.

B

ba, baī, see byōk.

bai', price, value, cost, 118, 169 (115). P.

- bē, 1, prepos. without, except (use explained, 80). It is prefixed directly to a noun substantive, as in bē saṇai, except a man. With a demonstrative pronoun, the latter is put into the oblique form, as in bē fa, without that. With a personal pronoun, the latter is put into the locative, as in bē kū-mun, without, or except, me, 86. Cf. 26, 99, 125. bē may be combined with pa-sa, except, as in bē Khudāē pa-sa, except God, 88.
- bē, 2, privative particle. P. Used as a prefix, it converts a noun substantive into a negatived adjective. A short i is generally added to the noun in such cases, as bē-fikri, without anxiety, from fikr, anxiety (164), but this seems not to be done when the compound is borrowed ready-made from another language. Gh. 32 (4) is by no means clear on the point. The following examples of the use of this particle appear in the foregoing pages:—bē-'aql, without sense, stupid, 164. bē-bari, doorless, 164. bē-dīn, irreligious, 82. bē-fikri, free from anxiety, 164. bē-gham, without sorrow, free from sorrow, 164. bē-hāṣili, fruitless, 164. bē-parwā, unconcerned, 26, 79. bē-raḥmi, merciless, 164. bē-shaki, adv. without doubt, certainly, 77, 164. bē-shām, fasting, Gh. 106 (9). bē-sūr, fasting, Gh. 106 (9, 10). bē-waki, waterless, 164.

bi, 1, see byok.

bī, 2, bihē, or biyē (plur. byī, 26), pronom. adj. other, 26, 78; another, 75; bī kuk, anyone else, 26, 75, 78, 79, 99; this compound takes dī, not ai, as an emphatic particle, 99. bī makhlūq, other people, other persons, 26, 99; bī ṣabā, the day after tomorrow, 75; indzān ta-mīn bī ryūz, the day before yesterday of yet another day, two days before yesterday, 75.

As adv. (account of use, 89), in the second place, also, moreover, bī, 89, 152, 169 (11); bihē, 89, 143, 169 (51); again, biyē, 89, I (14, 21).

 $b\bar{o}i$, adv. near, 74, 87, No. 87; $b\bar{o}i$ $r\bar{i}$ deai, come near to me, i.e. come here, 122, 169 (149); i-nar $k\bar{i}$ $b\bar{o}i$, near the house, I (15).

bū, verbal particle used to form the imperfect (28, 48), and the present (28, 64). It may be optionally omitted in the case of nominal verbs in article or ayēk (29). Regarding its use in the imperfect when it follows the verb, see 48. An example of this will be found in 169 (121). The particle occurs passim.

bad, adj. bad, evil, 24, 95, 144, 156. bad-khōī, unmannered, ill-tempered, 150, 169 (38); bad-kharchī, evil expenditure, debauchery, I (3); bad-nām, ef bad reputation, 26. P.

bād, wind, 147, 169 (54). P.

badī, badness, 156. P.

badē-khōr, a bribe-taker, one who takes bribes, 148, 169 (54). P.

bud, concealed. — $kay \tilde{e}k$, to conceal, hide, Gh. 187 (4).

badal, exchange, Gh. 186 (11). P.

-badal ēk, to exchange; to twist, be rolled up, Gh. 186 (11).

-hē-dīn, see bē, 2.

bēdārī, f. wakefulness, 82. P.

bādshāh, m. a king, 75, 79, II. P.

bėdiyā, f. a wilderness, 8 (4). P.

bagh, a garden, 162, III. P.

bāgh-girai, m. a small garden, dim. of bāgh, 162.

bargistā, the name of the language, so called by its speakers, while other people call it Örmurī, Gh. 6 (3); ta-bargistā a-zbān, the Bargistā language, 142a, 169 (144). For the vocalization of this word, see Gh. 1 and 258, 6.

barkak, m. a little door, dim. of bar, 162.

barakat, m. prosperity; a-barakat-at, thy prosperity, 169 (161). P.

bārān, m. rain. P. bārān syōk, rain fell, 92, 136C, 151.

barrī, see bor.

bras, brasī, see brashtak, 1.

brashtak, 1 (p.p. f. brūshk, 38; aor. sg. 2, bras, 38, 62A; 3, brasi, 38, 62A; impve. sg. 2, bras, 38, 71), to burn (intrans.), I, 10, Gh. 186 (6); brashtak syōk, became burnt, was burnt up, 99.

brashtak, 2 (p.p. f. brūshk, 38; aor. sg. 2, brēzi, 38, 62A; 3, brazī, brazzī, 38, 62A; impve. sg. 2, brēz, brēz²n, 38, 71), to burn (trans.), to set on fire, Gh. 186, 7.

brushaw ēk or brushayēk (p.p. f. brushawak or brushayak), to cause to glitter, Gh. 186 (4).

brush^yēk (p.p. f. brushak; aor. sg. 2 and impve. sg. 2, brush: aor. sg. 3, brushī), to glitter, 32, Gh. 186 (4). P. brēṣḥēd^ol.

brushayēk, see brushaw'ēk.

barwā, m. a pimp, a wittol, 156 (this word is doubtful). P.

barwītōb, the trade of a pimp, pimping, 156.

brazī, brēz, brēzan, brazzī, see brashtak, 2.

brazawek or brazayek (p.p. f. brazawak or brazayak), to cause to set on fire, caus. of brashtak, 2, Gh. 186 (7).

bāṣḥ, baṣḥī, see baṣḥ ēk, and b ēk.

bāṣḥa (pl. bāṣḥā), f. a sparrow-hawk, 9 (2); paka bāṣḥa (pl. paka bāṣḥā), f. a kind of kite or falcon, Gh. 232 (5). P.

başhaw^{*}ēk or başhayēk (p.p. f. başhawak or başhayak), to cause to give, to cause to distribute, 30B, Gh. 186 (3).

 $baṣh^y\bar{e}k$ (p.p. f. baṣhak; aor. sg. 2, $b\bar{a}ṣh$, 61A 3; 3, $baṣh\bar{\imath}$, 30B, 61A3), to grant, give, distribute. P. $baṣh^al$. Cf. $b^y\bar{e}k$.

başhayêk (30B), see başhaw'êk.

bata (pl. bata), f. a duck, Gh. 233 (5). P. bat, a duck, bata, a heron.

bēt, a cane, a rattan. pa-bēt dzōk, to hit with a cane, to flog, No. 228. P.

batkīya (pl. batkīyī), f. a wild duck, 9 (2).

bațēra (pl. bațērai), f. a quail, Gh. 233 (12).

byī, biyē or bihē, see bī, 2.

būy, see būny.

 $b^{j}\bar{e}k$ (p.p. f. bayak, 37, 59; the agricultures are taken from $bash^{j}\bar{e}k$, q.v. agr. sg. 2, $b\bar{a}sh$; 3, $bash\bar{i}$, 59), to grant, to give; to distribute, divide out, 86, I (2).

 $by\bar{o}k$ or $biy\bar{o}k$ (p.p. f. buk, 38; aor. sg. 2, $b\bar{i}$, 38, 62B, 68 (2); 3, **ba**, 38; impve. sg. 2, $b\bar{i}$, 38, 68 (2), 71; 3, $b\bar{o}n$, 71. This verb is conjugated in full in 40), to be (the copula), passim; (with di or wa, etc.) to exist (125) (as in az-a byōk-am, I was, I existed, 125; wa byōk, he was (there), 169 (11); di buk, there was a fem. thing, 94, 136G); to exist, to continue, to remain (bom, 75); to become. 130, 142c, passim. The present tense commonly indicates nature or habit, like Hindi $h\bar{o}t\bar{a}$ hai, as in $b\bar{u}$ ba, 24, 40, 64, 73, 151 ($b\bar{u}$ omitted). The past tense is used (1) as the past tense of the verb substantive, 39, 129, passim; and (2) to form the pluperfect, 50, 77, 90, 134, IV. The future imperfect (sū byōk, 51), with the p.p. of another verb, forms a future perfect conditional, as in tsekk-al The present conditional is used to form the $s\bar{u}$ by $\bar{o}k$, he would have gone, 136. past conditional of another verb, as in wust ēk byōkan, (if) . . . had arisen, 54; khwālk bukan, might have eaten a fem. thing, 94, 136; armān ka azz-al ts'ēk byōkana, would that I had gone, 95. The future is used to form the future perfect of another verb, as in wust ek sū ba, he will have arisen, 52; hir sū $dz\bar{o}k$ ba, he will have come, 73.

In addition to the forms given above and in 40, the following forms of this verb appear in the grammar:—

past sg. masc. 1, $by\bar{o}k$ -am, 20a, 50, 129, 134; 2, $by\bar{o}k$ -a, 20a, 77; $by\bar{o}k$ - \bar{e} , 20a, 129, 143; 3, $by\bar{o}k$, 6, 19, 21, 24, 26, 29, 90, 129, 151, 152, 169 (21, 23, 55, 56, 90), I (10, 14, 15, 21), III; fem. 3, buk, 24, 38, 129, 144; pl. 1, buk- $y\bar{e}n$, 20a; 2, buk- $a\bar{\imath}$, 20a, 129; 3, buk- $\bar{e}n$, 20a; buk-in, 20a, 26, 78, 99, 129, 142c, 151, 152, 168 (10), 169 (11), I (1); pres. cond. $by\bar{o}kan^a$, 136.

Aor. sg. 1, $b^a m$, 62B; 2, $b\bar{\imath}$, 38, 61B3, 62B, 68 (2); 3, ba, 38, 61B3, 62B, 73, 75, 148, 169 (92); pres. sg. 3, $b\bar{u}$ ba, 73.

Impve. sg. 1, $b^a m$, 71; 2, $b\bar{c}$, 38, 68 (2), 75; 3, $b\bar{o}n$, 71.

biyān, the lower part of the back, the back of the waist, the loins, 168 (22), No. 43. biyān (pl. biyaṇī, ? biyaṇṇ, 9 (7)), m. a colt, a foal, Gh. 227 (2). P. bīān, bihān. biyaṇī, 1, pl. of biyān.

 $biyan\bar{i}$, 2 (pl. the same), f. a she colt, a filly, 8 (5), Gh. 227 (3). P. $b\bar{i}ana$, $bih\bar{a}na$. $by\bar{e}n$, aor. and impve. pl. 1 of $by\bar{e}k$, q.v.

bāz (pl. bazī, ? bazzī), m. a falcon, 9 (7). P.

bēzī, see pakhyēk.

buz (pl. $bz\bar{\imath}$ or $b^az\bar{\imath}$), m. a he-goat, Nos. 150, 152, Gh. 228, 5; a hill goat, Gh. 231 (3). The fem. of this word is wz^a , q.v. P.

 $b\bar{e}zh$, the place above or outside, 57 (12), 74; adv. up, No. 86; i- $b\bar{e}zh$, above, outside, externally, 74, 108; pa- $b\bar{e}zh^2$, to above, upwards, to outside, 74.

bōzh, picking, choosing, Gh. 186 (10).

bozh ek (p.p. f. bozhak), to pick, to choose; to collect one by one, Gh. 186 (10).

bēzan, see pakhiek.

bazar, the arm from the elbow to the wrist, the fore-arm, 168 (28).

bāzār (pl. bāzarrī), m. a market, 9 (7). P.

buzwā (pl. buzwaī), f. a spider, 9 (3).

bizzī, see pakh^şēk.

Ch

chiai, see chiw, 2.

chauchī, see chauk.

chig, adj. high, No. 135; tall, 148, 169 (35), No. 231; chig dyō shutī, a certain time of the day, about 4 p.m., 167; chig syōk, he arose, I (10), Gh. 195 (12).

chigwaw⁵ēk or chigwayēk (p.p. f. chigwawak or chigwayak), caus. of chigaw⁵ēk and double caus. of chig⁵ēk, to cause to raise, 30C, Gh. 195 (5).

chigawiek or chigayek (p.p. f. chigawak (57) or chigayak; aor. sg. 3, chigawi (57)), caus. of chigiek, to cause to rise, to raise, 30°C, Gh. 195 (5, 6).

chig*ēk (p.p. f. chigak; aor. sg. 2, chig; 3, chigī), nominal verb from chig, high (trans. or causal chigaw*ēk or chigayēk, double causal chigwaw*ēk or chigwayēk, 30C), to become high, to rise; pres. sg. 3, bū chigī, (smoke) is rising, 147, 169 (150).

chigayēk, see chigaw ēk.

chauk (pl. chauchī), m. the yard of a village guest-house, a courtyard, 9 (9). P.

chal^yēk (p.p. f. chalak; aor. sg. 2, chal; 3, chala), to move, proceed, go. 58; to avail, be of service, Gh. 195 (7). P. chalēd^al.

chār, for tsār, four, in wī māī chār shamba, the last Wednesday in the month, 165. chār shamba is borrowed from Prs., the Örmurī form is tsār samba, 166.

charmaṣḥkī (pl. charmaṣḥkaī), a chameleon, 8 (5), 9 (4). P. charmuṣḥkaī.

chashm, in suf id-chashm, white-eyed, syāh-chashm, black-eyed, 164. Borrowed from Prs.

 $ch\bar{\imath}w$, 1 (pl. $ch\bar{\imath}w\bar{\imath}$), f. a hollow or cave in a precipice, 8 (7), 9 (10). $ch\bar{\imath}w$, 2 (pl. $chia\bar{\imath}$), f. a roof, 8 (7), 9 (10).

 d° , see i- d° .

da, 1, another form of di, q.v.

da, 2, see $dz\bar{o}k$, 3.

 $d\bar{a}i$, f. a nurse, 156. P.

dēō, m. a demon, a devil, No. 61. P.

- di or da, contracted pron. of the pronouns of the first and second persons, indicating the locative case in either number, in or on me, us, thee, or you, 19. For an account of its use, see 123-5. winar (or inar) di or winar (or inar) da, in me, us, thee, or you, 85; wizar (or izar) di or wizar (or izar) da, on me, us, thee, or you, 86, 123. Used to emphasize the subject of a verb in the first or second person which is connected with a locative, 124. With a verb substantive, indicates existence (only di, not da, being thus used), 125, 120, 150; di hā, there is, 125, 26, 169 (49); di byōk (buk), there was, 125, 94, 136G; di hā, he is here, 125, 99; di hin, they are here, 80.
- dī, 1, contracted pronoun of the third person singular or plural, from him, her, it, or them, 19. An account of its use will be found in 126. pushtan-wa dī dāk, he asked from him, I (16); dī pa-khabar, acquainted with him, 104, 169 (17, 18); dī, from here, 122, 132.

With a few exceptions this word must be introduced into a sentence which contains an ablative. It is thus used as a particle indicating the presence of an ablative in the sentence, see 12, 83, 126. Other examples, 15, 25, 26, 79, 81, 86, 89, ± 17 , 122, 142d, 169 (58, 130), I (7, 12), III. For instance of the omission of this $d\bar{\imath}$, see 83, I (3, 6).

dī, 2, particle of emphasis used with plura! nouns and with (99) singular nouns of multitude, the corresponding particle used with other singular nouns being aī, q.v. For the rules as to the use of these particles, which occur passim, see 78, 79, 99-102, 141-154. Cf. 26, 135B.

Used by itself, $d\bar{\imath}$ represents an indefinite plural object (of a transitive verb) not mentioned, 100, 102, 122, I (6).

Used with the following singular nouns of multitude, in addition to the sentences given in 99, we have, sharbat, sherbet, and wak, water, 90, ghwāsī, grass, 92, 136C; yānak, ashes, 169 (126); kuk, anyone, 24, 26, 78; ts², anything, 24, 80; hōn, this much, 169 (188); tsōn, how much? several, 26, 169 (187).

Regarding the use of $d\bar{z}$, when it follows a verb in a past tense, see 101. Cf. $khw\bar{a}lk-a\bar{d}i-n$, 140.

 $d\bar{\imath}$, 3, see $dz\bar{\imath}k$, 3.

 $d\bar{u}$, for $dy\bar{o}$, two, in the following:— $d\bar{u}$ -gad or $dy\bar{o}$ -gad, the two, both, 16; $d\bar{u}$ -jīst \bar{u} , card. twenty-two, 16; $d\bar{u}$ sōh, two hundred, 16; $d\bar{u}$ samba, Monday, 166.

 $du'\bar{a}$, a blessing, benediction. $du'\bar{a}$ salām, pl. salutations, 122, 169 (159). Gh.

259, 7, in this passage has $daw\bar{a}$ salām, which appears to be a misprint. P. $d\bar{u}b$, adj. sunk, immersed. $d\bar{u}b$ syōk, he sank, 152, 169 (46), Gh. 197 (12). P. $d\bar{u}b^a$ (pl. $d\bar{u}b^a\bar{i}$), f. a pit, a water-hole, 9 (2). Cf. P. tublai.

dabara (pl. dabarai), f. a kind of pigeon, Hindostānī fākhta, Gh. 232, 14.

```
dabawek or dabayek (p.p. f. dabawak or dabayak; aor. 2, dabewi; 3, dabawi), to
      strike violently; to pound, Gh. 197, 9. P. dabawul.
d\bar{u}ch\bar{\imath}, see d\bar{u}k^a.
didan, seeing, sight, interview, 169 (151). P.
d\bar{o}d\bar{i}y^a (pl. d\bar{o}d\bar{i}y\bar{i}), f. maize bread, Gh. 221 (12). P. d\bar{o}da\bar{i}, bread.
d\bar{o}dz\bar{a}r (pl. d\bar{o}dzarr\bar{i}), m. maize (j\bar{o}w\bar{a}r), 9 (7).
deg, a cauldron, a cooking-pot, 162. P.
dēgdān (pl. dēgdannī), f. a fireplace for cooking, 8 (1), 9 (7), 159. P.
d\bar{e}qrai, m. a small cooking-pot, a little cauldron, dim. of d\bar{e}g, 162.
d\bar{a}k, see kay\bar{e}k.
dak, adj. full, filled; - kayēk, to fill, I (6), Gh. 197 (11). P.
 dōk, see kayēk.
dūk, see dūs'ēk.
d\bar{u}k^a (pl. d\bar{u}ch\bar{i}, 9 (9), 11; sg. voc. d\bar{u}k\bar{e} or d\bar{u}k\bar{i}, 10), f. 7, 79, 118, a girl. The
      diminutive of this word is d\bar{u}kar\bar{i}y^a, 162. Cf. d\bar{u}w^a.
dokān (pl. dokannī, 9 (7)), a shop. P.
d\bar{o}k\bar{a}nd\bar{a}r, m. a shopkeeper, 157, No. 241.
-d\bar{u}kar\bar{\imath}y^a, f. a little girl, diminutive of d\bar{u}k^a, 162.
dal, contracted pronoun of the second person, indicating the dative case, singular or
      plural, to thee, to you, 19. An account of its use will be found in 122. Cf.
      19, 122, 144, 169 (159, 187), IV; dal war, carry to thyself, i.e. take, 24, 90;
      so dal wrūk, thou didst (not) take a fem. thing, 144. Regarding the position
      of this word in a sentence, see 139.
-dilak (p.p. f. dalk, 38; aor. and impve. sg. 1, diram, 62A, 71; 2, dir, 38, 62A, 68
      (3), 71; aor. sg. 3, dirī, 58, 62A; impve. sg. 3, dirōn, 71), to reap.
dālān (pl. dālannī), m. a vestibule, 9 (7). P.
d^{a}m, see dz\bar{o}k, 3.
dim, ord. second, 16, 165, IV.
d\bar{\imath}m, f. the belly, No. 42; a-d\bar{\imath}m-a, his belly, 168 (20).
dūm (pl. dūmī), a musician, a player, 26, 83, 109. P.
d\bar{u}m^{g}\bar{e}k (p.p. f. d\bar{u}mak; aor. and impve. sg. 2, d\bar{u}m; aor. 3, d\bar{u}m\bar{i}), to ache, be
      painful; pres. sg. 3, bū dūmī, 120, 132, 139 (1), 168 (1, 4, 34).

dānā, adj. wise, learned, 103. P.
d\bar{\imath}n, religion; a-d\bar{\imath}n, religion, 82, cf. a-. Cf. b\bar{e}-d\bar{\imath}n, under b\bar{e}, 2. P.
d\bar{o}n, see dz\bar{o}k, 3.
d\bar{u}n, smoke, 147, 169 (150). P. l\bar{u}, d\bar{u}d.
dand (pl. dandī), a pool in running water, 8 (1), 9 (1). P. dand, a pond.
dīndār, adj. religious, 82. P.
dang, onomat. the sound of a single beat of a drum, a drum-beat, 161. P. dang.
      the sound of a musical instrument.
dangawek or dangayek (p.p. f. dangawak or dangayak), to cause a drum to sound,
dany'ēk (p.p. f. dangak), to give forth a drum-beat, 161.
```

dangayēk, see dangawiek.

```
duny\bar{a}, the world; this present world, as opposed to the hereafter, 82, 143, 169
      (117). P.
d\bar{o}_{p}y\bar{a}z^{a} (pl. d\bar{o}_{p}y\bar{a}z\bar{i}), f. a kind of stew, 9 (2).
dr^{\mu} (pl. dr\bar{\imath}), f. a hair, 9 (2), No. 39; a-dr\bar{\imath}-wa, his hairs, his hair, 130, 168 (5, 31).
dar<sup>a</sup> (pl. dar<sup>a</sup>i), f. a board, a plank, Gh. 224 (13). P. dara, a splinter.
darī, see dranak.
dārū, medicine, 90.
                        Ρ.
der, derī, see dranak.
d\bar{e}r^{a}, f. a tent, a camp, 19, 82-5, 122, 126. P.
dir, dirī, see dilak.
dr\bar{a}gh (Gh. 239 (7)) or d\bar{a}ragh (Gh. 42 (8)), (f. dr\bar{a}gh^a, Gh. 239 (7)), adj. long,
     drāgh, drāgh, 109; dāragh, 156. Cf. Prs. darāz; P. lārgh, Avesta, darēgha-,
     Sanskrit dīrgha-.
dāraghāwī, length, 156.
dirön, see dilak.
dranak (p.p. f. dronk, 38; aor. sg. (62A), 1, darem; 2, deri; 3, dari; Impve. sg.
      (71), 1, dar^am; 2, d\bar{e}r, d\bar{e}r^an (87); 3, dar\bar{o}n), to own, possess, have, 79, 86, 87, 89,
     92, 133, 168 (7). The present often appears in the grammar, but in only one
     case (b\bar{u} \ dar\bar{i}), he possesses, 90) is the particle b\bar{u} used. In every other case
      (dar^{a}m, I \text{ have, } 56, 144, 169 (83); der\bar{\imath}, \text{ thou hast, } 56, 132, 144, 169 (73); dar\bar{\imath},
     he has, 169 (151)), the particle bū is omitted. Cf. Prs. dāram, I have; Wakhī,
     wa-dhür-am, I keep.
darēshī, pl. lies, 146, 169 (181). The nom. sg. of this word is not given in Gh.
     It may be dar\bar{o}sh or (?) dar\bar{o}gh.
durust, adj. straight, straightforward, right, right-minded, just, 24. Prs. (P.
     drast).
dērawāl, adj. of or belonging to Dēra, 163.
daryāb (pl. daryabbī), m. a large river, a river, 8 (1), 9 (7); i-daryāb likī,
      (immerse) in the river, 169 (107). P.
darzāō, m. noise, sound, I (15).
das, card. ten, 16.
dis, = dist, q.v.
d\bar{u}şh, see dz\bar{u}şh, \bar{e}k.
dush k\bar{\imath}, a little, somewhat, 169 (45).
dushman, m. an enemy, 87, 152, 169 (142). P.
dasam, ord. tenth, 16.
dist or (No. 32) dis (pl. distī), m. a hand, 97, 107, 118, 119, 122, 142a, 168 (23,
     27, 169 (49), I (12), No. 32; dist-am, in my hand, in my possession, 125,
     150; a-disti-wa, 120, a-disti-wa, 168 (24), his hands; dist kewan, put (a ring)
     on the hand, 146, 169 (103). P. Prs. dast, Sarīgolī ahüst.
dőst, m. a friend, 87, 152, 169 (142)
d\bar{u}s'\bar{e}k (p.p. f. d\bar{u}s''\bar{e}k or d\bar{u}k; aor. 2, d\bar{u}s; 3, d\bar{u}s\bar{i}), to milk (a cow, etc.), 37, Gh.
     197 (4).
dawā, see du'ā.
d_{\bar{i}}v^2, f. a lamp, 169 (183). P.
```

dūw, (pl. dūw, 9 (2)), f. a daughter, 79, 118, 120, 150, No. 56, No. 100.

 $d\bar{a}iw\bar{a}li$, the condition or profession of a nurse $(d\bar{a}i)$, 156.

dīwāl (pl. dīwallī), m. a wall, 9 (7), 162. P.

dīwālgai or dīwālgōṭai, m. a small wall, dim. of dīwāl, 162.

dwās, card. twelve, 16.

dwāsam, ord. twelfth, 16.

dyō, card. two, 16, 78, 86, 112, 120, 145, 150, 168 (14), I (1, 2). In every case it is in agreement with a singular noun, cf. No. 114; dyō-gaḍ or dū-gaḍ, both, 16; dyō wa nīm or dyō nīm, two and a half, 16; dyō shutī, a certain time of the day, 4.30 or 5 p.m., 167; chig dyō shutī, about 4 p.m., 167; qazā dyō shutī, about 5.30 p.m., 167.

daya, N. of the first ten days of the month Safar, 165.

 $d^{y}\bar{e}k$ (p.p. f. $d^{y}\bar{e}k$, 37, 59; aor. sg. 2, $dz\bar{u}n\bar{i}$, 68 (1); 3, $dz\bar{u}na$, 59, 68 (1); impve. sg. 2, $dz\bar{u}n^{a}n$, 68 (1)), to see, 103 (with two objects), 138, I (10, 19), IV; plup. f. $d^{y}\bar{e}k$ buk, IV. The causal of this verb is $dz\bar{u}nay\bar{e}k$, Gh. 197 (8).

dyūra (pl. dyūra), f. dry twigs, firewood, Gh. 224, 12.

dza, dzaī, dzāī, see dzōk, 1.

dazhāō, loading, the act of loading, 155.

dazhawek or dazhayek (p.p. f. dazhawak or dazhayak), to cause to load, to get loaded, Gh. 197 (6).

 $dazh^y\bar{e}k$ (p.p. f. dazhak; aor. sg. 2, $d\bar{e}zh\bar{i}$; 3, $dazh\bar{i}$), to load, Gh. 197 (6).

dazhayēk, see dazhawek.

dzak (f. dzaka), adj. lamed, wounded, hurt, 169 (50).

dzāk, 1, m. a place, 5, IV; i-sa dzāk, in one place, together, 129,

 $dz\bar{a}k$, 2, see $dz\bar{o}k$, 1.

dzik^a, conj. for this reason, on this account, because, 27, 76; P. dzik^a ka, because that, because, 169 (9), I (14, 17).

dzōk, 1, or zōk, 1 [p.p. f. dzāk, 38,113,134; past m. sg. 1, dzōk-am, 75, 78, 91, 121; pl. 3, dzāk-in, 26, 78, 80, 91; perf. m. sg. 3, dzōk hā, 75; dzōk ā, I (17, 20); f. sg. 3, dzāk hā, 120, 134; pluperf. m. sg. 2, dzōk byōk-a, 77; fut. perf. m. sg. 3, sū dzōk ba, 73.

Aor. sg. 1, dz^am , 62B; $dzaw^am$, 93, 122, 136A, I (18); 2, $dza\bar{\imath}$, 3, 61B4, 62B, 73, 94; 3, dza, 24, 38, 61B4, 62B, 73, 92, 122, 136A.

Impve. sg. 1, $dz^a m$ or $dzaw^a m$, 71; 2, $dza\bar{\imath}$, 71, 122, 169 (135, 136, 149, 158); pl. 2, $dza\bar{\imath}$ or $dz\bar{a}\bar{\imath}$, 70, 71.

This verb is often spelt with an initial z instead of dz. Thus, $z\bar{o}k$, $z\bar{a}k$, za, etc.], to arrive, I (10). Generally used with the contracted pronouns hir or $r\bar{i}$, dal, or hal, 122; hir $dz\bar{o}k$ (19, 24, 26, 73, 75, 78, 81, 83, 89, 90, 91, 99, 117, 122, 126, I (20)), or $r\bar{i}$ $dz\bar{o}k$ (24, 26, 73, 77, 78, 80, 83, 89, 91, 92, 93, 99, 113, 120-2, 134, 136A, C, F, 142, 169 (135-6, 149, 158), I (15, 17)), to come, to come here; i- d^{o} -l $r\bar{i}$ $dz\bar{a}\bar{i}$, come $(r\bar{i}$ $dz\bar{a}\bar{i})$ here (i- d^{o}) to it (hal), i.e. come hither, 122, 169 (135); with hal, to go, to go there, 73, 75, 86, 91, 93, 94, 117, 122, 126, 136A, I (18); $t\bar{u}$ -l ga i-w-l $dz\bar{o}k$ $by\bar{o}k$ -a, hadst thou gone $(t\bar{u}$ -l $dz\bar{o}k$ $by\bar{o}k$ -a) also (ga) there to it (i-w-l), i.e. gone thither, 77.

This verb and $ts^{j}\bar{e}k$ are very similar in their meanings. The difference consists in the fact that the root meaning of $dz\bar{o}k$ contains the idea of arrival $(pah\tilde{u}chn\bar{a})$, while that of $ts^{j}\bar{e}k$ contains the idea of mere motion $(chaln\bar{e})$.

dzōk, 2, or zōk, 2 (p.p. f. dzak, 38; past sg. m. dzōk, 26, 81, 89, 104, 115, No. 228; perf. sg. m. dzōk hā, 91, 135A, 145; aor. sg. 1, dzan , 62B; 2, dzan, 38, 62B; 3, dzana, 38; 62B; pres. sg. 1, bū zan , 169 (9); 2, bū zan, 169 (8); 3, bū zana, 169 (7); impve. sg. 1, dzan , 71; 2, dzan, 38, 71, No. 236; zan, 169 (65); 3, dzanōn, 71. All these forms may be spelt with z instead of dz. Thus, zak, zan m, etc. The whole verb is conjugated in Nos. 175ff.), to beat, to strike. Cf. wazyōk.

dzōk, 3, or zōk, 3 (p.p. f. dzak or zak, 38; aor. sg. 1, d*m, 62B; 2, dī, 38, 62B, 68 (2); 3, da, 38, 62B; impve. 1, d*m; 2, dōn, 38, 68 (2), 71, 168 (33); 3, dōn, 71), to propel, throw. pa-pūnd*-wa dōn, propel him with the heel, kick him with the heel (i.e. of a horse, urge him on by kicking with the heel), 168 (33).

dzēm, the place below; below, down, No. 88; i-dzēm, below; beneath (governs genitive), 74, No. 230; pa-dzēm, to below, downwards, 74.

dzan, dzana, see dzōk, 2.

dzān, m. life, soul, spirit; self, oneself, 21, 135A, 169 (63). a-khwai dzān, self, oneself, 21, 135A, 169 (59, 123); khwai dzān, id., I (6). P. dzūna, dzūnī, 1, see d³ēk.

 $dz\bar{u}n\bar{\imath}$, 2, in $dz\bar{u}n\bar{\imath}$ khutan, N. of a certain time of the night, sleeping time, 167. $dz\bar{u}n^{\imath}n$, see $d^{\imath}\bar{e}k$.

dzūnawiek or dzūnayek (p.p. f. dzūnawak or dzūnayak), to cause to see, to show, causal of diek, Gh. 197 (8). Cf. 30. The aor. sg. 3 of diek is dzūna.

dzīr, sight, contemplation, regard. dzīr kayēk, to look at, Gh. 201 (5). P. zīr or dzīr.

 $dzark^a$, see $zark^a$.

dzauraw'ēk or dzaurayēk (p.p. f. dzaurawak or dzaurayak), to cause to fret.

dzaur³ēk (p.p. f. dzaurak; aor. sg. 2, dzaur; 3, dzaura), to fret, be annoyed, 58, Gh. 200 (9).

dzaurayēk, see dzaurawēk.

dzūṣḥṣēk or (IV) dūṣḥṣēk (p.p. f. dzūṣḥak or (IV) dūṣḥak; aor. sg. 2, dzūṣḥ, duṣḥ; 3, dzūṣḥī, dūṣḥī), to look at, see, inspect (IV); to seek, search; to seek for, search for, Gh. 200 (11). The impve. sg. 2, dzūṣḥ, is used as an interjection, look! behold! 95.

This verb usually takes one of the contracted pronouns hir or ri, dal or hal, 122. In IV it takes hal.

dzut or zut, adj. (f. and pl. the same), much, very much, 83, 99, 109, 134, 150, 169 (126, 165, 169); (of a harvest) plentiful, 148, 169 (191).

Adv., very, 15, 150, 169 (38, 109), IV.

dzawān (pl. dzawanī, ? dzawannī, 9 (7)), m. a youth, a young man, 148, 169 (118, 119); adj. young. adolescent, II. Fem. dzawāna, f. a girl, 7. P. dzwān. dzēwan, see dzayēk.

dzaw^{*}ēk or dzayēk (p.p. f. dzawak or dzayak; aor. sg. 2, dzēwī; 3, dzawī; impve. sg. 2, dzēw, dzēw^{*}n), to lead, conduct, fetch. This verb is used with the contracted pronouns hir or rī, dal, hal, 122; rī dzayēk, to bring, 122, 142c, 169 (152), Gh. 200 (6). This verb is the causal of dzōk, 1. Cf. tsaw^{*}ēk, causal of ts^{*}ēk.

F

 $f^{\circ}, fa\bar{\imath}, f\bar{o}$, see hafo.

     takes the emphatic particle d\bar{i}, not a\bar{i}, 99, 144, 169 (155). Cf. P. ghvasha.
gli, see gastak.
gal, adj. recumbent, lying down, 169 (137, 164).
galgh, the shoulder, 142c, 168 (29).
gilak (pl. gilachchī, 9 (9)), m. a rat, Gh. 234 (7).
gl^am, g^al^am, gl\bar{o}n, see gastak.
glastak, see gastak.
glaw'ēk (p.p. f. glawak), to cause to transport, caus. of gastak or glastak, q.v.
g\bar{o}l\bar{i}y^a, f. a bullet, 34, 85, 147. P. g\bar{o}la\bar{i}.
gilaw'ēk or gilayēk (p.p. f. gilawak or gilayak), to tickle (trans.), Gh. 208 (5).
gal'ēk (p.p. f. galak; aor. sg. 2, gēlī; 3, galī), to twist, spin, roll up (intrans.), Gh.
     208 (6).
gil'ēk (p.p. f. gilak; aor. sg. 2, gil; 3, gilī), to be tickled, to feel tickling, Gh. 208-
      (5).
gilayēk, see gilaw ēk.
gumān, imagination, opinion. P. — kay\bar{e}k, to imagine (a person to be so and so),
     86, 123.
g\bar{a}n (27, I (19)), see k\bar{a}n.
g\bar{o}n (pl. gann\bar{i}, 9 (7)), m. a stick, 47, 109, 119, 148, 169 (148).
gōna-mirga (pl. gōna-mirdzī), f. a kind of skylark, Gh. 232 (12). Cf. mirga and tāk-
     mirg^a.
gandawiek or gandayek (p.p. f. gandawak or gandayak; aor. sg. 2, gandewi; 3,
     gandawi), to sew, Gh. 208 (10). P. gand'l.
gingit (pl. gingiti), m. the dung-beetle, the scarabæus, Gh. 235 (10). P. gūngaț.
gunāh, a fault, a crime, 61 (5, note), 87, 122. P.
gunum (pl. gunumī, Gh. 222 (15)), m. wheat, 125, 169 (39); ta-gunum, of wheat,
     made of wheat, wheaten, 169 (184). This word, even in the singular, takes the
     emphatic particle di, not ai, 99.
qunnī, see gon.
```

```
gin³ēk (p.p. f. ginak; aor. sg. ginī, 79; impve. sg. 2, gin²n, 15), to consider, estimate, know, look upon, 79, 103; to look upon with respect, to show respect to, honour, 15, 83. This verb sometimes has a double object, 103. P. gin²l.
```

gap (pl. gapī, 9 (1)), m. a stone, 8 (1), 9 (1), 47, 80, 88, 99, 125, 152, 169 (141).

gri (pl. the same, 9 (4)), m. a hill, a mountain, 8 (5), 86, 120, 229; ta-gri, of a mountain, of or belonging to a mountain, 163; ta-gri i-sar izar, on the top of the hill, No. 229.

 $gur\bar{u}$ (pl. $gura\bar{\imath}$, 9 (5)), com. gen. 8 (7), a kid.

girad, postpos. governing the loc. See 82, 87. With, together with, and various derived meanings given in 87. With, together with, 12, 87; i-khalaq girad, (behave well) with people, 145, 169 (170); kū-kuk girad, (do not use excess) with anyone, 169 (178); kū-har kuk girad, in everyone's opinion, 26, 143, 169 (116). Cf. gad, girgad.

gardan, the neck. P. gardan. gardan ka, put (a necklace) round, or on, the neck, 144, 168 (15).

girgad, postpos. governing loc. See 82, 87. i.q. gad, girad, q.v., with, together with, 12, 87, I (20, 21).

gardzai-ghal (pl. gardzai-ghalī), m. a kite, a bird of prey, Gh. 232 (4).

girgish^a (pl. girgishī), f. a centipede, 9 (2).

gurūkai, m. a small kid, dim. of gurū, 162.

gram, adj. censured, reproached, rebuked, 169 (62). P.

garm, adj. hot, 156. P.

garmi, f. heat, warmth, 152, 156, 169 (167). P.

grān (pl. grēnī, 129), adj. precious, dear; difficult to acquire (of a language), 142, 169 (144); difficult to get, dear, costly, 156; heavy, important, momentous, 129. P.

grānī, f. difficulty of attainment; dearness, cost, 156. P.

granaw⁵ēk or granyēk (p.p. f. granawak or ganayak), to cause to chew, Gh. 208 (7). granyē, f. a knot, 146, 169 (124).

gran^{*}ēk (p.p. f. granak; aor. sg. 2, grēnī; 3, granī), to chew, masticate (Indian corn or the like), Gh. 208 (7).

granayēk, see granaw ēk.

girano ēk or girayēk (p.p. f. girawak or girayak; aor. sg. 2, girēwī; 3, girawī; impve. sg. 2, girēwan, 168 (21)), to scratch. P. garawul.

girzaw^{*}ēk or girzayēk (p.p. f. girzawak or girzayak), to cause to turn round, to revolve (trans.), to cause to wander, Gh. 209 (3).

 $girz^{j}\bar{e}k$ (p.p. f. girzak; aor. sg. 2, girz; 3, girzi), to turn round, to revolve (intr.), Gh. 209 (3); to wander about, to roam, 26, 79, 169 (128). P. $g^{a}rz\bar{e}d^{a}l$. $girzay\bar{e}k$, see $girzaw^{j}\bar{e}k$.

gas, f. a tooth, 134, 168 (11), No. 37. P. ghāṣḥ.

 $g\bar{o}shai$, adj. alone, 129. P. $g\bar{o}sh^a$.

gāsk, see gastak.

gastak or glastak (p.p. f. gāsk, 38; aor. sg. 1, gl^am , 62A, or g^al^am , 62A, 132, 168 (6); 2 and 3, $gl\bar{\iota}$, 38, 61A4, 62A, 68 (2); impve. sg. 1, gl^am or g^al^am , 71; 2, $gl\bar{\iota}$ 0n, 38, 68 (2), 169 (106); 3, $gl\bar{\iota}$ 0n, 71), to take away, transport, carry (a thing without life), 38, 61A4, 62A, 68 (2), 71, 169 (106); to arrange the hair, 132,

168 (6), Gh. 209 (4); this verb commonly takes the contracted pronouns, hir (or $r\bar{\imath}$), dal, or hal, 122; with hal (in a special meaning) khwāw-al gastak-a, he has fallen asleep, he is asleep, 122, 169 (164). The causal of this verb is $glaw^{\bar{\imath}}\bar{e}k$.

gistawek or gistayek (p.p. f. gistawak or gistayak), to cause to return, to turn (so

and so) back, Gh. 209 (5).

gist*ēk (p.p. f. gistak; aor. sg. 2, gist; 3, gistī), to turn, turn back, Gh. 209 (5).

gistayēk, see gistaw'ēk.

gatak (? p.p. f.), to be fallen, to lie (upon), 168 (18). Except this sentence, there is no other mention of this verb in Ghulam Muḥammad Khān's Grammar. Cf. ghwashtak.

gatēs, in zawāl gatēs, a certain time of the day, 12.30 p.m., 167.

gatawek or gatayek (p.p. f. gatawak or gatayak; aor. sg. 2, gatewe; 3, gatawe), to cause to defeat; hence, to be defeated, to loose a wager or a battle, 30B, Gh. 208 (4).

gaț^{*}ēk (p.p. f. gatak; aor. sg. 2, gēṭī; 3, gaṭī) to earn, acquire; to defeat, worst, checkmate, 30B, 61A1, Gh. 208 (3). P. gaṭal.

gatayēk, see gatawēk.

gwāī, gawī, see giyōy.

gwāṣḥaw'ēk or gwāṣḥayēk (p.p. f. gwāṣḥawak or gwāṣḥayak), to cause to chide, Gh. 208, 8.

gwāṣḥṣēk (p.p. f. gwāṣḥak; aor. sg. 2, gwāṣḥ; 3, gwāṣḥa), to chide, reproach, blame, 58, Gh. 208 (8). P. gwāṣḥal.

gwāṣḥayēk, see gwāṣḥaw ēk.

gōy (pl. the same, 168 (4)), an ear, No. 38; a-gōy-a, his ear, 142a, 169 (52); a-gōy-am, my ear, 132, 168 (4); my ears, 168 (4).

 $g\bar{o}y\bar{a}$, adv. as though, as if, as one would say, 73. P.

giyōy (pl. gawī or gwāī, 9 (10)), f. a cow, 15, 85, 146, 148, 169 (34, 175), Nos. 69, 143-5; also m. a bull, No. 142.

gazhōī, m. a plough-bullock, Gh. 209 (9).

guzāra, f. living, means of livelihood, property, 86, I (2, 20). Prs. guzāra.

H

- h, this letter is often dropped when initial, thus, we have \bar{a} for $h\bar{a}$, he is; \bar{o} for $h\bar{o}$, this; am for h^am , I am; $\bar{o}n$ for $h\bar{o}n$, so much; and $any\bar{e}k$ for $hany\bar{e}k$, to remain. On the other hand we have an initial h added in haz for az, I; cf. Avesta $az\partial m$, Kurdish and Tālish az, Ossetic $\bar{a}z$, Paṣḥtō za.
- $h\bar{a}$, 1, $h\bar{a}$ $h\bar{a}$, or $h\bar{o}$ ya, adv. yes, 77; $h\bar{a}$, 152.

 $h\bar{a}$, 2, see $h\bar{o}$.

- $h\bar{a}$, 3, or ha, or \bar{a} , verb substantive, used only in the present; conjugated, 39; how used, 129. This verb is only a copula. By itself it does not predicate existence. If it is required to predicate existence then one of the contracted pronouns wa, wi, or di must be used with it, 125. It is also used to form the perfect tense, 49.
 - sg. 1, I am, $h^a m$, 39, 79, 113, 125-6, 129, 142c, 169 (18, 48, 77-8); ${}^a m$, 39, I (9, 11); 2, thou art, hai (or $h\bar{e}$), 39, 79, 104, 107, 118, 124, 125, 126, 129, 143,

149, 169 (1, 3, 6, 17, 62), I (21); 3, he, she, or it is, $h\bar{a}$, 125, 129, et passim. pl. 1, we are, $hy\bar{e}n$, 39, 49, 79, 113, 125, 129, 142c; 2, ye are, $ha\bar{i}$, 39, 125, 129, 142c; 3, they are, hin, 39, 78, 80, 111-2, 120, 125, 129, 143, 150, 168 (26-8, 31), 169 (88, 132, 143, 169), I (7).

For examples of the use of the verb substantive predicating existence, see 125. For the conjugation of the perfect, see 49.

The following examples also occur:—sg. 3, $h\bar{a}$, 21, 23, 25, 39, 75, 86, 91, 120, 134-5A, B, 142a, 145, 147, 169 (95, 98, 180), II; \bar{a} , I (8, 11, 17, 19, 20); pl. 3, hin, 147.

The past tense of the verb substantive is supplied by $by\bar{o}k$, q.v.

hai or hē, see hā, 3.

hai, 1, or hai, see $h\bar{o}$, 1.

 $ha\bar{i}$, 2, see $h\bar{a}$, 3.

haī, 3, in haī-haī, interj. alas !, 95.

hāi, see hō, 1.

 $h\bar{e}$, see $h\bar{a}$, 3.

 $h\bar{o}$, 1, or \bar{o} , proximate demonstrative pronoun, this. Also used as proximate personal pronoun, he, she, it (near by). Declined, 23. Its nom. pl. is $ha\bar{i}$ or $h\bar{a}\bar{i}$. When used as an adjective its oblique form singular is p^a , pl. $pa\bar{i}$. When used as a substantive referring to animate beings its oblique form sg. is r^a , pl. $ra\bar{i}$, with a genitive sg. tar^a , pl. $tara\bar{i}$. As a substantive referring to inanimate things its oblique form sg. is p^a , pl. $pa\bar{i}$, with gen. sg. $ta-p^a$, pl. $ta-pa\bar{i}$. The nominative singular is $h\bar{o}$, which is always masculine, or $h\bar{a}$, which as an adjective may be either masculine or feminine. The use of $h\bar{a}$ as a masculine substantive is doubtful. See below. In either case, the initial h may be dropped, so that we may also have \bar{o} or \bar{a} . The following instances of the use of this pronoun occur in the grammar:—

sing. nom. masc. subst. this, he, she, it, $h\bar{o}$, 15, 19, 78, 86, 92, 118, 129, 135C, 142d-3, 152, 169 (11, 58, 137), I (2), IV; opposed to $haf\bar{o}$, that, 90, 143, 169 (80); $h\bar{o}$ -l, he to him, IV; $h\bar{o}$ -r, this to me, 19, 144; \bar{o} , I (3, 4, 10, 16, 18); $h\bar{a}$, 90, 142d. It is doubtful whether $h\bar{a}$ in these cases is masculine. It can equally well be feminine. There is nothing in the context to show the gender.

adj. $h\bar{o}$, 21, 27, 79, 93, 95, 107, 135A, 136C, 146, 148, 152, 168 (19), 169 (35, 43, 54, 66, 91, 95, 111, 139, 162); $h\bar{o}$ waqt, at this time, now, 27, 75; \bar{o} , I (20); $h\bar{a}$, 23, 77, 79, 90, 104, 107, 118, 148, 169 (19, 34, 37, 148).

fem. subst. hā, this, she, it (fem.), 24, 79, 89, 118, 120, 143, 144, 169 (30, 51). Cf. remarks above regarding 90 and 142d.

adj. hā, 15, 79, 85, 122, 147, 148, 150, 169 (70, 98, 119, 152).

obl. an. subst. r^a , I (12), IV; gen. tar^a , 81, 118, 142d, 150, 169 (32), I (6, 20). $b\bar{e} \ k\bar{u} \cdot r^a$, without, or except, him, 80.

obl. inan. subst. p^a , 80; $pa-p^a$, here, 27, 74; gen. $ta-p^a$, 27, 118, 169 (115), I (9); $ta-p^a$ $p\bar{a}r^a$, for this reason, on this account, 76, II.

obl. adj. (an. and inan.) p^a , 86, 146, 148, 169 (15, 36, 119), IV; i- p^a palau, in this direction, 27, 74; pa- p^a rang, in this manner, 27, 73.

pl. nom. subst. $ha\bar{i}$, 129, 143, 146, 150, 169 (29); $h\bar{x}\bar{i}$, 129.

obl. an. subst. $ra\bar{\imath}$, 23; gen. $tara\bar{\imath}$, 23, 118, 169 (90). obl. inan. gen. $ta-pa\bar{\imath}$, 118.

 $h\bar{o}$, 2, card. seven, 16; $h\bar{o}$ - $j\bar{s}t\bar{u}$, twenty-seven, 16.

 $h\bar{o}$, 3, in \bar{o} - $h\bar{o}$ - $h\bar{o}$, interj. alas!, 95.

 $h\bar{o}$, 4, in $h\bar{o}$ ya, see $h\bar{a}$, 1.

hadd, a boundary, limit; i-hadd lasta, (passed) beyond the boundary (83). P.

hafo, $af\bar{o}$, haf^a , or af^a , remote demonstrative pronoun (22), also used as a pronoun of the third person (18). That, he, she, it. Declined, 18. The nom. plur. is $hafa\bar{\imath}$ or $afa\bar{\imath}$. The oblique singular is $f\bar{o}$ or f^a , and the oblique plural $fa\bar{\imath}$. Gender is distinguished only in the sing., in which $haf\bar{o}$, $af\bar{o}$, and $f\bar{o}$ are always masculine, while haf^a , af^a , may be either masculine or feminine.

The following instances of the use of this pronoun occur in this grammar:—sing. nom. masc. subst. $haf\bar{o}$, that, 83; opposed to $h\bar{o}$, this, 90, 143, 169 (80); he, 6, 35, 39, 78, 81, 85, 94, 98 (2), 100-1, 113, 122, 125, 129, 134-

5A, 142c, 169 (159); $af\bar{o}$, that, 25; he, I (5); $af\bar{o}$ -l, he to him, I (19); haf^a , that, 90; he, 24, 75, 90, 92-3, 103, 122, 136A, C, D, F, 138, 169 (92); af^a , he, 24, 136, 137, 144; af^a -l, he to him, I (17).

adj. that, $haf\bar{o}$, 22, 129, 152; haf^a , 24, 74, 83, 85-6, 92, 130, 135A, 148, III; haf^a wagt, at that time, then, 27, 75; af^a , 34, 64, 130.

fem. subst. she, hafa, 78, 113, 134, 142d.

adj. hafa, 22, 111, 129, 130, 152; afa, I (2).

sg. obl. masc. subst. that, him, it, $f\bar{o}$, 86, 118-9, I (15); f^a , 15, 78, 82-3, 86, 104, 116, 118-9, 121-2, 134, 139 (3), 142d, 169 (58); $b\bar{e}$ f^a , without that, 80; $baghair\ i-f^a$, without that, except that, 80; $pa-f^a$, there, 27, 74; $ta-f^a$ $p\bar{a}r^a$, for that reason, 27, 76.

adj. $f\bar{o}$, that, 22, I (5); f^a , 34, 85, 147, I (4), IV; i- f^a palau, in that direction, 27, 74; pa- f^a rang, in that manner, 27, 73; pa- f^a waqt, at that time, then, I (4).

fem. subst. $ta-f^a$, of her, her, 143.

adj. f^a , that, 22, 104.

pl. nom. subst. $hafa\bar{\imath}$, they, 39, 111, 113, 129, 130, 134, 135C, 142c, 146, 169 (96); $fa\bar{\imath}$, 83, 118; $f\bar{a}\bar{\imath}$, I (2).

adj. $hafa\bar{\imath}$, those, 22; $fa\bar{\imath}$, 86, I (2, 6).

hafta, Saturday, 166. P. hafta, a week.

hākim, m. a ruler, commander, 169 (130). P.

hukm (pl. $hukm\bar{i}$, 86), an order, command, 82, 86, 169 (130), I (19). P.

hal, contracted pronoun of the third person indicating the dative case, singular or plural, to him, to her, to it, to them, 19. An account of its use will be found in 122. When not the first word in a sentence it is suffixed to the preceding word. If that word ends in a vowel, then the ha of hal is dropped, and all that is suffixed is the letter l. Thus, hafō hal, that to him, becomes hafō-l. If the preceding word ends in a consonant that consonant is doubled, and only the h of hal is dropped. Thus, ts^an hal, to-day to him, becomes ts^ann-al. Regarding the position of this word in a sentence, see 139.

Examples of the use of this word are, trapp-al-a dak, he made running to him, he ran to him, I (10); hal khwurtayēk, he shook (his head) at it, IV; payānghgh-al syōk, he became with an embrace to him, he embraced him, I (10); i-mund-ghal likī-mm-al bū zlī sa, my heart is becoming for a fat tail for it, i.e. I long for a fat tail, II. In marīy^a-l-a dī kapak, he (A) cut his (B's) throat, and **a-maghzai-l-a** dī kap^şēk syōk, his neck was cut, 126, the hal has the force of a dativus commodi, quasi his throat was cut for him.

Other examples are hal $dz\bar{o}k$, to go away, 73, 74, 75, 77, 86, 91, 93-4, 117; but $r\bar{\imath} dz\bar{o}k$, to come, as in i-d²-l $r\bar{\imath} dzai$, come here to him (hal), 74, 122, 169 (135); hal ghwēk, to say to him, 19, 24, 135C, I (2, 8, 11, 12, 17, 21), II, III; hal ghwashtak, to fall down (against or into something), 82, 104, 122; khwāw-al gastak, he has fallen asleep, 169 (164); hal na-ghōk, he went out to him, 126, I (18); hal skriyōk, to give to him, 61A5, 87, 92, 136A, I (6, 18); hal $tsal^{r}\bar{e}k$, to take away, 139 (3); hal $ts^{s}\bar{e}k$, to go (opp. to $r\bar{i}$ $ts^{s}\bar{e}k$, to come), 35, 54, 81-3, 89, 90, 95, 104, 117, 120, 129, 134, 142a, I (5), III; hal walak, to bring to him, II.

haluk, adj. light, not heavy, 148, 169 (43). P. halak.

halāl, adj. lawful; halāl kayēk, to make lawful, in the prescribed form, to slaughter an animal for food, I (13, 17, 20). P.

halva (pl. halva), f. a kind of sweetmeat, 8 (4), Gh. 222 (10). P.

 $h^a m$, see $h\bar{a}$, 3.

 $h\bar{a}m$, adj. unripe, Gh. 215 (6.) Cf. Prs. $kh\bar{a}m$.

hōm, ord. seventh, 16.

hamēsha, adv. always, at all times, continually, 64, I (21). P.

hon, interj. of warning or reproof. Ah!, 95.

hin, see $h\bar{a}$, 3.

hon or on (pl. the same), pron. adj. this much, that much, so much (27); pl. this many, that many, so many, 27, 122, 144, 169 (188) $(h\bar{o}n)$, I (19) $(\bar{o}n)$.

hēndī, see hōnd.

hindū, m. a Hindū, voc. wō Hindū, 10; hindū sūrī māl klak barī zar, N. of a certain time of the day, 10 or 11 A.M., 167.

hond (f. hond, pl. hendi, 14 (2)), adj. blind, sightless, 111, 129, 130.

handzyōk or hanzyōk (p.p. f. handzuk, 38, 120, 134, or hanzuk, 38; aor. sg. 2 and impve. sg. 2, hazn, 38, 62A, 71; aor. sg. 3, haznī, 38, 62A), to remain behind, be left behind, 120, 134; to be left over and above, to be left over; perf. sg. m. handzyōk hā, 75, 79, II.

hinlaw ēk or hinlayēk (p.p. f. hinlawak or hinlayak), to grind, 31, Gh. 214 (9).

hinle k (p.p. f. hinlak; acr. sg. 2, hinle k sū, 59; 3, hinly k sa, 59), to be ground, Gh. 214 (9). Note the irregular agrist of this verb.

hinlayēk, see hinlawek.

hins (pl. hinsi, Gh. 230 (5)), m. a bear; n'r hins, a he-bear; shadi hins, a she-bear, 7. P. khirs.

hānsht, card. eight, 16; hānsht nīm, eight and a half, Gh. 39 (1).

hēntschī, pl. tears, 169 (125).

The singular of this word does not occur in Ghulam Muhammad Khan's Grammar. It is probably hontsk, or some such word, cf. 9 (7, 9).

hints'ēk (p.p. f. hintsak; aor. sg. 2, hēntsī, Gh. 214 (11); 3, hintsī), to be able to do, 137; to be able, to can (forming potential compound verbs), 137 (where the use of this verb is described).

hanwalk (pl. hēnlchī, Gh. 222 (14)), f. an egg, 8 (1), 9 (9).

 $hinaw^y \bar{e}k$ or $h\bar{i}nay\bar{e}k$ (p.p. f. hinawak or hinayak), to cause to bray, Gh. 214 (12). $h\bar{e}ny\bar{i}$, see $hany\bar{e}k$.

hanyēk or anyēk (p.p. f. hanyak, 37, 57; aor. sg. 1, hanyem, 73; 2, hēnyē, 61A1; 3, hanyē, 6, 30B, 57, 61A1, 81, 94, 120, 132, 154, 169 (105); pl. 3, hanyins 56, 74. The n of this verb is nūn ghunna, and gives merely a nasal sound to the preceding vowel. A better spelling would be hāyēk; see 32, note), to remain, to continue in one place, 57; to abide, dwell, 120, 132, No. 233; to remain seated, be seated, be sitting, 6, 56, 73-4, 81, 94, 154, 169 (105, 108), No. 230. The initial h of this verb is often dropped, as in Nos. 230, 233.

 $hin^y \bar{e}k$ (p.p. f. hinak; aor. sg. 2, hin; 3, hin), to bray (like an ass), 58, Gh. 214 (12). P. $han\bar{e}d^al$.

hanyawiek or hanyayek (p.p. f. hanyawak or hanyayak), caus. of hanyek, q.v. to cause to remain; to cause to dwell; to cause to be seated, to seat, 30B.

hinayēk, see hinaw'ēk.

hanyayêk, see hanyaw'êk.

hanzyōk, see handzyōk.

har, 1 (pl. harra), adj. every, 26. The pl. harra means 'all,' 26, 83, 109; or, as a substantive, all men, everyone, 80, 91, 150, 169 (88, 132), or all things, everything, I (4); so, to form a superlative, *i-harra inar*, among all, 15, 85, 148, 169 (34). P.

har gudā, everywhere, 26; har kuk, everyone, 26, 87, 99, 133, 143, 147, 168 (7), 169 (116); har kuk ka, whoever, 24; har kān, at every time, at each time, 26; har sō, each, 26; har ts², everything, 6, 77, 80 (with pl. verb), 99, 125, I (3, 21); har ts² ka, whatever, 24; har waqt, always, at all times, 148, 169 (134).

Note that har-kuk and $har ts^a$ take the emphatic particle $d\bar{\imath}$, not ai, even in the singular, 99.

har, 2, in the following phrases:—har ka, har kēw'n, both meaning 'God knows,'
73.

harai, see sarai-harai, s.v. sarai.

hir or $r\bar{\imath}$, contracted pronoun of the first person indicating the dative case, singular or plural, to me, to us, 19. An account of its use will be found in 122. When not the first word in a sentence, hir (but not $r\bar{\imath}$) is suffixed to the preceding word. If that word ends in a vowel, then the hi of hir is dropped, and all that is suffixed is the letter r. Thus, $h\bar{o}$ hir, this to me, becomes $h\bar{o}$ -r. If the preceding word ends in a consonant, then that consonant is doubled, and only the h of hir is dropped. Thus, ts^an hir, today to me, becomes ts^ann -ir. On the other hand $r\bar{\imath}$ is not suffixed, and never changes its form. With this

exception hir and $r\bar{i}$ are interchangeable and have exactly the same meaning, but $r\bar{i}$ is most commonly used with the verb $dz\bar{o}k$, see below.

Regarding the position of these words in a sentence, see 139.

Examples of the use of these words are, $hir dz\bar{o}k$, to come, 24, 26, 73, 75, 78, 81, 83, 89, 90-1, 99, 117, 122, 126, I (20); $r\bar{\imath} dz\bar{o}k$, to come, 24, 26, 68 (3), 73, 77-8, 80, 83, 89, 91-3, 99, 113, 120-2, 134, 136A, C, F, 142b, 169 (135-6, 149, 158), I (15, 17); but $hal dz\bar{o}k$, to go, see hal. $hir ghw\bar{e}k$, to say to me, 19, 92, 135, I (13); $hir s\dot{k}iy\bar{o}k$, to give to me, 142a, 144, 168 (23); $hir ts\dot{e}k$, to come, 94, 146, 169 (138), III; $hir w^a lak$, to bring, to bring here, 90, 99, 144.

hir (pl. hiri), m. a ram, Gh. 228 (3). P. hērai.

hira (pl. hirai), f. a ewe, Gh. 228 (4). P. hērai.

hargāh ka, conj. if, 93. Use explained, 92, 93.

hargiz, adv. used to strengthen a negative, as in hargiz nak, not at all, 77. P.

hairan (pl. the same, 113), adj. worried, perplexed, 113, 125, 129, 142c. P.

harra, see har, 1.

hirs, greed, covetousness, 12, 83. P.

hisāb, an account, a reckoning, 94, 146, 169 (138). P.

hīshk, see hīshtak.

hashtāī, card. eighty, 16.

hashti-jistü, card. twenty-eight, 16.

hīshtak (p.p. f. hīshk, 38; aor. sg. 1, haw'm, 62B; 2, wīw, 38, 61B5, 62B; 3, hawa, 38, 61B5, 62B; impve. sg. 1, haw'm, 71; 2, wīw, 71; 3, hawōn, 71), to read. The causal of this verb is nwalaw'ēk, Gh. 214 (13).

hashtam, ord. eighth, 16.

huṣḥyār (f. and pl. huṣḥyarrī, 14 (2), 82, 129, 142c), adj. intelligent, clever, 14 (2), 79, etc., as ab. P.

hāṣil, income, profit, 87. P. Cf. bē-hāṣili, s.v. bē, 2.

hasan, N.P. in ta-Hasan Husain a-māī, N. of the month Möharram, 165.

hat (pl. hatī), m. a market, Gh. 221 (3). P. hataī.

hātī (pl. hatyanni), m. an elephant, 8 (5), 9 (8). P.

hatak (p.p. f. hōtk, 38, IV; aor. sg. 1, zh^am or zhay^am, 62B, IV; 2, zhī, 38, 61B3, 62B, 68 (2); 3, zha, 38, 69B3, 62B; impve. sg. 1, zh^am or zhay^am, 71; zhōn, 38, 68 (2), 71; 3, zhōn, 68 (2), 71), to leave, abandon, IV.

hōtk, see hatak.

hīts, indef. pron. adj. any, 146, 169 (129); subst. something, 26, anything, 26. hīts, nothing. hīts gudā nak, never at any time, 135A, 145; hīts kuk, anyone, 26, 83, 125; hīts nak, nothing, 26, 73, 79,125, 144, 146, 169 (61, 97); (adverbially) not at all, in no way, 1 (11). P.

       151, 135A, C, 144, 169 (22); hargāh ka, if, 92, 93; mun ka, if, 92, 93; agar
       ka, although, 92, 93, 135A, C, 144.
                                                            1 . . 1
   ka, 5, final conj. that, in order that. Use explained, 94. Cf. 94, 146, 169 (94, 138).
        I (13, 20).
                                                     · . .
   ka, 6, consecutive conj. that, so that. Use explained, 94. Cf. 79, 94, I, (9, 11);
       used to give the force of an imperative, 94, 144; teen waqt ka, at the time that,
       24; ts\bar{o}n ka, as long as, 75.
   ka, 7, causal conj. that, because that, because, as, 169 (93), II; dzik ka, because,
       169 (9), I (12, 14); kiy\bar{e} ka, because, I (21).
   ka, 8, conj. used like the Greek ότι, to introduce a statement or thought, after
       a verb of speaking, wishing, etc., 6, 81, I (2, 6, 7, 8, 12, 13, 16), II, III, IV;
       armān ka, would that, 54, 95.
   ka, 9, in har ka or war ka, God knows, 73. This is probably the same as ka, 10.
   ka, 10, see kay \tilde{e}k.
   k\bar{i}, 1, polite impve. of kay\bar{e}k, q.v.
   k\bar{\imath}, 2, or k\bar{\imath}y\bar{e}, interrog. adv. why? 27, 76. Cf. k\bar{\imath} in 136F, 169 (87, 128), II, III.
```

kī, 3, postposition governing the loc., interchangeable with likī, to, into, for, 12. Use explained, 82. Cf. i-grī kī, (went) to the mountain, 120; i-khwai khaī kī, (sent him) to his own fields, I (5); i-k*lai kī, to the village, 122, 147, 169 (5, 98); kū-mākh kī, to us, 116; kū-mun kī, to me, 116, I (19); i-khwai mradzī, (said) to his own slaves, I (12); i-nar kī, to the house, 120, 134; into the house, 169 (106); i-nar kī bōī, near to the house; i-har sarai kī, (spoke) to every man, 26; i-piē kī, (said) to the father, I (2, 19); (go) to the father, I (8, 10); kū-tū kī, to thee, 79; i-w² kī, thither, 169 (110).

Sometimes the locative preposition is omitted (82), as in gudā kī, whither?

120, 134; mihmān kī, (set bread) for the guest, 169 (192); saṇai kī, (necessary)

for a man, 79. Cf. likī.

. kī, 4, in kī-tsaw ek, kī-ts ek, qq.v.

.ku or $k\bar{u}$, preposition of locative, on, used only with proper names of persons, or with substantive pronouns indicating persons. In other instances i, 1, is used instead, 10, 11, 17, 18, 23, 24, 25, 26. In the following instances the locative is almost always governed by a postposition, so that the translation of $k\bar{u}$ by 'on' is seldom correct:—

Proper names.—ku- or kū-'Abdullāh, on 'Abdullāh, 11; kū-Makālī Ṣāḥib, on Mr. Macaulay, 83, 122, 126; kū-Zaid, on Zaid, 26, 78, 99.

Pronouns.— $k\bar{u}$ - f^a , on him, 18, 82, 116, 122; $k\bar{u}$ - $fa\bar{\imath}$, on them, 18; $k\bar{u}$ -har kuk, on everyone, 26, 87, 133, 143, 147, 168 (7), 169 (116); $k\bar{u}$ $h\bar{\imath}ts$ kuk, on anyone, 26, 83; $k\bar{u}$ -kuk, on whom? 25, 82; on anyone, 83, 86, 146, 169 (131, 178); $k\bar{u}$ - $m\bar{a}kh$, on us, 80, 82, 116; $k\bar{u}$ -mun, on me, 6, 18, 80, 82-3, 86, 88, 116, 169 (62, 114), I (19, 21); $k\bar{u}$ - r^a , on this person, on him, 50, I (12), IV; $k\bar{u}$ - $t\bar{u}$, on thee, 26, 79, 80, 83, 86, 89, 92, 122, 126, 169.

kwulak (p.p. f. kwalak, 38; aor. sg. 1, $k\bar{\imath}n^{\ast}m$, 62B; 2, $k\bar{\imath}n\bar{\imath}$, 38, 62B; 3, $k\bar{\imath}na$, 38, 62B; impve. sg. 1, $k\bar{\imath}n^{\ast}m$, 71; 2, $k\bar{\imath}n$, 38, 71; 3, $k\bar{\imath}n\bar{o}n$, 71), to copulate.

kwalān, see kulān.

kwalanachi, kwalanak, see kulanak.

kwalannī, see kulān.

kawam, kawin, kawon, kawun, kewan, see kayek.

kwas, interrog. pronoun, what? see 25; cf. 169 (113).

kawyēn, see kayēk.

 $k\bar{\imath}y\bar{e}$, adv. why? 27, 76; $kiy\bar{e}$ ka, why that, = because, I (21). Cf. $k\bar{\imath}$, 1.

kayēk (p.p. m. dōk, 36; f. dāk. This verb is conjugated throughout in 42. The principal parts are therefore not here given. Omitting the occurrences in 42, the following forms appear in the grammar:—

Past sg. m. $d\bar{o}k$, 21, 25, 35, 37, 73, 77, 79, 82, 86, 95, 104, 135A, 144, 169 (60, 63, 113, 123), I (3, 4, 10, 17); f. $d\bar{a}k$, 26, 37, 59, 83, 86-7, 135B, 144, 146, 169 (69, 86, 186), I (10, 16), II; pl. (obj. 3rd. pers.) $d\bar{a}k$ -in, II. Perf. m. $d\bar{o}kh\bar{a}$, 21, 23, 39, 135A, 169 (95); $d\bar{o}k\bar{a}$, I (8, 11, 20).

Aor. sg. 1, kaw^am , I (19); kay^am , 81, 95; k^am , I (19); 2, $k\bar{e}w\bar{i}$, 61A1, 68 (1), 95, 144; ka, 61A1, A5, 68 (13); 3, $kaw\bar{i}$, 26, 59, 61A1, 69; ka, 59, 61A1, A5, I (6); $k\bar{i}$, 59, 61A5; pl. 1, $kawy\bar{e}n$, I (13); $kay\bar{e}n$, 94, 146, 169 (138); pres. sg. 2, $b\bar{u}$ $k\bar{e}w\bar{i}$, 25-6; 3, $b\bar{u}$ $kaw\bar{i}$, 144, 146, 169 (9, 61); $b\bar{u}$ ka, 24, 144-5, 168 (14); pl. 2, $b\bar{u}$ $ka\bar{i}$, 95; 3, $b\bar{u}$ kawin, 146, 169 (29); fut. pl. 3, $s\bar{u}$ kawin, 86, 123.

Impve. sg. 2, $k\bar{e}w$, 68 (1); $k\bar{e}w^a n$, 6, 12, 26, 68 (1), 77, 83, 86-7, 94, 104, 144-6, 169 (4, 72, 82, 89, 93-4, 103, 107, 124, 129, 133, 147, 170, 173-4, 177-8, 182-3), I (9); ka, 68 (1, 3), 86, 133, 144, 146, 168 (9, 15), 169.(4, 6, 9, 36, 99, 166); 3, kawun or $kaw\bar{o}n$, 69; pl. 2, $ka\bar{i}$, I (12-3); polite impve. $k\bar{i}$, 70, 133. In the phrases har ka or har $k\bar{e}w^a n$, God knows, 73, we probably have impve. sg. 2.

to do, to make, 32, 36, 42, 59, 61A1, A5, 68 (1, 3), 69, 70; to do, 23-6, 35, 37, 69, 73, 77, 79, 94-5, 104, 144, 146, 169 (9, 29, 61, 94, 113), \bar{I} (8, 11, 19); to make, 81, 82-3, 86-7, 123, 133, 135A, B, 146, 169 (69, 86, 99, 124, 138, 173, 182-3, 186), \bar{I} (6, 9, 10, 13, 19, 20-1), \bar{I} I; to do, to act, 145, 169 (89); to put (clothes on the body), \bar{I} (12); har ka or har $k\bar{e}w^a n$, God knows (73), see above.

This verb is very frequently used to make nominal transitive verbs, 29. The following are some of those occurring in the grammar:— 'amal kayēk, to carry out (an order), 86; bal k., to light, set alight, 146, 169 (4, 166, 183); dist k., to put on a person's hand, 146, 169 (103); gardan k., to put on, or round, a person's neck, 144, 168 (15); halāl k., to slaughter (an animal) in the prescribed way, I (13, 17); hisāb k., to make up an account, 146; jagar k., to fight, 169 (72); jama k., to collect, bring together, I (3); jōr k., to build, 135B, 144; khālī k., to empty, 12, 83; khalāṣ k., to release, 21, 169 (123); khanī k., to laugh, II; khūn k., to be a murderer, to murder, 144, 169 (93); kharts k., to expend, spend, 87; khwūrāk k., to eat food, 145, 168 (14); khvāw k., to sleep, 144, 169 (60); kōr k., to make anger, to be angry, 169 (82); krik k., to show aversion, 26; lūt k., to rob, plunder, 21, 169 (63); mihrbānī k., to show kindness, 86; puṣḥtan k., to inquire, 26, 83, I (16); raḥm k., to show pity, 169 (174); ṣabr k., to wait, 6, 169 (133); sūn k., to blow

(the nose), 168 (9); sir k, to act or behave well, 145, 169 (170); sir m k, to immerse, 169 (107); sust k, to show laziness, 169 (129); swar k, to cause (aperson) to mount, 169 (177); tamām k, to finish, I (4); top k, to jump, 86, 146, 169 (36); trap k, to run, I (10); $y\bar{a}d k$, 21, 135A, 169 (95); zulm k, to show tyranny, 86; $z\bar{a}s|r\bar{s}k$, to put thorns (on a road), 169 (147); $zy\bar{a}t\bar{s}k$, to display excess, 169 (178).

L

-l, the form taken by hal (q.v.) when used as an enclitic after a word ending in a vowel.

lau, reaping, see lau-garai. P.

lagand'ēk, to pull, 168 (32). This word occurs only once (in the impre. sg. 2, lagand) in Gh. 247 (13), and the form is doubtful.

lau-garai, m. a reaper, 157. P.

lōgarī, adj. of or belonging to the valley of Lōgar, 163.

lagawiek or lagawek (p.p. f. lagawak or lagawak; pres. sg. 3, bū lagawi, 24), to apply; (of earnings) to spend, 24.

ligawiek or ligayek (p.p. f. ligawak or ligayak), to cause to wallow, to cause to roll, Gh. 210 (6).

lag^{*}ēk (p.p. f. lagak; aor. sg. 3, laga, 147, 169 (76)), to be applied, 58; to befall, happen, 147, 169 (76) (of wind beginning to blow). P. lagēd^{*}l. This verb is not included in the list in Gh. 210.

lagayek, see lagawiek.

 $lig^{y}\bar{e}k$ (p.p. f. ligak; aor. sg. 2, lig; 3, $lig\bar{i}$), to roll, wallow, Gh. 210 (6).

ligayēk, see ligawiek.

lāhōr, the town of Lahore; used with def. art., 5.

lak, ascent; — kayēk, to ascend, Gh. 210 (12). Cf. lik ēk.

 lik^a , pain, 125, 169 (101).

likī, postpos. governing loc., to, into, for. Use explained, 12, 82; elsewhere, i-bāgh likī, (went) to the garden, III; i-daryāb likī, (immersed) into (i.e. in) the river, 169 (107); i-kūwai likī, (fell) into the well, 122; i-sa lawanai likī, (said) to a madman, II; i-sō pēts mulk likī, (went) to a far country, I (3); i-mund-ghal likī, (I long) for a fat tail, II; i-nādannī likī, for foolish people, 82; i-shōr likī, (went) to the city, 154, 169 (157); i-sa sarai likī, (signed) to a man, II; i-syāka likī, (sit) into (i.e. in) the shade, 169 (176); i-tsa likī, for what (dost thou long), II; kū-fa likī, (say) to him, 116, (give) to him, 122, 139 (3); kū-har kuk likī, (news came) to everyone, 26, 147; (look pleasant) for (i.e. before) everyone, 133, 168 (7); kū-kuk likī, (say) to whom? 25; kū-mun likī, (write) for me, 6, 169 (114); (censured) to (i.e. before) me, 169 (62); kū-mun likī, (write a letter) to me, 6, 169 (114).

In the phrase gharmi liki, at noon (169 (158)), the locative preposition i is omitted. Cf. ki, 3.

 $l\bar{e}kin$, conj. but, I (12); use explained, 91.

 lak^a - sh^awai (f. and pl. lak^a - sh^awai , 7, Nos. 153-5), m. a deer, 148, 169 (156).

289

likawiek or likayek (p.p. f. likawak or likayak), to cause to ascend, to cause to rise, to raise, Gh. 210 (4).

lik^yēk (p.p. f. likayak, 37; aor. sg. 2, likaī, 61 (5); 3, likayī, 61 (5)), to rise, ascend, mount, 134. This verb is commonly used with the contracted pronouns hir (or rī), dal, or hal, 122. lik^yēk kayēk is also used with the meaning of lik^yēk, Gh. 210, 12. Cf. lak. We should perhaps spell l^ak^yēk and l^ak.

likayēk, see likawek.

lalawiek or lalayek (p.p. f. lalawak or lalayak), to cause to hang, Gh. 210 (7).

lal'ëk (p.p. f. lalak, 58; aor. sg. 2, lal; 3, lala, 58), to hang, be suspended; to raise an outery. P. dzarēdal and lalēdal, Gh. 120 (7).

lalayēk, see lalawēk.

land (f. and pl. the same, 13), short, not long, 94, 169 (93). P

langīy^a, f. the leg, 168 (32). P. lēngai, the leg below the knee.

lupawek or lupayek (p.p. f. lupawak or lupayak), to cause (a babe) to drink its mother's milk, to suckle, Gh. 210 (5).

 $.lup^{s}\bar{e}k$ (p.p. f. lupak; aor. sg. 2, lup; 3, $lup\bar{\iota}$), to be suckled, to drink one's mother's milk, 146, 168 (19), Gh. 210 (5).

lupayēk, see lupawēk.

 $l\bar{a}iq$, adj. fit, worthy, I (11); $ta-p^a l\bar{a}iq$, worthy of this, I (9). P.

 $l\bar{o}_{i}^{a}$ (pl. $l\bar{o}_{i}$), f. a small mountain torrent, 9 (2).

laram (pl. laramī), m. a scorpion, Gh. 230 (9). P.

larawiek or larayek (p.p. f. larawak or larayak), to cause to stir, to cause to mix, Gh. 210 (8).

lar ēk (p.p. f. larak; aor. sg. 2, lērī; 3, larī), to stir, agitate; to mix, blend; to be mixed, blended, Gh. 210 (8). P. laral.

larayēk, see larawek.

lashtai (pl. lashtai), f. a brook, a rivulet, 8 (2), 9 (6), Gh. 218 (15). P.

laspaw^{*}ēk or laspayēk (p.p. f. laspawak or laspayak; aor. sg. 2, laspēwī; 3, laspawī), to push, shove, Gh. 210 (10).

lāsta, postpos. governing loc., from, 12; its use described, 82,83; found elsewhere in:—i-harra dūmī lāsta, (inquired) from all the singers, 26; i-dēra lāsta, from the camp, 19, 84, 122, 126, i-fāī lasta, from among them, I (2); i-sa faqīr lāsta, (stole) from a mendicant, III; i-dzut gham lāsta, from (owing to) excessive grief, 109; i-sra sra ghūndzī lāsta, from the best garments, I (12); i-hukm lāsta, (rebelled) against, (swerved) from a command, 169 (130), I (19); i-lwuzha lāsta, (dying) from hunger, I (7); i-māl lāsta, from the property, I (2); sa i-naukarī lāsta, one from among (i.e. one of) the servants, I (16); i-fāī paṭṭī lāsta, (filled himself) with those leaves, I (6); i-tsēn lāsta, since, II; i-tsēn ryūz lāsta i-pētsa, after some days, I (3); kū-kuk lāsta, from whom? 25; kū-hīts kuk lāsta, from anyone, 26; kū-makālī Ṣāḥib lāsta, from Mr. Macaulay, 122; kū-mun lāsta, from me, 18; kū-tū lāsta, from thee, 79, 86, 89, 92, 126, 169 (172).

This postpos. is often used in the comparison of adjectives, see 15, cf. 142d, and 169 (58).

Whenever $l\bar{a}st^*$ is used, $d\bar{i}$, 1, must also appear in the sentence, see 12, 83, 126. For the few instances in which $d\bar{i}$ is not used, see 83. See $d\bar{i}$, 1. Cf. P. $l\bar{a}sta$, a side.

lasaw^{*}ēk or lasayēk (p.p. f. lasawak or lasayak), to cause to lick, see las^{*}ēk, Gh. 210 (3).

las'ēk (p.p. f. lasak; aor. sg. 2, lēsī; 3, lasī), to lick, Gh. 210 (3). The meaning of this word is uncertain. Gh. gives the equivalent P. as tsaṭel, which means 'to lick,' but the equivalent Urdū as chāṭnā anguli-sē, to lick from the finger.

lasayēk, see lasaw'ēk.
lūṭ, m. robbery, plunder, Gh. 210 (11). — kayēk, to rob, plunder, 21, 135A, 169
(63). P.

lēw (Gh. 54 (12)) or lēwū (Gh. 229 (14), 48 (4) (pl. lēwgannī or lēwūī, 9 (5, 8)), com. gender, 8 (7), a wolf. P. lēw, pl. lēwagān.

lēwgannī, see lēw.

lawanai (pl. lawanai, 129; f. lawaniy^a, q.v.), adj. mad, 129; a madman, 86, 95, II; voc. ai lawanai-a, II. P. lēwanai.

lwang (pl. lwandzī), m. the slope down a hill, 9 (9). Cf. pēchūmai.

lwan⁵ēk (p.p. f. lwanak; aor. sg. 2, lwēnī; 3, lwanī), to sprinkle; to brush, dust, Gh. 210 (9). P. lwan⁶l (Gh.).

lawanīy^a (pl. lawanīyī), f. of lawanai, mad, 129; a madwoman.

law^ar, a bludgeon, 162, 169 (65). P.

lawirkai, m. a small bludgeon, 162.

liouzha, hunger, I (7). P. lwazha.

lyirai (pl. the same), m. a lamb, 9 (6). P. wrai.

lēzķadūnkai, m. a sender, one who sends, 33E. P.

lāzim, adj. necessary, incumbent, obligatory, 86, 121, I (21). P.

M

-m, the form taken by the pronominal suffix am, q.v., when suffixed to a word ending in a vowel.

ma, the negative used with the imperative in Pashtō. It is borrowed from that language, and used instead of mak, in 77, 133, 168 (12). P.

mai (pl. the same), f. a female sheep, a ewe, Gh. 228 (2).

māi, m. (8 (6)), a month; for the names of months, see 165; ta-Ḥasan Ḥusain a-māi, the month Möḥarram, 165; ta-Safar māi, the month of Ṣafar, 165; wī māi chār shamba, the last Wednesday of each month, 165.

 $m\bar{o}'$, in $sh\bar{e}$ $m\bar{o}'$, N. of the three months following Rajab, 165. The correctness of this word is doubtful. It occurs only in Gh. 59 (9), and the reading is not certain.

 $mach^a\bar{i}$ (pl. the same), f. a honey-bee, Gh. 235 (3). P.

madat-garai, m. a helper, 157. P. madad-gar.

maghzai, m. the throat, the neck, 126, 139 (3), 168 (17). P.

magar, conj. but, I (6); use explained, 91. P.

māhī (pl. māhīgannī, 9 (8)), m. (8 (5)), a fish, Gh. 234 (2). P. māhai, Prs. māhī. mahkam, adj. firm, strong, 168 (28). P.

maḥal, in sūrī maḥal barī zar, N. of a certain time of the day, 8 or 9 A.M., 167.

maḥmūd, N. of a certain king, Sultan Maḥmūd of Ghaznī, II. P.

mihmān, a guest; mihmān $k\bar{\imath}$ (without the locative preposition i-), for the guest, 82, 169 (192). P.

mahin, adj. fine, not coarse, delicate, 148, 165 (111). P.

mihrbānī, f. kindness. — kayēk, to show kindness, 86. P.

muḥtāj, adj. necessitous, poverty-stricken, indigent, I (4). P.

mak, adv. prohibitive particle, used to negative the imperative, do not, 26, 83, 86, 94, 144-6, 169 (72, 81, 89, 93, 110, 122, 129, 130-1, 147, 175, 178, 181-2). Use explained, 77. P. ma, which is also occasionally used in Ormuri. Seema.

 $m\bar{a}k$, adj. withered, faded; — $sy\bar{o}k$, to wither, Gh. 211 (13-4).

 $m\bar{a}kh$, pl. of az or haz, I. See az. P. $m\bar{u}zh$.

mēkh (pl. the same), m. a locust, 9 (1). Cf. milkhai. P. malakh.

mukh, the face; the mouth, No. 36; pa-mukh, (fell) on (his) face, 104, 122; mukh-pa-mukh, face to face, 74; i-mukh inar, before (governing gen.), I (8, 11). P. makh, the face.

mukh^a, old oblique form of mukh, used in adverbial phrases, as in i-mukh^a, before, in front, 74, No. 90; first, 16; pa-mukh^a, to the front, towards the front, 74.
So also it is used to form a postposition, as in i-f^a lāst^a mukh^a, before that, 83; tar-mun i-mukh^a, before me, No. 238.

mukhāō, the act of kneading, 155.

makhak (pl. makhachi), m. a kind of pulse, mūng, Gh. 223 (5).

makhlūq, human beings, the people, used with a plural verb, 26, 78, 99. P. a human being.

mukhawin, the act of kneading or rubbing, kneading, rubbing, 155.

mukhaw⁵ēk or mukhayēk (p.p. f. mukhawak or mukhayak, 57; aor. sg. 2, mukhēwī, 61A1, 68 (1), 69; 3, mukhawī, 30A, 57, 61A1; impve. sg. 2, mukhēw, mukhēw^an, 68 (1); 3, mukhawun, mukhawōn, 69; the causal of this verb is also mukhaw⁵ēk, 30A), to knead, to rub, shampoo, Gh. 212 (3); (as causal) to cause to knead, to cause to rub.

makālī, N.P. (English), Macaulay, 83, 122, 126.

māl, 1 (pl. mallī, No. 229), property, wealth, goods, 23, 107, 118, 148, 169 (19), I (2, 3); pl. cattle, No. 229. P.

māl, 2, in hindū sūrī māl klak barī zar, N. of a certain time of the day, 10 or 11 A.M., 167. The word is evidently a corruption of maḥal, q.v.

 $m\bar{a}l^a$, a word added to indefinite pronouns of number, to indicate persons, 26, 152, 169 (11).

mulā, N.P., voc. wō Mulā, 10.

mūlaī, f. a radish, II. P.

malk, see mulak.

malik, m. a chief, the headman of a village, 151, 169 (21). P.

mulk, a country, a region, I (3-5). P.

mulak, 1, or mullak, 1 (for the spelling mullak, see Gh. 123 (6)) (p.p. m. mulak, 92, 97; mullak, 5, 34, 85, 95, 135, 135A; f. malk, 38, 118, 120, 134; pl. 3, malk-in, vol. x.

P. mzaraī. $m^a z^y \bar{e}k$ (p.p. f. $m^a zak$), to be twisted (string, rope, etc.), Gh. 211 (14).

N

-n, for the pronominal suffix an, q.v., when added to a word ending in a vowel.

na, 1, adv. of negation. Used in answering questions, no. na a is also employed in the same way. It is emphasized by repetition, as in na na, no, no. As a negative in a sentence it is only used when repeated, as in na . . . na, neither . . . nor. In other direct statements or questions nak is used, but mak or ma is used with the imperative. See 77.

na, 2, see nastak.

na, 3, in na-ghōk, na-walak, qq.v.

nā, privative particle. P. Used as a prefix, it converts a noun substantive into a negative adjective, 164. The following examples of the use of this particle appear in the foregoing pages:—nā-dān (pl. nā-dannī, 9 (7), 82), adj. ignorant, 164; a fool, 9 (7), 82. P.; nā-fahm, adj. unintelligent, 164. P.; nā-jōr, adj. unwell, indisposed, sick, ailing, 164. P.; nā-jōrai, id., 125, 129, 152; nā-mard, adj. unmanly, 164. P.; nā-tars, adj. fearless, pitiless, 164. P.

naī, 1, see ka-naī, s.v. ka, 3.

-nādān, nādannī, see nā-dān, s.v. nā.

naī, 2, see nastak.

 $mach\bar{\imath}$ (pl. the same), f. a white ant, 8 (5), Gh. 235 (13).

na-ghōk (p.p. f. naghak, 38; aor. sg. 1, nis^am, 62A; 2, nis, 38, 62A; 3, nisī, 38, 62A; pres. pl. 1, bū nisyēn, 122, 126, 132; impve. sg. 1, nis^am, 71; 2, nis, 38, 71; 3, nisōn, 71), to emerge, issue, I (18); used with the contracted pronouns, hir (or rī), dal, or hal, 122; hal na-ghōk, to go out, 122, 126, 132. Cf. aghōk and waghyōk. The causal of this verb is na-w^alak, q.v., Gh. 212 (7).

 $n^a h$ card. nine, 16. P. $n \delta h$.

nahī, negative adv. said by Gh. to be used with the imperative, 77.

- n°ham, ord. ninth, 16.
- nō-jīstū, card. twenty-nine, 16.
- nak, 1, negative adv. not. This is the regular negative employed in direct statements and interrogative sentences, mak being used with the imperative, see 77. Cf. 23, 24, 26, 39, 56, 73, 75, 78-9, 86, 89, 90-2, 94-5, 99, 108, 120, 125-6, 129, 135A, C, 136G, 142c, 144-6, 148, 150, 152, 169 (9, 16, 18, 23, 28, 49, 60-1, 73, 81, 87, 97, 141-2, 169), I (6, 9, 11, 18-9), II, IV.
- nak, 2, see akhwara-nak, tra-nak. Cf. Prs. -nāk.
- nak, 3, see $n\bar{o}k$.
- $n\bar{a}k$, 1, see $ny\bar{o}k$.
- $n\bar{a}k$, 2, f. a wife, 118, 134, No. 53; $k\bar{a}y\bar{e}k$ (past sg. $n\bar{a}k$ $d\bar{a}k$), to marry, Gh. 213 (3, 13).
- nēk, adj. good, virtuous, 24, 156. nēk-nām, adj. possessing a good name, of good repute, 94. P.
- $n\bar{e}k\bar{i}$, f. virtue, goodness, 156; with def. art. a- $n\bar{e}k\bar{i}$, virtue, 26, 87, 143, 169 (116), of. a-. P.
- nōk (p.p. f. nak, 38; aor. sg. 1, nis^am, 62B; 2, nis, 38, 62B; 3, nisa, 38, 62B; impve. sg. 1, nis^am, 71; 2, nis, 38, 71, No. 235; 3, nisōn, 71), to seize, catch hold. P. nīwul, pres. nisō.
- nēknām, see nēk.
- naukar (pl. naukarī, I (16)), m. a servant, 75, I (16). P.
- nikiz^{*}ēk, or nikīz^{*}ēk (p.p. f. nikīzak; aor. sg. 2, nikīz; 3, nikīzī), to throw down; to throw, propel, 57, Gh. 212 (6).
- nālattī, pl. swine, I (5, 6). The singular of this word has not been ascertained.
- nmā-ṣḥām (84) or nmā-shām (167), N. of a certain time of the day, evening, 84, 167; awwal nmā-shām, the time immediately after sunset, 167. P. nmā-sḥām. Cf. nim.
- -nām, a name, No. 220. nām-at, thy name, 25, 148, 169 (2). Cf. bad-nām, s.v. bad, and nēk-nām, s.v. nēk. P.
- nāmī, a particle used to strengthen a negative, as in nāmī nak, not at all, 23, 77.
- nim, for nīm, in the following:—nim-ryūz, a certain time of the day, about 3 P.M., 167; awwal nim-ryūz, 2 P.M., 167; tūt nim-ryūz, about 3-30 P.M., 167. Cf. nmā.
- nīm, adj. half, 16; used in forming fractions, 16. nīm shīw, midnight, 167. P. ni mat, favour, graciousness, 143, 169 (140). P.
- nimawek or nimayek (p.p. f. nimawak or nimayak), to cause to descend, to take down, Gh. 212 (10).
- nāmyēk (p.p. f. nāmyak; aor. sg. 3, nāma), to name, 37, 59.
- nim⁵ēk (p.p. f. nimak; aor. sg. 2, nim, 61A3; 3, nimī, 61A3), to descend. nimayēk, see nimaw⁵ēk.
- nmāz, prayer, 148, 169 (189). P. namāz.
- ninī (133, 168 (9)), or nīnī (No. 34), the nose. a-ninī sūņ ka, blow your nose, 133, 168 (9).
- $n^a r$, m. a male, a man; used to indicate the masculine gender, 7. $n^a r s h^a dz$ (pl. $n^a r s h^a dz_1$), m. a male woman, a cunuch, Gh. 226 (13). P. nar.

```
nar, f. (8), a house, 8 (1), 85, 118, 120, 134, 135B, 142a, 143-5, 148, 169 (10, 71,
     86, 106), I (15), No. 67; i-nar, at home, 74, 85, 108, 120, 132.
                                                                          The postposi-
     tion inar, in, q.v., is derived from i-nar.
narai (pl. narai), m. a mountain pass, 8 (2), 9 (6).
n\bar{o}_{i}\bar{i} (pl. the same), f. bread, 8 (5), 12, 75, 82, 94, 100, 132, 135, 136G, 169 (154,
     192), I (7). P. nwaraī.
narm, adj. soft, tender. — syōk, to become soft, Gh. 104 (5). P.
narshadz, see nar.
norsh, adj. soft, not hard, 152, 169 (141).
nar ek (p.p. f. narak; aor. sg. 2, nar; 3, nara), to low (of a cow). P. nar l, to bray.
nas, the belly, 125, 169 (101). P.
nis, see na-ghōk and nōk.
nasīb, fortune, luck, fate, 143, 169 (145). P.
nīsht, the place above, 74; the place outside, 74; i-nīsht, adv. outside, externally,
     108; pa-nīsht, to the outside, (going) outside, 104, 122, I (18).
nashtar (pl. nashtari), m. the mountain pine, Gh. 225 (11). P.
nāsk, see nastak.
nis^a m, see na-gh\bar{o}k and n\bar{o}k.
nastak (p.p. m. bū nastak ba, he is seated, 73; f. nāsk, 38; past m. sg. 1, nastak-
     am, 73; 2, nastak-ē, III; 3, nastak, 78, 85, 86, 102, 108, III; pl. 3, nāsk-in,
     89, 102, 113, 134; perf. m. sg. 3, nastak hā, 86; aor. sg. 1, nam, 62B; 2, naī,
     38, 61B4, 62B, 68 (3); 3, na, 30B, 38, 61B4, 62B; impve. sg. 1, nam, 71; 2,
     naī, 38, 68 (3), 71, 169 (176); 3, nōn, 71; pl. 2, naī or nāī, 70-1), to sit down,
     to sit. P. kṣḥē-nāstal. The causal of this verb is nawēk or nayēk, 30B.
natiek (p.p. f. natak; aor. sg. 2, nat; 3, nati), to pillage, loot, Gh. 212 (13). P.
     natal.
n\bar{a}w^a (pl. n\bar{a}w\bar{i}), f. a hollow between two hills, a hill valley, crevasse, 9 (2), Gh.
     220 (3). P. nāwa, a gutter.
nawi, card. ninety, 16.
nwī, see nwastak.
nīw, nīwī, see nyōk.
na-w^alak (p.p. f. na-w^alk; aor. sg. 1, na-w^ar^am, 62B; 2, na-w^ar, 38, 61B1, 62B; 3,
     na-w<sup>a</sup>ra, 30B, 38, 61B1, 62B; impve. sg. 1, na-w<sup>a</sup>r<sup>a</sup>m, 71; 2, na-w<sup>a</sup>r, 38, 71,
     No. 237; 3, na-w^ar\bar{o}n, 71; pl. 2, na-w^ara\bar{i}, I (12)), to take out, 38, 61B1, 62B,
     71; to bring out, I (12); to put out, 30B; to draw (water from a well),
     No. 237. This verb is the transitive or causal form of na-ghōk, Gh. 212 (7);
     in turn, it has itself a causal na-warawek, or na-warayek, 30B. Cf. walak.
nwalaw'ēk or nwalayēk (p.p. f. nwalawak or nwalayak), causal of hishtak, to read,
     q.v. Gh. 214 (13).
nicam, nicon, see nwastak.
nīwun, nīwon, see nyok.
na-warawak or na-warayek (p.p. f. na-warawak or na-warayak), causal of na-walak,
     q.v. This form is rarely used, 30B.
nicasai, m. a grandson, 120, 125, 150.
nıcāsk, see nıcastak.
```

nwastak (p.p. f. $nw\bar{a}sk$; aor. sg. 1, $nw^a m$, 62A; 2 and 3, $nw\bar{i}$, 38, 62A; impve. sg. 1, $nw^a m$, 71; 2 and 3, $nw\bar{o}n$, 38, 71), to lie down; to go to sleep.

P

 p^a , see $h\bar{o}$, 1.

pa, prepos. forming the instrumental case, with, by means of. Use explained, with examples, 19, 104. Examples of the instrumental meaning occurring elsewhere, pa-dyō zām², (eats) with both jaws, 145, 168 (14); pa-fulānai-m na-w²lak, I put him out by means of so and so, 30B; pa-law²r, (beat) with a cudgel, 169 (65); pa-mun-a dzōk, he struck by means of me, 115; pa-pūnd², (kick) with the heel, 168 (33); pa-tūr², (slay) with a sword, 20c, 86; pa-bud-kharchī, by means of bad expenditure, I (3); pa-tsamī, (signalled) with the eyes, II.

It is often used to form adverbs of time or place, as in $pa_{\cdot}f^{a}$, there, 27, 74; $pa_{\cdot}p^{a}$, here, 27, 74; $pa_{\cdot}ry\bar{u}z$, by day, 75; $pa_{\cdot}sh\bar{v}w$, by night, 75; $pa_{\cdot}tsat$, behind the back, behind, 74, 148, 169 (92); afterwards, 74; see also bel.; $pa_{\cdot}f^{a}$ waqt, at that time, I (4); $s\bar{a}'at$ $pa_{\cdot}s\bar{a}'at$, at every moment, 104.

Or adverbs of motion to, the letter being added to the main word, as in pa-bēzḥ^a, to above, upwards, to outside, 74; pa-dzēm^a, to below, downwards, 74; pa-khwarints^a, towards the right, 74; pa-mukh^a, to the front. 74; see also bel.; pa-nīsht^a, to the outside, 74, 122, I (18); pa-pēts^a, to the outside, 74; pa-sa, hither, in this direction, behind, 74; without, except (governing loc.), 82, 88; pa-tsēl^a, towards the left, 74.

It also forms adjectives or other adverbs, as in $pa-khwash\bar{\iota}$ $sy\bar{o}k$, to become happy, I (14); pa-ghussa $sy\bar{o}k$, to become energy, I (18); pa-quhr $sy\bar{o}k$, to become energed, 86; pa-yangh $sy\bar{o}k$, to embrace, I (10).

Or postpositions governing the genitive, as in $pa-mis\bar{a}l$, like, I (9); $pa-p\bar{o}rkai$, with, together with, 74; pa-rang, like, 81. Compare $pa-p^a-rang$, in this manner, 27, 73.

Other miscellaneous uses are pa-'umr, (never) in (his) life, IV; pa-galgh, (carry) on the shoulder, 142c, 168 (29); pa-khabar, cognisant (of=abl.). 126, 169 (17); pa-khwai, by oneself, of one's own accord, 21, 79; pa-langiy, (pull)

by the foot, 168 (32); pa-mukk, (fall) on the face, 122; mukk pa-mukk, face to-face, 74; see also ab.; pa-test, (fell) flat on the back, 104; see also ab.

Verbs indicating kindness, tyranny, or rage, take pa with izar; examples,

pa is also used to form a gerund; examples, 34.

paī, see hō, 1.

piē (pl. the same, 9 (4)), m. a father, 15, 83, 118, 120, 146, 169 (104), I (2, 7, 8, 10, 12, 17-9), Nos. 47, 101; voc. ē piē, I (2, 8, 11); a-piē-m, my father, 142a; a-piē-wa, his father, 89.

rwan, fire, No. 65; rwan bal kayēk, to light a fire, 146, 169 (4, 166).

rawān, adj. moving, going. rawān syōk, to set out, set forth, depart, go one's way, I (3), III, IV. P.

rawas (pl. rawasi), com. gen. a fox, Gh. 230 (4).

rayī, see rāī.

 $r^{y}\bar{e}k$ (p.p. f. ryak, 37; aor. sg. 2, $r^{y}\bar{e}k$ $s\bar{u}$, 59; 3, $r^{y}\bar{e}k$ sa, 59), to be torn (of cloth). Gh. 198 (3).

rayēk (p.p. f. rayak, 37; aor. sg. 2, rēyī; 3, rayī), to tear (cloth), Gh. 198 (4).

rīyēk (p.p. f. rīyēk, 37, 59; aor. sg. 2, rīnī, 61B3; 3, rīna, 59, 61B3), to shave, to shear, Gh. 198 (5). Cf. P. khriyal.

 $riy\bar{o}k$, another form of $shiy\bar{o}k$, to give, q.v.

ryūz (pl. ryūzī, Gh. 106 (10)), a day. P. rōz. pa-ryūz, by day, 75, 104; ryūz pa-ryūz, day by day, 104; tsōn ryūz, some days, 26, I (3), with noun in singular; nim-ryūz, about 3 p.m., 167; awwal nim-ryūz, 2 p.m., 167; tūt nim-ryūz, about 3.30 p.m., 167.

razghūn (f. razghūn^a), pl. razghūnī, adj. green, 14 (2).

8°, see sō.

sa, 1, see 41, and $sy\bar{o}k$, 2.

sa, 2, an adv. of manner, for no particular reason, just, 73.

sa, 3, in pa sa, hither, in this direction, close up behind, 74; or, as a postposition governing the locative, without, except, 82, 88. As a postposition it is often combined with the preposition bē, without change of meaning, 88.

 $sa\bar{\imath}$, see 41, and $sy\bar{o}k$, 2.

sē, see ka-sē, s.v. ka, 2.

 $s\bar{\imath}$, see 41, and $sy\bar{o}k$, 2.

sō or s^a (f. 16, and pl. 16, 26, syī), card. one, 16; sō-jīstū, twenty-one, 16; sō nīm, one and a half, 16. The following are examples of its use as a numeral:—s^a, 78-9, 120, 129, I (16); syī (f.), 79, 120, 146, 150.

This word is very frequently used to supply the place of an indefinite article, meaning 'a,' 'a certain,' 6. Thus, $s\bar{o}$, I (3, 5, 9); s^* , 81, 94, 169 (114), I (1), II, III, IV; $sy\bar{\imath}$ (f.), 6, 169 (133), II.

 $h\bar{a}r$ sō, each, 26; $sy\bar{\imath}$ $ts\bar{o}n$, several, 16, 26, 125, 151; followed by $b\bar{\imath}$ or $biy\bar{e}$, sō means 'for one,' 'on the one hand,' in the first place,' 89, 152, 169 (11).

- $s\bar{u}$, 1, card. one hundred, 16. The higher hundreds are formed with $s\bar{o}h$, not $s\bar{u}$, as in $d\bar{u}$ $s\bar{o}h$, two hundred, 16. $s\bar{u}$ -gad, the hundred, the whole hundred, 16.
- sū, 2, see 41, and syōk, 2.
- sū, 3, verbal particle used with the past tense to form the future imperfect (51), and with the agrist to form the future (65). With the agrist of byōk conjugated with the past participle of the main verb, it forms the future perfect (52). Regarding its use in the future imperfect, when it follows the verb, see 51.

Examples of the future occur in 20c, 51, 73, 86, 92-4, 122-3, 136A, C, F, 151-2, 169 (25, 93, 141-2), I (8), III, IV. In all these the sū precedes the verb, except in the case of one of the three futures in I (8).

 $sab\bar{a}$, adv. tomorrow, 75, 94, 146, 169 (25, 94). P. $b\bar{i}$ $sab\bar{a}$, the day after tomorrow, 75; $m\bar{i}n$ $sab\bar{a}$, two days after tomorrow, 75; in future, 75.

sabaq, a lesson, 21, 135A, 169 (95). P.

şabr, patience, endurance, long-suffering, Gh. 204 (8). a-şabr, patience, 15 (see a-).
şabr kayêk, to wait, 6, 146, 169 (133). P.

sabr^{*}ēk (p.p. f. sabrak), to have patience, to wait, Gh. 204 (9).

saudā, 1, madness, 163. P.

saudā, 2, f. merchandise, 8 (4). P.

saudāī, adj. mad, 163. P.

saudā-gar, a merchant, 157. P.

sufid, in sufid-chashm, white-eyed, 164. Prs.

safar, in ta-safar $m\bar{a}\bar{\imath}$, N. of the Musalman month of Safar, the second month in the Örmuri calendar, 165.

- -sifatawēk or sifatayēk (p.p. f. sifatawak or sifatayak; aor. sg. 2, sifatēwē; 3, sifatawē), to praise, Gh. 204 (7). P. sifat, praise.
- sag², f. sand, 99. This word takes the emphatic particle $d\bar{\imath}$, not $a\bar{\imath}$, with the singular, 99. P. shiga.
- saggarū, m. a kid, I (19). Cf. gurū.
- saghī, see syūgh, 1.
- -saghadī, see syūgh, 2.
- shai, m. a thing, an article, 6, 148, 169 (40), IV. P.
- $sh\bar{o}$, in $sh\bar{o}$ - $j\bar{\imath}st\bar{u}$, twenty-six, and so for thirty-six, forty-six, and so on, 16. See sh^ah .
- sõh, a hundred, this is the form taken by $s\tilde{u}$, 1, in conjunction with other numerals, as in $d\tilde{u}$ sõh, two hundred; $sh\bar{e}$ sõh, three hundred, and so on, 16.
- sāhib, m. a European gentleman, 73. Used as a suffix to European surnames, equivalent to 'Mr.,' as in Makālī Ṣāhib, Mr. Macaulay, 83, 122, 126. P.
- .sha'bān, N. of the eighth month in the Örmurī calendar. Ar.
- shādī, merriment, rejoicing, I (21). P. shādī.
- shadz, f. a female, a woman, 7. Used to indicate the feminine gender, as in shadz hins, a she-bear, 7. P. shadza.
- sh^ah , card. six, 16; sh^ah wa $n\bar{\imath}m$, six and a half, 16; $ta-sh^ah$ $ts\bar{a}n$ (noun singular), of six years, six years old, 148, 169 (27).
- shaham, ord. sixth.
- shak, doubt, in bē-shaki, adv. without doubt, certainly, 77, 164. P. bē-shaka. Cf. bē, 2.
- shakh, burial. Shakh Barāt, the Shab-ĕ-barāt, or 14th day of the month of Sha'bān, on which oblations are made to the Manes of deceased ancestors, 165. P. shakh.
- shakh, in shakh syök, to put on (clothes), to dress oneself, Gh. 203 (11, 12).
- shak^al, shape, form, figure, IV. P.
- şhkārawēk or şhkārayēk (p.p. f. şhkārawak or şhkārayak), to make manifest, Gh. 206 (6). Cf. P. şhkāra, manifest.
- şḥkār³ēk (p.p. f. ṣḥkārak, 58; aor. sg. 2, ṣḥkār; 3, ṣḥkāra, 58), to become manifest, known, or visible, Gh. 203 (6). P. ṣḥkārĕd³l.
- shōl (pl. shilī, 9 (7)), m. rice in the husk, paddy, Gh. 223 (4). P. shōla.
- shām, 1, see bē-shām, under bē, 2.
- shām, 1, showing, pointing out, Gh. 203 (12).
- shām, 2, or shām, 2, see nmā-shām.
- shamba, in chār shamba, see chār.
- shumār, counting, computing, Gh. 203 (4). P.
- shumār ēk (p.p. f. shumārak), to count, compute, Gh. 203 (12). P. shmār l.
- shmushawek or shmushayek (p.p. f. shmushawak or shmushayak), to cause to slip, Gh. 203 (8).
- $shmush^y\bar{e}k$ (p.p. f. shmushak; aor. sg. 2, shmush; 3, $shmush\bar{i}$), to slip, slide. P. $shwaiy\bar{e}d^zl$.
- shmushayēk, see shmushawek.
- $sh\bar{a}m^{y}\bar{e}k$ (p.p. f. $sh\bar{a}mak$), to show, point out, Gh. 203 (12).

į,

```
shin (f. and pl. shin, 14 (1)), green, 109. P.
shand'ek (p.p. f. shandak; aor. sg. 2, shëndi; 3, shandi), to give, contribute,
    dispense; to spend, expend, Gh. 203 (7). P. shandel.
shīmoŭ (pl. shīmoaī, 9 (5)), f. spinach, potherbs, sāg, 8 (7).
shīpī or (99) shippī, f. milk, 8 (5). This word takes the emphatic particle ds, not
    ai, even in the singular, 99.
sha, 1, see sha-s'ek and sha-tsaw'ek.
sha, 2, see shiyok.
shē, card. three, 2, 16; shē-gad, the three, all three, 16; shē wa nīm, three and a
    half, 16; she soh, three hundred, 16; she mogh, N. of the three months Rajab,
    Sha'ban, and Ramazan, 165; she samba, Tuesday, 166. Cf. shiw; also Avesta,
    thri-; Munjani, sherai; Yüdghā, shuroi.
shī, see samsī-shī.
shor (2, 8 (1), 9 (7), 162), or shor (2, 154, 169 (57)) (pl. sheri, 9 (7)), m. a city.
     P. sh'hr. The diminutive of this word is shorgai, 162.

 $s\bar{e}r$, a seer (the weight), 125, 169 (39). P.

sērā, adv. quickly. Cf. P. zar.

sir (f. and pl. sir^a or sr^a), adj. good; sg. masc. 5, 15, 24, 40, 74-5, 78, 85, 90, 95, 109, 111, 125, 129, 138, 143, 148, 169 (40, 80, 92, 118, 145, 184); f. sir^a, 14 (1), 26, 111, 143; sr^a, 14 (1), 24, 78, 82, 87, 129, 142d, 143-4, 148, 169 (116, 134, 150); pl. sir^a, 14 (1); sr^a, 14 (1), 129, 143, 150, 169 (132, 169).

As an adverb of affirmation, we have sir, good! and sir sir, very good! 77. sir $agh\bar{o}k$, to seem good, appear right, 24; sir $kay\bar{e}k$, to behave well, 145, 169 (170); sr^a $sh\bar{\imath}w$ ta- $im\bar{a}my\bar{\imath}y\bar{\imath}$, the Åshūrā, 165; i- sir^a inar sir, the best, 15, 85; sr^a sr^a $gh\bar{\imath}ndz\bar{\imath}$, garments, each of which is good, I (12).

sūr, 1, adj. red. Cf. sūṣḥ. sūr kayēk, to make red, Gh. 106 (14); sūr sakkar (pl. sūr sakkrī), a kind of sugar. P. shakkara. Cf. tīrī; sūr zar, gold, No. 45. P. sara zar. This word sūr is borrowed from P. The Ōrmurī word is sūṣḥ. sūr, 2, see bē-sūr, s.v. bê, 2.

sūrī, in sūrī maḥal barī zar, N. of a certain time of the day, 8 or 9 A.M., 167; hindū sūrī māl klak barī zar, 10 or 11 A.M., 167.

sardī, coldness, 169 (165). P. sardī.

saṛīgai, m. a little man, a dwarf, 162; dim. of saṛai, q.v.

 $sy\bar{u}m$, adj. immersed; $sy\bar{u}m$ $kay\bar{e}k$, to immerse, 169 (107).

srat, condition, circumstance. a-b²l srat, the condition of good health, good health, 143, 169 (140). P. sūrat.

surtā, f. a certa in musical instrument, 8 (4).

 $sirw\bar{a}$ (pl. $sirwa\bar{i}$, 9 (3)), f. soup, 8 (4). P. $sh\bar{o}rw\bar{a}$.

 $s\bar{u}sh^a$ (pl. $s\bar{u}sh^a\bar{i}$), f. a mountain ewe, Gh. 231 (6). The male is called wrai, Gh. 231 (5).

sūṣḥ (f. and pl. sūṣḥ, 14 (1)), adj. red, 78, 129, 168 (10), 169 (42). Cf. sūr, 1. sūṣḥ zar, gold, No. 45. P. sūr.

sisnaw⁷ēk or sisnayēk (p.p. f. sisnawak or sisnayak), to cause to neigh, Gh. 202 (7).

 $sisn^{g}\tilde{e}k$ (p.p. f. sisnak; aor. sg. 2, sisn; 3, $sisn\tilde{e}$), to neigh (like a horse), Gh. 202 (7). P. $shish\tilde{n}\tilde{e}d^{z}l$.

sisnayēk, see sisnaw'ek.

sustī, laziness. — $kay\bar{e}k$, to show laziness, 146, 169 (129). P.

sa'at, f. a moment of time, 8 (1). P. $sy\bar{s}$ $s\bar{a}$ 'at, (wait) a moment, 6, 146, 169 (133); $pa-f^s$ $s\bar{a}$ 'at, at that time, 104; $s\bar{a}$ 'at $pu-s\bar{a}$ 'at, at every moment, 104.

st^ar, adj. great, big, 113, 130, I (4); (of two sons) the elder, I (15). st^ar 'id, the great 'Id, N. of the month Zi'l-hijja, the twelfth month of the Örmuri calendar, 165. P. star.

stir (f. and pl. the same, 13), adj. weary, 79, 113, 125, 129, 130, 142c. P. starai.

311

stargai, in spīn-stargai, white-eyed; tōr-stargai, black-eyed, both borrowed from P., 164.

stirrak, a star, No. 64. P. starga, a planet; storai, a star.

 $sat^y\bar{e}k$ (p.p. f. satak; aor. sg. 2, $s\bar{e}t\bar{\imath}$, 61A2; 3, $sat\bar{\imath}$, 61A2), to keep, preserve, take care of, Gh. 201 (12). P. sat^al .

savab, the future reward of virtue, 169 (151). P.

swār, adj. mounted, on horseback, riding, 169 (6). swār kayēk, to make (so and so) a rider, to mount (a person), 169 (177). P. sōr, Prs. suwār.
syī, see sō.

syūgh, 1 (pl. saghī, 9 (7, 10)), f. 8 (1), a grape.

syūgh, 2 (pl. saghadī, 9 (7, 10)), f. a mother-in-law, 8 (1); a-syūgh-at, thy mother-in-law, 120, 132; a-syūgh-a, his mother-in-law, 134.

syāh, in syāh-chashm, black-eyed, 164, borrowed from Prs.

 $sy\bar{a}k^a$, shade, shadow; $i-sy\bar{a}k^a$ $lik\bar{\imath}$ $na\bar{\imath}$, sit to (i.e. in) the shade, 169 (176).

s'ēk, a by-form of ts'ēk, in sha-s'ēk, q.v.

 $sy\bar{o}k$, 1 (p.p. f. suk; aor. sg. 2, $s\bar{u}$; 3, sa), to break (a rope). This verb is always used with the contracted pronoun hal, Gh. 202 (5).

syōk, 2, or siyōk, copulative verb. This verb is conjugated in full in 41. The following additional examples of its use occur in the grammar.

Past sg. m. 1, $sy\bar{o}k$ -am, 130, 169 (79); 2, $sy\bar{o}k$ -a, 75, 79, 113, 130; $sy\bar{o}k$ - \bar{e} , II; 3, $sy\bar{o}k$, 25, 75, 83, 85-6, 89, 92, 95, 99, 104, 111, 126, 130, 136C, 139 (3), 151, 152, 168 (17), 169 (12, 44, 46, 66), I (3-5, 7, 10, 14-5, 18, 21), III, IV; f. suk, 31, 38, 99, 111, 130, 152, 169 (102, 167), IV; pl. 1, suk- $y\bar{e}n$, 130; 2, suk- $a\bar{\imath}$, 113, 130; 3, suk-in, 31, 111, 130, 142a, 153, 168 (5, 8), 169 (125, 171), I (14); imperf. sg. m. 3, $b\bar{u}$ $sy\bar{o}k$, I (6).

Aor. sg. 1, $s^a m$, 62B, I (9, 11); 2, $s\bar{s}$, 38, 61B3, 62B, 94; $s\bar{u}$, 38, 61B3, 62B, 68 (2); 3, sa, 38, 61B3, 62B, 94, 146, 169 (94); pres. sg. 3, $b\bar{u}$ sa, 25-6, 82, 152, 169 (166, 168); I (7), II; fut. sg. 3, $s\bar{u}$ sa, 92-4, 136C, 151-2, 169 (93, 141-2).

Impve. sg. 1, $s^a m$, 71; 2, $s\tilde{u}$, 38, 68 (2), 71; sun, 38, 68 (2), 71, 74, 169 (45, 190); 3, $s\tilde{o}n$, 71, 169 (161).

The use of this copulative verb is explained, with examples in 130, cf. 151, 152; to become, 26, 75, 79, 85, 94, 111, 113, 169 (44-6, 66, 79, 93-4, 102, 141-2, 161, 166-8, 171), I (passim), II, III, IV, et passim; to come into being, 92, 136C, 151; to happen, occur, 25, 95.

The passive voice is made by conjugating $sy\bar{o}k$ with the past participle of the main verb, 31, 153; cf. $brashtak\ sy\bar{o}k$, was burnt, 99; $b\bar{u}\ ghw\bar{e}k\ sa$, it is being said, 25, 82; $kap^y\bar{e}k\ sy\bar{o}k$, it was cut, 126, 139 (3), 168 (17).

This verb is also very freely employed to form nominal compound verbs as in $sp\bar{\imath}w$ $sy\bar{\imath}k$, to become white, 29; in fact, almost every occurrence in the sense of 'to become' might be so classed. A few selected instances are:— $b\bar{a}r\bar{a}n$ $sy\bar{\imath}k$, rain to occur, to rain, 92, 136C, 151; $khw\bar{\imath}a$ suk, it (fem.) fell, 99; $khw\bar{\imath}a$ suk-in, they fell, 130, 168 (5, 8), 169 (125); $karts\bar{\imath}sy\bar{\imath}k$, it became rent asunder, 83; pa-qahr $sy\bar{\imath}k$, he became angry, 86; pa-sa sun, become up here, come behind and follow me, 74; sahar $sy\bar{\imath}k$, it is morning, 169 (12); $s\bar{\imath}al^a$ -m $b\bar{\imath}u$ sa, cold is becoming to me, I feel cold, 152; $ts\bar{\imath}al\bar{\imath}k$ sun, be quick, 169 (190).

sayēk, 1 (p.p. f. sayak; aor. sg. 2, sēyī; 3, sayī), to abrade, grate, smoothe, Gh. 201 (9). Cf. sūlawēk.

sayaw^sēk or sayēk, 2 (p.p. f. sayawak; aor. sg. 2, sayēwī; 3, sayawī), to hear-endure, Gh. 201 (11). P. sah^{*}l.

sazā, punishment, 61A5 (note), 87, 122. P.

sīzgai (pl. sīzgai), com. gen. a porcupine, hedgehog, Gh. 231 (8). P. zīzḥkai,

T

- -t, the form taken by the pronominal suffix at, q.v., when suffixed to a word ending in a vowel.
- ta, 1, adv. then, 75. According to Gh. 59 (13), this word is also used in conditional sentences, but no examples of its use are given. P. trō.
- ta, 2, preposition of the genitive, of, 10, 11, 107, 118. P. da. This preposition becomes tar when forming the genitive of a pronoun of the first or second person or of the pronouns kuk, who?, and tson, how much?, 17, 25, 107, 118. The animate genitive substantive of ho, this, is tara, pl. tara, 23.

When forming the genitive of a pronoun of the third person, the governing noun must have the definite article a-, as in ta-fō a-dist, his hand; ta-fō dist would mean 'of that hand,' 119.

If the noun put in the genitive has an adjective in agreement, ta- is prefixed to the first of the two, as in ta-sir yansp, of a good horse, 109.

For ta-minak, ta-minshaka, see s.vv.

The form ta occurs passim, and it is unnecessary to give further references. For tar, we have :—tar-kuk, who e ? 23, 25, 81, 107, 118, 148-9, 150, 169 (3, 10, 14, 19, 31, 37, 91, 120, 146); tar- $m\bar{a}kh$, our, of us, 17, 107, 118; tar-mun, my, of me, 6, 17, 21, 78, 81, 94, 107, 118, 152, 169 (33), I (2, 7, 21); tar- $t\bar{u}$, thy, of thee, 17, 25, 79, 107, 118, 142a, b, 143, 154, 169 (71, 105, 145), I (2, 8, 9, 11, 17, 19, 20-1), IV; tar- $ty\bar{u}s$, your, of you, 17, 107, 118, 120, 132; tar- $ts\bar{o}n$, of how much ?, 27, 107, No. 221; but ta- $ts\bar{o}n$, 107, 148, 169 (26).

 $t\bar{a}$, m. a paternal uncle, a father's brother, 132, 144, 146, No. 225. P. tr^a . $t\bar{a}$, see $t^a\bar{b}$.

tū, pron. 2nd pers. thou. Declined, 17. It takes tar, not ta, as the preposition of the genitive (17, 25, 107, 118), and kū, not i, 1, as the preposition of the locative (10, 17). The following forms occur:—sg. nom. acc. tū, thou, thee, 17, 19, 25-6, 39, 75, 77, 79, 90, 93-4, 104, 113, 122, 126, 129, 130, 134, 145A, 136A, F, G, 142c, 143, 169 (17, 22, 62), I (19, 21), II, III; instr. pa-tū, by thee, 17; gen. tar-tū, of thee, thy, 17, 25, 79, 107, 118, 142a, b, 143, 154, 169 (71, 105, 145), I (2, 8, 9, 11, 17, 19-21), IV; loc. kū-tū, on thee, 17; kū-tū kī, to thee, 79; kū-tū lāsta, from thee, etc., 79, 83, 86, 89, 92, 122, 126, 169 (172); bē kū-tū, without, or except, thee, 26, 80; baghair kū-tū, without, or except, thee, 80; pl. nom. tyūs, ye, you, 17, 39, 113, 129, 130, 132, 142c; tyūz, 17; instr. pa-tyūs, pa-tyūz, by you, 17; gen. tar-tyūs, of you, your, 17, 107, 118, 120, 132; tar-tyūz, 17; loc. kū-tyūs, kū-tyūz, on you, 17.

 $t\bar{o}b^a$, f. penitence, contrition. With definite article (see a-), $a-t\bar{o}b^a$, contrition, 148, 169 (134). P.

tabawek or tabayek (p.p. f. tabawak or tabayak; aor. sg. 2, tabewe; 3, tabawe), to dress a wound. P. tabel.

tachī, see tāk.

tiṣḥtṣēk (p.p. f. tiṣḥtak; aor. sg. 2, tiṣḥt; 3, tiṣḥtē), to run away, bolt, Gh. 191 (7). P. taṣḥtēdel.

tsāk, adj. sour, acid, 156.

 $tsak^a$, adv. as; use explained, 73; cf. 151, sakhal. . . $tsak^a$, such . . . as, 27. Postpos. governing gen.; use explained, 80; cf. 129, 168 (10).

tsaka, m. taste, flavour, relish, savour. tsaka dok, he tasted, Gh. 194 (13). We should expect the word to be tsak', fem., but Gh. shows it as masculine. P.

 $ts\bar{e}k$, the bosom of a woman. — $lup^{\nu}\bar{e}k$, to suck the breast (of a child), 146, 168 (19). tusk, empty, Gh. 192 (7, 11).

tsakhal, or (27, note) tsa-khal, pron. adj. of what kind? of what sort?, 27, 135C (pl.), 146 (pl.), 148, 169 (53, 74 (pl.)).

tskhat, adj. fattened, fatted, I (13, 17, 20).

tsākāwī, sourness, acidity, 156.

tsakaw^{*}ēk or tsakayēk (p.p. f. tsakawak or tsakayak; aor. sg. 2, tsakēwī; 3, tsakawī), to pluck or cut (flowers, grass, hair by the roots, etc.), Gl. 194 (9). P. shūkawul.

 $ts\bar{e}l^*$, in i- $ts\bar{e}l^*$, on the left; pa- $ts\bar{e}l^*$, towards the left, 74. $ts\bar{e}l\bar{i}$, see $tsal^3\bar{e}k$.

tsalak, f. married (No. 225), see tsal*ēk.

tsālāk, adj. clever, 129, 143; sharp, quick, alert, 169 (190). P. chālāk.

tasallā, consolation, comfort, solace, I (18). P.

tsalawiek or tsalayek (p.p. f. tsalawak or tsalayak), to cause to take away; to cause a woman to be taken in marriage, 30B.

tsal⁵ēk (p.p. f. tsalak, No. 225; aor. sg. 2, tsēlī, 61A1; 3, tsalī, 30B, 61A1), to bring or take away (something animate), 30B, 61A1; to take a woman in marriage, Gh. 194 (4). In the sense of 'taking away,' this verb generally takes one of the contracted pronouns hir (or rī), dal, or hal, 122, 139 (3).

tsalyēr (pl. tsalyaraī), m. a place where water is allowed to collect for irrigation purposes, 9 (10), Gh. 219 (9).

tsam, adj. flat, level, even. P.

tsamī, see tsom.

tsom (pl. tsami, 9 (7), 133, 168 (2, 30), II), an eye, 133, 168 (3), No. 25.

ts^an, adv. today, 4, 19, 75, 90, 94, 120, 122, 134, 146, 169 (94); ts^an shiw, tonight, 75.

tsān (pl. tsēnī, 9 (10)), I (19), a year; ōn tsēnī, for so many years, I (19); ta-ṣḥ-h tsān (not tsēnī), of six years old, 148, 169 (27); ta-tsōn tsān (not tsēnī), of how many years? how old?, 107, 148, 169 (26).

tsēn, pron. interrog. what?, 25. This is the form usually taken by ts², 1, when employed as an adjective. ta-tsēn k²lai, of what village?, 25, 148, 169 (157); tsēn palau, in what direction, whither?, 25, 27, 74. Used substantively, we have i-tsēn lāst² (for i-tsēn waqt lāst²), since, II. With ka, it has the force of a relative, as in tsēn waqt ka rī dzōk, at the time at which he came, lit. at what time that he came, 24, 92.

tsēnī, see tsān.

tsōn, 1, pron. adj. interrog. how much?, 25, 27, 107, 125, 169 (115); how many?, 25, 27, 144, 169 (187) (in this sense it is usually in agreement with a plural noun, as in 78-9, 112, 120 (3 times), 150, 168 (26), I (7); but with the words tsān, a year, man, a maund, and sēr, a seer, they are in the singular, 122, 148, 169 (26, 39, 64); ta-tsōn tsān, of how many years?, i.e. how old?, 107, 148, 169 (26); but tar-tsōn 'umr, of how much age?, i.e. how old?, No. 221 cf. 27, 107); tsōn pēts, how far?, No. 222. P. tsōnē.

tsōn, 2, pron. adj. indefinite, some (sg. or pl.), some indefinite quantity or number, 26; several, more than one, 151; tsōn ryūz, some days (noun in singular), 26, I (3); syī tsōn, several, 16, 26, 125, 151; tsōn māl^a, several persons, 26, 152, 169 (11); syī tsōn māl^a, id. 26.

As adv. tson ka, as long as, 75.

tsindzarai (pl. tsindzarai), m. a grey partridge, Gh. 233 (8). P. tanzarai.

tsang^a, in i-tsang^a, adv. and postpos. governing gen., near, 6, 74, 81, 94. Cf. P. tang, tight.

tsangil, the arm, from the elbow to the wrist, the forearm. a-tsangil-a, his forearm, 169 (100). P. tsangal.

tsuņawēk or tsuņayēk (p.p. f. tsuņawak or tsuņayak; aor. sg. 2, tsuņēwī; 3, tsuņawī), to strain, sift, Gh. 194 (8).

tsaplai (pl. the same), a sandal, a shoe, 1 (12). P.

tsār, card. four, 16; tsār nim, four and a half, 16; tsār sōh, four hundred, 16; tsār samba, Wednesday, 166.

tsarāō, the act of grazing, or feeding, I (5). P. tsarawul, to graze.

tsarī-jīstū, card. twenty-four, 16.

tear m, ord. fourth, 16, 165.

tsarés, card. fourteen, 16.

tsarwök (pl. tsarwēchī, 9 (9)), m. a general term for goats or sheep. Gh. 228 (8).

tsirawek or tsirayek (p.p. f. tsirawak or tsirayak), to cause to sputter, etc., Gh. 194 (7).

tsir*ēk (p.p. f. tsirak; aor. sg. 2, tsir; 3, tsirī), to sputter, squirt, eject, emit with a sharp sound, Gh. 194 (7). P. tsirēd*l.

tsirayēk, see tsirawek.

tsāṣḥtū, card. forty, 16.

tsat, the nape of the neck. pa-tsat, close up behind, behind, behind one's back, 74, 148, 169 (92); afterwards, 74; pa-tsatt-al ghwashtak, he fell flat on his back, 104; pa-pēts pa-tsat, far and close behind, backwards and forwards, 104. P.

tsāts (pl. tsachī, 9 (9)), m. a kind of partridge, Gh. 233 (11).

tsajawek or tsajayek (p.p. f. tsajawak or tsajayak), to cause to lick. P. tsajawal.

tsaț^eēk (p.p. f. tsațak; aor. sg. 2, tsēțī; 3, tsațī), Gh. 194 (5), to lick, to lap. P. tsaț^el.

tsatayēk, see tsatawiek.

tsawa, tsīw, tsawak, see ts'ēk.

tsawine, tsawunkai, see shī-tsawine, shī-tsawunkai.

tswan^zēk (p.p. f. tswanak; aor. sg. 2, tswēnī; 3, tswanī), to shake out dust from clothes, Gh. 194 (6). P. tsand^al.

tswartsī, adj. torn, tattered. tswartsī syōk, to become torn, Gh. 194 (11, 13). Cf. P. tswal.

tsawek, causal of tsek, cf. kī-tsawek, sha-tsawek, and shī-tsawek. Also cf. dzawek.

ts^{*}ēk (gerund, i-ts^{*}ēk inar, in going, 34; past m. sg. 3, ts^{*}ēk, 21, 35, 81-3, 89, 117, 120, 122, 126, 139 (3), 154, 169 (57), I (5), III; fem. sg. 3, tsawak, 37, 58, 122; pl. 3, tsawak-in, 104, 122; imperf. m. sg. 3, bū ts^{*}ēk, 34; perf. m. sg. 3, ts^{*}ēk hā, 142a, 169 (180); f. sg. 3, tsawak hā, 147, 169 (98); plup. m. sg. 1, ts^{*}ēk byōk-am, 134; 3, ts^{*}ēk byōk, 90; past conditional, ts^{*}ēk byōkan^{*}, 54, 95; cf. ts^{*}ēkk-al sū byōk), he would have gone, 136F.

Aor. sg. 2, $t\bar{s}iw$, 61B2; 3, $t\bar{s}awa$ or $t\bar{s}a$, 58, 61B2; pres. sg. 1, $b\bar{u}$ $t\bar{s}aw^am$, 122, 169 (5, 23); 2, $b\bar{u}$ $t\bar{s}iw$, 169 (22, 24); 3, $b\bar{u}$ $t\bar{s}awa$, 25, 107, No. 239; pl. 2, $b\bar{u}$ $t\bar{s}awa\bar{i}$, 132; fut. sg. 1, $s\bar{u}$ $t\bar{s}aw^am$, 169 (25), I (8); 3, $s\bar{u}$ $t\bar{s}a$, III.

Impve. sg. 2, tsīw, 94, 122, 142c, 146, 169 (110, 138, 152).

This verb is conjugated throughout the present and past tenses in Nos. 205ff.

VOL. X.

In the compound sha-siek, to swell, the initial is of this verb has become s, but in shi-tsiek, to send, it is not changed.

The causal of this verb is tsawek, cf. ki-tsawek, ska-tsawek, and ski-tsawek.

To move, go, proceed, walk, travel, 25, 34, 107, 122, 132, 134, 142c, 169 (5, 22-5, 110, 152), I (8), No. 239. This root idea of this verb is simple motion, as in the Hindī chalnā, as contrasted with $dz\bar{o}k$, 1, q.v., the root meaning of which is arrival, Hindī pahūchnā.

This verb is commonly used with the contracted pronouns hir (or ri), dal, or hal, 122. Thus, hir ts'ēk, to come, to come here, 94, 122, 146, 169 (138), III; dal ts'ēk, to come, or gc, to thee or to you, 122; hal ts'ēk, to go to him, to go away, depart, 21, 35, 54, 81-3, 89, 90, 95, 104, 117, 120, 122, 126, 136F, 139 (3), 142a, 147, 154, 169 (57, 98, 180), I (5), III.

Cf. $k\bar{\imath}$ - $ts^{\imath}\bar{e}k$, $s\dot{r}\bar{\imath}$ - $ts^{\imath}\bar{e}k$, and $s\dot{r}a$ - $s^{\imath}\bar{e}k$.

 $t\bar{u}t$ (pl. $t\bar{u}t\bar{i}$), m. a mulberry, 162, Gh. 224 (9). P.

tūt, in tūt nim-ryūz, N. of a certain time of the day, about 3.30 P.M., 167.

 $t\bar{u}t\bar{i}$ (pl. $t\bar{u}tyann\bar{i}$, 9 (8)), m. 8 (5), a parrot, Gh. 233 (13). P.

tatak (p.p. f. tōtk, 38, 61A4; aor. sg. 1, trom, 62A; 2 and 3, trī, 38, 61A4, 62A, 68 (2); impve. sg. 1, trom, 71; 2 and 3, trōn, 38, 68 (2), 71), to drink. tōtk, see tatak.

tūtkai or tūtkirai, m. a small mulberry, 162. Dim. of tūt, q.v.

tītar (pl. tītrī, cf. 9 (1)), m. a partridge, Gh. 233 (9). Borrowed from Hindī.

tētsan, heat, warmth, 152, 169 (168).

tutyannī, see tūtī.

tūwā, sunshine, Gh. 24 (11).

tawunkai or tawunkai, m. one who stands still, 33C. See tek.

 $taw^{j}\bar{e}k$ or $tay\bar{e}k$ (p.p. f. tawak or tayak), to cause to stand, to set up, Gh. 191 (3). Causal of $t^{j}\bar{e}k$, q.v.

t'ēk (p.p. f. tak, 37; aor. sg. 2 and 3, tī, 33C, 61A4), to be standing up, to stand still.

tyus, tyūz, see tū.

tiz, a fart. — na- $gh\bar{o}k$, to break wind, Gh. 192.(5, 10). P.

 $t\bar{o}z\dot{h}^{i}\bar{e}k$ (p.p. f. $t\bar{o}z\dot{h}ak$; aor. sg. 2 and 3, $t\bar{o}z\dot{h}\bar{i}$), to plane, shave, Gh. 191 (9). P. $t\bar{o}z\dot{h}^{a}l$.

tēz^yēk (p.p. f. tēzak; aor. sg. 2 and 3, tēzī), to run or gallop a horse, to ride, Gh. 191(8). P. tēz²l.

W

 w^a , see i- w^a .

wa, 1, see wi.

wa, 2, pronominal suffix of the third person singular, 20. It may indicate, (1) the object of a transitive verb, when in a tense not formed from the past participle; (2) the subject of a transitive in a tense formed from the past participle; or (3), when attached to a noun, any oblique case, usually the genitive. After a consonant, the w is generally dropped, as in khwalak-a, he

ate. Sometimes the w in such a case is retained, with or without a inserted before it, as in $b\bar{u}$ khur^am-a, $b\bar{u}$ -khur^am-wa or $b\bar{u}$ khur^am-awa, I eat him, 20b.

Examples of this suffix will be found passim. See especially 20, 98 (2, 3), and (for the genitive) 120.

va, 3, see wadzōk, waghyōk, and wazyōk.

wa, 4, conj. and. Use explained, with examples, 89; cf. 16, 35, 78, 152, 159, 169 (11), I (2-4, etc.), II, III, IV. P.

It is employed idiomatically to indicate remoteness, 89.

For its use in fractional numbers, see 16.

 $w\bar{a}$, in $w\bar{a}$, $w\bar{a}$, interj. Ah! indicating joy or surprise, 95.

 $w^a\bar{e}$, $w\bar{a}\bar{e}$, or $w^a\bar{e}$ $w^a\bar{e}$, interj. Alas! used in time of trouble, or by beggars, 95. P. $w\bar{a}\bar{e}$.

wi or wa, contracted pronoun of the third person, indicating the locative singular or plural, in him, in her, in it, or in them, 19. After a consonant the w of wa is dropped, and it becomes a, 19. It is used after a regular locative to emphasize the subject of a following verb, and, very frequently, to indicate existence, or presence, in a certain place. Regarding the use of this word, see 123-5 for explanation with full examples. Cf. also 26, 150-2, 142d, 169 (11, 68, 137). For winar-wa (-wi) and wizar-wa (-wi), see 85, 86; inar-wi, on it, 85, 147.

wī, in wī māi chār shamba, N. of the last Wednesday of each month, 165.

 $v\bar{o}$, interj. O!, sign of the vocative, 10, 11. P. \bar{o} .

wadānī, cultivation, crops, harvest. P.

 $wadz\bar{o}k$, an alternative, and less usual, spelling of $wazy\bar{o}k$, q.v.

 $w\bar{e}g\bar{a}$, the evening, night; as adv. tonight, 75; i- $w\bar{e}g\bar{a}$ $lik\bar{\imath}$, at night, 82. P. $b\bar{e}g\bar{a}h$.

waghyōk (p.p. f. waghuk, 38; aor. sg. 1, wēs'm, 62B; 2, wēs, 38, 62B; 3, wēsa, 38, 62B; impve. sg. 1, wēs'm, 71; 2, wēs, 38, 71; 3, wēsōn, 71), to enter. This verb is usually employed with the contracted pronouns hir (or rī), dol, and hal, 122. Its causal is wēsaw'ēk. Cf. aghōk and na-ghōk.

wh, interj. of warning or reproof, 95.

 $w^a k$ (No. 66) or wak, f. (8), water, 107, 109, 150, 169 (153), Nos. 66, 237. This word takes the emphatic particle di, not ai, even when used in the singular, 90, 99, 144. $b\bar{e}$ -waki, waterless, see $b\bar{e}$, 2.

wōk (past m. sg. wōk, 1 (14, 21); f. wāk, 38, IV; perf. m. sg. wōk ā, I (17); aor. sg. 1, waw^am, 62A; 2, wāw, 38, 61A3, 62A; 3, wawī, 38, 61A3, 62A; impve. sg. 1, waw^am, 71; 2, wāw, 38, 71; 3, wawōn, 71), to get, obtain, find.

wakhaw^{*} $\bar{e}k$ (p.p. f. wakhawak), to cause to dig, Gh. 213 (11). Causal of wakh-ay $\bar{e}k$, q.v.

wakhayēk (p.p. f. wakhayak; aor. sg. 2, wakhaī, 61A5; 3, wakhayī), to dig. Gh. 213 (11).

 $w\bar{a}l$ (157), see bagar- $w\bar{a}l$, $b\bar{e}g\bar{a}r$ - $w\bar{a}l$.

wālai (156), see ghrās-wālai, spīw-wālai, ziyaṛ-wālai.

wālī (156), see dāī-wālī, mrīk-wālī, wīnz-wālī.

 $w^a lak$ (p.p. f. $w^a lk$, 38, II; aor. sg. 1, $w^a r^a m$, 62B; 2, $w^a r$, 38, 62B, 68 (3); 3, $w^a ra$, 38, 62B, 69; $w^a rra$, 24, 38, 62B (regarding this spelling, see Gh. 24 (6)),

impve. sg. 1, $w^a r^a m$, 71; 2, $w^a r$, 4, 38, 68 (3), 71, 90, 99, 142c, 144, 168 (29), 169 (130); 3, $w^a r u n$, 69; $w^a r \bar{o} n$, 69, 71; pl. 2, $w^a r a \bar{i}$, I (13)), to bring, fetch, carry (something inanimate), 24, 122, 142c, 168 (29); sar $w^a lak$, to rebel (against = $l\bar{a}st^a$), 169 (130). This verb is commonly used with the contracted pronouns hir (or $r\bar{i}$), dal, and hal, 122. Thus:— $hir\ w^a lak$, bring to me, bring here, 90, 99, 144, I (13); $dal\ w^a r$, bring to thyself, i.e. take, 90; $hal\ w^a lak$, to bring to him, II.

This verb borrows its agrist tenses from wriyok, and many of the above examples can also be referred to that verb.

 $w^a n^a$ (pl. $w^a n^a \bar{\imath}$ or $w^a n n^a \bar{\imath}$, 9 (2, 7), for the spelling $w^a n n^a \bar{\imath}$, see Gh. 217 (8)), f. (8 (3)), a tree, 107, 109, No. 230. P. wana.

wan, f. a co-wife, 118, 143. P. ban.

windzōk, m. the son of a co-wife, a woman's stepson, 120. P. $b^a nzai$. wangū (pl. wangūī), m. a certain poisonous insect, 8 (7), Gh. 234 (13). $w^a nn^a i$, see $w^a n^a$.

winar, adv. in him, in her, in it, or in them, 85, I (18), IV; inside, within, 74.

The use of this word is explained, with examples in 85, q.v.; winar-di or winar-da, in me, in us, in thee, or in you, 85, 123; winar-wi or winar-wa, in him, in her, in it, or in them, 85, 123.

winz", f. a slave-girl, 156. P. winza.

wīnz wālī, the condition of being a slave-girl, 156.

waqt, time, season, 148, 169 (189), I (4). P. hō waqt, now, 27, 75; haf a waqt, then, 27, 75; ts waqt, when?, 27, 75; har waqt, at all times, always, 92, 148, 169 (134); tsēn waqt ka, at the time that, 24, 92.

wrai (pl. wrai), m. a mountain ram, a male mountain sheep, a fat-tailed sheep, Π_r . Gh. 231 (5). P. a lamb. The fem. is $s\bar{u}sh^a$, q.v.

 $w^a r$, 1, $w^a r a$, see $w^a l a k$.

 $w^a r$, 2, $w^a r \bar{\imath}$, see $wriy \bar{\imath} k$.

wār, in wār-ka, adv. indicating doubt or ignorance, God knows, 73.

wir, adj. open, expanded, Gh. 214 (5, 14). Cf. wit. P.

warchi, see wark.

 $wr\bar{u}dz^a$ (pl. $wr\bar{u}dz\bar{\iota}$, 9 (2)), an eyebrow, 168 (31). P. $wr\bar{u}dza$.

wragha, see kana-wragha.

warghawai, the palm of the hand. P.

wark (pl. warchī, 9 (9)), f. (8 (1)), a worm, an insect.

workai, a child. P.

 $wr\bar{u}k$, see $wriy\tilde{o}k$.

warkh (pl. warkhī), the head of a small watercourse, where it leaves the main stream, Gh. 218 (16). P.

waram, waram, see walak and wriyok.

wīrān, adj. ruined, 152; sick, 75, 85, 103, 111, 138. P. wairān, desolated. Prs. wīrān.

wrander, f. a brother's wife, a sister-in-law, 120, 132. P. warandar.

warra, see walak.

warrī, see wriyāk.

wurarawiek or wurarayek (p.p. f. wurarawak or wurarayak; aor. sg. 2, wurarewi; 3, wurarawi), to drive away, turn out, Gh. 213 (10).

 $wr^a sht^a$, a beard, 169 (102).

w^araw⁵ēk or w^arayēk (p.p. f. w^arawak or w^arayak), to cause to bring, 30B. Causal of wriyōk, q.v.

 $wriy^a$ (pl. wriyi, 9 (2)), f. a ewe-lamb, Gh. 227 (15).

wṛīya (pl. wṛaī, 9 (2)), f. a kind of food, Gh. 122 (7). P. baṛaī, Hindī waṛī.

wriyōk (p.p. f. wrūk, 24, 38, 144; aor. sg. 1, waram, 62A; 2, war, 38, 62A, 68 (3); 3, warī, warī, warī, 30B, 38, 62A; impve. sg. 1, waram, 71; 2, war, 38, 68 (3), 71; 3, warōn, 71. For the spelling warī, see Gh. 24 (5), to take, 25; to fetch, carry. The aorist tenses of this verb are also used by walak, a verb with practically the same meaning, so that it is always impossible to state to which of the two any of the aorist forms should be referred. All the examples of the aorist tenses given under walak may therefore also be taken as examples of this verb. With dal, we have nak-a dal wrūk, thou didst not take her to thyself, 24, 144.

wriyōkāo, taking, the act of taking, 155.

warayēk, see warawek.

wēs, wēsa, see waghyōk.

w^aspalaw^yēk or w^aspalayēk (p.p. f. w^aspalawak or w^aspalayak), to cause to wring out, Gh. 214 (3).

w'spal'ēk (p.p. f. w'spalak; aor. sg. 2, w'spal; 3, w'spalī), to wring, squeeze out, press out, Gh. 214 (3).

wspalayēk, see wspalawsēk.

wustawiek or wustayek (p.p. f. wustawak or wustayak), to cause to rise, to set up, Gh. 213 (8); to cause to fly away, to waste, dissipate, I (3).

wust⁹ēk (p.p. f. wustak, 37; aor. sg. 2, wust, 61A3; 3, wustī, 61A3. This verb is conjugated throughout the past tenses in 44-5, 48-54), to rise, arise; (of a bird) to fly up, 34, 85, 147 (i-wust⁹ēk inar, on flying up). Cf. Gh. 213 (8). P. wurzēd^al.

waswās, doubt, 163. P.

waswāsī, doubtful, 163. P.

wēsaw⁵ēk or wēsayēk (p.p. f. wēsawak or wēsayak; aor. sg. 2, wēsēwī; 3, wēsawī), to cause to enter, to insert, causal of waghyōk, q.v., Gh. 213 (13, 14).

wit (f. wit^a , 169 (99)), adj. open, wide open. Cf. wir. P.

watk (pl. watchi, 9 (9)), f. 8 (1), a walnut, Gh. 224 (7).

wāw, wawī, wawon, see wok.

wīw, see hīshtak.

 $wy\bar{u}k$ (f. $wy\bar{u}k^a$), adj. dry (of a cow), 146, 169 (175).

wz^a (pl. wzī, 9 (2), No. 151), a she-goat, a nanny-goat, a she hill-goat, 148, 169 (120), Gh. 231 (4). P. wuza. The masculine of this word is buz, q.v.

24

BALOCHI.

The word 'Balochi' is an adjective meaning 'of or belonging to the Balochi nation,' and is hence employed to indicate that nation's The Baloches. language. The Baloches themselves say that they origin--ally came from Halab (Aleppo), that they fought on behalf of Husain, the son of 'Alī, at the battle of Karbala, and that after Husain's death they migrated to Sīstān. On the other hand, references to them in Persian literature? first show them as living in the neighbourhood of the Caspian Sea. Thence they migrated to Karman, and thence, under pressure of the Seljūq invasion in the 11th century, they moved to Sīstān and Makrān, some journeying south-west into what is now Persian Baluchistan and others south and south-east into Makran. In the days of Changez Khan (13th century A.D.) the latter gradually pushed eastwards into eastern Makran and the Sind frontier, and ultimately occupied the Sulaiman Range on the border of India proper. In the 13th century they already had connexions with Sind, and in the 15th and 16th centuries parties of them entered the southern Panjab and Sind and settled there. The last movement took place during the period of unrest and disruption of Governments that followed Taimur's conquest (end of 15th century), and synchronized with the invasions of India by Bābur (born 1483, died 1530) and the Arghūns.³

During their progress through Makran, the Baloches occupied the highlands of Kalāt, now held by the Brāhūis. They appear to have been expelled by the latter, and this fact seems to have had something to do with their descent into the plains of India.⁴ Since that time the Baloches have been divided into two bodies, separated by the Brahūi-speaking territory of Kalāt.

We have seen that the word 'Balōchī' means the language of the Balōches, and so far as it relates to the Balōches of Baluchistan, the name is accurate enough; but there are numerous Balōches in India, and probably also in Persia, who have abandoned their tribal speech, and have adopted that of the people among whom they have become settled.

The word 'Baluchistan,'—properly Balōchistān,—denotes territories under two distinct governments. There is British Baluchistan, and, to its west, there is Persian Baluchistan. With the exceptions to be presently noted, Balōchī is the language of the whole of Baluchistan. In Persian Baluchistan it goes as far west as Cape Jask, where the Persian coast first commences to trend northwards towards the Gulf.⁵ On the east, Balōchī has overstepped the south-eastern boundary of Baluchistan into Sind and Bahawalpur, and, further north, it occupies the Sulaimān Hills on the western

¹ The words are often spelt 'Balūchī,' 'Balūchī,' 'Bilūchī,' 'Bilūchī,' and so on, but the above spelling represents the true pronunciation. See Dames, *The Baloch Race*, pp. 1ff. The spelling 'Baluch' has survived in the official name of the Province of 'Baluchistan.' I take this opportunity of acknowledging my indebtedness to the valuable work of Mr. Dames above referred to. It will be seen that in the following pages I have freely utilized the information therein contained. But my indebtedness is much greater than can be measured by the scanty references in the footnotes.

328 BALÓCHÍ.

border of the Panjab District of Dera Ghazi Khan. In former times Balöches progressed much farther, across Dera Ghazi Khan into the southern Panjab, and here their descendants are still found; but these have abandoned their own tongue, and now speak the Lahndā of their neighbours. This change of language is progressing at the present day. Even in the few years that have elapsed since this Survey was begun, Balōchī has, as we shall see, altogether disappeared from the District of Dera Ismail Khan, immediately to the north of Dera Ghazi Khan. So far as the Balōchī language is concerned, in the Panjab, its eastern limit is approximately the Sulaimān Range. In Sind and the neighbouring State of Bahawalpur, Balōchī has been better preserved, and is still spoken, more or less corruptly, by some 200,000 Balōches scattered over the tract referred to.

The language of North-Eastern Baluchistan, i.e. of the District of Zhob, and of nearly the whole of the Districts of Quetta and Loralai, is Pashto; but further west. Balochi is the language of Northern Baluchistan and extends northwards beyond thefrontier nearly up to the River Helmand, where Pashto is finally established. Between the frontier and the Helmand the sparse population of the desert is mixed, some of the people speaking Pashto, and others Balochi. Further west, where the lower course of the Helmand runs south to north, we come to the Province of Sistan. Here Baloches are also found, mixed with Persians, and the language of the tract is partly Balochi and partly Persian. Further south, in Baluchistan itself, Balochi is supreme right up to the western frontier of British territory. How much farther westwards Balochi remains the chief language of Persian territory we do not know. It is certain. that it is the chief language of the country as far west as Bampur, and that it is spoken by at least a part of the population so far west as Jask. There are also speakers of Balochi further north in Sistan and Karman.2 It is reported that the population of the former is about 45,000, of whom some 10,000 are nomadic Baloches, and that that. of the latter is about 700,000, about a third of whom are nomads.² Indeed Baloches have been found so far north as Central Khurāsān,3 though whether these speak Balochi, or not I cannot say.

We thus see that Balochi is bounded on the north by Pashto, and on the north-west and west by Persian, in each case there being a debatable ground between the two, in which both languages of each pair are spoken.

The southern boundary of Balōchī, from Cape Jask to Karachi, is the Arabian Sea, and there is therefore no language boundary on this side. On the east, Balōchī is bounded, in Sind, by Sindhī, the state of affairs being much the same as that in Sīstān and Karmān, the whole of Sind being a kind of debatable ground in which both Sindhī and Balōchī are spoken. The speakers of Sindhī form the mass of the population, and those of Balōchī are in a small, scattered, minority. Still further to the east, beyond Sind, we find the Rājasthānī of Jaisalmer and Marwar. North-west of Sind lies the Panjab-State of Bahawalpur, of which the principal language is Lahndā, and here also are colonies of Balōchī speakers. Directly north of Sind, in the Panjab, Balōchī has Lahndā to its east.

¹ See Geiger, in Grundriss der Iranischen Philologie, Vol. iii, p. 384.

² Encyclopædia Britannica (11th Ed.), Vol. xxiv, p. 592, and Vol. xv, p. 756.

⁵ Lord Curzon, Persia, i, 228, Note 1; i, 203. Cf. Eastern Persia (edited by Sir F. J. Goldsmid), i, 46; all quoted by Geiger in the Grundriss der Iranischen Philologie, I, ii, 232.

In this way, while Balochi has closely related Eranian languages on its north and west, on its east it has the distantly related Indo-Aryan languages, Lahnda and Sindhi.

Moreover, Balochī has in its bosom another neighbour, the Dravidian Brāhūī of the Sarāwān and Jahlawān divisions of Kalāt. In these divisions, it is true, there are, as we shall see, a certain number of Baloches, but the bulk of the population is Brāhūī. Brāhūī has not influenced Balochī, but on the other hand (see Vol. iv, p. 627 of this Survey) Brāhūī has been to a certain extent affected by the surrounding Balochī.

A glance at the map facing p. 327 will show that the intrusive Brāhūī divides the Balōchī area into two distinct blocks,—a western and an eastern. Corresponding to this division, there are two main Balōchī dialects. These are Western Balōchī,—often called 'Makrānī,' from Makrān, the coast country along the Arabian Sea,—and Eastern Balōchī. The two differ considerably, but are not mutually unint ligible.¹ They are compared on every page of the grammar that follows, so that it is unnecessary to deal here with the points of difference, beyond pointing out that, on the whole, the western dialect has better preserved the earlier forms of the language. The eastern has developed, or decayed, into a stage of which we see only sporadic beginnings in the west. The eastern dialect, too, has borrowed words very freely from the neighbouring Sindhī and Lahndā. The western dialect is naturally free from this temptation. When it borrows, it mostly borrows from Persian.

In a wild mountainous country such as Baluchistan there are numerous subdialects. The various forms assumed by the western dialect are well described by Mr. Denys Bray, whose account is given on p. 385, below. In the east, the variations consist partly in the clipping of final syllables, and partly in the amount of borrowing of words from Sindhī or Lahndā. This borrowing is carried to an extreme in the Kasrānī Balōchī of Dera Ghazi Khan and Dera Ismail Khan, described below on pp. 405ff.

As regards the Western Balochi spoken in Persian Baluchistan, we have no census figures of the population, nor have we any detailed information as to the exact nature of the language. We may estimate the number of speakers of Balochi in Persian Baluchistan at something like 200,000.2

In British Baluchistan the western dialect prevails in Makrān, Khārān, and Chagai. These three lie on the west side of the Sarāwān and Jahlawān divisions of Kalāt, of which the main language is the Dravidian Brāhūī, but colonies of speakers of the western dialect are also found intruding into these divisions on their western side. North of Kalāt lies the British District of Quetta, the main language of which is Paṣḥtō, and here also, in its south-western corner, are found some speakers of Western Balōchī. The total number of speakers of the western dialect in British Baluchistan is 114,899, and to these, and the 200,000 of Persian Baluchistan, we have to add a further number of 10,000 speakers who have settled in Karachi of Sind. The total

¹ Dames, op. cit., p. 3, Note 1.

² Encyclopædia Britannica (11th Ed.), Vol. iii, p. 297.

330 BALÖUMÉ.

number of speakers of the western dialect may therefore be put approximately as 324,899, or, roughly, 325,000.

As explained above, the eastern dialect is separated from the western by the Brāhūī of Sarāwān and Jahlawān of Kalāt. In Baluchistan, its speakers are most numerous in the Bolan and Sibi Districts. These lie to the north-east of Kalāt, and, as in the case of the western dialect, the eastern dialect also intrudes across the border, and speakers of it are found in the Pōmbkī and Kachhī divisions of Kalāt, and even in the eastern parts of Sarāwān and Jahlawān. We thus see that in Sarāwān and Jahlawān there are found speakers of both dialects, between which no distinction has been made in the census figures. The total number of speakers of Balōchī in these districts is:—

Sarāwān	•	•	•	•	•	•	•		•	13,786
Jahlawān	•	•	•	•	•	•	•	• •	•	14,760
								TOTAL		28,546

As a rough approximation, I put two-thirds of these as speaking the western, and one-third as speaking the eastern dialect, so that, for these two dialects, we get as estimates:—

Western Dialect	•	•	•	•	•	•	•	•	•	19,031
Eastern Dialect	•	•	•	•	•	•	•	• '	•	9,515
,							То	TAL		28,546

The eastern dialect is also heard in the extreme south-east of Baluchistan, in the eastern half of the State of Las Bela. Here, it really forms a part of the Balochi of Sind, which adjoins Las Bela on the immediate east.

North-Eastern Baluchistan consists of the British Districts of Quetta, Loralai, and Zhob. The main language of all these three is Pashtō, not Balōchī. Quetta has been already referred to as containing a few speakers of Western Balōchī. In the Loralai District, along the eastern border, there is a small colony of speakers of Eastern Balōchī, joining on to, and forming a unit with, those of the neighbouring Panjab District of Dera Ghazi Khan. The total number of speakers here is only 3,413. The remaining District of these three is Zhob. Here Balōchī is practically non-existent, only 22 speakers in a population of over 70,000 having been recorded. These must all have been exiles, temporary or otherwise, from their proper abodes, and in the table given below they are not included in the number of speakers of Balōchī in its own home, but are shown separately in the list of those who speak Balōchī in countries of which it is not the vernacular.

Leaving Baluchistan, we come to the Province of Sind. As stated above, numerous colonies of Baloches have, at various times, entered, and settled in that Province. Besides these, there is in the neighbourhood of the city of Karachi a colony of about 10,000 Makrānī Baloches who speak the western dialect. All other Baloches in Sind speak the eastern dialect. The Upper Sind Frontier District borders on the Baluchistan District of Sibi, and the Baloches on each side of the frontier speak the same dialect in very fair purity. On the other hand, in the hill country between the District of

Karachi and the Baluchistan State of Las Belā, there is a colony of Baloches which, as we have seen, is continued into the latter State. But this Balochī is far from pure. It is locally known as the 'Kāchhē-jī Bolī,' and is much mixed with Sindhī. Over the rest of the province, it cannot be said that any particular tract is in possession of Baloches. They are scattered all over the country. Many of them have abandoned their own language, and speak the Sindhī of the people among whom they have settled. But others have retained Balochī in a corrupt form, much mixed, as in the case of Kāchhē-jī Bolī, with Sindhī. In fact, the only pure Eastern Balochī spoken in the Province is that of the Upper Sind Frontier. We may accordingly class the Balochī of Sind as follows:—

·				Number of Speakers.
Western Dialect	•			10,000
Pure Eastern Dialect of the Upper Sind	Frontie	\mathbf{r}		56,589
Mixed Eastern Dialect	•	•		131,802
	198,391			

In the Panjab, there are, in the first place, 1,444 speakers of Eastern Balōchī in the State of Bahawalpur, lying immediately to the north-east of Sind. For the purposes of linguistic classification, these may be considered as forming one body with the Balōches of Sind, and as speaking the same kind of corrupt mixed dialect. Balōchī is also a home language in the Dera Ghazi Khan District. Here the greater part of the population is Balōch, but most of these people have abandoned their tribal language, and now employ the ordinary Lahndā of the Western Panjab, described in Vol. VIII, Part i, pp. 233ff. of this Survey. Only in the Sulaimān Hills bordering on Baluchistan, and in the Mazārī tribe and part of the Gurchānī tribe on the plains, do the Balōches of this District retain their own language. The parts of Baluchistan that lie immediately to the west of this part of the Sulaimān Range are the Mūsa Khēl and Bārkhān tracts of the Loralai District, and, as already stated, the Balōchī of Dera Ghazi Khan is also found here. The Balōchī of these two tracts and of Dera Ghazi Khan is a joint survival from the time that Balōches settled here during their various migrations into India.

From the North-West Frontier Province, a few speakers of Balöchī were returned from the District of Dera Ismail Khan in the Census of 1901. They were the inhabitants of some Kasrānī villages in the south of the Kulachi Taḥṣīl. Their language was a continuation of the Kasrānī Balōchī of Dera Ghazi Khan, and like it was much mixed with the local Lahndā. As had been the case in Dera Ghazi Khan, the other Balōches of Dera Ismail Khan had lost their tribal language and now spoke only Lahndā. A specimen of this Dera Ismail Khan Kasrānī Balōchī will be found on pp. 410ff. below. Since 1901, even these few speakers have abandoned their native tongue, and at the Census of 1911 not a single speaker of Balōchī was returned from Dera Ismail Khan, or, indeed, from any District of the North-West Frontier Province.

We thus get the following figures for the number of speakers of Balochi in countries in which it is the vernacular. The figures are necessarily those of the Census of 1911, yol. x.

BALOCHI.

as no complete returns were available in the Census of 1891, on which the estimates of this Survey were originally based:—

Other Provinces	•	•	•	•	•	•	•	•		•	•	721
,									To	TAL	•	2,865

Adding to this 701,721, the number of speakers of Balochi in their own country, we arrive at a total of 704,586 for the number of speakers of Balochi at home and abroad. The figures in the Census of 1911 are 504,586, and the difference of 200,000 is the estimated number of speakers in Persian Baluchistan, outside British territory.

Balochi resembles most other Eranian languages in showing a nearer relationship to the ancient language of the Avesta than to the Old Per-Relationship to other Eranian sian, the court language of the Achæmenides, from which Modern Persian is directly descended. In other words, it is a tribal form of speech which has developed on its own lines from the earliest times, and has been but slightly influenced by the Persian of literature. At the same time, it is more nearly related to Persian than are some of the other languages, and, on this account, has occasionally been spoken of as if it were merely a bastard Persian dialect. This is the popular opinion of many Baloches themselves, who disdain their own language, and carry on all their epistolary communications in Persian, more or less correct, elegant or the reverse, according to the knowledge of it possessed by the scribe."

But, though it is related to Persian, this is an incorrect way of looking at the facts. Balochi, as an Eranian language, occupies a distinctly independent position. The real state of the case is well put by Professor Geiger in the *Grundriss der Iranischen Philologie*.² He says:—

'Of all the dialects'—he is speaking of Eranian dialects in general—'Balöchī is raised to a preeminence of its own by virtue of the marked antiquity of its phonetics. It has preserved the old tenues in all positions, even after vowels and liquids. In this respect accordingly it stands on a level with the older Pahlavi. In Persian the transition of the tenues after vowels and liquids to voiced spirants took place between the third and sixth centuries after Christ. In a word, Balöchī represents in the all-important matter of consonantal system a stage of language left behind by Persian some fifteen hundred years ago.'

Mr. Bray's remarks on this are to the point, and I make no apology for quoting them:—

'So with equal justice we might almost invert the common verdict and speak of Persian as bastard Balochi. This at any rate would bring out the fact that Balochi preserves a much more archaic

¹ Mockler, Grammar, p. 1.

² Vol. I, ii, p. 417. I quote the translation of Mr. Denys Bray on p. 131 of the Baluchistan Census Report for 1911, from which also Mr. Bray's subsequent remarks are taken.

form of the parent language than Persian." But old heliefs die hard, and it will be many a long day before the idea that Balochi is a mongrel form of Persian is finally consigned to limbo, Balochi cannot be said to possess any written literature. Only of late years have the Baloches begun to write their language at all, as they Literature. considered it to be merely a colloquial form of Persian. was the latter that they employed as the ordinary medium of written communication. 1 Messrs. Lewis, Mayer, and, above all, Mr. Dames have, on the other hand, rescued a number of | folktales and ballads, historical and others, which, although hitherto never reduced to writing by the Baloches themselves, had in some instances been traditionally handed down for many generations. These are all in the eastern dialect. No doubt similar ballads also exist in the western dialect, but they have not yet had the good fortune of finding a collector. So far as I am aware, the only western hallad that has yet been printed will be found on pp. 370ff. of this volume. Geiger? mentions a manuscript collection of stories in the western dialect which is preserved in the British Museum. It contains, amongst other poems, the story of Laila and Majnun, a tale of Shēkh Sadi, and the story of Bahrām Shāh Jihān and Gulandām. They are all apparently imitations of Persian originals. Other poems also exist in Makran itself. On this subject Mr. Hughes Buller³ says :—

'A considerable body of literature exists in Western Balochi and many of the leading men keep books, known as doftar, in which their favourite ballads are recorded in the Persian character. Among the more famous of these poems may be mentioned that recounting the Rind migration; two poems giving details of the various rulers of Kech-Makran, the second of which is by Allo, son of Zarīn, Kosag; a ballad by Ghulām 'Alī describing Malik Dīnār Gichkī's fight with Takī Khān, Nādir Shāh's general; another by Hothman Kalmatī describing the fight between Hammal-ē-Jihand and the Portuguese; and lastly a poem describing a fight at Lashkaran Kaur in Panjgur between Mir Mohim Khan, Nausherwani, and Mir Gohram, Gichki, of Panjgur on one side and the brothers, Lal Khan and Zangi, Brahuis of Nushki, on the other.'

The various printed collections in the eastern dialect are all given in the list of Authorities.

The 'Tenth Memoir' (1832)4 of the Serampore Press records that in the 'Belochee. or the Beloutche of Balbi (Persian Character). Translations of the Bible. three of the Gospels were printed as early as 1815.' years earlier John Leyden, of the College of Fort William, had translated St. Mark's Gospel; and in 1810 he had presented the MS. to the Calcutta Corresponding Secretary of the British and Foreign Bible Society. After Leyden's death the Serampore Missionaries employed his native assistants to continue the translation, which advanced as far as Acts; but apparently they printed no more than these three Gospels (probably Matthew, Mark, Luke), and eventually abandoned the work. Nothing more was done till A. Lewis translated St. Matthew's Gospel in 1884. This was in the Roman character. The matter again rested till 1899, when a series of translations from the pen of T. J. Lee Mayer began to appear. The first of the series was St. Matthew's Gospel (Lahore, 1899). It was in the Roman character. Of the

SKETCH OF BALOCHI GRAMMAR.

The following account of Balōchī grammar is based on the works of Major Mockler and Mr. Longworth Dames. I must here express my obligations to Mr. Dames for the kindness with which he has assisted me in its preparation and in the editing of the specimens that come after it. Without his help I should have been unable to solve many difficulties that presented themselves, and if these pages possess any merit, it is due to the store of ripe knowledge which, in the midst of other and pressing duties, he has ungrudgingly placed at my disposal.

As previously stated, Balōchī can hardly be called a written language, in the sense that up to quite lately it was not used by Balōches for written communications. If, occasionally, a Balōch does happen to wish to put his own language into writing, he employs the Persian character for that purpose, and I have therefore in a few cases given specimens of the language so written. But for the bulk of the work, I have followed Dames and other recorders of Balōchī in employing the Roman character.

Alphabet and Pronunciation.—Taking Western Balöchī as the oldest and most original form of the language, we may say that its alphabet is the same as that of Urdū, but that many of the letters occur only in words borrowed from India or from Persia (including Arabic words).

The vowels are $a, \bar{a}, i, \bar{i}, e, \bar{e}, o, \bar{o}, ai, au$. A Persian \bar{u} often appears as \bar{i} in Balōchī, as in $d\bar{i}r$, for $d\bar{u}r$, far; $b\bar{i}ta$, for $b\bar{u}da$, become; $d\bar{i}t$, for $d\bar{u}d$, smoke.

The real Balochi consonants and semivowels are k, g, ch, j, t, d, p, b, m, n, r, l, y, v, s, sh, z, zh, and h. The letter sh corresponds to the Persian \hat{x} , and zh to the Persian \hat{y} . The usual ligatures under these letters, as in \underline{sh} , \underline{zh} , which have been employed in transliterating Indian languages, will be omitted in the case of Balochi, as there is no chance of the omission leading to any misunderstanding, or to confusion with the Indian sh (\overline{y}).

In Eastern Balöchi several other sounds, additional to those given above, have been noted. These will be described on a later page.

The letters t, d, and r occur in words borrowed from India. As will be subsequently explained, their aspirates will be transcribed as t, d, and r, respectively. Letters peculiar to Arabic or Persian are freely written in borrowed words in which they occur, but are not usually pronounced as in the original language, being given the force of the nearest Balōchī letter. Thus:—

- ي (ث) and s (س) are both pronounced as s, as in waris, for Arabic waris, an heir; sabr, for Ar. sabr, patience.
- h ($_{7}$) is pronounced as h, as in hukm, for Ar. hukm, an order.
- χ ($\dot{\tau}$)¹ is pronounced as k or as h, as in bakshish, for Persian baxshish, a gift; habar, for Prs. $\chi abar$, news; $t\bar{a}ht$, for Prs. $ta\chi t$, a bedstead.
- z (ف), z (ف), and z (ف) become z, as in mazkūr, for Ar. mazkūr, mentioned; zarūr, for Ar. zarūr, necessary; and zohr, for Ar. zohr, midday.
- \underline{t} (\underline{b}) becomes t, as in $t\bar{u}fan$, for Ar. $t\bar{u}f\bar{a}n$, a storm.

¹ Regarding the transliteration of this letter, see the next page.

- ' (2) is simply dropped, as in sāat, for Ar. sā'at, an hour.
- γ (\dot{z}) becomes g, as in $gar\bar{\imath}b$, for Ar. $\gamma ar\bar{\imath}b$, poor.
- f (i) becomes p, as in napas, for Ar. nafs, breath.
- q (3) becomes k, as in $taks\bar{i}r$ or $task\bar{i}r$, for Ar. $taqs\bar{i}r$, a fault.

When borrowed words are written in the Persian character, the original letters are often retained, but the pronunciation is as above.

It must be repeated that the above remarks apply chiefly to the western dialect. In the east, the consonantal system, as will now be explained, presents numerous points of difference, although the treatment of borrowed letters is much the same as in the west.

As regards Eastern Balochi, attention must in the first place be directed to the pronunciation of the surd consonants ch, k, p, t, and t. When these are initial, or when they follow another consonant in the middle or at the end of a word, they are pronounced with a forcible explosive utterance, not unlike, but different from, the aspiration of the Indian letters chh, kh, ph, th, and th, respectively. In most works dealing with the dialect advantage is taken of the fact of the resemblance to the Indian sounds to class these letters also as aspirates, and to write them, more or less consistently, as chh, kh, ph, th, and th. There is a danger, however, that this method of writing the letters may give rise to the assumption that the Balochi and Indian sounds are identical; and, in order to avoid this, in the following pages, I follow Professor Geiger in adding an inverted comma to the original letters, in order to indicate their explosive force. Thus, I write ch'am, the eye, where Mr. Dames writes chham; k'apt'a, fallen (Dames, khaptha); $p'anj\bar{a}h$, fifty (Dames, $phanj\bar{a}h$); $t'\bar{i}$, other (Dames, $th\bar{i}$); t'ular, coarse (Dames, thular), and so on. This explosive utterance is very distinct as an initial, and after most consonants, but is not so easily heard after spirants, such as sh or χ (i.e. \underline{kh} , see below). For this reason Mr. Dames, in his grammar, often omits the h in words such as k'asht'a, pulled, or $b\bar{o}\chi t'a$, opened, writing them khashta and $bo\underline{kh}ta$, respectively. I have thought it best to indicate the explosive utterance throughout, even when it is feeble, as in the case of the two words just quoted.

There remains the question of these surd consonants when between vowels in the middle of a word, or following a vowel at the end of a word. Here they come under another rule which applies to all mutes except t and d. When any mute consonant follows a vowel it is, in the eastern dialect, changed to the corresponding spirant. The mute consonants (omitting t and d) are the above surds, ch, k, p, and t, and their corresponding sonants, j, g, b, and d. Whenever any of these letters follows a vowel it becomes a spirant. Thus:—

- ch is sounded like the sh in 'shin.' This sound is indicated by the letters sh.
 j is sounded like the s in 'pleasure,' or like the j in the French word 'jour.' I indicate this sound by zh.
- k is sounded like the ch in 'loch,' or the Arabic \dot{c} . I indicate this sound by the Greek letter χ .
- g is sounded like the Arabic $\dot{\xi}$. I indicate this sound by the Greek letter γ . p is sounded like the f in 'fire.' I indicate this sound by the letter f.

¹ The statements of fact in this and the following paragraphs are based upon information kindly supplied by Mr. M. Longworth Dames.

b is sounded something between the v in 'visible' and the w in 'wisp.' I indicate this sound by the letter v or w.

t is sounded like the th in 'thin.' I indicate this sound by the Greek letter θ .

. d is sounded like the th in 'this.' I indicate this sound by the Greek letter δ .

As there are no spirants corresponding to the letters t and d, this change does not occur in regard to them. In the case of the other letters, the change is practically universal, except in the case of words borrowed from other languages.

The use of Greek letters to represent some of the above-mentioned sounds is, so far as this Survey is concerned, a novelty, but is a commonplace in works devoted to Eranian languages. They are employed because the only alternative would be to use ligatured combinations, such as <u>th</u> for the <u>th</u> in 'thin,' and <u>dh</u> for the <u>th</u> in 'this.' The practical objection to the use of ligatured groups in the following pages is that they would occur very frequently, and are a fruitful source of misprints. To avoid this danger, I therefore, for Balochi only, employ these Greek letters.

These explosive sounds, and the changes of mutes to spirants, do not regularly occur in the western dialect, and the following examples illustrate the use of spirants in the east, by comparing the same words as used in the west and in the east:—

Eastern Dialect.
ash, from.
wāzhā, a master.
k'ushay, to kill.
$\bar{a}f$, water.
shafank', a shepherd.
barāwar, equal.
$d\tilde{a}\theta a$, given.
$p'\bar{a}\delta$, a foot.

Natives of India proper are unable to pronounce the sounds of θ and δ , and substitute for them s and z, just as many foreigners say 'sing' for 'thing' and 'zis' for 'this.' We see this in specimens of Balochī received from the Dera Ghazi Khan District, where the Indian influence is strong. Here the scribe has written such words as $p'i\theta$, a father, as phis, and $p'a\theta$, a foot, as is phaz. The sounds of θ and δ do not ordinarily occur in Western Balochī, but, in special localities, some speakers occasionally substitute them for t and d, respectively, as in the east, and sometimes, even, substitute s for t.

Finally, for the eastern dialect, there remains the case of the surd consonants ch, k, p, t, and t, when in the middle of a word, and immediately preceding another consonant. Under these circumstances, and under this circumstance only, they remain unchanged. Thus, we have k'apt'a, not k'ap't'a, fallen, because the p is immediately followed by the consonant t.

Isolated words occasionally suggest apparent exceptions to these rules for Eastern Balochi. Some of these are borrowed from other languages, and still retain their original pronunciation, as, for example, the Arabic word minnat, instead of minnat, entreaty. Other words are capable of a different explanation. Such, for instance, is

2 Y

sak', hard, which, according to the rule that a final k' preceded by a vowel becomes χ , we should expect to see spelt sa χ . The reason for the retention of the surd k' is that the word is originally sakt',—compare the Persian sa χt . In sakt' the k' has been preserved unchanged by the following t', and when, as often happens in Balōchī, the final t' has been dropped, the k' remains hard under the memory of its influence. Again, we have $p'ad\bar{e}a\gamma$, not $p'a\delta\bar{e}a\gamma$, to run, because the word is really a contraction of an older $p'a\delta$ $d\bar{e}a\gamma$, lit. to give a foot.

Another letter peculiar to East Balōchī must also be noted. It is an aspirate of w, and I represent it by w', corresponding to Mr. Dames's wh. Its pronunciation is peculiar. Mr. Dames informs me that the aspiration seems to accompany the w throughout, and not to precede it. In fact, w' seems to be a true surd, corresponding to the sonant w, as f does to v. This w' usually corresponds to a Persian χw or a Sanskrit sv, and to a West Balōchī w. Thus, corresponding to the Persian χw we have the West Balōchī wash, and the East Balōchī w'ash, sweet; to the Persian $\chi w ab$, we have W. Balōchī wab, and E. Balōchī w'av, sleep; and to the Sanskrit svada, taste, we have W. Balōchī wad, and E. Balōchī $w'a\delta$, salt.

Balōchī is fond of clipping its words. In commonly used vocables, such, for instance, as the preposition ach or ash, from, the initial vowel is often dropped. In the west, this word appears under many forms, such as ach or ash, chi or shi. Before a w it even becomes chu, as in chu watī nafarā, from (thine) own servants. Before a vowel or h it becomes simply ch, as in chamudā, for ach hamudā, from there.

Much more marked is the universal tendency to drop a final consonant. Thus, in the east, we have $r\bar{o}$, as well as $r\bar{o}sh$, a day; $gw\bar{a}n\ jana\gamma$, as well as $gwank'\ jana\gamma$, to call; and (West) sak, (East) sak', for sakt (Persian $sa\chi t$), hard. In both west and east a final t (or θ) is very frequently dropped. This is very prominent in the forms of the third person singular of verbs. Thus, in the west, we have $kush\bar{i}t$ or $kush\bar{i}$, and, in the east, $k'ush\bar{i}\theta$ or $k'ush\bar{i}$, he will slay, in which the form in t or θ is the original. Again, in the west, we have $kushag\bar{a}yint$, $kushag\bar{a}yin$, or $kushag\bar{a}yi$, and, in the east, $k'usha\gamma\tilde{e}$, he is slaying, in which the original form is that ending in nt. We shall also see that the past participle of a verb ends in g (East, γ), and that this g (γ) is quite commonly dropped.

This dropping of final consonants is of frequent occurrence, and is by no means confined to the letters above mentioned. The tendency must therefore be allowed for in reading Balochi.

When a word ends in a long nasalized vowel, if a suffix beginning with a vowel is appended, the nasalization becomes a full n. Thus, we have $gwash\tilde{a}$, I will say, but $gwash\tilde{a}n-\tilde{i}$, I will say to him.

The following is the full Balochi alphabet in the Persian character,—including the special letters used in the east,—with the system of transliteration that will be adopted for the language in these pages:—

```
4, f. (Only in borrowed words.)
                                     b , t.
                                             (Only in borrowed words.)
ث \theta.

```

ARTICLE.—There is no definite article. One of the demonstrative pronouns is employed in its place, if it is desired to emphasize the definiteness of a noun.

As in Persian, the force of the indefinite article is given by the addition of a suffixed $-\bar{e}$, the ' $y\bar{a}$ -e-waḥdat,' thus, mard, man, $mard\bar{e}$, a man.

GENDER.—There is no distinction of grammatical gender in Balochi. Male and female are distinguished either by the use of different words,—as in gurānd, a ram, gad, a ewe,—or by the addition of words such as nar, male, and mādag (Eastern, māδaγ), female.

DECLENSION OF NOUNS.—There is only one declension. Nouns are declined as follows:—

 $L\bar{o}g$ ($l\bar{o}\gamma$), a house.

	Western Dialect.	Eastern Dialect.
Sing.		
Nom.	$lar{o}g$	lōγ.
Gen.	lōga	lōγ, lōγē.
Dat.	lōgā, lōgā-rā	lōyār, lōyā-rā.
Obl.	lōgā .	lōγā.

Plur.	Western Dialect.	Eastern Dialect.
Nom.	$oldsymbol{lar{o}g},oldsymbol{lar{o}g}oldsymbol{\widetilde{a}}$	$lar{o}\gamma$, $lar{o}\gamma\widetilde{m{a}}$.
Gen.	lōgāna, lōgānī	$lar{o}\gammaar{a}nar{\imath}$.
Dat.	$lar{o}g\widetilde{a}$, $lar{o}g\widetilde{a}$ - $rar{a}$	$lar{o}\gammaar{ar{a}}r,lar{o}\gammaar{ar{a}}$ - $rar{a}$.
Obl.	$lar{o}g\widetilde{m{a}}$	$lar{o}\gamma\widetilde{\widetilde{a}}.$

The oblique case is used with prepositions, as in $ash \ l\bar{o}g\bar{a}$, from the house; $ash \ l\bar{o}g\tilde{a}$, from the houses. It will be observed that the plural is formed by nasalizing the oblique case singular. If this is followed by a vowel, the nasalization becomes a full n. Thus, when in the genitive it is followed by the termination $\bar{\imath}$, we get $l\bar{o}g\bar{a}n-\bar{\imath}$, not $l\bar{o}g\tilde{a}-\bar{\imath}$. So, when ash, from, follows, as it sometimes does, the noun, we get $l\bar{o}g\bar{a}n \ ash$, not $l\bar{o}g\tilde{a} \ ash$, from the houses. Similarly in the eastern dialect.

The accusative takes either the form of the nominative or that of the dative. The latter form is most used when definiteness is indicated, or when it is required to distinguish a nearer object from one more remote.

When a noun is the subject of a verb in one of the tenses derived from the past participle of a transitive verb, it is put into the agent case, exactly as in Hindī. The agent case is the same in form as the oblique case.

The other case relations are indicated by prepositions or postpositions. A preposition governs a noun in the oblique case, as in $ash\ l\bar{o}g\bar{a}\ (ash\ l\bar{o}\gamma\bar{a})$, from the house; but a postposition governs a noun in the genitive case, as in $l\bar{o}ga\ sar\bar{a}\ (l\bar{o}\gamma\ sar\bar{a})$, on the house; $l\bar{o}g\bar{a}n\bar{i}\ sar\bar{a}\ (l\bar{o}\gamma\bar{a}n\bar{i}\ sar\bar{a})$, on the houses. Prepositions precede, and postpositions follow, the nouns they govern. Occasionally, however, prepositions exceptionally follow, instead of preceding, as in $l\bar{o}g\bar{a}n\ ash$, from the houses, quoted above. When this happens, the preposition still governs the oblique case.

If a noun is made indefinite by the addition of the indefinite article $-\bar{e}$, a, the case terminations are added after the article. Thus, singular oblique $l\bar{o}g\bar{e}\bar{a}$ ($l\bar{o}\gamma\bar{e}\bar{a}$). Naturally, this form is used only in the singular.

If a noun ends in \bar{a} , a y is inserted before the terminations. Thus, $hay\bar{a}$, shame, sing. obl. $hay\bar{a}y\bar{a}$. But, in the eastern dialect, a few words of this class insert h, preceded by a short a, instead of y. Thus, $w\bar{a}zh\bar{a}$, a lord, plural $w\bar{a}zhah\bar{a}$; $b\bar{e}g\bar{a}$, evening, sing. obl. $b\bar{e}gah\bar{a}$, in the evening. On the other hand, in the western dialect, nouns like $hay\bar{a}$ form the genitive singular by adding $\bar{\imath}$, not a, as in $hay\bar{a}\bar{\imath}$, of shame. I have no information as to the treatment of such nouns in the other cases in the western dialect.

Most nouns ending in \bar{o} , change this \bar{o} to av before terminations, and before the indefinite article. Thus, $l\bar{e}r\bar{o}$, camel, $l\bar{e}rav\tilde{a}$, camels; $l\bar{e}rav\bar{e}$, a camel.

The genitive precedes the noun by which it is governed. Thus, $marda\ sar$ (Eastern, $mard\ sar$), the man's head; $marda\ sara\ m\bar{\imath}d$ (Eastern, $mard\ sar\ m\bar{\imath}\delta$), the hair of the head of the man. In the east it is, in the singular, usually the same as the nominative, but it sometimes takes the termination \bar{e} , as in $mulk\bar{e}\ sard\bar{a}r$, the chief man of the country; $ma\bar{\imath}\ p'i\theta\bar{e}\ naukar$, my father's servant. In the genitive singular of the western dialect, I have followed Mockler in writing it with a short a. Thus, $l\bar{o}ga$, not $l\bar{o}g\bar{a}$ as in the oblique case. So far, however, as I can ascertain, either $l\bar{o}ga$ or $l\bar{o}g\bar{a}$ may be used both in the genitive and in the oblique singular. Balōchī scribes, writing in the

Persian character, make no distinction between the two forms, and use either for either case indiscriminately. In fact we may assume that, in the western dialect, the genitive singular and the oblique singular both end in a or ā, and that the genitive is in form the same as the oblique.

BALÖCHĪ.

Sometimes an adjective of possession is used instead of the genitive. In such cases, the adjective follows the noun. These adjectives will be dealt with in the next section.

After numerals, and other adjectives signifying number, the noun is usually in the singular, as in do bach, two sons.

ADJECTIVES.—The principal adjectival suffixes are $-\bar{\imath}$, $-\bar{\imath}g$, and $-\bar{e}n$. The vowels of the two last vary according to the final letter of the noun to which one or other may be added. The termination $-\bar{\imath}$ occurs in both dialects, as in $b\bar{a}dsh\bar{a}h\bar{\imath}$, royal, from $b\bar{a}dsh\bar{a}h$, a king.

The termination $-\bar{\imath}g$ forms adjectives of possession and of relationship. It takes various forms. In the western dialect, it is most often -aig, as in mard, a man, mardaig, of or belonging to a man. Some pronounce it $-\bar{\imath}g$, as in $mard\bar{\imath}g$. In the eastern dialect, it generally takes the form $-\bar{e}\gamma$ or $-\bar{e}\gamma\bar{a}$, as in $d\bar{a}r\bar{e}\gamma$, wooden, from $d\bar{a}r$, wood; $mard\bar{e}\gamma$ or $mard\bar{e}\gamma\bar{a}$, of or belonging to the man, from mard, man. It is sometimes weakened to \bar{e} , as in $mard\bar{e}$, of or belonging to a man. These adjectives are often used with the force of the genitive, and in such cases follow the governing noun, instead of preceding it, as in the case of the regular genitive. Thus, in the western dialect, we have \bar{e} $l\bar{o}g$ $b\bar{a}dsh\bar{a}haig\text{-}int$, this house is the king's.

When an adjective is used attributively, it generally precedes its noun, and then takes the suffix $-\tilde{e}$, which, as usual in such cases, becomes -en before a vowel. Some forms of the western dialect have $-\tilde{i}$ instead of $-\tilde{e}$. Examples are \bar{a} (Eastern, \tilde{a}) sharr \tilde{e} mard, that good man, as compared with sharr, good; sharren $\bar{a}p$ (Eastern, sharren $\bar{a}f$), good water. When not used attributively, they do not take this termination. Thus, \bar{a} (Eastern, \tilde{a}) mard sharr-ant (Eastern, -ant'), those men are good. If an adjective ends in a nasalized vowel, the nasalized vowel becomes a full n before the $-\tilde{e}$. Thus, from (Eastern) k'isā \tilde{a} , small, we have k'isā \tilde{a} . This \tilde{e} is not a long vowel, but is pronounced quite shortly.

Adjectives do not otherwise change. They are immutable for gender, number, and case.

The comparative degree is formed by adding -tir, as in sharr, good, sharrtir, better. In the eastern dialect the corresponding suffix is -t'ar'or -t'ir, as in sak, strong, sakt'ar, stronger. The primary form of the adjective sometimes undergoes a change when these suffixes are added. Thus:—

Western Dialect.

mazan, great.

Comparative, mastir.

burz, high.

Comparative, bustir or burztar.

kasān, small.

Comparative, kastir.

Eastern Dialect.

mazaĩ, great.

mastir.

burz, high.

burzāt'ir.

k'isāī, small.

k'ast'ar or k'isant'ir.

8

The thing with which comparison is made is governed by the ablative preposition ash, ach, or chi, than, the corresponding eastern preposition being azh, ash, or shi. Thus:—

(West) ē mard chi ā mardā sharrtir-ĩ, this man is better than that man.

(East) $azh \ t'\bar{o} \ sakt'ar-\tilde{e}$, he is stronger than thee. In such cases, the comparative suffix is, in the east, sometimes omitted, as in $azh \ t'\bar{o} \ n\bar{e}\chi-\tilde{e}$, he is better than thee.

There is no proper superlative form. The comparative may be used as a superlative; or adverbs, such as $sak\tilde{e}$ (Eastern, $sak\bar{\imath}a$), very, may be used. The most common method is to use the comparative in some such phrase as (West) \tilde{e} chi drust \tilde{a} sharrtir- $\tilde{\imath}$, this is better than all, or (East) azh t' $\tilde{e}wa\gamma\tilde{e}$ mast'ir, greater than all. In the west, the Persian suffix $-tar\tilde{\imath}n$ is sometimes used, as in $kastar\tilde{\imath}n$, the youngest.

PRONOUNS.—Pronouns, especially the personal pronouns, have, as in the Ghalchah languages, two forms of the genitive. The first is the ordinary genitive, corresponding to our 'my,' 'thy,' 'his,' and so on. The other is a genitive absolute, corresponding to our 'mine,' 'thine,' 'ours,' 'yours,' and so on. It is formed by adding the possessive suffix -ig, described under the head of adjectives, to the simple genitive.

The pronoun of the first person is described as follows:—

	7	Western Dialect.	Eastern Dialect.
Sing.			
Nom.	I,	man.	$m\widetilde{a}, ma, m\widetilde{\widetilde{a}}.$
Gen.	my,	manī.	manī, maī.
Gen. Abs.	mine,	$man\bar{\imath}g.$	$mai\gamma$.
AccDat.	me, to me,	$manar{a}, manar{a}$ - $rar{a}$.	ma $n\widetilde{f a}$.
Obl.	me,	manā (Ag. man).	$mar{a}$.
Plur.			
Nom.	we,	amā, mā.	$mar{a}$.
$\mathbf{Gen.}$	our,	amaiī, maiī.	$ma\tilde{m{i}}$.
Gen. Abs.	ours,	amai $ar{\imath}g$, mai $ar{\imath}g$.	$mai\gamma$.
AccDat.	us, to us,	amā-rā, mā-rā.	mār, mā-rā.
Obl.	us,	amā, mā.	$m ilde{a}$.

The old form of the nominative plural is $m\bar{a}k'$, and, in the eastern dialect, this has survived when the verb substantive is suffixed to the pronoun. Thus, $m\bar{a}k' - \tilde{u}$ (not $m\bar{a} - \tilde{u}$), we are; $m\bar{a}k' - a\theta\tilde{u}$, we were.

The pronoun of the second person is declined as follows:-

	We	estern Dialect.	Eastern Dialect.
Sing.			
Nom.	thou,	tau.	t'au, t'a, t'ō.
Gen.	thy,	taiī, taī.	t ' $aar{\imath}$.
Gen. Abs.	thine,	taiīg.	t ' $aar{\imath}\gamma$.
AccDat.	thee, to thee,	tarā, tarā-rā.	t ' ar , t ' a - $rar{a}$.
Obl.	thee,	tau.	t' au , t ' a .

	•	Western Dialect.	Eastern Dislect.
Plur.			,
Nom.	ye,	shumā.	shawā, shā.
Gen.	your,	shumaiī.	shawāi, shāi.
Gen. Abs.	yours,	shumaiig.	shawāīy.
AccDat.	you, to you,	shumā-rā.	shawār, shār.
Obl.	you,	shumā.	shawā, shā.

As in the case of the first person, there is, in the east, an old form, $shaw\bar{a}k'$, of the nominative plural, which is used when the verb substantive is suffixed. Thus, $shaw\bar{a}k'-\bar{e}\theta$, you are; $shaw\bar{a}k'-a\theta\bar{e}$, you were.

There is no pronoun of the third person. The demonstrative pronouns are used! in its place.

PRONOMINAL SUFFIXES.—The personal pronouns are often represented by pronominal suffixes. These are:—

W	estern Dialect.	Eastern Dialect.
Sing. and Plur.		•
1st person	-ũ.	$-\widetilde{a},\ \widetilde{u}.$
2nd person	-it.	?
3rd person		
Sing.	$-ar{e}$ or $ar{\imath}_{f \cdot}$	-ī
Plur.	-ish.	−isħ, ã.

The forms for the first and second persons are very rarely used, but $-\bar{e}$ (-i) and -ish of the third person are quite common. The eastern $-\tilde{a}$, $-\tilde{u}$ (first person) and \tilde{a} (third person) appear to be used only with verbs. In the eastern dialect, the singular and plural of the third person are commonly confounded, and each is used indiscriminately for the other. In the western dialect, when $-\bar{e}$ or -ish is added to a word ending in \bar{a} , the two contiguous vowels coalesce into ai. Thus, $m\bar{a}l\bar{a}$ (acc. sing.) $+\bar{e}$ becomes $m\bar{a}lai$, his cattle, and $l\bar{o}g\bar{a}$ (acc. sing.) +ish becomes $l\bar{o}gaish$, their house.

These suffixes are added to nouns to indicate the genitive or the dative. The above two are examples of the use to signify the genitive in the western dialect. For the eastern, we may quote $gir\bar{o}\chi-\bar{i}$, a purchaser of it. For the dative, we may quote $ruskat-\bar{e}$, (give) leave to him.

Most frequently they are used with verbs. If the verb is transitive, and is in one of the tenses formed from the present base, they indicate the object, direct or remote, if that object is not mentioned elsewhere in the sentence. Thus:—

```
(West) man a-kushān-ē (for kushā-ē), I will kill him. man a-girān-ish (for girā-ish), I will seize them. (East) mā k'-ārān-ī (for k'-ārā-ī), I will bring it. bar-ish, take them away. manzūr ma k'anant'-ā, if they do not agree to them (-ā).
```

If the verb is transitive, and is in one of the tenses formed from the past participle, the suffix indicates the agent, i.e. the subject, if it is not expressed elsewhere in the sentence. Thus:—

(West) kutag-ē, he made, lit. made by him. burtagant-ish, they carried (it) off, lit. carried off by them.

(East) \tilde{a} $k'u\theta a$ or $k'u\theta a - \bar{\imath}$, he made, lit. made by him. $ja\theta a - ish$, they struck, lit. struck by them.

In the above examples, the suffixes are all attached to the verb, but this is not necessary. Such suffixes may be attached, exactly as occurs in the <u>Ghalchah languages</u>, to any other word, usually a noun, in the sentence. Mockler gives a good example:—

wati ushtira guțā lönjān kutag-ē, or

wati ushtira guțai (gutā+ē) lonjān kut, or

wati ushtira guță lōnjān-ē kut, he $(-\bar{e})$ made it pendent on the neck of his camel.

DEMONSTRATIVE PRONOUNS.—There are two demonstrative pronouns, a proximate and a remote. The proximate demonstrative is thus declined:—

•	'This,' 'he,' 'she,' 'it.'	
	Western Dialect.	Eastern Dialect.
Sing.	•	
Nom.	$ar{e}.$	$ar{e}sh$, $ar{e}$, $ar{\imath}$.
Gen.	ishī, ēshī.	ēshī, ēshiyā.
Dat.	ishiā-rā, ēshiā-rā.	$ar{e}shiyar{a}r$.
Obl.	ishiā, ēshiā.	$ar{\emph{e}}shiyar{a}.$
Plur.		
Nom.	$ar{e}$, $ar{e}sh\widetilde{ar{a}}$.	$ar{e}sh,ar{e}sh\widetilde{ar{a}}.$
Gen.	ishānī, ēshānī.	$ar{e}shar{a}nar{\imath}$.
Dat.	ishānā, ish ã-r ā.	$ar{e}sh\widetilde{ar{a}}$ - $rar{a}$.
	$ar{e}shar{a}nar{a},ar{e}shar{\widetilde{a}}$ - $rar{a}$.	

The oblique case may be used for practically any case, including the dative. The accusative may have the form of the dative, or of the oblique case.

ēshānī.

The remote demonstrative pronoun is thus declined:—

Obl.

ishã, éshã.

	'That,' 'he,' 'she,' 'it.'	
	Western Dialect.	Eastern Dialect.
Sing.		•
Nom.	$ ilde{a}.$	$\widetilde{\widetilde{a}}$, $\widetilde{\widetilde{a}}h$.
Gen.	$ar{a}ar{\imath},ar{a}yar{\imath},ar{a}har{\imath},ar{a}hiyaiar{\imath}.$	$\tilde{ar{a}}hi, ilde{ar{a}}hiyar{a}.$
Dat.	$ar{a}ar{\imath}$ - $rar{a}$, $ar{a}yar{a}$ - $rar{a}$.	ãhiyār. ⊤
Obl.	āyā, āhiyā, aiyā.	$\widetilde{m{a}}$ h i y $m{ar{a}}$.
Plur.	·	
Nom.	$ar{a}$, $ar{a}y\widetilde{ar{a}}$, $ar{a}h\widetilde{ar{a}}$.	$\widetilde{\widetilde{a}},\ \widetilde{\widetilde{a}}h,\ \widetilde{\widetilde{a}}h\widetilde{\widetilde{a}}.$
Gen.	āyānī, āhānī.	$\widetilde{ar{a}}har{a}nar{\imath}.$
Dat.	āyānā-rā, āhānā-rā.	$\widetilde{ar{a}}h\widetilde{ar{a}}$ - $rar{a}$.
Obl.	$ar{a}y\widetilde{\widetilde{a}},ar{a}h\widetilde{\widetilde{a}}.$	$\widetilde{ar{a}}har{a}nar{\imath}.$

In the western dialect, there is a singular genitive absolute, $\bar{a}y\bar{\imath}\bar{e}g$ or $\bar{a}h\bar{\imath}\bar{e}g$, his. Probably also there is a plural $\bar{a}y\bar{a}n\bar{\imath}g$ or $\bar{a}h\bar{a}n\bar{\imath}g$, theirs, but it is not mentioned either by Mockler or by Pierce. The initial \bar{a} of the western forms may be nasalized, as in the east. Thus, \tilde{a} , he; $\tilde{a}h\bar{a}n\bar{\imath}$, of them.

The oblique case may be used for practically any case. The accusative may have the form of the dative or of the oblique case. The oblique case is often combined with a preposition into one word, as in (West) $chi-m\tilde{a}h\tilde{a}$, for $chi-m\tilde{a}h\tilde{a}$, from among them; $ch\tilde{a}hiy\tilde{a}$, for $chi-\tilde{a}hiy\tilde{a}$, from that,

To the two demonstrative pronouns, the particle ham is very frequently prefixed. It means 'even,' and is equivalent to the Hindi suffix $-h\tilde{i}$. Nominally, as in the case of $-h\tilde{i}$, it gives emphasis, as in ham- \tilde{e} , this very; ham- \tilde{a} or ham- \tilde{a} , that very. But the compound is frequently used as a simple demonstrative pronoun, or as a pronoun of the third person, so that hamā or hamā means merely 'he,' 'she,' 'it,' or' that.' The prefix ham is used in both dialects. In the east it is sometimes weakened to have, so that we get hamēsh or hawēsh, hamē or hawē, hamā or hawā, and so on.

These compounds are of very frequent occurrence, and will often be met with in the following pages. They are declined exactly like the simple pronouns.

RELATIVE.—In both dialects, the relative pronoun is the Persian ki (Eastern, k'i), which is not declined. Its declension is formed with the aid of another pronoun. Thus, (East) $\dot{k}'i$ $\bar{e}shiy\bar{a}$, whose, lit. who of this. The idiom is the same as that of Persian.

INTERROGATIVE.—The interrogative pronouns are kai (Eastern, $k'\bar{a}\bar{\imath}$), who?, and $ch\bar{\imath}$ (Eastern, $ch'\bar{\imath}$), what?, and others. Used as adjectives, these are indeclinable. Used substantively, they are declined as follows:—

' Who ? ;

,	Western Dialect.		Eastern Dialect.
Sing.	·		
Nom.	ka i .		k'āī.
Gen.	kaiī.		k'āīy.
Dat.	kaiā-rā, kai-rā.		k'āiār.
Obl.	kaiā.		k'āiā.
Plur.			•
Nom.	ka i.		•••
Gen.	kaiigānī.	c	•••
Dat.	ka i igã. •		•••
Obl.	ka i $oldsymbol{i}$ $oldsymbol{\widetilde{a}}$.		•••

In the east, the plural is the same as the singular, and, in the west, the singular may also be used as a plural.

'What?'

	Western Dialect.	Eastern Dialect.
Sing.		
Nom.	$char{\imath}.$	$ch^{\epsilon}ar{\imath}.$
Gen.	chī, chiā.	?
Dat.	chīā-rā.	?
Obl.	chīā.	?

The plural is the same as the singular.

In the western dialect, there is kujām, kutām, kudām, kujān, kutān, or kudān, which? This, when used substantively, is thus declined:-

	Singular.	Plural.
Nom.	kujām.	kujām.
Gen.	kujāmī.	kujāmāni.
Dat.	kujāmiā.	kujāmã.
Obl.	kujāmiā.	$kujar{a}m\widetilde{ar{a}}.$

Similarly for the other forms. In the eastern dialect, there is $k'i\theta\tilde{a}$ or $t'\tilde{a}$, which?, what?, which is used only as an adjective.

REFLEXIVE PRONOUN.—The reflexive pronoun is wat (Eastern, $wa\theta$), self. The genitive means 'own.' It is thus declined:-

'Self.'

Western Dialect.		Eastern Dialect.
Sing.		
Nom.	wat.	$oldsymbol{w}a heta.$
Gen.	watī.	$oldsymbol{w}a hetaar{\imath}.$
Gen. Abs.	wating.	$wa heta \imath_{oldsymbol{\gamma}}.$
Dat.	$oldsymbol{wata-ra}.$	$oldsymbol{w}a hetaar{a}r.$
Obl.	watā (Ag. wat).	$oldsymbol{w} a heta ar{a}$.
Plur.		
Nom.	•••	$wa heta\widetilde{ar{a}}.$
$\mathbf{Gen.}$	•••	$oldsymbol{w}a hetaar{a}nar{i}.$
Dat.	•••	$oldsymbol{w}a heta\widetilde{ar{a}}$ - $rar{a}$.
Obl.	•••	$oldsymbol{wa} heta\widetilde{oldsymbol{a}}.$

This pronoun is employed, like the Hindi ap, to refer to the subject of the sentence. In the eastern dialect, p'a $wa\theta \tilde{a}$ or ma $wa\theta \tilde{a}$ is used to mean 'amongst themselves,' etc. It is the equivalent of the Hindi $\bar{a}pas-m\tilde{e}$. In the western dialect, the plural is the same as the singular.

Jind, body, is also used in both dialects to mean 'self.'

The following are additional pronominal forms from the west:—

```
kas, anyone, someone.
     har kas, everyone.
     hēch, hech, any.
    chī, any.
     chunt, how much? how many?
     bāz, many.
     lahtē, some, a few.
For the eastern dialect, we may quote :—
     k'as, anyone, someone.
     har k'as, everyone.
     hēch', hēch'ī, any.
     ch'īx-t'ar, ch'īx-t'ar, how much? how many?
     bāz, many.
VOL X.
```

k'am, a few. k'ardē, some. t'ī, other. t'ēyī, t'ēwayē, all. drust', kull, las, the whole.

CONJUGATION.—Auxiliary Verbs and Verb Substantive.—Before dealing with the active verb, it will be convenient to discuss the verb substantive, which is also used as an auxiliary verb. This is used enclitically, and is attached as a suffix to some other word in the sentence. It is conjugated as follows:—

Present, 'I am,' etc.

	,,,
Western Dialect.	Eastern Dialect.
\widetilde{a} , \widetilde{i} , or \widetilde{u} .	$\widetilde{m{a}}.$
$ec{e}_{ullet}$	$ ilde{e}_{ullet}$
int, in, or \tilde{i} .	$\widetilde{e}.$
in, \tilde{i} , an, or \tilde{a} .	$\widehat{m{u}}.$
it , $ ilde{e}$.	$ar{e} heta$, $ar{e}$.
ant, an, \tilde{a} , or \bar{a} .	ant', an, or \tilde{a} .
	Past, 'was,' etc.
atã, atũ.	$a heta \widetilde{ar{a}}.$
$atar{e}.$	$a hetaar{e}$.
at.	$a heta,ar{e} heta.$
atin, atī, atan, or ate	\widetilde{a} . $a heta\widetilde{u}$.
atit, atē.	$a hetaar{e}.$
atant, atan, atã.	$a\theta ant$, $a\theta an$.
	 ā, ī, or ũ. ē. int, in, or ĩ. in, ĩ, an, or ã. it, ē. ant, an, ã, or ā. atã, atũ. atē. at. atin, atĩ, atan, or ata atit, atē.

After a long vowel, the initial a is liable to be dropped, as in $dag\bar{a}r\bar{a}$ -t for $dag\bar{a}r\bar{a}$ -at, he was in the fields.

These are often attached to personal pronouns, as well as to other words. Thus, (Western) $man-\tilde{a}$, I am; $tau-\tilde{e}$, thou art, and so on. But it must be remembered that in the eastern dialect, when they are suffixed to the first or second person plural, the pronouns take the forms $m\bar{a}k'$ and $shaw\bar{a}k'$, respectively (see pp. 343, 344). We thus get the following conjugation in the east:—

Singular.	Plural.
1. $man-\tilde{a}$, I am.	$m\check{a}k'$ - \widetilde{u} , we are.
2. $t'av-\bar{e}$, thou art.	shawāk'-ēθ, shawāk'-ē, you are.
3. $\tilde{a}h-\tilde{e}$, he is.	$\tilde{a}h$ -ant', they are.
Similarly, for the past, we have :-	·

Singular.	Plural.
1. $man-a\theta \tilde{a}$, I was.	$m\bar{a}$ k'- $a\theta\widetilde{u}$, we were.
2. $t'ar-a\theta\bar{e}$, thou wast.	shawā k '-a $ hetaar{e}$, you were.
3. $\tilde{a}h$ - $a\theta$, $\tilde{a}h$ - $e\theta$, he was.	$\tilde{a}h$ - $a\theta ant$, they were.

The negative form of this verb is $ne\tilde{a}$ or $ni\tilde{a}$, I am not, and so on.

Another form of the verb substantive, meaning 'to be,' 'to exist,' and connected with the Persian hast, is also used in the present and the past. Thus:—

'I am,' 'I exist.'

		-
	Western Dialect.	Eastern Dialect.
Sing.		
1.	as $t\widetilde{\widetilde{a}}$ or $hast\widetilde{\widetilde{a}}$.	$m{ast'} \widetilde{m{a}}$.
2.	a s tē, hastē.	ast'ē.
3.	ast, astint, astî, hast, hastint, hastî.	ast'ẽ.
Plur.		
1.	astin, astī, hastin, hastī.	ast ' $\widetilde{m{u}}$.
2.	astit, astē, hastit, hastē.	ast'ë $ heta$, ast'ë.
3.	astant, astan, astã, hastant, hastan,	ast'ant', ast'an, ast'ã.
	haetã	

The past is apparently used only in the east. In the west, the past of baiag, to be, is used instead, or the present may be used for the past, as in yak mardumēā-ra dō bach hastant, to a certain man were two sons. In the east it is thus conjugated:—

'I was,' 'I existed.'

	Singular.	Plural.
1.	ast'a $ heta\widetilde{ar{a}}$.	ast ʻa $ heta\widetilde{m{u}}$.
2.	ast'aθē.	ast'aθē.
3.	ast'a θ , ast' \bar{a} .	ast'abant', astaban.

This verb is used with the dative to express the meaning of 'have,' as in (western dialect) manā hast, there is to me, i.e. I have.

The negative is nist (East, nest' \tilde{e}), he is not, with a past (only East) nest' \tilde{a} , he was not, and so for the other persons.

ACTIVE VERB.—As in other Eranian languages, the conjugation of the verb is founded upon two bases,—a present and a past. The present base, commonly called the 'root,' is the same as the second person singular of the imperative, and may most easily be obtained by dropping the final ag (Eastern, a_{γ}) of the infinitive. Thus, from kanag (Eastern, $k'ana_{\gamma}$), to do, we get the present stem kan- (or k'an-).

The formation of the past base, or past participle, is more varied. In the western dialect, many verbs form it by simply adding -tag to the present stem. Thus, from prushag, to break (intrans.), we get the present base prush- and a past base prush-tag. In the eastern dialect, the corresponding suffix in such cases is -t'ay, so that from p'rushay, to break, we get p'rusht'ay. But, after a vowel, according to the general rule given on p. 338, this -t'ay becomes - θay , so that, e.g., from $b\bar{\iota}ay$, to become, we get the past base $b\bar{\iota}\theta ay$.

Many verbs, mostly those corresponding to Persian verbs in -idan, add -itag (Eastern, $-i\theta a\gamma$). Thus the verb rasag (Eastern, $rasa\gamma$), to arrive (Persian, rasidan), has its past base rasitag (Eastern, $rasi\theta a\gamma$).

In all these cases, the final γ of the past base, which is also the past participle, in the eastern dialect, is dropped when it comes at the end of the word, and is retained only when terminations are added. Thus, while we have $p'rusht'a\gamma-\tilde{a}$, I broke, with

the suffix $-\tilde{a}$ of the first person, we have p'rusht'a, not p'rusht'ay, he broke, because the third person singular of the past tense has no suffix. In the western dialect, the dropping of the corresponding final g is optional, so that we have prushtag or prushta, he broke. It is, however, always preserved before suffixes. Henceforth, I shall call the form with g or γ the long form, and that without g or γ the short form of the past participle.

The following list of the principal verbs with irregular past participles is compiled from the works of Pierce, Mockler, and Dames. The past participles are given in their short forms:—

WESTER	N DIALECT.	Eastern	DIALECT.	
Infinitive.	Past Part.	Infiniti ye.	Past Part.	Meaning.

rag	zurta	zīray	zurtia.	to take up, raise.

There is only one conjugation of verbs. It should, nevertheless, be remembered that, in the case of transitive verbs, the past participle is passive in signification, and that hence, in tenses of such verbs that are derived from the past participle, the subject must be put into the agent case, which in Balōchī is the same as the oblique case, and the object put into the nominative. Thus, $b\bar{a}dsh\bar{a}h\bar{a}$ \bar{a} mard kushtag (Eastern, $b\bar{a}dsh\bar{a}h\bar{a}$ \bar{a} mard k'usht'a), the king killed that man, or, literally, by the king that man was killed. If the object is definite, and especially if it is a personal pronoun, it is usually put into the dative, instead of into the nominative, as in $b\bar{a}dsh\bar{a}h\bar{a}$ manā-rā kushtag (Eastern, $b\bar{a}dsh\bar{a}h\bar{a}$ manā k'usht'a), the king killed me, literally, by the king, with reference to me, it (impersonal) was killed (or killing was done).

Sometimes intransitive verbs are impersonal in these tenses, and are then treated as if they were transitive, as in $b\bar{a}dsh\bar{a}h\bar{a}$ kandita (Eastern, $b\bar{a}dsh\bar{a}h\bar{a}$ k'andi θ a), the king laughed, lit. by the king it was laughed.

It follows that, in the western dialect, the first and second persons are not used in the case of the past tenses of transitive verbs. If the object is a noun in the nominative case, it is naturally in the third person, and the verb is in the third person too. If the object is a pronoun of the first or second person, it would be in the dative, and the verb, being used impersonally, would again be in the third person.

In the eastern dialect, this rule is also in vogue, but, optionally, the subject (in the agent case) may also be indicated in the conjugation of the verb, the terminations having the force of the agent case. For instance, instead of $m\bar{a}$ k'usht'a, by me killed, we may say k'usht'a γ - \tilde{a} , killed-by-me, both meaning 'I killed.'

Infinitive.—The infinitive is a verbal noun. It is formed by adding -ag (East, -ay) to the present base. Thus, kush-ag (East, k'ush-ay), to kill, the act of killing. It is declined like any other noun, and its oblique case singular, $kushag\bar{a}$ (East, $k'ushay\bar{a}$), on killing, a-killing, is employed to form the present definite and imperfect tenses. This oblique form is also used as an infinitive of purpose, and in many other senses corresponding to the Latin gerunds. Thus, as an example of the infinitive of purpose in the east, Dames gives:—

t'ō mai k'ushayā āxt'ay-ē, thou art come for my killing, i.e. thou art come to kill me.

For the west, Mockler gives several examples, of which one will suffice:—

ā nibīsagā pakā-ĩ, he is perfect in writing.

Future Passive Participle.—This is formed by adding $-\bar{\imath}$ (East, $-\bar{\imath}$ or $-\bar{\imath}g$) or $-\bar{\imath}g$ (East, $-\bar{\imath}\gamma$) to the infinitive. It indicates possibility or necessity, like the Latin gerundive in -endus. Thus, $d\bar{\alpha}rag\bar{\imath}$ (East, $d\bar{\alpha}ra\gamma\bar{\imath}$ or $d\bar{\alpha}ra\gamma\bar{\imath}$), capable of being held, one who can be restrained; $kanag\bar{\imath}g$ (East, $k'ana\gamma\bar{\imath}\gamma$), necessary to be done.

Present Participle.—This indicates repeated action, and is formed, in the western dialect, by the addition of $-\bar{a}n$, and, in the eastern dialect, by the addition of $-\bar{a}na$, to
the present base. Thus, $kush-\bar{a}n$ (East, $k'ush-\bar{a}na$), slaying repeatedly.

In the east, another continuous present participle is formed from the past participle by changing the final -a of the short form of that participle to $-iy\bar{a}$ or $-iy\bar{a}$. Thus, the short form of the past participle of k'ushay, to slay, is k'usht'a, and from it we get $k'usht'\bar{i}y\bar{a}$ or $k'usht'\bar{i}y\bar{a}$, slaying, continuing to slay. The difference between $k'ush\bar{a}na$ and $k'usht'\bar{i}y\bar{a}$ is that the former means slaying repeatedly (at intervals), while the latter indicates continuous slaying.

Past Participle.—This has already been dealt with on pp. 349ff. It almost always ends, in the west, in -ta(g), and, in the east, in $-t'a(\gamma)$ or, after a vowel, in $-\theta a(\gamma)$.

Conjunctive Participle.—This is formed by changing the final -a of the short form of the past participle to \bar{o} . Thus, kushta (East, k'usht'a), slain; $kusht\bar{o}$ (East, $k'usht'\bar{o}$), having slain.

Noun of Agency.—This is formed by adding, in the west, $-\bar{o}k$, and in the east, $-\bar{o}\chi$, to the present base. Thus, $kush-\bar{o}k$ (East, $k'ush-\bar{o}\chi$), a slayer, a murderer.

Finite Tenses.—The finite tenses of the Balochi verb fall into three groups:—

- A. Those formed from the present base.
- B. Those formed from the past base, or past participle.
- C. Those formed from the oblique infinitive.

They are as follows:-

- A. Tenses formed from the present base:-
 - (1) Imperative.
 - (2) Present-Future.
- B. Tenses formed from the past participle:-
 - (3) Past.
 - (4) Pluperfect.
 - (5) Habitual Past.
 - (6) Conditional.
- C. Tenses formed from the oblique infinitive:-
 - (7) Present Definite.
 - (8) Imperfect.

We shall consider them in the above order. The model verb will be kushag (East, k'ushay), to slay. This verb is transitive. For the past tenses of the intransitive verb, the model verb will be rasag (East, rasay), to arrive.

The principal parts are as follows:-

1 1 1		
	Western Dialect.	Eastern Dialect.
Infinitive.	kushag, obl. kushagā.	k'ushay, obl. k'ushayā, to slay, the act of slaying.
Future Passive Participle.	kushagī, ku shagī g.	k'ushayī, k'ushayē, k'ushayīy, (neces-sary) to be slain.
Present Partici-	kushān.	k'ushāna, slaying repeatedly.
ple.		k'usht'īyā, slaying continuously.
Past Participle-	•	
Long form.	kushtag.	k'usht'ay, slain.
Short form.	kushta.	k'usht'a, slain.
Conjunctive Participle.	kushtō.	k'usht'ō, having slain.
Noun of Agen- cy.	ku s hōk.	$k^{\epsilon}ushar{o}\chi$, a slayer.

A.—Tenses formed from the Present Base, kush (East, k'ush).

(1) Imperative.—The second person singular of the imperative is the same as the present base. The second person plural adds -it in the west, and $-\bar{e}\theta$ or $-\bar{e}\delta$ in the east. We thus get:—

Western Dialect. Eastern Dialect. Sing. 2. kush. k'ush, slay thou. Plur. 2. kushit. $k'ush\bar{e}\theta$, $k'ush\bar{e}\delta$, slay ye.

The other persons are borrowed from the present-future. In the east, the singular imperative of deay, to give, is dai, give thou.

As in Persian, the syllable bi is usually prefixed to the imperative, and is subject to the following rules:—

In the west, bi is the general form. If the verb begins with long \bar{a} , a y is inserted, as in bi-y- \bar{a} , come thou, from \bar{a} -y-ag, to come. If the verb begins with any

other vowel, then b- only is prefixed, as in b-il, permit thou, from ilag, to permit. If the present base contains the vowel \bar{o} or the diphthong au, the prefix is bu. Thus from rauag, to go, we have bu-rau, go thou. If the base begins with wa, as in warag, to eat, then we get a form like $b\bar{o}r$, eat thou. We thus get for the west, as optional forms of the imperative:—

Sing. 2, bikush, slay thou.

Plur. 2, bikushit, slay ye.

In the east, the prefix is used only with verbs beginning with vowels, and with the verbs $wara\gamma$, to eat, and $rava\gamma$, to go. If the verb begins with long \bar{a} , then y is inserted, as in $bi-y-\bar{a}$, come thou, $bi-y-a\bar{e}\theta$ (with shortened \bar{a}), come ye, from $\bar{a}\gamma$, to come. So $bi-y-\bar{a}r$, bring thou. If the verb begins with i, only b- is prefixed, as in b-il, permit thou, from $ila\gamma$, to permit. From $wara\gamma$, to eat, we have ba-war, and from $rava\gamma$, to go, $ba-r\bar{o}$ or ba-rau. In these two words the stress-accent falls on the prefix.

The negative imperative is formed by prefixing ma instead of bi, etc. Thus, ma-kush (east, ma-k'ush), do not slay. If the verb begins with \bar{a} or i, there are irregularities, as in (West) $ma-y-\bar{a}$, (East) $mi-y-\bar{a}$, do not come; (West) ma-y-il, (East) mail, do not permit.

(2) Present-Future.—This is the tense which is called 'Aorist' by Mockler and Dames. It is derived from the ancient present, and may be used as an indefinite present, as a future, or where we should use a present subjunctive. It is thus conjugated:—

'I slay,' 'I shall slay,' 'I may slay,' etc.

Western Dialect.

Eastern Dialect.

Sing.

1. kushā, kushī, kushū.

k'us $h\widetilde{\overline{a}}$, k'us $h\widetilde{\overline{u}}$.

2. kushē.

k' $ushar{e}.$

3. kushīt, kushī.

 $k'ush\bar{\imath}\theta$, $k'ush\bar{\imath}$.

Plur.

1. kushî, kushã, kushē.

kʻush $\widetilde{\overline{u}}$.

2. kushit.

 $k'ush\bar{e}\theta$, $k'ush\bar{e}\delta$, $k'ush\bar{e}$.

3. kushant.

k'ushant'.

The forms of the first person singular in the west vary according to locality. For the east, $k'ush\tilde{u}$ is not given by Dames, but occurs in the specimens. It will be observed that the first person singular and plural ends in a nasalized vowel. This nasalization becomes a full n if it precedes another vowel. Thus, if, in the west, we add the pronominal suffix $-\bar{e}$, him, to $kush\tilde{a}$, I will slay, we get $kush\bar{a}n-\bar{e}$, I will slay him.

As in the imperative, this tense often takes prefixes, which are subject to the following rules:—

In the west, the vowel a- is always prefixed, if the preceding word ends in a consonant or diphthong. It is also used, but not so often, after a vowel. If, therefore, we express the pronoun of the subject, we get the following:—

Singular.

Plural.

1. $man \ a$ -kush \tilde{a} , a-kush \tilde{u} , a-kush \tilde{i} .

mā kushî, kushã, kushē.

2. tau a-kushē.

shumā kushit.

3. ā kushīt, kushī.

ā kushant.

VOL. X.

3 A

Moreover, k- is also prefixed to the verb, after the a-, if the verb begins with a vowel. Thus, man a-k- $\bar{a}y\tilde{a}$, I come, from $\bar{a}yag$, to come; man a-k- $\bar{i}l\tilde{a}$, I shall permit, from ilag, to permit; man a-k- $\bar{o}sht\tilde{a}$, I shall stand, from $\bar{o}shtag$, to stand. If the verb is used with a future sense, bi is often prefixed, as in the Imperative, instead of k. Thus, biy- $\bar{a}y\tilde{a}$, I shall come.

In the east, the prefixed a-does not seem to be used. But, if a verb begins with a vowel, k- is prefixed, or bi- may be used, as in the imperative. Thus, $m\tilde{a}$ k- \tilde{a} or $m\tilde{a}$ bi-y- \tilde{a} , I shall come, from $\bar{a}y$, to come; $m\tilde{a}$ k- $il\tilde{a}$ or $m\tilde{a}$ b- $il\tilde{a}$, I shall permit, from ilay, to permit; and so on for the other persons.

Some verbs are irregular in the third person singular, which in the above paradigm ends, in the west, in -it or -i, and, in the east, in $-i\theta$ or i.

In the west, many bases ending in n or r or in a vowel or diphthong drop the \tilde{i} of $-\tilde{i}t$, so that the third person singular simply ends in -t. If the base ends in r, the root-vowel is also, if possible, lengthened. Mockler gives the following examples:—

· Verb.	3 sing. presfut.
$gr\bar{e}$ - g , to weep,	ā grēt, he will weep.
dai-ag, to give,	$\bar{a} d\bar{a}t$, he will give.
bai-ag, to be,	$\bar{a} \ b\bar{\imath}t$, he will be.
rau-ag, to go,	\bar{a} raut, he will go.
jan-ag, to beat,	\bar{a} jant, he will beat.
war-ag, to eat,	\bar{a} wārt, he will eat.

Similarly, in the eastern dialect, the $\bar{\imath}$ of $-\bar{\imath}\theta$ is dropped under very similar rules. But, according to the phonetic rules of this dialect, the θ becomes t' when it follows a consonant. As in the western dialect, a short vowel before a final r of the base is lengthened here also. Dames gives the following examples:—

3 sing. presfut.
\tilde{a} $b\bar{i}\theta$, $b\bar{i}$, he will be.
$\tilde{\vec{a}}$ $r\bar{o}\theta$, $r\bar{o}$, he will go.
\widetilde{a} dā θ , dā, he will give.
\tilde{a} $si\theta$, he will swell.
\tilde{a} k'ant', he will do.
\tilde{a} jant' or ja θ , he will beat.
\tilde{a} girt', he will take.
\tilde{a} bart', he will take away.
\tilde{a} wart', he will eat.

It may be noted that the terminations of the present-future closely agree with the present tense of the verb substantive. The principal difference is in the third person singular. In the verb substantive, this is, in the west, int, in, or \tilde{i} , and, in the east, \tilde{e} . In the present-future, the termination is $-\bar{i}t$ or $-\bar{i}$ in the west, and $-\bar{i}\theta$ or $-\bar{i}$ in the east.

B.—Tenses formed from the Past Participle.

(3) Past.—This tense is also used as a perfect.

In the west, for transitive verbs, the third person alone is used, in the singular or plural according to the number of the object, the subject being in the agent case. It

will be remembered that the past participle, which is identical in form with the third person singular of the past tense, ends in -ag (long form) or -a (short form). When used in the past tense, the final a of the short form may optionally be dropped, so that for the third person singular we get kushtag, kushta, or kusht, the plural being kushtagant or kushtant. We thus get, for the conjugation of the past tense of a transitive verb in the west, the following:-

```
 \frac{man, \ tau, \ \tilde{a}y\bar{a}, \ ma}{shum\bar{a}, \ \text{or} \ \tilde{a}h\tilde{a}} \right\} kushtag, kushta, \text{ or } kusht   \begin{cases} I, \text{ thou, he, we, you, or they slew, or has or have slain, him, her, or it.} \end{cases} 
                                                                                                                                             I, thou, he, we, you, or they slew, or has or have slain, them.
\left. egin{aligned} \textit{man, tau, $\tilde{a}y\bar{a}$, $m\bar{a}$,} \\ \textit{shum}\bar{a}, & \text{or $\bar{a}h\tilde{a}$} \end{aligned} 
ight\} kushtagant or kushtant
```

Still referring to the west, the past tense of an intransitive verb is conjugated fully, the terminations of the present-future being added to the past participle, except in the third person singular, which takes no termination. We take the verb rasag, to arrive, past participle rasitag or rasita, as the model of an intransitive verb. It is conjugated as follows in the past tense:

'I arrived,' or 'I have arrived,' etc.

- 1. $man \ rasitag\tilde{a} \ \text{or} \ rasit\tilde{a} \ (-\tilde{i}, -\tilde{u}).$ $m\tilde{a} \ rasitag\tilde{i}, \ rasitag\tilde{a}, \ rasit\tilde{i}, \ \text{or} \ rasit\tilde{a}.$
- 2. tau rasitagē or rasitē. shumā rasitagit or rasitit.
- ā rasitag, rasita, or rasit. ā rasitagant, rasitagā, rasitant, or rasitã.

The use of a form with or without the g depends mainly on locality. The forms with g are the most usual.

In the east, the conjugation of the past tense differs somewhat from the foregoing. In the transitive verb, either the past participle alone is used, or else the tense is conjugated as if it were the past tense of an intransitive verb, the persons referring to the subject, although that is in the agent case. Of the two forms of the past participle, the short form, without the y, is always used when no termination is added, while either the long form, with the γ , or the short form, without it, may be used when terminations are added.

When the participle is used alone, it is employed only in the singular,—not, as in the west, in the singular or plural according to the number of the object.

We thus get the following conjugation of the past tense of a transitive verb in the eastern dialect :-

 $m\bar{a}$, t'au, $\tilde{a}hiy\bar{a}$, $m\bar{a}$, $shaw\bar{a}$, or $\tilde{a}h\bar{a}n\bar{i}$ $\}$ k'usht'aI, thou, he, you, or they slew, or has or have slain, him, her, it, or them.

or else:--

'I slew,' or 'I have slain,' etc.

(With the long form of the past participle.)

Singular. $m\bar{a}$ k'usht'a $\gamma \tilde{\bar{a}}$.

 $m\bar{a} \ k'usht'a\gamma \tilde{u}$.

2. t'au kusht'ayē. shawā k'usht'ayē.

3.

ahanī k'usht'ayant'.

358 BALÖCHĪ.

When pronominal suffixes are added to the first or to the third person plural, there are additional irregular forms in the case of this tense. We find k'usht'ayat'a or $k'usht'a\gamma \tilde{u}t'\tilde{u}$, we slew, or have slain; and $k'usht'a\gamma ant\tilde{a}$, they slew, or have slain.

or else:-

(With the short form of the past participle.)

Singular. 1. $m\bar{a}$ k'usht' \tilde{a} or k'usht'am.

mā k'usht'aw or k'usht'om.

t'au k'usht'aē.

shawā k'usht'aē.

ahiya k'usht'a.

āhānī k'usht'ant'.

The intransitive verb presents no difficulties. It will suffice to give the conjugation with the long form of the past participle. The subjects, of course, are in the nominative case.

'I arrived,' 'I have arrived,' etc.

Singular.

Ploral.

1. $m\tilde{a} \ rasi\theta a\gamma \hat{\bar{a}}$.

 $m\bar{a} rasi\theta a \gamma \tilde{\bar{u}}$.

t'au rasiθavē.

shawā rasiθayē.

 $\widetilde{ar{a}}$ rasiheta a. 3.

 \tilde{a} rasi θ ayant'.

Except in the third person singular, Dames does not give any example of the past of an intransitive verb formed from the short form of the past participle.

(4) Pluperfect.—This is formed by adding the past tense of the verb substantive to the perfect participle. The compound is then treated exactly as in the past tense.

In the western dialect, the third person singular of the past tense of the verb substantive is at, and the plural of the same is atant, atan, or ata. Added to kushtag or kushta, we get, for the singular, kushtag-at or kusht-at, and, for the plural, kushtag-atant or kusht-atant. The tense is therefore:

> $man, tau, \tilde{a}y\tilde{a}, m\tilde{a}, \\ shum\tilde{a}, \text{ or } \tilde{a}h\tilde{\tilde{a}}$ kushtagat or kushtat { I, thou, he, we, you, or they had slain him, her, or it. man, tau, āyā, mā,) kushtagatant or

shumā, or āhā) kushtatant, etc. [I, thou, he, we, you, or they had I slain them.

Similarly, for the western intransitive verb, we have :-

'I had arrived,' etc.

Singular.

1. $man \ rasitagat\tilde{a} \ (or \ -at\tilde{u}) \ or$ $rasitat\tilde{a}$, etc.

mā rasitagatin (-atī, -atan, or -atā) or rasitatin, etc.

tau rasitagatē or rasitatē.

shumā rasitagatit (or -atē) or rasitatit (or $-at\bar{e}$).

ā rasitagat or rasitat.

ā rasitagatant (-atan, or -atā) or rasitatant (-atan, or ata).

In the east, we have the following conjugation of a transitive verb, the past tense of the verb substantive being $a\theta \tilde{a}$, I was: —

'I had slain,' etc.

Singular.

Plural.

 $m\bar{a}$ k'usht'aya $\theta \bar{a}$.

mā k'usht'ayaθū.

t'au k'usht'ayaθē.

shawā k'usht'aya θē.

3. āhiyā k'usht'ayēθ.

ahānī k'ushtayabant' or k'usht'yaban.

So, for the intransitive verb, we have:-

'I had arrived,' etc.

Singular.

Plural.

1. $m\tilde{a} rasi\theta a \gamma a \theta \tilde{a}$.

 $mar{a}$ rasihetaaya $oldsymbol{ heta}$ $ar{oldsymbol{u}}$.

2. t'au rasiθαγαθē.

shawā rasiθαγαθē.

3. $\bar{a} rasi\theta a \gamma \bar{e}\theta$.

 \tilde{a} rasibayabant' or rasibayaban.

(5) Habitual Past.—This tense is only recorded for the eastern dialect. It is used as a habitual past and also as a conditional past. It has two forms. The first form is simply the short form of the past participle, with the final a dropped. Thus:—

 $m\bar{a}$, t'au, $\tilde{a}hiy\bar{a}$, $m\bar{a}$, t'usht' { I, thou, he, we, you, or they used to slay, or shawa, or $\tilde{a}h\bar{a}n\bar{\imath}$ } k'usht' { would have slain, or (if) I, thou, etc. had slain, him, her, it, or them.

The second form is made by adding the past tense of the verb substantive to the short form of the past participle. It thus corresponds to that form of the western pluperfect, which is based on the short form of the past participle. It is thus conjugated:—

'I used to slay,' 'I would have slain,' '(if) I had slain,' etc.
Singular.

Plural.

mā k'usht'aθā.

 $m\bar{a}$ k'usht'a $\theta \tilde{u}$ or k'usht'a $\theta \bar{o}m$.

2. t'au k'usht'aθē.

shawā k'usht'abē.

3. ahiyā k'usht'aθ.

ähānī k'usht'aθant'.

Similarly for the intransitive verb, except that the subject is in the nominative case. Thus, $m\tilde{a}$ rasi θ , or rasi $\theta a \theta \tilde{a}$, I used to arrive, I would have arrived, or (if) I had arrived, and so on.

(6) Conditional.—This is a conditional past, and therefore agrees with the preceding tense in one of the latter's meanings. It is also used as a past optative.

In the transitive verb it does not change for person, but agrees with the object in number. It is made by substituting $\tilde{\tilde{e}}$ in the singular, and $\tilde{e}nant$ (Eastern, $\tilde{e}n\tilde{\tilde{a}}$) in the plural for the final a of the short form of the past participle. Thus:—

Western Dialect.

man, tau, āyā, mā, shumā, or āhā

| kushtē| | fif) I, thou, he, we, you, or they bad slain him; or I, thou, etc. would have slain him; or would that I, thou, etc. had slain him.

| (if) I, thou, he, we, you, or they had slain them; or I, thou, etc. would have slain them; or would that I, thou, etc. had slain them.

| Eastern Dialect. | (if) I, thou, he, we, you, or they had slain him; or I, thou, etc. would have slain him; or I, thou, etc. would have slain him; or would that I, thou, etc. had slain him; or would that I, thou, etc. had slain him.

Eastern Dialect.

mā, t'au, ãhiyā, mā, shawā, or ãhānī

 $\left. \left. \right\}$ k'usht'ēn \tilde{a}

(if) I, thou, he, we, you, or they had slain them; or I, thou, etc. would have slain them; or would that I, thou, etc. had slain them.

As for the intransitive verb, in the west, this tense is conjugated in full, the above forms being used as the third person. Thus:—

'(If) I had arrived,' I would have arrived,' or 'would that I had arrived,' etc.

Singular.

Plural

1. man rasitēnā.

mā rasitēnin, rasitēnī.

2. tau rasitēnē.

shumā rasitēnit.

3. ā rasit e.

ā rasitēnant.

But, in the eastern dialect, it is the same as in the transitive verb. Thus:— $m\tilde{a}$, t'au, or \bar{a} $rasi\theta\tilde{e}$, (if) I, thou, or he had arrived; or I, thou, or he would have arrived; or would that I, thou, or he had arrived.

 $m\bar{a}$, $shaw\bar{a}$, or \tilde{a} $rasi\theta\bar{e}n\tilde{a}$, (if) we, you, or they had arrived; we, you, or they would have arrived; or would that we, you, or they had arrived.

This tense may optionally take the prefix bi as in the imperative and aorist. It takes the negative ma, not na.

C.—Tenses formed from the Oblique Infinitive.

The oblique verbal noun, or oblique infinitive, ends in $-ag\bar{a}$ (East, $-ay\bar{a}$), and this is combined with the verb substantive to form a present definite and an imperfect, exactly equivalent to the English 'I am a-slaying,' 'I was a-slaying.' This is most clear in the western dialect. In the eastern, the forms are more contracted.

(7) Present Definite.—This is conjugated as follows:—

'I am slaying,' etc.

Western Dialect.

Eastern Dialect.

Sing.

kushagāyā.
 kushagāyē.
 k'ushayāē.
 k'ushayāē.

3. kushagāyint, kushagāyin, kushagāyĩ.

k'usha $\gamma \tilde{e}$.

Plur.

1. kushagāyin, kushagāyī.

k'ushayāū, k'ushayū, k'ushayāōm.

2. kushagāyit, kushagāyē.

k'ushayāēθ, k'ushayāē.

3. kushagā yant, kushagāyan, kushagāyā.

k'ushayant', k'ushayan, k'ushayê.

(8) Imperfect.—The imperfect is similarly made with the past tense of the verb substantive. Thus:—

'I was slaying,' etc.

Western Dialect.

Eastern Dialect.

Sing.

kushagāyatā, kushagāyatū.
 k'ushayaθā.
 k'ushayaθē.

5. kushagāyat.

k'ushaya0, k'ushayē0, k'ushayā.

Western Dialect. 1

Eastern Dialect.

Plur.

kushagāyatin, kushagāyatĩ, k'ushaγaθᾶ.
 kushagāyatan, kushagāyatã.

kushagāyatit, kushagāyatē.
 kushagāyatant, kushagāyatã.
 k'ushaγaθē.
 k'ushaγaθant'.

Passive Voice.—This is not often used, and the two dialects differ in their modes of expressing it.

In the western dialect, the infinitive, or verbal noun, is sometimes used with the verb baiag, to be, which is then conjugated throughout. Thus, man kushag a-ba, I shall be slain. Or we may say manā kushit, he will slay me, to express the same idea. There are also other ways of expressing the passive, for which the reader is referred to Mockler's grammar.

In the eastern dialect, there are various ways of forming the passive. By one method, evidently borrowed from the Indian Lahndā, -ij is added to the present base, as in $k'ush\bar{i}j$ - from k'ush-. This is treated as a new present base, from which we may form an infinitive and a present-future tense. A past participle, $k'ush\bar{i}ja\theta a$, may also be formed from it.

As only transitive verbs can become passive, and as the past participle of a transitive verb is passive in signification, it also can be used as a past passive base. In this way the perfect acquires the force of a passive present. Thus, the perfect k'usht'a \tilde{a} means 'I have killed.' But, if we take the termination \tilde{a} as meaning 'me,' not 'I,' it means 'has killed me,' or 'I am being killed.'

Or, again, a fresh passive participle may be made from the short form of the ordinary past participle, by changing the final a to $iy\bar{a}$ or $i\gamma\bar{a}$. Thus, from k'usht'a, we get $k'usht'iy\bar{a}$ or $k'usht'iy\bar{a}$, from which the usual tenses may be formed. For further particulars, Dames's grammar should be consulted.

Causal Voice.—In the western dialect, the causal voice is generally formed by adding $-\bar{a}\bar{e}n$ to the present base; thus forming a new present base, which is regularly conjugated. Thus, from kushag, to slay, we have the present base kush-, from which we get the causal infinitive kushāēnag, to cause to be slain, or to cause to slay.

An intransitive verb is similarly made transitive by adding $-\bar{a}\bar{e}n$, $-\bar{a}n$, or $-\bar{e}n$. Thus, from rasag, to arrive, we get rasāēnag, rasānag, or rasēnag, to cause to arrive, to send. Mockler adds the following irregular causals and transitives, in which the original vowel is lengthened:—

gwazag, to pass over; gwāzēnag, to carry across. tachag, to run; tāchag, to gallop (a horse). wapsag, to lie down; wāpēnag, to lay down.

In the eastern dialect, -ain is added to the present base to form a causal. Thus, from k'ushay, to slay, we get k'ushainay, to cause to be killed. Dames gives the following irregular causals:—

ōsht'ay, to stand;ōsht'alainay, to set up.ninday, to sit;nisht'ainay, to lay down, to spread out.

In the following, the root vowel is lengthened in the causal:-

sushay, to burn (intr.); soshay, to burn (tr.).

t'ashay, to run, gallop; t'āshay, to gallop (a horse).

t'ushay, to faint; t'ōshay, to extinguish.

Compound Verbs.—Potential compound verbs are made in both dialects by taking the short form of the past participle, and eliding the final a. Thus, from kushta (Eastern, k'usht'a), slain, we get kusht (East, k'usht'). To this kanag (East, k'anay), to do, is added, and conjugated throughout. Thus, kusht kanag (East, k'usht' k'anay), to be able to slay.

In the East, the same apocopated past participle may also be used with $b\bar{\imath}a\gamma$, to be, to become, which in this case means 'to be possible,' or 'to be able.' Thus, k'usht'' $b\bar{\imath}a\gamma$, to be possible to slay, to be able to slay.

INDECLINABLES.—Adverbs.—Lists of these are given in the grammars, and only a few typical examples will here be given.

Eastern Dialect. Western Dialect. $n\bar{i}$, $n\tilde{i}$, now. nī, $ha\delta \hat{e}$, then. $ka\delta \hat{e}$, when? kadī. maroshī, today. marochi, zī, yesterday. $zar{\imath},$ bānyā, tomorrow. bāndā, $\bar{e}\delta$, here. idā, $\bar{o}\delta$, there. ōdā, ba k'ū, where? kū, $p'\bar{e}\delta$, hither. p'ōδ, thither. t'ago, whither? sh $\bar{e}\delta$, hence. ash-idā, sh $\bar{o}\delta$, thence. ash-ōdā, ash-k'ō, whence? ēr, down. p'ar-ch'e, why? par-chī,

In the East, adverbs are formed from adjectives by the addition of $iy\bar{a}$, $\bar{i}\gamma\bar{a}$, or $i\chi\bar{a}$, as in the following examples taken from Dames's grammar:—

ganda, bad,gandaγiyā, badly.jawaĩ, good,jawāniyā, jawāniyā, well.sak, strong,sakiyā, sakīyā, very.

There are probably similar terminations in the western dialect, but they are not mentioned by Pierce or Mockler.

The negative is na, but with the imperative and conditional ma is used. See pp. 355 and 360.

¹ Compare Hindî ham-sē nohi bantā. It is not possible by me, i.e. I cannot do it.

Prepositions and Postpositions.—As explained on p. 341 prepositions govern the oblique case, and postpositions the genitive case. The following are the more important prepositions:—

```
Western Dialect.
                                                         Eastern Dialect.

                                                    hau, balē, yes.
```

The following specimens of Balōchī come from the District of Karachi, and are in the western dialect described in the preceding pages. It is reported to be spoken by about 10,000 Balōches in the Karachi Taluka, chiefly in the town of Karachi. It is named in the original 'Makrānī,' and the speakers come from Makrān. In other parts of the Karachi District, the eastern dialect is employed. The only point to note is the dropping of the initial wa in $war\tilde{\imath}$, we may eat, which appears as $r\tilde{\imath}$.

na, innā, no.

Although Balochi has properly speaking no written character of its own, it is occasionally written in the Persian character. In order to show how the western dialect looks when so written, the first specimen is given in that character as well as in the Roman. The spelling of final vowels is here somewhat capricious, short vowels being often written as long, and vice versá. Thus we have with for it is for it, and the for it is also a tendency to spell words in the Arabic or Persian style, which has been silently corrected in the transliteration.

na, nā, innā.

The following specimen of the Makrānī dialect of Balōchī, also received from Karachi, is a sample of the popular poetry of the tribe, and is of considerable interest. All the Balōchī poetry that has been hitherto collected has been in the eastern dialect. Regarding this, Mr. Dames¹ says:—

"I have not been able to discover any poems in Makrānī Balōchī. They must exist among the tribes of Mekran and Persian Balochistan, and it may be hoped that some official or traveller who has access to those regions will take the trouble to record some of them before they are lost."

The present specimen belongs to the class of epic ballads dealing with the early wars and settlements of the Balōches, of which a number of examples in the eastern dialect will be found in Mr. Dames's work. Like other poems of the kind it begins with the battle of the Karbalā, in which Yazīd slew Ḥusain, the son of 'Alī, in the year 680 A.D. According to the Balōch story, which is probably mythical, the Balōches of that period inhabited Ḥalab, or Aleppo, and fought at Karbalā on the side of Ḥusain. After Ḥusain's death they migrated to Sīstān (Seistan of the maps). Here tradition merges into history. Thence, in subsequent times, they migrated into Kēch-Makrān, and gradually journeyed eastwards into their present seats in Sind and North Balōchistān. These migrations are depicted in numerous ballads, of which the present specimen is an example. Like others of its kind, it begins with a reference to the death of Ḥusain at the hands of Yazīd, and then, without a break, plunges into the middle of things at the journey of the tribes eastwards from Lāristān in Persia.

These poems are handed down by word of mouth, and the texts are naturally often corrupt. The present specimen is no exception, and, as received, some of it was unintelligible. Owing to the fact that it is an example of a ballad in the western dialect, it is of more than ordinary interest, and I have consulted Mr. Dames, whose authority in this subject is unquestioned, as to the emendation of the text and as to its translation. He has most kindly corrected it where necessary,—the textual emendations were few and slight,—and has suggested slight alterations in the order of the verses which I have adopted. He says:—

"Probably many of the couplets come in their wrong places, so that the geographical succession is somewhat upset; but evidently Lär and Rūdbār, the furthest west, come first; then the group Pahra, Bampūr, Lāshār, Gēh; then the coast places, Chāhbār, Hārīn, and Rās Malān; and last Kolwā, etc., leading North-East through the mountain country to the Bolān and Mulla passes leading down to Kachchhī and Sēvī (Sibi of the maps)."

I owe a further debt of gratitude to Mr. Dames for notes on the geographical names mentioned in the poem. These I have incorporated in the notes to the translation. For further information, a useful comparison can be made with the first ballad in Mr. Dames's collection.

The language of the ballad contains some old forms. Such, for instance, is the use of kurta, in place of the modern kuta, made. Here the r of the Avesta kereta- is still preserved, while it has been lost in the modern language. We may also note an old genitive form in $-\bar{\imath}$, as in $R\bar{o}db\bar{a}r\bar{\imath}$, or $R\bar{o}db\bar{a}r$; $Pahra\bar{\imath}$, of Pahra; $Bamp\bar{u}r\bar{\imath}$, of Bamp $\bar{u}r$; $D\bar{a}m\bar{a}n\bar{\imath}$, of the Dāmān; $K\bar{o}lw\bar{a}\bar{\imath}$, of K $\bar{o}lw\bar{a}$; and $Tanda\bar{\imath}$, of Tanda. It will be observed that these are all genitives of place-names.

When a Balochi adjective is used attributively, it takes the termination $-\tilde{e}$. An older form of this termination is $-\tilde{e}n\tilde{a}$ or $-\tilde{e}n\tilde{a}$. We have this termination in the present specimen in the words $sanj\tilde{e}n\tilde{a}$, harnessed; $hanj\tilde{e}n\tilde{a}$, heautiful; $tunj\tilde{e}n\tilde{a}$, in flocks; and $b\tilde{a}sh\tilde{a}m\tilde{e}n\tilde{a}$, of the rainy season.

¹ Popular Poetry of the Baloches, I, xv.

² As we shall see from the next specimen, the form kurta survives in the Makrani of Nakran

FREE TRANSLATION OF THE FOREGOING,

(Before supplying a free translation of the above it will be advisable to give a shortaccount of the principal persons and of the events referred to therein. At the time described at the beginning of the poem the Baloches formed one body, divided into several tribes, of which the Rinds and the Lāshārīs were the chief. It is probable that at one period these two, the Rinds and Lasharis, were clans of one and the same tribe, under one chief named Shaihak2 (called Shahaik in the text of the present poem). After his death his son Mīr Chākur (Chākar in the present text) became chief of the Rinds, and Mir Gwaharam of the Lasharis. At this stage appears the Helen of the Iliad of the Rind-Lashari quarrel, in the person of a lady named Göhar, who was beloved by both chiefs, and who favoured Chakur. In the romantic tale of the tribal war that followed, one of the most prominent characters is Nodbandag, the old father of Gwaharam, and proverbial for his wisdom and generosity. In an early battle the Rinds were defeated, but Mir Chākur was saved by Nodbandag, and escaped from the field on a mare lent by The war lasted for thirty years, and ended in the destruction of most of the Lasharis. The facts regarding it are not mentioned in this poem, but it is necessary to know their broad outline in order to understand the relationship of the persons mentioned,—that the principal Rinds were Shaihak and Mir Chākur with his Gōhar, and that the principal Lashari was Nodbandag. Gwaharam is not mentioned.)

- 1. The clans from Aleppo became full of wrath on the day that Yazīd raised his head.³
- 2. When Husain, the king and monarch, was slain, the clans bore malice against Yazīd.
- 3. The Lāshārīs advanced a stage, and with them marched Nodbandag, the liberal.4

¹ Dames, Popular Poetry of the Baloches, I, xxiff.

² Dames, op. cit., i, 2, Note 2.

² This and the next verse refer to the battle of the Karbalā, at which Ḥusain was defeated by the troops of Yazīd. The Balōch tradition is that they sided with Ḥusain, and after the battle migrated to Sīstān, and thence into Makrān and India.

⁴ As customary in these Baloch accounts of the tribal migrations, the story now skips the intervening period, and goes on to the time succeeding the migration from Sīstān. They first settled in what is now Persian Makrān.

- 4. Shaihak (with the Rinds) followed close behind him, and they descended beyond Rödbar.¹
 - 5. They passed from barren Lar, facing the bazaar of Pahra.2
 - 6. Beyond the boundaries of Bampur's went men with harnessed horses.
 - 7. Women decked in fine ornaments, with sheep and cows in herds.
- 8. (Women) with their locks unplaited, did the chief, the sword-smiter, Shaihak seize.
 - 9. Nodbandag, the liberal and the just, settled in the barren country.
- 10. (He, with) the Lasharis settled in Lashar, and the Rinds settled in the bazaar of Pahra.
- 11. Thus three years passed, one by one, by the command of God, the Almight, who veileth his face from our sins.
 - 12. Then the Ghāzīs,—Turks on swift horses,—attacked them.5
- 13. The army drew its sword, and came from Iran, and no place was left for the lion-hearted.6
 - 14. They marched like lightning and wind. Like thunder roaring did they go.
 - 15. From Kech and Makran to India, to the stream in the region of Sindh.7
 - 16. From Sarbaz to barren Mand. Göhar set forth behind them.8
- 17. They went on (seeking for) springs of water and water embankments, and passed on from Pagaya's embankment.
 - 18. May the carrion Sābukīs10 flee, the Kurds and Khalkhalīs, those eaters of men.
- 19. May the Marīs have no dealings with the Rinds. May the dwellers in the Dāmān remain in idleness.
 - 20. By Nodbandag, the liberal, the valiant, and Shaihak, their leader, at their head,

¹ Rūdbār or Rodbār is a district in the west of Persian Balochistān, north of the straits of Ormnz.

² The province of Lāristān, and its capital, Lār, are in Persiau territory, to the west of Rūdbār, and along the east of the Persian Gulf. From here the eastward migration begins. Pahra is well to the east of Lār, in Persian Makrān. Its original name was Pahrag, of which the Arabic form, Fahraj, is still found in maps.

³ Bampar, or Bompar, is in the neighbourhood of Pahra, a little to its west.

⁴ While the Rinds, as already stated, stayed in Pahra, the Läshäris, with Nodbandag at their head, settled at this stage in Läshär. It is from this tract that the Läshäris take their name. It is to the south of Pahra and Bampur.

It is not known who these 'Turks' were. The next couplet seems to make them come from Īrān, or Persia. Bahrarī, swift, is here used for the more common bahranī.

[•] I.e. the Baloches. Hence they abandoned Persian Makrau, and migrated eastwards. First, the whole journey through Kech-Makran to India is mentioned, and then the stages are given in detail.

⁷ Kēch (or Kēj in the maps) is further east, in British Makrān. The name is generally employed jointly with Makrāu (usually pronounced 'Makurān' by Balēches) to designate the Province. Even Marco Polo (about 1300 A.D.) writes 'Kesmacoran.' The stream in the region of Sindh is, I suppose, the Indus.

s The stages are now set forth in detail. Sarbāz is Persian Makrān, to the east of Lāshār. Mand is a district just inside the Perso-British frontier, lying east of Sarbāz and west of Kēch. Gōhar was the heroide of the tribal war referred to above. This did not take place till after the arrival of the tribes at Sībī and the neighbourhood. The meaning of the second balf of the couplet is obscure. The word jahjatā, translated 'set forth,' occurs here and in verse 30, but is not found in the dictionaries. It looks like a compound verb made with janag, to strike, but the meaning of jah is nukuown. A translation sent with the text translates jahjatā here by 'prepared herself,' and in verse 30 by 'rose.'

Pagāyā has not been identified. Perhaps we should read 'pa Gēhā-banda,' by the embankment of Gēh. Gēh is a well-known place in Persian Makrān, between Lāshār and the coast.

Verses 18 and 19 seem to give the names of certain inferior tribes. The name Sābakī is unknown, but may possibly be sabuk or sawakk, light, weak, frail. Murdār is carrion, anything vile. Knrds and Khalkhalīs are evidently aboriginal tribes. The former are now classed as Brahūis, but there is no name like the latter. It may be incorrect for 'Kalmatī,' a tribe not considered to be genuine Balōch. The Marīs are not considered to be of pure origin, although now a powerful tribe. In No. XXI of Mr. Dames's Balluds, they are classed as slaves of Chākur. The Dāmān is the skirts of the hills,—the low lands at the foot of the Makrān rauges.

- 21. The clans were raised in a mass, and marched on, led by watering places and by fate.
- 22. Halting by streams and by fountains, inspecting the country and the mouths of the torrents.
- 23. Kēch did not please the Rinds, when they settled in the bare plains of Kölwā.¹
 - 24. One year passed to completion when Shaihak had settled in Āshāl.2
 - 25. Chākur,3 like a shining ruby, sprang up, a Master of Fortune.
 - 26. Minstrels (came) all at once as far as Gar and Danda from Dora up to Sagik.4
 - 27. From Zig and Chambar to Mālā, to Hōrtā and the bazaar of Ṭanḍa.5
 - 28. Nodbandag went at their head. He passed on from Upper Hari,6
 - 29. From Gishkaurā to Gulkaurā, as the rain that falls in the rainy season.
- 30. Then in company (with Nödbandag and the Lāshārīs) the Rinds set their faces towards Kachchhī and Sībī.

¹ Kõlwä is in East Makrän, towards Las Bělä. It is evidently a stage in the movement from the West to the East, i.e. towards India.

² Not identified.

³ Shaihak's son.

^{&#}x27;None of these names has been identified. The translation is doubtful. $D\bar{o}mb\bar{a}$ means 'minstrels'; but, if it is taken as the name of a place, then the verse would mean '(Chākur was fortunate) from $D\bar{o}mb\bar{a}$ to Gar and $D\bar{o}md\bar{a}$; from $D\bar{o}mb\bar{a}$ to Sagik.' As common nouns, gar means 'a precipice,' and $d\bar{o}r$, 'a pool.'

⁵ None of these places has been identified. Chambar and Mālā suggest the port of Chābbār in Persian Makrān, and the cape in Eastern Makrān known as Rās Malān. If we adopt a slightly different reading, the second half of the couplet would mean 'from Hōr to the bazaar of Tanda.'

⁶ Probably Hārīn, the location of which is uncertain. Cf., in the first of Mr. Dames's Ballads, 'the port of Hārīn to the right side of Kēch,' i.e. on the south side to tribes marching eastwards. This would bring it somewhere near Gwādar, which is about half way hetween Chāhbār and Rās Malān.

⁷ These are names of valleys along kaurs, or mountain torrents. Gish-kaur has given its name to the Gishkaurī tribe. Its exact position, and that of Gul-kaur (i.e. 'the flower torrent'), are unknown.

The joint tribes are now brought together, and reach Kachchhi and Sibi through the Bölän and Mulla passes. Here they settled, and lived together till the quarrel that ended in the war mentioned above.

The following specimens of Western Balochi come from Makran Proper, and are therefore in a form of Makrani spoken further west than was the case with the preceding specimens. The first specimen is a version of the Parable of the Prodigal Son, and the second is a moral tale containing the account of the very different fate of a Balochi prodigal. The usual List of Words and Sentences will be found on pp. 434ff. There are several points of difference from the standard set by the grammars of Mockler and Pierce, of which the following are the most noteworthy:—

A long final vowel is commonly nasalized. Thus we have $am\tilde{a}$, for $am\tilde{a}$, we; \tilde{i} , for \tilde{e} , this; and \tilde{a} , for \tilde{a} , that. When a word in the standard dialect ends in i or \tilde{i} , here it often ends in \tilde{e} . Thus, we have $ch\tilde{e}$, for $ch\tilde{i}$, what \hat{i} ; $sh\tilde{e}$, for shi, from; guehnage, for gushnagi, hunger.

In the standard Eastern and Western Balochi, an original \vec{u} often becomes \vec{i} . Thus, the Avesta $b\bar{u}ta$ - becomes $b\bar{i}ta$, become; Avesta $d\bar{u}ra$ - becomes $d\bar{i}r$, far; Avesta $n\bar{u}$ -becomes $n\bar{i}$ or $n\bar{i}$, now. In the present dialect the original \bar{u} is retained, or sometimes changed to \bar{o} , so that we have $b\bar{u}ta$ or $b\bar{o}ta$, become; $d\bar{u}r$, far; and $n\bar{u}$, now (in 'my son was dead, and now is alive again'). The standard \bar{o} , and, is represented by au.

The tendency to clip words (see p. 339) is as strong as, or stronger than, in the standard dialects. Thus, not only is the final a of a past participle often dropped, but even the final \bar{a} of the oblique case singular of a noun. Thus, we have aht, for ahta, he came, and $d\bar{a}t$, for $d\bar{a}ta$, he gave, in pis aht, the father came (outside), and jawāb $d\bar{a}t$, (the elder son) gave answer. So, for oblique forms, we have \tilde{a} waktā, at that time (when he had wasted his property), but $ham\tilde{a}$ wakt, at that time (when thy son came); \tilde{a} mard (for mardā), that man (divided the property); wat-rā (for watā-ra) taī zahaggushī, I may call myself thy son.

As in the other dialects, a final t is often dropped. Thus, we have pash kapag, to remain over, in the Parable, but pasht kapag, in the second specimen. Very frequent examples are $b\bar{u}$, become, for $b\bar{u}ta$ or $b\bar{u}t$; and $k\bar{u}$, made, for kuta or kut. In muriagā, (my son) had died (but is now alive), we probably have the pluperfect murtag-at, in which the final t has been elided, and the now final a lengthened in compensation.

One of the marks by which Balōchī of the east is distinguished from the Balōchī of the west is that in the former an initial surd (ch, k, t, t, or p) is always aspirated (see pp. 337ff.). We find occasional instances of this aspiration in the present dialect. Thus, we have ch'am, an eye (List, No. 35); $p'\bar{a}d$, a foot (33); $p'\bar{o}nz$, the nose (34); tau or t'au, thou (21). We sometimes even find the sonant letter b aspirated. Thus, the standard $l\bar{a}p$, belly, appears in the Parable as $l\bar{a}b'$. The word $b\bar{a}z$, many, appears several times under this form in the specimens, but in No. 228 of the List of Words we have $b'\bar{a}z$ (written $b'\bar{a}z$ in the original).

This dialect also occasionally follows the eastern dialect in changing a medial mute into the corresponding spirant (see pp. 337ff.). Thus the word for 'father' is $pi\theta$, $p'i\theta$, or pit (written ;, or ;), 'mother' is $m\bar{a}\theta$ or $m\bar{a}t$, and 'brother' is $br\bar{a}\theta$ or $br\bar{a}t$, in Nos. 47, 48, and 49 of the List of Words. In the specimens, 'father' is always written 'piss' (;) and 'brother' ' $br\bar{a}s$,' which may, or may not, exactly represent the pronunciation intended. Again, in the Parable, we have gifta, he took (i.e. he fell on

his son's neck), for the standard western gipta. As written, these changes to spirants are sporadic, and, as a rule, the usual western spelling is preferred.

An Arabic 'ain becomes h in shāhir, for shā'ir, a singer (Specimen II).

In the declension of nouns, as stated above, the termination $-\bar{a}$ of the oblique case singular is sometimes dropped, so that, for instance, we have \tilde{a} mard (for marda). bahra $k\bar{u}$, that man divided (the property), and other similar cases.

In standard Western Balōchī the genitive singular ends in -a, as in lōga, of a house. In the present dialect this -a is represented by aī or by ē. Thus, \tilde{a} mulkaī tahā dōkālē kapta, in that country a famine fell; manī pisaī naukarā, my father's servants; ispētē aspaī zēn, the saddle of the white horse (List, No. 225); ach shaharaī bakkālēā, from a shopkeeper of the village (No. 241); gisē kirā rasita, (when) he arrived near the house; sautē tawār, the sound of a song; and, in Specimen II, Malik Dīnārē zahag, the son of Malik Dīnār; watī pisē miragā guḍ, after the death of his father; daulatē dard, the pain of wealth; kafanē zar, the price of a coffin; and others.

The plural termination, as elsewhere, is \tilde{a} , but $\bar{a}n\bar{a}$ is sometimes used instead. Thus, for the nominative plural, we have $wat\bar{i}$ $m\bar{a}l\bar{a}n\bar{a}$ $yak-j\bar{a}$ $k\bar{u}$, he collected his properties; $mulk\bar{a}n\bar{a}$ jata, countries were plundered (Specimen II); and, for the oblique plural, $yak\bar{e}$ $sh\bar{e}$ $naukar\bar{a}n\bar{a}$ $taw\bar{a}r$ $k\bar{u}$, he called one of the servants.

There is a vocative singular in a, as in pisa, O father!, zahaga, O son!

Adjectives call for no remarks. In one phrase, $sh\bar{e}$ $h\bar{u}k\bar{a}n\bar{i}$ $pash-kaptag\bar{e}$ $p\bar{o}st\tilde{a}$, from the husks that were left by the swine, $kaptag\bar{e}$ is not an adjective, but is in the genitive singular of the verbal noun kaptag. Pash-kaptag means 'to remain over,' and the whole phrase is literally 'from the husks of the remaining over of the swine.'

As regards pronouns, man is 'I,' but if the oblique case, manā, is prefixed to $a\bar{\imath}$, thou art, the two coalesce into $m\bar{a}\tilde{\imath}$, as in tau hamēsha gōn $m\bar{a}\tilde{\imath}$, thou art ever with me. The nominative plural is $am\tilde{a}$, not $am\bar{a}$, as in $am\tilde{a}$ war \tilde{a} , let us eat. The proximate demonstrative pronoun more nearly approaches the eastern than the western dialect, as will be seen from the following table:—

Sing.	Makrān.		East.	West.	
	Nom.	$\widetilde{m{i}}$	• 2	$ar{e}.$	
	Obl.	$\widetilde{m{i}}$, a $m{i}shm{ar{e}}$	$ ilde{e}shiy ilde{a}$	ishi $ar{a}$, $ar{e}$ shi $ar{a}$.	

The oblique case aishē is quite common. In the Persian character it is spelt without vowel points. In the transliterated version received with the copy in the Persian character it is spelt sometimes aishē, but more generally aishey. So far as I can gather from the method of spelling followed by the writer in transcribing into the Roman character, it is most probable that the sound meant is that of aishē.

The remote demonstrative pronoun, and pronoun of the third person is \bar{a} or \tilde{a} , and its agent case singular is also \tilde{a} , as in \tilde{a} gusht, he said ('thy brother is come'). The genitive is generally $\bar{a}\bar{\imath}$, in $\bar{a}\bar{\imath}$ jānā kanant, put ye (the robe) on his body. In the List of Words, the usual form of the genitive is $\tilde{a}h\bar{\imath}$, as in $\tilde{a}h\bar{\imath}$ brāt, his brother (No. 231).

No instance of any pronominal suffix occurs in the specimens, although there are several opportunities for their use.

The reflexive pronoun is wat, declined as in the western dialect. In one instance, the final $-\bar{a}$ of the oblique case singular is dropped, so that we have $wat-r\bar{a}$ (for $wat\bar{a}-r\bar{a}$) tai zahag $gush\tilde{i}$, I may call myself thy son.

The inanimate interrogative pronoun is che, what? (List, No. 93). When at, is, is added to it, it is shortened to chi, as in aiche matlab chi-at, what is the meaning of this?

The conjugation of the present tense of the verb substantive is as follows:-

'I am,' etc.

	Singular.	¢ ·			Plural.
1.	ã, वर्चे, um			_	ã.
2.	aī			-44	it.
3.	ĩ, ễ, dĩ		• .		ant.

The difference from the standard dialects is thus in the singular only. The following are examples of some of the singular forms:—

malāmat aữ, I am blameable.

aspēā suwār-ē, he is mounted on a horse (List, No. 230). aishē matlab chi-ai, what is the meaning of this?

As already stated under the head of pronouns, when $a\bar{i}$, thou art, is suffixed to $man\bar{a}$, me, the two together become $m\bar{a}\tilde{i}$. Similarly, $ta\bar{i} + a\tilde{i}$ becomes $ta\bar{i} - \tilde{i}$, it is thine.

The only irregular forms in the past tense of the verb substantive are atum, I was, and atai, thou wast.

For the negative verb substantive we have na-au or nayu, I am not (worthy).

In other verbs the conjugation does not materially differ from that of the standard western dialect. There are in the specimens three irregular past participles which are not the same as in the standard. The verb $\bar{a}yag$, to come, has its past participle ahta or aht, instead of atka; baiag, to become, has $b\bar{u}ta$, $b\bar{o}ta$, and $b\bar{u}$, as well as $b\bar{u}ta$; and kanag, to do, to make, has kurta or $k\bar{u}$, instead of kuta. Numerous examples of these will be found in the specimens and the List.

As an example of the future passive participle, we may quote tai zahag gushagī lāik nayī, I am not worthy to be called thy son. Here the form is quite regular.

For the imperative, second person singular, we have bi-dai (List, 234) and bi-dik (Parable), give thou; kan, make thou (List, 227); bi-gir, take thou (List, 235); bi-kash, draw thou (237); and $b\bar{u}$ or bai, be thou (168). The second person plural ends in -ant, not it, as in bi- $\bar{a}rant$, bring ye; kanant, make ye; and diyant, give ye, all in the Parable.

The present future closely follows the western standard.

The List of Words gives the following:--

'I strike,' 'I shall strike,' etc.

		•
Sin	ngular.	Plural.
	anĩ	.janã.
2. j	anai	janit.
3. j	ant	janant.

Similarly:

'I go,' 'I shall go,' etc.

1.	ravî	$rav\widetilde{a}$.
2.	rawai	rawit.
3.	rant	rawant,

Several other examples occur in the Parable and in the List of Words. Thus, we have $mir\tilde{i}$, I die; warant, they eat; and $d\tilde{a}rant$, they own. The Parable has $ra\tilde{i}$, not $raw\tilde{i}$, for I will go; and the List, No. 233, has nindit, he dwells. The prefixed k-occurs in the Parable in $p\tilde{a}d$ k- $\tilde{a}\tilde{i}$, I will arise, and in k-ait (List, 239), he comes, but nowhere is a- prefixed, which, according to Mockler's and Pierce's grammars, always occurs with this tense in the standard western dialect.

For the past tense, we have in the List of Words:-

6	T	struck.	,	T	have	struck	٠,	etc
		BLI UUN.			110 4 5	201 11111	Λ.	17171

	•	2
	Singular.	Plural.
1.	jatum	$jat ilde{a}$.
2.	jatai	jatit.
. 3.	jata, jat	jatant.

Similarly:-

'I went,' 'I have gone.'

	Singular.	Plural.
1.	shutum	$sholdsymbol{u}t\widetilde{a}$.
2.	shuta i	shut it.
3.	shuta, shut	shutant.

In the Parable, we have $b\bar{u}ta$, $b\bar{o}ta$, or $b\bar{u}$, he became, he was; and kurta or $k\bar{u}$, he did, he made. These all are of frequent occurrence. In List, No. 240, we have giptai, thou boughtest. These instances are all based on the short form of the past participle. Based on the long form, we have ahtagum, I have come (List, No. 224); gustagant, (days) passed; and kurtagant, they made. The last two are in Specimen II.

For the pluperfect, the List gives jatag-atum, I had struck. More doubtful is murtagā, he had died, in the Parable. It seems to be a shortened form of murtag-at.

We may note the presence of the conditional tense in ki man pa watī dostā majlasē bi-kurtē, that I might have made a feast with my friends (Parable). The form is quite regular.

For the present definite we have man janagā-um, I am striking (List, No. 191), and chārēnagā-ē, he is grazing (cattle) (List, No. 229).

Chārēnagā- \tilde{e} is also an example of a causal verb. Another example (Specimen II) is gwāzinta, he passed (a few days), as compared with gustagant, (a few days) passed.

FREE TRANSLATION OF THE FOREGOING.

It has been said by old men that after Malik Dinar's death his son made ducks and drakes of his property, for no guardian had been left to take care of him. His father had plundered the country-side and killed many men, and thus had amassed great wealth. In doing this he had experienced many troubles and sorrows, and his brothers had been killed. But his son had none of this trouble and sorrow,—the wealth lay there before his eyes. None of the toil of gaining affluence was his. He girded up his loins for squandering his inheritance; thousands of gold and silver fell from him into the hands of buffoons and singers, and much money did he waste on evil deeds. A short time passed in this way, and then he had lost all his accumulated capital. So he sold his inherited lands, and by this means passed a few days more. In the end came destruction. He sunk to being a beggar, and his followers and tribe-fellows all deserted him, for no one approved of a beggar. Finally he sunk to keeping body and soul together by picking up date seeds and eating them. When the end came there wasnot so much money in his house as would pay for his coffin, and at the funeral prayersthe people uttered gibes and taunts. So they buried him. The end of extravagance isruin.

The preceding specimen completes the list of those that I have received dealing with the western dialect. It has been seen that the first of the two sets comes from Balōch inhabitants of Karachi city. These dwell far to the east of Makrān, and their dialect shows that they must have come direct from that country to their present abode, where they still retain their home-dialect, and, moreover, that they must have come in comparatively recent times. Other Balōch inhabitants of the Karachi District, and of Sind generally, speak the eastern dialect. Some of these, in the Kāchhō tract of Karachi, are between the city of Karachi and Makrān, so that, in this case, we have speakers of the eastern dialect living to the west of the Makrānī speakers of Karachi city.

The remaining two specimens come from Makrān itself. No information has been received as to the precise locality in which they were recorded, but internal evidence shows that they come rather from North Makrān, in the neighbourhood of Panjgūr, than from South-West Makrān, near Kēch. As may be expected, the language of Makrān differs from place to place, and, if materials were available, no doubt a number of sub-dialects, each varying slightly from the other, could be recorded. We have, however, to be content with the specimens that are available. Mr. Denys Bray, in § 219 of the Baluchistan Census Report for 1911, gives the following brief but interesting account of some of the Makrān sub-dialects. In copying it, I have slightly altered the spelling of Eranian words so as to agree with the system followed in this Survey. It will be observed that he spells the Panjgūrī words pis, mās, brās, and zāmās with a final s, instead of with θ . I have not ventured to alter this, although it is possible that the sound meant is really that represented by the latter character. In writing Balōchī in the Persian character the letter ω is often used, instead of ω , to represent this sound:—

'The Balochi consonantal system has developed itself among the many dialects in a curiously uneven manner. One dialect, for instance, has faithfully maintained the original sounds in one portion of its consonantal system, and has evolved variations of its own in another; in a second dialect we are faced with the exact converse. In other words, there is no one dialect which has preserved the whole consonantal system of the parent stock in its archaic purity, and we are left to piece it together by a process of selection. To illustrate my meaning I will turn to Western in preference to Eastern Balochi, not only because it is more archaic, but also because the existence of the many sharply defined dialects within it has hardly been recognised at all. Take for instance these typical variations in the two Makrāni dialects spoken in Kēch and Panjgūr:—

OLD PERSIAN.	Modeen Presian.	BESIAN. MAK	
		Kēchī.	Panjgūrī.
pitar-, father	pidar	$m{pit}$	pis.
mātar-, mother	${f n}ar a dar$	$mar{a}t$	$mar{a}s$.
$br\bar{a}tar$ -, brother	$birar{a}dar$	$brar{a}t$	$brar{a}s$.
zāmātar-, son-in-law	$dar{a}mar{a}d$	$zar{a}mar{a}t$	$zar{a}mar{a}s.$
mahrka-, death	marg	marg	mark.
maxshi-, fly	m agas	magisk	makisk.

This comparative statement almost tells its own tale. For the preservation of the original consonants t, z, k, we took to Persian in vain, and have to turn to Makrānī Balochī. But even Makrānī preserves the archaic sound in both the dialects I have selected in the case of z only. And while Kēchī has retained the final t, it has, like Persian, forsaken final and medial k in favour of g. On the other hand Panjgūrī has struck out a line of its own in the radical change of final t to s [? θ], yet at the same time has clung conservatively to the ancient hard guttural. How uneven the consonantal development has been in the various

386 BALÖCHĪ.

dialects, may further be seen in the fact that Kēchī, while preserving an original final t, shows a distinct tendency to oust an initial d by the corresponding cerebral: dumb, tail, dumbag, sheep, $duw\bar{a}l$, wall. Panjgūrī on the other hand preserves the original forms: dumb, dumbag, $duw\bar{a}l$. Instances in which both these dialects (and indeed Balōchī generally) preserve, while modern Persian discards, an original final d, are fairly common: Pahlavi $m\bar{u}d$, hair, modern Persian $m\bar{u}$, Kēchī mud, Panjgūrī $m\bar{u}d$, is a case in point. This particular instance, by the by, is doubly interesting as illustrating a curious vowel variation in the two dialects, Kēchī, unlike Panjgūrī, having a tendency to shorten an original long \bar{u} : Panjgūrī $m\bar{u}d$, hair, Kēchī mud; Panjgūrī $s\bar{u}t$, profit, Kēchī sut; Panjgūrī $b\bar{u}ta$, was, Kēchī buta. In the dialects spoken in Mand and along the ccast, \bar{u} is regularly changed to \bar{i} : $m\bar{u}d$, $s\bar{i}t$, $b\bar{i}ta$ —one illustration out of many of the interestingly close connection of these particular Makrānī dialects with Eastern Balōchī.

But the subject of dialectical variations is at once too wide and too technical to be pursued further. Nor are the data available, for the study of Balöchī dialects has hitherto been neglected. The neglect is curiously ill-deserved. A careful analysis of the phonetic system of any one dialect would be labour well spent. It is the first step towards a comparative survey of the many phonetic systems now surviving in the Balöchī language, the results of which would be not only valuable in themselves, but of wide philological interest. The need for research into the related subjects of dialectical characteristics in vocabulary and grammatical system, I must leave to plead its own cause. So much however seems obvions. The longer the research is put off, the greater the difficulties that will attend it, and the less rich the results. Changes are in the air. Boundaries, both tribal and geographical, are gradually shifting and becoming absorbed. To a large extent this process is an inevitable outcome of our administration, and it is the more incumbent on nato record existing dialectical variations before they become merged into uniformity.'

Mockler refers to dialectic variations in several parts of his grammar, but nowhere states the localities where they occur. The following passage dealing with phonetic variations is of interest. I have altered the transliteration so as to agree with that of this Survey:—

'The Long Vowels and Diphthongs often permutate, أَ قَ being changed to رُ أَ يُ to وَ أَ وَ أَ كُلُ to وَ أَ وَ أَ كُلُ لَا اللهِ مُ أَ أَ عُلُوا اللهِ أَوْ اللهُ وَ أَ أَ عُلُوا اللهُ وَ أَ أَ عُلُوا اللهُ وَ أَلَا اللهُ وَاللهُ وَاللّهُ ولَا لَا لَا لَا لَا لَا لَاللّهُ وَاللّهُ وَاللّه

Among the consonants the following are sometimes found interchanged: ψp , ψb , ψf and ψg ; ψf ,

و في s and s d; چ ch, ش sh and و n and r; i h and و على s and s d;

These mutations constitute dialectic peculiarities, and may not be used at pleasure: thus, we find منت bita, بينه būta, bū

EASTERN DIALECT.

We commence the specimens of the eastern dialect of Balochi with a version in the dialect of Dera Ghazi Khan. This is that illustrated in the preceding grammatical sketch. I am indebted to the kindness of Mr. Longworth Dames, the author of the well-known Balochi Grammar, for its preparation.

BALOCHI OF NORTH BALUCHISTAN.

The two following specimens and the List of Words and Sentences on pp. 435ff. come from the District of Loralai, and may be taken as examples of the form of Eastern Balöchi spoken in North Baluchistan, in the country east and south of Quetta. It closely resembles the form of the language described in the grammatical aketch given above. The following are the few chief points of difference.

As in the neighbouring Sindhī, a preference is shown for cerebral letters. Thus, in the Parable, we have $d\bar{e}h$, instead of $d\bar{e}h$, a country, and, in the List of Words (No. 147), hind, for hind, a bitch. The letter r regularly becomes r before a dental, as in mard or mar, for mard, a man; $k'ard\bar{e}$, for $k'ard\bar{e}$, a few; $w\bar{a}r\theta a\theta ant'$, for $w\bar{a}rt'a\theta ant'$, they used to eat (husks), but $war\bar{a}$, I shall eat (Specimen II); $mur\theta a$, for murt'a, he died, but $mir\bar{a}$, I die; $\bar{a}r\theta\bar{o}$, for $\bar{a}rt'\bar{o}$, having brought (Specimen II), but $bi-\bar{a}r$, bring thou (Parable); and burz, for burz, high (List, Nos. 135, 231).

In several cases, especially after r, we have θ instead of the t that we should expect. Thus, besides $w\bar{a}r\theta a\theta ant$, $mur\theta a$, and $\bar{a}r\theta \bar{o}$, just quoted, we have $w\bar{a}r\theta a$, he has eaten (with harlots), and $gwashain\theta a$, called (thy son). Possibly this is a mistake of the scribe who wrote the specimens, but the words are printed as they were received.

The declension of nouns calls for but few remarks. In the western dialect, the genitive is formed by adding -a, as in $l\bar{o}ga$, of a house. In the eastern dialect, as described in the grammatical sketch, it generally takes no termination, but sometimes ends in $-\bar{e}$. So, in the present specimens, we have $ma\bar{i}$ $p'i\theta\bar{e}$ $b\bar{a}z$ $mazd\bar{u}r$ -ant', there are many servants of my father. Similarly, in Sentence 221, we have $dat'\bar{a}n\bar{e}$, of a tooth $(dat'\bar{a}n)$. Occasionally the termination $-\bar{a}$ of the oblique case is dropped, as in $p'i\theta$ (for $p'i\theta\bar{a}$) rahm $k'u\theta a-\bar{i}$, the father made pity to him, i.e. felt pity for him.

The nominative plural ends in $-\bar{a}n$, not in $-\bar{a}$. Thus, in the List of Words we have $pi\theta\bar{a}n$, fathers; $jinik'\bar{a}n$, daughters; $mard\bar{a}n$, men; $nari\bar{a}n\bar{a}n$, horses; $m\bar{a}\delta in\bar{a}n$, mares; $k'ai\gamma ar\bar{a}n$, bulls; $g\bar{o}\chi\bar{a}n$, cows; $b\bar{i}ng\bar{a}n$, dogs; $hind\bar{a}n$, bitches; and $buz\bar{a}n$, goats. In the Parable, we have, perhaps, one case of a nominative plural ending in $-\bar{e}$, viz. $hami\chi t'ar\bar{e}$ $s\bar{a}l\bar{e}$, for so many years (do I do service), but it is doubtful whether $s\bar{a}l\bar{e}$ is singular or plural, coming, as it does, after an adjective of number.

The dative plural ends in $-\bar{a}n$ -ar, as in (List) $p'i\theta\bar{a}nar$, to fathers; $jinik'\bar{a}ntar$ or $jinik'\bar{a}nr\bar{a}$, to daughters; $mard\bar{a}nar$ or $mard\bar{a}nr\bar{a}$, to men. Similarly, in the Parable-ambrahānar, (the father said) to the servants.

Adjectives sometimes drop the termination \tilde{e} , when it should according to rule appear. This is quite possibly simple carelessness. The cases of omission of the termination cannot be brought under any particular rule, except, perhaps, that, in the list of words, it does not seem to be used in the plural (cf. Nos. 123ff. and 130). The same peculiarity will be observed in the language of the Upper Sind Frontier.

The pronouns present a few divergencies from the standard. 'My' is $ma\bar{\imath}$, instead of $ma\tilde{\imath}$, and the dative plural, 'to us,' is $m\bar{a}$ -ar (cf. the dative plural of nouns in $-\bar{a}n$ -ar).

The demonstrative pronoun \tilde{a} , that, with ham prefixed, has a nominative plural $ham\tilde{a}h\tilde{i}$, those (husks), instead of $ham\tilde{a}h\tilde{a}$, etc. We may also notice the oblique plural $ham\tilde{a}hi\bar{a}$, which, with the preposition ash both prefixed and suffixed, takes the form sh-am $\tilde{a}hi\bar{a}$ -zh, in the first line of the Parable.

As regards verbs, the principal irregularities are connected with the tenses formed from the past participle. There are two forms which I am unable to explain. One is $k'apt'\bar{o}$, they began (to make merry). We should expect k'apt'ant' or $k'apt'a\gamma ant'$. $K'apt'\bar{o}$ is usually the conjunctive participle, 'having begun.' The other form is $\bar{a}\chi t'\bar{i}-\tilde{e}-\bar{i}$, (thy brother) has come (back safely) to him. Here \tilde{e} means 'is,' and \bar{i} ' to him,' but I cannot explain the form $\bar{a}\chi t'\bar{i}$, which apparently has the force of a past participle. There is no tense of this kind in any of the grammars. See, however, lower down.

There is an interesting case of contraction in $gw\bar{a}nji\theta\bar{o}$, (the elder brother) having called (a servant). The full form would be $gw\tilde{a}k'$ $ja\theta\bar{o}$. The two words have been contracted into one, and an i has been inserted on the analogy of other, regular, past participles.

In the eastern dialect, the pluperfect is formed by adding the past tense of the verb substantive to the long form of the past participle, as in $shu\theta a\gamma\bar{e}\theta$, he had gone, or he went a long time ago. In the western dialect, either the long form or the short form of the past participle may be used, as in shutagat or shutat. When, in the east, the short form of the past participle is employed, the tense has the force either of a habitual past, or of a conditional. Thus, in the east $shu\theta a\theta$ is either 'he used to go' or 'he would have gone.' But in the following version of the Parable we have one instance of $shu\theta a\theta$ used as a pluperfect, with the meaning of 'he went (a long time ago),' in \bar{o} and $a\bar{r}$ a a $shu\theta a\theta$, he did not go within. There are true examples of the habitual past in $w\bar{a}r\theta a\theta ant$ ' (for $w\bar{a}rt^*a\theta ant$ '), (the husks which the swine) used to eat, and $d\bar{a}\theta a\theta$, (no one) used to give (him anything). We have another tense,—the conditional past,—in $wa\theta\bar{i}$ $d\bar{a}f$ p'ur $k'u\theta$, he would have filled his belly, in which $k'u\theta$ represents the $k'u\theta\bar{e}$ of the grammatical sketch.

Intransitive verbs of motion are sometimes used passively, in an impersonal sense, with the subject in the agent case. Thus, $k'is\tilde{a}$ bach'ā ya dīrē dēhā shuba, literally, by the younger son it was gone to a far country, i.e. the younger son went to a far country. Similarly, $shuba-\bar{\imath}$ ya bakk'ālā, it was gone by him (i.e. he went) to a shop-keeper; and $wab\bar{\imath}$ p'ibār $\bar{a}\chi t'a-\bar{\imath}$, it was come by him (i.e. he came) to his father. This may possibly be an explanation of the puzzling form $\bar{a}\chi t'\bar{\imath}-\tilde{e}-\bar{\imath}$, already referred to. The word $\bar{a}\chi t'\bar{\imath}$ may be a contraction of $\bar{a}\chi t'a-\bar{\imath}$, it was come by him, and the whole may be then translated 'it is come by him to him.'

Reference has already been made to the curious use of the preposition ash, from, in the first line of the Parable. It is suffixed, as well as prefixed, to the same word, the suffix being in the form of zh, and the prefix in the form of sh, in sh- $am\tilde{a}hi\bar{a}$ -zh, from among them.

FREE TRANSLATION OF THE FOREGOING.

There were a tiger, a wolf, and a fox, and the three went a-hunting. They wentforth and slew a cow, a goat, and a hare. So they brought their booty, and collected ittogether. Then said the tiger to the wolf, 'get up and apportion the flesh.' The wolf
got up and said, 'your share is the cow, mine is the goat, and the fox can have the hare.'
At these words the tiger became furious, and struck the wolf such a blow that he fell down
dead. Then said the tiger to the fox, 'here you, get up and apportion the flesh.' The fox
replied, 'Master, this hare is for your morning snack, the goat will serve for your lunch,
and the cow will do nicely for your dinner in the evening.' Said the tiger, 'what, then,
is your share?' Said the fox, 'Master, I am not a person entitled to a share.'

At this
the tiger became mightily pleased with the fox, and said to him, 'here, I give you the
whole lot as a present. I'll go off and hunt again, and eat what I get by that.'

i.e. he was only a menial servant, who got what he could from his master's leavings. He could not claim any share-of right.

The following specimens of the eastern dialect of Balochi come from the Upper Sind Frontier District. The language is practically the same as that illustrated in the preceding grammatical sketch. The few divergencies are as follows. Many of them are hardly anything more than matters of spelling:—

The genitive singular of a noun is twice formed by adding $\bar{\imath}$ instead of \bar{e} , in the phrase $sha'ar\bar{\imath}$ wa $n\bar{a}ch\bar{\imath}$ $\bar{a}w\bar{a}z$, the sound of singing and dancing. The agent case is very carelessly used, the nominative being frequently used in its place. Thus, in the very first line we have, $k'is\bar{a}$ (for $k'is\bar{a}n\bar{a}$) gwasht'a, the younger said; and in the second part of the Parable we have $t'a\bar{\imath}$ $pi\theta$ (for $pi\theta\bar{a}$) majlis $d\bar{a}\theta a$, thy father gave a feast. In the List of Words, besides the regular plural formed by adding \tilde{a} , a periphrastic plural is also made by the addition of the word gal, a number, as in janik'-gal, daughters; jangal, women; $\bar{a}sik'-gal$, deer.

Adjectives call for only one remark. In the List of Words, the termination \tilde{e} is added only in the singular, and is wanting in the plural. Thus while we have $jaw\tilde{a}\tilde{e}$ $mard\tilde{e}$, a good man; and $jaw\tilde{a}\tilde{e}$ $jan\tilde{e}$, a good woman; we have, in the plural, $jaw\tilde{a}$ $mard\tilde{a}$, good men, and $jaw\tilde{a}$ $jan\tilde{a}$, good women. Whether this is simple carelessness or not I cannot say. The same peculiarity has been observed in the Balochi of Loralai (p. 394).

In the pronouns, the nasalization is omitted in the genitive. We have $ma\overline{\imath}$, my; $t'a\overline{\imath}$, thy; for $ma\overline{\imath}$, $t'a\overline{\imath}$. So, $man\overline{a}$, for $man\overline{a}$, to me. The plural of the second personal pronoun is the western $shum\overline{a}$ or $shw\overline{a}$, instead of $shaw\overline{a}$ or $shw\overline{a}$. There are several minor irregularities in the declension of the pronoun $haw\overline{a}$ of the third person. Thus, the genitive singular is $haw\overline{a}\overline{\imath}$, as well as $haw\overline{a}h\overline{\imath}$, and the dative, $haw\overline{a}r\overline{a}$ or $haw\overline{a}r$. The dative plural, used honorifically as a singular, is $ham\overline{a}hi\overline{a}r$, (I will say) unto him.

The nominative is continually used in the sense of the agent, as in $haw\tilde{a} da\theta a$, he gave (a share of the property); $haw\tilde{a} \min_{n} haw\tilde{a} \psi a$, he made entreaty; $haw\tilde{a} r\bar{a}h\bar{i} k'u\theta a$, he dispatched him (to feed swine); $haw\tilde{a} gwasht'a$, he said (in answer to his father).

In the verb substantive, there is occasional difference as regards nasalization. Thus, the second person singular is \tilde{e} , as well as \tilde{e} , and the third person singular is \tilde{e} , as well as \tilde{e} . Similarly, in other verbs, the third person singular of the present ends in \tilde{e} , not in \tilde{e} . For the present-future, the List of Words gives $jan\tilde{a}$ or janan, I shall strike, and $jana\tilde{e}$, instead of $jan\tilde{e}$, you will strike. Other minor variations, such as $b\tilde{e}\gamma\tilde{e}$, for $b\tilde{e}a\gamma\tilde{e}$, are evident contractions. More important is the method of treating the past tenses of transitive verbs. Properly speaking the object of the verb in such a tense should be in the nominative; but here it is several times put (as also occurs in Hindostānī and cognate forms of speech) into the dative. Such cases are:—

hawa mālā dā θa , he gave the property, literally, by him, as for the property, it was given.

 $\tilde{a}hi\bar{a}r$ $jaw\tilde{a}$ - $dur\bar{a}h$ $di\theta a$, (he) saw him safe and sound, literally, as for him, he was seen, etc.

 $haw\tilde{a}$ t'aī $m\bar{a}l\bar{a}$ - $r\bar{a}$ gum $k'u\theta a$, he made thy property lost, literally, as for thy property, by him it was made lost.

KASRĀNĪ BALŌCHĪ.

The Kasrānī Balōches are of Rind descent, and form the most northerly of all the organized tribes. They occupy parts of the Sulaimān Mountains and the adjoining plains in the Dera Ismail Khan and Dera Ghazi Khan Districts. No statistics are available as to their numbers.

These Kasrānīs have Paṣḥtō speakers to their north and west, and Lahndā speakers to their east, and their own language is very corrupt. This is most especially the case of the specimens that came from the Dera Ismail Khan District. The language of those of Dera Ghazi-Khan more nearly approaches the standard. I give as a specimen a version of the Parable from the former locality, as best illustrating its mixed character. It will be seen that while Paṣḥtō has had little or no influence upon it, the influence of Lahndā in idiom, vocabulary, and grammar is marked.

The vocabulary is much mixed with words borrowed from Lahndā. Such are: —ajjan (Lahndā ajjan), yet, still; $ch\bar{e}t\bar{a}$, sense; $d\bar{i}r$ (L. $dh\bar{e}r$), very; $jitt\bar{e}$ (L. $jitt\bar{i}$, as much), worthy (to be called); $jutt\bar{i}$, shoes; the Lahndā phrase $lagg\bar{a}$ wanjan, to start, set forth, copied in $lagi\delta\gamma\bar{a}$ shu δa ; the suffix -kar of the conjunctive participle in $t'a\chi t'\bar{o}-kar$, having run; $gir\bar{a}-kar$, having taken; and $gua\gamma\delta\bar{o}-kar$, having called; $labb'i\bar{o}$ (L. labbhan, to get), having been got; $mil\bar{a}$ (L. $mili\bar{a}$), he was got; $puch'\delta a$ (L. puchhan, to ask), he asked; $s\bar{a}rw\tilde{e}$ (L. $s\bar{a}r\bar{a}$), all; $tark\bar{a}$, property; $t\bar{e}$, and; $wand\delta\bar{o}$ (L. wandan, to divide), having divided; and others. We have a borrowing from Sindhī in the word $t'\bar{a}$, corresponding to the Sindhī feminine $th\bar{i}$, was, used to form a pluperfect in the Sindhī style in $k'u\delta\gamma\tilde{a}-t'\bar{i}$, (when) he had wasted (all his property).

Besides the above, there are several words that I cannot find in any Balōchī vocabulary, and which I have not identified as coming either from Paṣḥtō or from Lahndā. Such are:— $ch'i\bar{e}$, moreover; $j\bar{a}$ - $\bar{a}\chi t'a$, (sense) came (to him); $zijj\bar{a}$ $k'a\delta\gamma\bar{a}$ - \bar{i} , he collected (his property). The phrase $\gamma a\delta\bar{i}$ $shu\delta a$ is said to mean 'he sent,' but it is difficult to understand this. The word $\gamma a\delta\bar{i}$, commencing with the letter γ , cannot be Balōchī. Possibly it may be explained as 'sending of him $(\gamma a\delta - \bar{i})$ became $(shu\delta a)$.' Another phrase I am unable satisfactorily to explain is zirih $m\bar{a}$ -k'in- $\bar{i}h$, put ye on him (a garment, ring, shoes). $M\bar{a}$ -k'in- $\bar{i}h$ is equivalent to the standard $m\bar{a}n$ -k'an- \bar{i} , but the meaning of zirih is unknown to me, unless it means 'armour.' Compare, however, $z\bar{i}r\bar{e}$, lift ye, in the Sind specimen on p. 421.

The pronunciation of this form of Balōchī shows many peculiarities. Contraction is frequent. Thus, a is dropped in $b\bar{\imath}\delta\gamma\tilde{a}$, for $b\bar{\imath}\theta a\gamma\tilde{a}$, they became; $k'a\delta\gamma\bar{a}-\bar{\imath}$, for $k'u\theta a\gamma\bar{a}-\bar{\imath}$, he made; $ch'ar\bar{a}n\gamma\bar{a}$, for $ch'ar\bar{a}n\alpha\gamma\bar{a}$, for feeding. Other instances of contraction are $p'\bar{a}\delta w\tilde{a}$, for $p'\bar{a}\delta-\bar{a}\gamma\tilde{a}$, I will arise; $gua\gamma\delta\bar{o}$, for $gw\tilde{a}k'ja\theta\bar{o}$, having called; and $puch'\delta a$, for $puch'i\theta a$, he asked.

The vowel a sometimes becomes i in the conjugation of the verb $k'ana\gamma$, to do, to make. Thus, we have guzrān $k'iny\bar{a}$, a living is being made; $k'in-\bar{\imath}h$, for $k'an-\bar{\imath}$, make on him. At other times the a is preserved, as in k'ana, I will make. The past tense of the same verb is generally $k'u\delta a$, etc., for $k'u\theta a$, etc., but occasionally the u becomes a, as in $zijj\bar{a}$ $k'a\delta\gamma\bar{a}-\bar{\imath}$, he collected (his property); $k'a\delta a$, he made (entreaty). We have \bar{u}

5 G 2

¹ This was received nearly twenty years ago. Since then all the Balöchi-speakers have disappeared from the District. See p. 331.

-406 Balochī.

for \tilde{o} in $\tilde{u}\delta\tilde{a}$, for $\tilde{o}\delta\tilde{a}$, there. A long final vowel is often nasalized, as in dasta, on the hand, and other instances.

The most striking feature in the pronunciation of Kasrānī is the regular change of θ to δ . The sound of θ does not occur once in the whole Parable. As examples of the change, we may quote $barā\delta$, for $brā\theta$, a brother; $bi\delta a$, for $bi\theta a$, became $da\delta \gamma i$, for $da\theta a \gamma a i$, he gave; $di\delta a$, for $di\theta a$, saw; $k'a\delta \gamma a i$, for $k'u\theta a \gamma a i$, he made; $lagi\delta \gamma a$, for $lagi\theta a \gamma a$, he became attached; $p'i\delta$, for $p'i\theta$, a father; $puch'\delta a$, for $puch'i\theta a$, asked; $r\delta \delta$, for $r\delta \theta$, he goes; $shu\delta a$, for $shu\theta a$, he went, he became; $wa\delta i$, for $wa\theta i$, own; $wand\delta i$, for $wandi\theta i$, having divided, and many others. In one case a standard θ is exceptionally represented by t', viz. in wanja i, to go, and means literally 'having caused to go.' A somewhat similar case is ashkt'a, for $ashk'u\theta a$, heard.

In the word k'apt'a, he fell, which occurs three times, the pt' is changed to tt, so that we have k'atta.

There is a tendency to vocalize the semivowel w into u, as in $guay\delta \bar{o}$, for $gw\tilde{a}k'$ $ja\theta \bar{o}$, having called; guar, for $gwar\bar{a}$, with; and guasht'a, for gwasht'a, said. In each case, the w follows a g.

The numeral 'one,' used for the indefinite article, appears under the forms $y\bar{a}$ and $y\bar{e}$. In the latter case, the suffix $-\bar{e}$ of the indefinite article appears to have been added.

In the declension of nouns, the direct form is often carelessly used in the place of the oblique form, or, in other words, the final $-\bar{a}$ of the oblique form is often dropped. Thus, we have $bach'-r\bar{a}$, (the father gave an embrace) to the son; or, (the father said) to the (elder) son; bach', the son (said, 'I have sinned'); $p'i\delta-r\bar{a}$, (I will say) to the father. As instances of irregular oblique forms, we have $k'as\bar{a}in\bar{a}$, the oblique case of $k'as\bar{a}$, the younger (son); $dast\bar{a}$, on the hand; and $alm\bar{e}-r\bar{a}$, (said) to people.

Adjectives sometimes do not take the final $-\tilde{e}$ when used attributively. Thus, we have miza bach, the elder son. The word for 'good' is juvān, which, when used attributively, becomes $j\tilde{o}\tilde{e}$, in $j\tilde{o}\tilde{e}$ $j\tilde{o}\tilde{e}$ $jarr\tilde{a}$, excellent garments. Zindayā, as well as zinday, is 'alive.' Har-donnānī means 'of both.'

As regards pronouns, $m\bar{a}$ is 'I.' The same form is used for the agent singular in $m\bar{a}$ $k'u\delta a$, I have done (sin). The genitive singular is $ma\bar{e}$, of me, my, and also $ma\bar{i}$, in $ma\bar{i}$ $p'i\delta\bar{a}$, (servants) of my father. Manā, to me; $m\bar{a}$ - $r\bar{a}$, (it was proper) for us.

 T^iau is 'thou' and 'by thee.' The genitive singular is $ta\tilde{e}$, of thee, thy, with $ta\tilde{e}\gamma\tilde{a}$, thine, as genitive absolute. The oblique plural is $sh\tilde{o}\tilde{e}$, as in $m\tilde{a}$ $sh\tilde{o}\tilde{e}$ warda k'ana, I will make a dinner for you, i.e. I will give you a feast.

The proximate demonstrative pronoun is \bar{e} , this; sing. gen. ishī, obl. ishiā. Another form of this pronoun occurs in wī bach maē murt ayā, this my son died; and lahwā wīshan gungā p'ur k'ana, I will fill my belly with this. The latter form is not easy to explain.

The remote demonstrative pronoun, and pronoun of the third person, 'that,' 'he,' is of frequent occurrence, and appears in several forms. These may be grouped as follows:—

	Sing.	Plur.
Nom.	$ar{a},~\widetilde{ar{a}}$	•••
Obl.	$ar{a}$ hi $ar{a}$, $ar{a}$ hi $ar{e}$	•••
Gen.	āhī, ãhī, āhiē	āhā.
Dat.	āhī-rā, āhiā-rā, āhiē-rā	ãhā-rā.

Examples of these forms are:—

ā p'āxt'a, he arose.

ã wēla, at that time.

āhiā manā di, give that to me.

āhiā dihāsa, he gave (the property).

āhiē guasht'a, he said.

āhī dil lōṭ'ēs, his heart longs.

a hi p'iòa ahiē-rā dīòa, his father saw him.
vā ādmiē āhiē dō hach'ā, of a certain man, of him (

yā ādmiē āhiē dō bach'ā, of a certain man, of him (were) two sons. Regarding the meaning here of āhiē, see the remarks below, under the head of the verb substantive.

āhiē mulk' nōyā shusa, he went (i.e. had gone) to his field.

k'asēā āhī-rā na dāb, no one gave to him.

āhī-rā p'isā zurt'o ch'ukk'a, his father raised and kissed him.

āhiā-rā ch'ī p'ak'ar bība, want of things happened to him.

 $\bar{a}hi\bar{e}$ - $r\bar{a}$ $d\bar{\imath}\delta a$, saw him (as above quoted).

and gave to them.

ãhā guzrān k'inyā, their living is being made.

The pronominal suffix of the third person singular is $\bar{\imath}$ or $\bar{\imath}h$. For $\bar{\imath}$, we have examples such as $k'a\delta\gamma\bar{a}-\bar{\imath}$, he made. In $d\bar{a}\delta\gamma-\bar{\imath}$, he gave, the final a of the participle has been dropped. For $\bar{\imath}h$, there is, three times, $m\bar{a}-k'in-\bar{\imath}h$, put on him. In $sar-\bar{a}\chi t'\bar{e}-w\bar{\imath}na$, remained over for them, $w\bar{\imath}na$ also seems to be a pronominal suffix.

As in the standard dialect, the relative pronoun is generally k'i, borrowed from Persian. But, in one place, an attempt is made to utilize the interrogative pronoun ch'i, what?, in the formation of a new relative pronoun. The sentence is $\bar{a}ch'i\bar{a}$ $jahl\bar{i}bal\bar{a}$ $war\bar{a}n$, (husks) which the wild beasts (i.e. swine) eat. Here $\bar{a}ch'i\bar{a}$ is the accusative singular of $\bar{a}ch'i$, which is a compound of the demonstrative pronoun \bar{a} with the interrogative ch'i.

One more pronominal form may be noted,—indar, so many (years), used instead of the standard ixt'ar.

For the verb substantive, we have $-\bar{e}$, is, in $ch^i\bar{\imath}-k\bar{a}r-\bar{e}$, for what is (this matter)? For $a\theta$, was, we seem to have a in \bar{e} $g\bar{a}lwari$ $m\bar{a}-r\bar{a}$ $juw\bar{a}n-a$, this affair was good for us. In the first line of the Parable, $y\bar{a}$ $\bar{a}dmi\bar{e}$ $\bar{a}hi\bar{e}$ $d\bar{o}$ $bach'\bar{a}$, of a certain man there were two sons, the word for 'were' is omitted. Whether this was accidental or intentional, I cannot say. In the specimen as received, the word $\bar{a}hi\bar{e}$ is carefully translated 'his.' It is, however, possible that it is really a corruption of the Lahndā $\bar{a}hin$, they were. In the Persian character, as received, it is distinctly written \bar{a} which may be a mistake for \bar{a} .

For the negative verb substantive, we have $ni\tilde{a}$, I am not.

For the verb corresponding to the Persian hast, is, we have ast'ai, thou art (ever with me), and mae bahara k'i rizq ast'ī, the share which is my property.

The conjugation of the active verb presents several irregularities. Most of these are due to the change of θ to δ already mentioned, but there are others. We have an oblique infinitive in $ch'ar\bar{a}n\gamma\bar{a}$, for $ch'ar\bar{a}na\gamma\bar{a}$, for feeding (swine), but in gustnay $jitt\bar{e}$, fit to call (thee father), the final \bar{a} has been dropped.

We have an oblique plural of the past participle guasht'ay, a thing said, in guasht' $\gamma \tilde{a}$ p'asē, (I never acted) behind what (thou) hast said, i.e. against thy command.

The conjunctive participle generally ends in \bar{o} , as in the standard. Thus, $b\bar{\imath}\delta\bar{o}$, for $b\bar{\imath}\theta\bar{o}$, having become; $k^{\iota}u\delta\bar{o}$, for $k^{\iota}u\theta\bar{o}$, having made; $labb^{\iota}i\bar{o}$, having obtained (borrowed from Lahndā); $wand\delta\bar{o}$, for $wandi\theta\bar{o}$, having divided; $wanj\bar{e}t^{\iota}\bar{o}$ (not $wanj\bar{e}\delta\bar{o}$), having caused to go, i.e. having wasted; $zurt^{\iota}\bar{o}$, having raised. To this the Lahndā suffix -kar is sometimes added, as in $gua\gamma\delta\bar{o}$ -kar, having called; $t^{\iota}a\chi t^{\iota}\bar{o}$ -kar, having run. In one case, $gir\bar{a}$ -kar, having taken, a purely Lahndā form is used, although the verb $gira\gamma$, to take, is Balōchī.

The imperative presents frequent irregularities. Thus, we have di, for dai, give thou; irk', for $\bar{e}r$ -k'an, place thou (me as a servant); $m\bar{a}$ -k'in- $\bar{i}h$, for $m\bar{a}n$ -k'in- \bar{i} , put thou on him. With the prefix bi-, we have b-ih, for bi-y- \bar{a} , come thou; and b- $ur\bar{e}$, for ba-war, eat thou. The last is so translated in the specimen as received, but it may be for b- $ur\bar{e}$, for ba- $war\bar{a}$, let us eat, which is the sense required by the passage. Many of the others, though singular in form, must be translated with plural meanings.

The first person singular of the present-future generally ends in $-\tilde{a}$, as in the standard. Thus, we have $mir\tilde{a}$, I die; $p'\tilde{a}\delta w\tilde{a}$, for $p'\tilde{a}\delta - a\gamma\tilde{a}$, I will arise; $gush\tilde{a}$, I will say. Three times, however, the verb $k'ana\gamma$, to make, has k'ana, not $k'an\tilde{a}$, I will make. On one occasion this is joined to the past tense of $sar-\tilde{a}\gamma$, to form a continuous past, in k'ana $sar-\tilde{a}\chi t'a\gamma\tilde{a}$, I have continued doing (thy service), literally, I do, I remained. The third person singular ends in δ , corresponding to the standard θ . Thus, $l\tilde{o}t\tilde{e}\delta$, he longs (to eat the husks), for standard $l\tilde{o}li\theta$; and $r\tilde{o}\delta$, for $r\tilde{o}\theta$, he does (not) go (into the house). In both cases these are historical presents, used with the force of the past. For the third person plural, we have $war\tilde{a}n$, for standard warant', (the swine) eat.

As for the past tense, we have a first person singular in $sar-\tilde{a}\chi t'a\gamma \tilde{a}$, I remained, already mentioned under the head of the present-future. As in the standard dialect, the third person singular most often ends in -a, i.e. has the short form of the past participle. Thus, ashkt'a, for $ashku\theta a$, heard; $bi\delta a$, became; ch'ukk'a, for $ch'uki\theta a$, kissed; $di\delta a$, saw; $k'u\delta a$, made, did; also $k'a\delta a$, in minnat $k'a\delta a$, made entreaty; k'atta, for k'apta, he fell, as in $k\tilde{a}l$ k'atta, a famine fell; this verb is also used to intensify the meaning of a conjunctive participle, as in $labb'i\tilde{o}$ k'atta, he has been unexpectedly obtained; zinday $bi\delta \tilde{o}$ k'atta, he unexpectedly became alive. Other third singular pasts are $lai\delta ha$, for $l\tilde{a}i\theta a$, he touched; $p'\tilde{a}\chi t'a$, for $p\tilde{a}\delta - \tilde{a}\chi t'a$, he arose; $puch'\delta a$, asked; and $shu\delta a$, went, became.

Sometimes, as in the western dialect, the long form of the past participle is used for this person of the tense. It will be remembered that the long som is not used in the East unless a termination is added (see p. 349). The long form, however, does not here end in γ , but in $\gamma \tilde{a}$ or $\gamma \tilde{a}$. Thus we have $lagi\delta \gamma \tilde{a}$ $shn\delta a$, for $lagi\theta a$ $shn\theta a$, a translation of the Lahndā $lagg\bar{a}$ $g\bar{e}\tilde{a}$, and meaning the set forth; $murt^{*}a\gamma \tilde{a}$, he died, or the one who was dead, according to context; $b\tilde{a}\delta\gamma \tilde{a}$ or $b\tilde{a}\delta\gamma \tilde{a}$, for $b\tilde{a}\theta$, he became, or he who had become. With the pronominal suffix $-\tilde{a}$, we have $d\tilde{a}\delta\gamma - \tilde{a}$, given by him, i.e. he gave, in $g\tilde{a}r$ $k^{*}u\delta\tilde{a}$ $d\tilde{a}\delta\gamma - \tilde{a}$, he wasted; and $k^{*}a\delta\gamma \tilde{a} - \tilde{a}$, for $k^{*}u\theta a\gamma - \tilde{a}$, he made (collected).

 $D\ddot{a}\theta a$, the past of the verb $d\ddot{e}a\gamma$, to give, appears under three forms. We have $d\ddot{a}\delta\gamma - i$ just quoted, and also, twice, $d\ddot{a}\delta a$, gave (answer), and did (not) give (a kid), and wand $\delta \ddot{a}$ divided (his goods). Twice we get corrupt Lahnda forms of this tense,

in zinda $bi\bar{a}$, for zinday $bi\theta a$, he became alive, and $mil\bar{a}$ in zinday \bar{a} $\bar{a}\chi t'a$ $mil\bar{a}$, he came alive (and) was obtained. In $sar-\bar{a}\chi t'\bar{e}-w\bar{i}na$, food remained over for them, I am unable to explain the form $\bar{a}\chi t'\bar{e}$. $W\bar{i}na$, as already stated, seems to be a pronominal suffix.

One instance of the third person plural of this tense occurs in $s\bar{a}rw\tilde{e}$ $\chi ush b\bar{\imath}\delta\gamma\tilde{a}$, all became happy.

A pluperfect borrowed from Sindhī occurs in $s\bar{a}rw\tilde{e}$ $ch'\bar{\imath}$ $wa\delta\bar{\imath}$ $g\bar{a}r$ $k'u\delta\gamma\bar{a}-t'\bar{\imath}$, (when) he had wasted everything of his own. Here $t'\bar{\imath}$ (Sindhī $th\bar{\imath}$) is feminine, to agree with $ch'\bar{\imath}$, a thing.

We have a conditional in $m\bar{a}$ k'u $\delta a\tilde{i}$, for $m\bar{a}$ k'u $\theta \tilde{e}$, I might have made (a dinner for my friends), and a definite present in k'inyā, is being made. This latter word is puzzling. The form is active, but the sentence in which it occurs requires it to be construed passively. It runs $b\bar{a}z$ mihnatī maī pi $b\bar{a}$ juānīyā $\tilde{a}h\bar{a}$ guzrān k'inyā, which can only mean '(there are) many servants of my father; of them $(\tilde{a}h\bar{a})$ living is being well made.' If we translated 'many servants of my father are making their living well,' we should require wa δi instead of $\tilde{a}h\bar{a}$.

We have a passive in *gushijayā*, (worthy) to be called, and causals in *charānyā*, (sent him) to feed (swine), and *wanjēt'ō*, having caused to go, *i.e.* having wasted. It has been previously pointed out that the last is borrowed from Lahndā.

The following adverbs may be noted:— $d\bar{e}w\bar{a}$, in future.

 $p'a\delta\bar{a}$, for $p'a\delta\bar{a}$, behind.

t'arzan, a second time, again. Compare the standard t'aray, to return.

Adverbs are also formed, as in the standard, by adding $-i\gamma\bar{a}$. Thus, juaniyā, well; xushiyā, happily.

The following postpositions may be noted:—
andrā, within.
dē, for dēmā, before.
guar, with, by means of.
gurā, (distant) from.
gungā, with, by means of.

BALOCHI OF SIND.

We know from history that, in the course of their eastward migration, many Baloches settled in what is now the province of Sind. They are scattered over the whole area. Some of them, such, for instance, as the Jaṭkī-speaking Lēghārīs, have abandoned their tribal language, and speak that of the people amongst whom they have settled, but about 200,000 out of the 340,000 Baloches in Sind still speak Balochī. Most of these people are bilingual, and speak Sindhī as well as Balochī. It follows that their Balochī is much mixed with Sindhī. In other respects, with one exception to be noted below, they all use the eastern dialect.

The original estimates, prepared for this Survey, of the number of persons whose native language was Balochi, were based on the Census of 1891, and, for Baluchistan, were necessarily incomplete. To use these estimates now would give a false idea of the number of speakers, and accordingly, as has been also done in the case of Paṣḥtō, I use for Balochi the figures of the Census of 1911. According to that census the number of speakers of Balochi in Sind is as follows:—

Name of District	or otl	er Are	.								Num	ber of Speakers.
Hyderabad .	•		•		•	•		•	•	•	•	28,731
Karachi	•	•	•	•	•	•	•	•	•	•	•	3 2,523
Larkana	•	•	•	•		•	•	•	•			54,32 8
Sukkur .	÷	•	•	•	•	•	•	•	•	•	•	9,276
Thar and Parkar	•	•	•	•	•	•	•	•	•	•	•	12,708
Upper Sind Frontier	•	•		•	•	•		•	•	•	•	56,5 89
Native States and Ag	encie	8 .	•	•	•	•	•	•	•		•	4,236
									To	TAL	•	198,391

Of these, about 10,000 speak the western, or Makrani, dialect. They are principally coolies from Makran, who find work in the Town of Karachi and its neighbourhood. Their language has already been considered on pp. 364ff.

The remaining 188,000 all speak the eastern dialect, and here again we must make another division. The Upper Sind Frontier District is geographically a part of the Balōchī-speaking tract of Baluchistan, and the Balōchī spoken here is the same as that spoken in north-eastern Baluchistan and in Dera Ghazi Khan. It is a very pure example of the standard eastern dialect, and, as such, has been already considered on pp. 401 ff. The remaining speakers of Balōchī in Sind employ, as has been explained, a very mixed form of the language. We may perhaps consider as the most typical form of this mixed Balōchī that known as 'Kāchhē-jī Bōlī.' The term 'Kāchhō' is the local name for the west of Karachi District, separating it from Baluchistan. It has a strong Balōch population, and those who speak the Kāchhē-jī Bōlī may be estimated as numbering about 5,000 souls. We thus get the number of speakers of Balōchī in the Karachi District divided as follows:—

Makrānī Kāchhē-jī													10,000 5.000
Others													-
Omers	•	•	•	•	•	•	•	•	•	•	•	-	
										To	TAL		32,523
,													

Those classed as 'others' speak the ordinary mixed Balōchī of Sind, i.e. a Balōchī which is more mixed with Sindhī than even the Kāchhē-jī Bōlī. So far as Karachi is concerned, they are strongest in the north of the District. The Balōches of the rest of Sind cannot be put down as inhabiting any particular sites. They are distributed among the other inhabitants.

Dividing the language according to dialectic forms, we may, thus, put the number of Balochi-speakers in Sind as follows:—

Western Dialect (Makrānī)	•	•		•	•	•	•	•	•	•	10,000
Pure Eastern Dialect .	•	•	٠	•	•	•	•	•	•	•	56,589
Mixed Eastern Dialect	• -	•	•	•	•	•	•	•	•	•	131,802
							٠				
•								To	TAL	•	198,391

It may here be noted that the speakers of this mixed dialect have overflowed into the Panjab, 1,144 being found in the adjoining State of Bahawalpur. It is unnecessary to discuss the language of these people, or to give examples of it as it in no way differs from the mixed speech of the neighbouring tracts of Sind.

As explained above, specimens of Makrānī and of the dialect of the Upper Sind Frontier have already been given. It now remains only to describe the mixed dialect. For this I first give specimens of the Kāchhē-jī Bōlī, and then a couple of short passages from Hyderabad and Khairpur.

The specimens of Kāchhē-jī Bōlī consist of a version of the Parable of the Prodigal Son and of one of those Balōchī ballads that form the nation's literature. In the latter there are several difficult passages, and here again I must express my indebtedness to Mr. Longworth Dames for much help which he has been kind enough to give me in translating many of them, and in explaining several of the more obscure references.

The following sketch of dialectic peculiarities is based on the specimens.

BORROWING.—There is much borrowing from Sindhī. Thus we have the Sindhī double consonants in words such as bbilī, a cat; bbanī, a field; ddēh, a country; dduk'āl, a famine; guddā, then; aggā, before; and ggãway, singing. Nouns occasionally end in the characteristic of Sindhī. Such are gunāh, sin; ch'am, an eye; daf, a mouth, and many others in the List of Words on pp. 435ff. Words borrowed from Sindhī are common. We may notice, as typical, ai, and; pand, a road (List, No. 224); and jahirō-k'ũ, like. Sindhī verbs are taken and conjugated in the Balōchī fashion, as in chamburisa, he adhered (S. chamburan) and lab'isa-astē, he has been got (S. labhan). In k'apāi-t'aī, he squandered; samjāi-t'aī, he remonstrated; and viñāi-t'aī, he wasted, we have apparently the Sindhī verb thian, to become, with the Balōchī suffix -ī of the third person singular. But the form is not clear to me.

PRONUNCIATION.—The letters θ and δ of the standard Eastern Dialect are always represented by s and z, respectively. We have seen (p. 338) that Indian writers of Balochi in the north of the eastern tract are often unable to pronounce the sounds of θ and δ , and use s and z to represent them. As, in that case, this was a mere scribal error, it was allowable to correct the transliteration by giving the proper spelling. In Karachi, however, the state of affairs may be different, and I have not ventured to

¹ Possibly these spellings are due to the employment of a scribe accustomed to write Sindhi.

make the same corrections in the following specimens. The sounds are regularly written ω and j in the Persian character, and may, or may not, represent ω and j respectively. The matter must here be left in doubt. Examples are $br\bar{a}s$, for $br\bar{a}\theta$, a brother; was, for wa $\theta\bar{a}$, own; $d\bar{a}sa$, for $d\bar{a}\theta a$, given; k'usa, for k'u θa , made; shusa, for shu θa , gone; and many other past participles; hav $\bar{o}z\tilde{a}$, for hav $\bar{o}\delta\bar{a}$, there; and $n\bar{o}z$, for $n\bar{o}\delta$, rain.

As in Sindhī, the letter \underline{r} is very often substituted for r. Thus, we have $ha\underline{r}\text{-}ch'\overline{\imath}$, whatever; $ma\underline{r}dun$, a man; $p'u\underline{r}sisa\overline{\imath}$, for $p'ursi\theta a\overline{\imath}$, he asked, and others. In $ward\overline{\imath}$, for $wald\overline{\imath}$, an answer, l has become r.

Elision and contraction are frequent. Thus, in $m\bar{a}n$ -tika, for $m\bar{a}n$ - $\bar{a}tka$, the \bar{a} has been elided; in $ju\bar{a}n\tilde{e}$ (List, 119) or $ju\bar{a}\tilde{e}$ (Parable), good (attributive), n is optionally dropped. In the standard dialect we have $p'\bar{a}\delta$ - $\bar{a}\gamma$, to arise. Here we have $p'\bar{a}z$ -a-k'- \bar{a} , I will arise, but p'- $\bar{a}tik\bar{o}$, having arisen. The second person plural of the imperative ends in t, as in $pahr\bar{a}in\bar{e}t$ - \bar{i} , clothe ye him; $p'irn\bar{e}t$ - \bar{i} , put ye on him. But when the $-\bar{e}t$ is final, the t is dropped, and we get forms such as $z\bar{i}r\bar{e}$ (not $z\bar{i}r\bar{e}t$), lift ye; bi- $\bar{a}r\bar{e}$ (not bi- $\bar{a}r\bar{e}t$), bring ye. In the standard dialect, this form ends in θ , and we should expect here s, not t.

As usual, when a word ends in a nasalized vowel, the nasal sound becomes a full n before another vowel. A good example is $ast\tilde{e}$, he is, but $d\tilde{\imath}sa\text{-}asten\text{-}\tilde{\imath}$, has been seen by him.

In words like $\bar{a}tika$, he came, and $t'itik\bar{o}$, having run, for $\bar{a}tka$ and $t'akt'\bar{o}$, respectively, an i has been inserted between t and k, to help the pronunciation.

Note that the aspiration of the consonants k', ch', p', t', and t' is very irregular. It should probably follow the same rules as in the standard, but I have spelt the words as I have received them.

DECLENSION.—Substantives.—We have seen that, in the standard Western Dialect, the genitive singular is the same in form as the oblique singular, and, like it, ends in a or \bar{a} , although Mockler makes an apparent distinction by writing the genitive as ending in a, and the oblique as ending in \bar{a} . In the Persian character a final \bar{a} is quite commonly written a, so that, e.g., $r\bar{a}j\bar{a}$ may be written $r\bar{a}ja$ ($|\cdot|$), or $|\cdot|$), and $l\bar{o}g\bar{a}$ may be written $|\cdot|$ 0 or $|\cdot|$ 1. In the following specimens we occasionally find this western custom followed, the genitive singular being written with a final a or \bar{a} . Thus, we have a in p'isa in $ma\tilde{i}$ p'isa $gur\bar{a}$, (there are several servants) before my father; $was\bar{i}$ p'isa $was\bar{i}$ $was\bar{$

The eastern custom of giving the genitive no termination is also common. Thus, while in cases such as $dasta\ vich\bar{a}$ the postposition $vich\bar{a}$ governs a genitive in -a, in other cases it governs a genitive without a, as in $haw\bar{a}\ dd\bar{e}h\ vich\bar{a}$, in that country (there came a famine), and so elsewhere.

In the Eastern Dialect, the genitive sometimes ends in \bar{e} , and of this we have an example in $talb\bar{e}$ $vich\bar{a}$, in want, in which $talb\bar{e}$ is a genitive of the Sindhī $talab^a$, want. This termination is extended to $a\bar{e}$ in $gg\bar{a}waya\bar{e}$ ai $j'umara\bar{e}$ $galiw\bar{a}r$, the sound of singing and dancing. We shall see subsequently that a final \bar{e} is also extended to $a\bar{e}$

in the second person singular of verbs. Instead of i, we have i (carefully so written in the original in the Persian character) in ārmānī bar-xilāf, against heaven, and (Specimen II, verse 2) shāirī, of a poet. Finally the ī is extended to aī (as ē was extended to aē) in the genitives given in the List of Words Nos. 102 (p'isē-aī, of a father, written أرجنني), 111 (jinik'ē-aī, of a daughter, أرجنني), 120 (mardunē-aī, of a man, مَرَدَني أَرْ), and in (226) naryānaī zīn, the saddle of the horse.

The other cases of the singular call for no comment.

The genitive plural ends in $-\bar{a}n\bar{s}$, as in the Standard. Thus, we have (Spec. II, 16) $t'\bar{e}\gamma\bar{a}n\bar{i}$ $p'at\bar{a}$, the wounds of swords, but this is sometimes weakened to $-\bar{a}\tilde{i}$, as in $\hbar\bar{i}\chi\bar{a}\tilde{i}$ chāranayā, for the feeding of swine, and in $p'\bar{a}z\bar{a}\tilde{i}$ vichā, (shoes) on the feet.

Pronouns.—The pronoun of the first person is mu, I, also used in this form in the agent case. The singular genitive is $ma\bar{i}$ or $ma\bar{i}$, and the dative is $man\bar{a}$. The plural nominative is $m\bar{a}$, as in the Standard. The Parable has also a form $m\bar{a}sh\bar{a}$ in $m\bar{a}sh\bar{a}$ war \bar{i} , let us eat, which I am not able to explain with certainty. It looks as if it were a compound, $m\bar{a}-sh\bar{a}$, we (and) you, i.e. we all, including the persons addressed, but it may possibly represent the old poetical form $m\bar{a}k'$, we. The oblique plural is $m\bar{a}$, as in the Standard.

The pronoun of the second person calls for no remarks.

The pronominal suffixes are as in the Standard, but when they indicate the subject they are sometimes used even when the subject is independently expressed. Thus, $haw\hat{a}h\tilde{i}a\tilde{a}\tilde{a}h\tilde{i}a-ra\bar{s}hast\bar{a}sa-\bar{i}$, he sent him (to feed swine). Here the subject, $haw\tilde{a}h\tilde{i}a$, is fully expressed and is repeated in the $-\bar{i}$ of $shast\bar{a}sa-\bar{i}$.

The proximate demonstrative pronoun is \bar{e} or $a\bar{e}$ (List, 234), this. Note the extension of \bar{e} to $a\bar{e}$, as elsewhere. The remote demonstrative pronoun is \tilde{a} , sing. gen. $\tilde{a}h\tilde{i}$, $\tilde{a}h\tilde{i}a\tilde{i}$, or $\tilde{a}h\tilde{i}\bar{e}$, and sing. obl. $\tilde{a}h\tilde{i}a$. The plural calls for no remarks. As in the Standard, haw is often prefixed, as in haw \tilde{a} , haw $\tilde{a}h\tilde{i}a$, etc. The relative pronoun is indicated by the Persian ki, added to the demonstrative pronoun. But the ki is often omitted, so that the demonstrative pronoun (like our that is then used alone in the sense of the relative. Similarly, from $haz\tilde{e}$, then, we have $haz\tilde{e}-ki$ or $haz\tilde{e}$, when. The interrogative pronouns are $k'a\bar{i}$ (obl. $k'ay\bar{a}$, List, 240), who?, and $ch'\bar{e}$, what?.

CONJUGATION.—Auxiliary Verbs and Verbs Substantive.—The short form of the verb substantive has been noted, in the present, only in the following two forms:— $-\tilde{e}$, he is; and $-\tilde{u}$ (Standard $-\tilde{a}$), they are. Examples are:—

 $haw\tilde{a}$ t'aïy- \tilde{e} , that is thine.

 $t'\tilde{a}\chi ar\ bach'-\tilde{u}$, how many sons are there (List, 223)?

For the past tense, I have noted $-s\tilde{a}$, I was; -a (Standard $-a\theta$), he was; and $-s\tilde{u}$, they were. In each case the s represents a standard θ .

The negative verb substantive is $ni\tilde{a}$, I am not (worthy).

Much more common is the verb substantive corresponding to the Persian hast. We have:—

Present, 'I am,' etc.

	Sing.	Plural.
1.	as $t\widetilde{ar{a}}$	astũ.
2.	astaē (for ast'ē)	a s tē.
3,	ast \tilde{e}	$ast\widetilde{u}$ (for $ast'\widetilde{a}$).

Past, 'I was,' etc.

1.	as t as $\widetilde{ar{a}}$	$astas\widetilde{oldsymbol{\widetilde{u}}}.$
2.	astasaē (for ast'aθē)	$astasar{e}$.
3.	$asta$ (for $ast^a\theta$)	astas (for ast abant)

Note how in both the second persons singular, the termination \tilde{e} is extended to $a\tilde{e}$, as has also been noted in regard to the genitive case singular of nouns. Note also the elision of the final θ in the third persons singular of both the pasts.

Active Verb.—The conjugation closely follows that of the Standard, but the following points may be noted:—

The past participle of $\bar{a}\gamma$, to come, is $\bar{a}tika$, for $\bar{a}tka$, and of $gusha\gamma$, to say, is gushta, for gwashta. Other past participles, allowing for the change of θ to s, are, so far as has been noted, the same as in the Standard. The past participle of $rawa\gamma$, to go, is shusa or rapta. Rapta is several times used to mean 'he went,' while in the Standard it means only 'he went on 'doing something.

In the standard eastern dialect, the present participle ends in $-\bar{a}na$. Here it ends in $-\bar{a}n\bar{a}$ or $-\bar{a}n\bar{a}$ as in $k'an\bar{a}n\bar{a}$, making; $gir\bar{a}n\bar{a}$, taking; and $ch'ar\bar{a}n\bar{a}$, grazing, all in the fourth verse of the second specimen. For $-\bar{a}n\bar{a}$, we have $k'an\bar{a}n\bar{a}$ min $\bar{a}y\bar{a}$, I continue doing (thy service).

The conjunctive participle is as in the Standard, but from $\bar{a}\gamma$, to come, we naturally have $\bar{a}tik\bar{o}$, from the past participle $\bar{a}tika$.

The second person singular of the imperative follows the Standard, except that, from $d\bar{e}a\gamma$, to give, we have $da\bar{i}$, give thou, instead of dai. The second person plural of the imperative ends in $-\bar{e}t$, instead of $-\bar{e}\theta$ or $\bar{e}s$; as if we had $jan\bar{e}t$, strike ye, instead of $jan\bar{e}\theta$. But, unless a vowel follows, the t is dropped, so that we get a form like $jan\bar{e}$. Thus, in the Parable, we have $z\bar{i}r\bar{e}$, lift ye; $bi-\bar{a}r\bar{e}$, bring ye; $bi-\bar{a}\bar{e}$, come ye; and, with a vowel following, $pahr\bar{a}in\bar{e}t-\bar{i}$, clothe ye him; and $p'irn\bar{e}t-\bar{i}$, put ye on him.

In verse 17 of the second specimen, we have $ashk\widetilde{u}$, hear! This is probably a contraction of what in the Standard would be $ashk^can$.

The following is the conjugation of the present-future:—
'I strike,' 'I shall strike,' etc.

Sing.	Plur.
1. janā, janāī	$jan\widetilde{u}.$
2. janaē (for janē)	janē.
3. jat' (for $jant'$ or $ja\theta$)	jan i (for janant').

Note how in the second person singular, a Standard final $-\bar{e}$ is represented by $-a\bar{e}$, as we have previously noted in the case of the genitive singular of nouns. This change does not take place in the plural, for here the word $jan\bar{e}$ represents an older $jan\bar{e}t$, with the usual elision of a final t. Examples of this tense in the Parable are $:=-gush\tilde{a}$, I will say; bi-raw \tilde{a} , I will go; $mir\gamma\tilde{a}$, I die; $ba\chi sha\bar{e}$, thou givest (II, 1); $b\bar{\imath}$, it may become (my share); k'at' (for k'ant'), he may make; $war\tilde{u}$, we may eat; and $k'an\tilde{u}$, we may make.

In the western dialect, the letter a- is prefixed to this tense after a consonant; and when the k- prefix is employed, it follows the a-. So, here, in the Parable, we have $p'\bar{a}z$ -a-k'- \tilde{a} , I will arise, corresponding to the western $p\bar{a}d$ -a-k- $\bar{a}y\bar{a}$, eastern $p'\bar{a}\delta$ - $k'\bar{a}$.

The past tense follows the past participle, and, allowing for the representation of θ by s, does not differ materially from the Standard. We have:—

'I went,' etc.

	Sing.			Plur.
1.	<i>ล</i> hนร∂ัั			કં તેપક રવે પેં.
2.	shusāi	•		shusā ē .
3.	shusa			કhusā ū̃ , કhu sα̃ .

It will be observed that this is based on the short form of the past participle. We have an example of the long form of the past participle in k'azī t'aī marzīā-sh darā na raptayā, I never went outside your order. Others are ātikayū, they came (II, 10); guwastayū, they passed through (II, 11); raptayū, they went (II, 10); k'ushtayā, they were killed (II, 5).

For the third person singular we have:—ātika, he came; rapta, he went; zānt'a, thought. In poetry the final a of this person is sometimes dropped, as in karkāṭas, resounded; luṭlāṭas, thundered; and sarkāṭas, sounded, all in II, 9.

With pronominal suffixes, we may quote, as examples, k'usa-ī, he made (II, 7); and shastāsa-ī, he sent (him to feed swine).

A perfect, not noted as used in the standard eastern dialect, and formed probably under the influence of Sindhī, is made by suffixing astē, etc., to the past participle. Thus, ātika-astē, he has come; bīsa-astē, he has become (alive); k'usa-astē, (a feast) has been made; lab'isa-astē, he has been got. With a pronominal suffix, we have dīsa-asten-ī, he has seen (his son returned safely), in which the nasalization of astē has become n before a vowel.

The pluperfect is made by suffixing the past tense of the verb substantive to the past participle. It will be remembered that the third person singular of the past tense of the verb substantive is -a. Thus, we have bīsay-a, he had become (lost); dāsay-a, (victory) had been given (II, 19); k'aptay-a, had met (II, 16); murt'ay-a, he had died; shusay-a, he had become (lost); dīsay-a-ī (with pronominal suffix), he had seen. (II, 4).

The present definite closely follows the Standard. We have :-

'I am striking,' etc.

	Sing.	Plur.
1.	janaγã	janoyã.
2.	janayaē	janayē.
3.	janayê	janay v.

And

'I am going,' etc.

	· ·	O .
1.	$rar{o}\gamma\widetilde{ar{a}}$	rauyữ.
2.	rōγaē	rōγē.
3.	$rar{o}\gamma\widetilde{e}$	rauy T.

So, (List, 229) chārnayē, he is grazing; (233) tikayē, he is dwelling; (239) man- $\tilde{a}\gamma\tilde{\tilde{e}}$, he comes.

For the imperfect, we have (List, 192) $jana\gamma-s\tilde{a}$, I was striking; $da\tilde{e}\gamma-a$, (no one) was giving; na $ma-r\tilde{o}\gamma-a$, he was not entering; $wara\gamma-s\tilde{u}$, (the husks which) they were eating.

For the passive, we have in the List of Words, janījiā, I shall be struck; janījīsā, I have been (i.e. I am) struck; and janījīsāsā, I had been (i.e. I was) struck. Similarly, we have guā janījiā, I may be called (thy son), in the Parable.

The Indeclinables call for no remarks.

FREE TRANSLATION OF THE FOREGOING.

(This song is in honour of a victory gained by the Lēghārī Baloches over the Brāhūīs of Kalāt. Another account of what is apparently the same battle will be found on pp. 60ff. of Mr. Dames's 'Popular Poetry of the Baloches,' but in that version the tribe credited with the victory is the Mazārī. In both versions the leader of the Brāhūīs is cailed Gul Muhammad.)

- 1. I call to mind God, the Generous, the Compassionate. To us givest Thou the Faith.
- 2. O Bard, to us and to all the Faithful tell thou the tale—the story in the poetry of the poet.

- 3. The Brāhūī equipped for war came from Khurāsān, over the mountain passes, like a torrent of rain.
- 4. He came asking for the Kalōī, and taking the name of a Rōhil, he saw the cattle grazing.
- 5. They seized the cattle and carried them off. Löhār and Pāhī did they slay.³ (To the Lēghārīs) came running a battle-alarmer.
 - 6. Bringing the news came Data running, and Dula the valorous youth.
- 7. To Hājī Khān⁴ came the news. He gathered together his battle-equipment, and summoned all the clans.
- 8. Gul Muhammad⁵ and Saīd Khān, with their brothers the Blinda and the Gabol, (have bound) silken⁶ helmets on their heads.
- 9. The Kārīs and the guns resounded, loud thundered the Lārīs.⁷ The blow of leaden (bullets) sounded on the spot where stood the leader.
- 10. Hot became⁸ the battle, high rose the din, as the young men assembled, heroes marching in step together.
- 11. Hastened the valiant youths, like tall minarets, through the mountain pass.
- 12. Like sparrow-hawks and hawks they struck the blow, and broken was the mobof Brāhūis.
- 13. Fast from the spot ran the men of the Brāhūis, and the Lēghārī warriors-plundered their goods.
- 14. Then Alī Murād⁹ returned to the attack, and of the Brāhūīs were five men slain.
- 15. Through the bravery of the Rinds, by the sword Hindi of Mir Hasan were they slain.¹⁰
- 16. Mēwā¹¹ in battle met his opponent match, and kept him back with wounds of the sword
 - 17. There and then was his opponent slain. Hear ye the tale with heart and soul.

¹ By Khurāsān is meant the high plateau country of Baluchistan, to which access from the Indus plains is obtained by

The Kaloïs are a clan of the Lēghārīs. 'Röhil' means 'hill-man,' i.e. he passed himself off as a peaceful hill-man. The 'cattle' are camels. According to Mr. Dames's version, the Baloches began the quarrel by first raiding the Brāhūī camels. About this the bard is here silent. Under Gul Muhammad's leadership, the Brāhūīs made a counter-raid, and carried off Baloch camels. Gul Muhammad was pursued, and the camels recovered. He then came again with a larger force and made a second raid. He was overtaken and defeated. He and eighty of his men were slain, while the Baloches lost only two wounded and none killed.

³ In Mr. Dames's poem, the Brahuis in their first raid killed one man, whose name is not mentioned.

⁴ He seems to have been the leader of the Legharis, but I have failed to trace his name elsewhere. There was a Haji Khan, a Rind poet (Dames. p. 34), but this can hardly have been the man.

^{*} He was the leader of the Brahūis. I do not know who Said Khān and Blinda were. The Gaböls were a mixed servile race (Dames, p. 52). Blinda may possibly be a proper name=Buland the Gaböl, but this gives rise to difficulties in the translation.

⁶ Mandin is perhaps the poetical word, elsewhere written mandil, a turban.

⁷ Kāris and Lāris are said to he two kinds of gun. Lārī perhaps refers to the Persian Province of Lār.

⁸ Machisa is the past of the verh elsewhere written manchay, to join battle.

[•] Apparently one of the Brahūī leaders.

The Legharis claim to be Rinds by descent. The word translated 'bravery' is tawakl, apparently a corruption of the Arabic tawakkul, confidence. But it may be noted that Tawakkuli is also a proper name. Mir Hasan was a famous leader of the Rind tribe (Dames, p. 3). 'Hindi,' or 'Indian,' like Mirsi, for Misri, 'Egyptian,' is a common name given to a sword.

¹¹ I have not traced Mewa elsewhere.

- 18. On the spot where the battle was fought, there verily was Allahyār¹ himself.
- 19. From its sheath he drew the sword Gulzār,² and God, the Compassionate, gave the victory.
- 20. (The victory) became bestowed upon the Legharis, and the news reached the chiefs of Sind and men of distant lands.
- 21. Lord God! I ask of Thee a blessing. Grant Thou unto me the perfection of the religion and of the faith.

¹ I have not traced this name elsewhere.

² Gulzār, or 'Garden of Roses,' is another name by which a sword is called.

The following extract from a version of the Parable of the Prodigal Son comes from the District of Hyderabad. The mixed character of the language is obvious in the very first line, where we have the Sindhī $t'\delta$ for 'were.' The sound of θ is represented in various ways. We have $wa\theta\bar{\imath}$, own; $p'i\delta$, a father, for $p'i\theta$; and $d\bar{a}sa$ and $d\bar{a}t'a$, for $d\bar{a}\theta a$, given. In each case, I reproduce the spelling of the original. Considerable consistency is observed in all these spellings. Thus, 'own' is always $wa\theta\bar{\imath}$, and 'father,' throughout the whole specimen from which the extract is taken, is always spelt $p'i\delta$. The letters γ and g seem to be interchangeable. Thus, we have g' for grazing, but $gushtag\tilde{a}$, elapsed.

The following little story comes from the State of Khairpur. It will be observed that it is full of Sindhī words and idioms. It is unnecessary to dwell upon these here, beyond drawing attention to the occasional addition of a vowel at the end of a word, as in $d\bar{e}dar$ or $d\bar{e}dar$, a frog. In Sindhī every word must end in a vowel. As for Balōchī irregularities, we may mention the following. The aspiration of surds is very carelessly indicated. The letters θ and δ are both employed. In the original specimens as received, θ is indicated by both t and by s, and δ by t and by z. There can be no doubt about the sound meant, from the hesitation shown in representing it. The word iraga represents the Standard \bar{s} -rangā, in this manner. For \bar{e} , he is, we have \bar{e} ; for $\bar{e}\theta$, he was, we have $\bar{s}\theta\bar{a}$; and for $a\theta\bar{u}$, we were, t a \bar{u} . The word $m\bar{a}$ is used for the nominative singular, and means 'I' as well as 'me.'

Ī ch'i yārī shāī Thou becamest mouse, he became what friendship is? frog. This your ganda yārī friendship is.' bad

FREE TRANSLATION OF THE FOREGOING.

A mouse and a frog were close friends, like brothers. The frog lived in the water, and the mouse in a hole in the ground. One day the mouse said, 'you and I are such friends that if you feel any trouble, I also am troubled. I'll go and steal shreds of cloth from some house, and out of them I'll twist a thread. Then I'll tie one end of the thread to your leg, and the other end to mine.'

[So the mouse did as he said, and twisted a thread, which he tied as above described. One day] the mouse [was in some trouble, and] pulled the thread [as a signal to his friend]. The frog came out from the water and was struck down by a hawk. The hawk flew off with the frog, and off after him went the mouse, for his leg was fast to the string.

Then said to him the other mice, 'why did you ever make friends with a frog?' He replied, 'we were friends one of the other, and now the hawk is carrying me off too.' Said they, 'what friendship was that for you? You were born a mouse, and he was born a frog. That friendship of you two was a bad one.'

The state of the second

The same and the same of the same of

DEHWART.

In order to round off the account of the Eranian languages of Baluchistan, a brief mention may be made of a dialect of Persian spoken within the limits of the Political Agency. This is Dehwari. The only information that I have gathered concerning the language and the people that employ it is contained in Mr. Denys Bray's Report on the Census of Baluchistan for 1911.

In § 282 he describes the people in the following words:—

'The Dehwar are a peaceful, law-abiding people, simple and unaffected in manners, homely, thrifty husbandmen. The bulk of them are settled in Sarāwān, where they are divided between Kalāt and the Mastung valley into two main communities, each under an arbāb or leader of its own; of recent years a small colony has gone over into the Quetta District. How they first came to settle down in Sarawan, nobody knows. They have evidently been there for many generations. The vague but very persistent tradition that they had a large hand in the setting up of Brāhūt rule seems to be borne out both by the nature of the services they still render to the ruling house (the repairing of the Kalat battlements, for instance) and the privileges they still enjoy. The honour of having played the chief part in the overthrow of the earlier tyrants is supposed to rest with the Dodaki, one of the chief sections in the Kalat group. And the story that attaches to their name is this. They had sworn an oath never to take up arms against the tyrant-whoever he may have been, for the story is told indifferently of a Moghal and of Sowa, the Hindu. Crushed by his oppressions, they at last hit upon a method of putting him ont of the way and at the same time of keeping to their oath. They baked a number of dods or loaves, with a thin layer of dough round largish stones, and with these they pelted him to death. The name Dehwar itself seems clearly a descriptive appellation,—a mere variation of Dehkan, common enough in Central Asia-people who live in deh or villages, in distinction to nomad tribesmen. So it is not surprising to find that these Dehwar are a very heterogeneous.community. All the main peoples of Baltichistan seem to have been laid under tribute to swell their numbers. There are some, like the Zharkhel and the Yusufzai, who claim to be Pathans; others, like the Hotizai, who claim to be Baloch; and others, again, like the Saulāi, who claim to be Brāhūi. And in addition there are many who claim to have come from Persia, Arabia or Afghānistan. But the nucleus is supposed to be Tājik, chiefly, I fancy, because of their name and their Persian language. Unfortunately the word Tājik is often brought in when origin is uncertain, or when a humble origin has to be covered up. But the important thing for us is that, however heterogeneous their origin, the Dehwar are to-day a very homogeneous community, homogeneous in every way-looks, manners, language, occupation and all.'

Regarding their language he says (§ 221):-

'Though Dehwart really seems a genuine case of a debased dialect of modern Persian, the mere fact that the lonely Dehwar settlement in the Brahul country is several centuries old, is enough to lend the language ar interest and importance which intrinsically it may hardly possess. To judge by the Dehwari of Mastungfor even Dêhwari can boast its dialects-the vocabulary is for the most part ordinary Persian, but there are a few old forms and not a few corruptions. Among isolated peculiarities I may note giftan, Persian giriftan, to seize; shishtan, P. nishastan, to sit; var khēstan, P. bar-khāstan, to stand up; indākhtan, P. andākhtan, to throw; shū, P. shauhar, husband; umsāl, P. imsāl, this year; umrōz, P. imrōz, to-day; īsā, P. im sāat, this moment; izmā, P. in zamān, this time. Here are some of the more general features: a preference for the majhūl sounds (bēnī, P. bīnī, nose; ·ē, P. -ī, the indefinite article; mē-, P. mī-, the verbal affix; ārōs, P. 'arūs, bride; to, P. tu, thou); a tendency to change an a-sound to u (-um, P. -am, I am; -um, P. -am, my; hum, P. ham, also); the avoidance of an ancient or modern b-especially medially or finally-in favour of vor a diphthong (āv, P. āb, water; shav, P. shab, evening; taustān, P. tābistān, summer; va, P. ba, on); the clipping of final consonants (ma, P. man, I; i, P. in, this; kho, P. khud, self; kudā, P. kudām, which? da, P. dar, in; es, P. ast, is; -an, P. -and, are; aya, P. ayad, comes; ko, P. kun, do; zū, P. zūd, quickly); a tendency to vowel-shortening (kah, P. kāh, grass; -ra, P. -rā, the dative-accusative suffix, often, by the by, cut down to a: e.g., gurga, to the wolf). There is of course a fair sprinkling of loan-words, chiefly Brahui. In the choice of the words it borrows, Dehwari is anything but fastidious; even sounds foreign to Persian find a ready welcome: e.g., daggī, cow; tāng, leg; jōr, well.

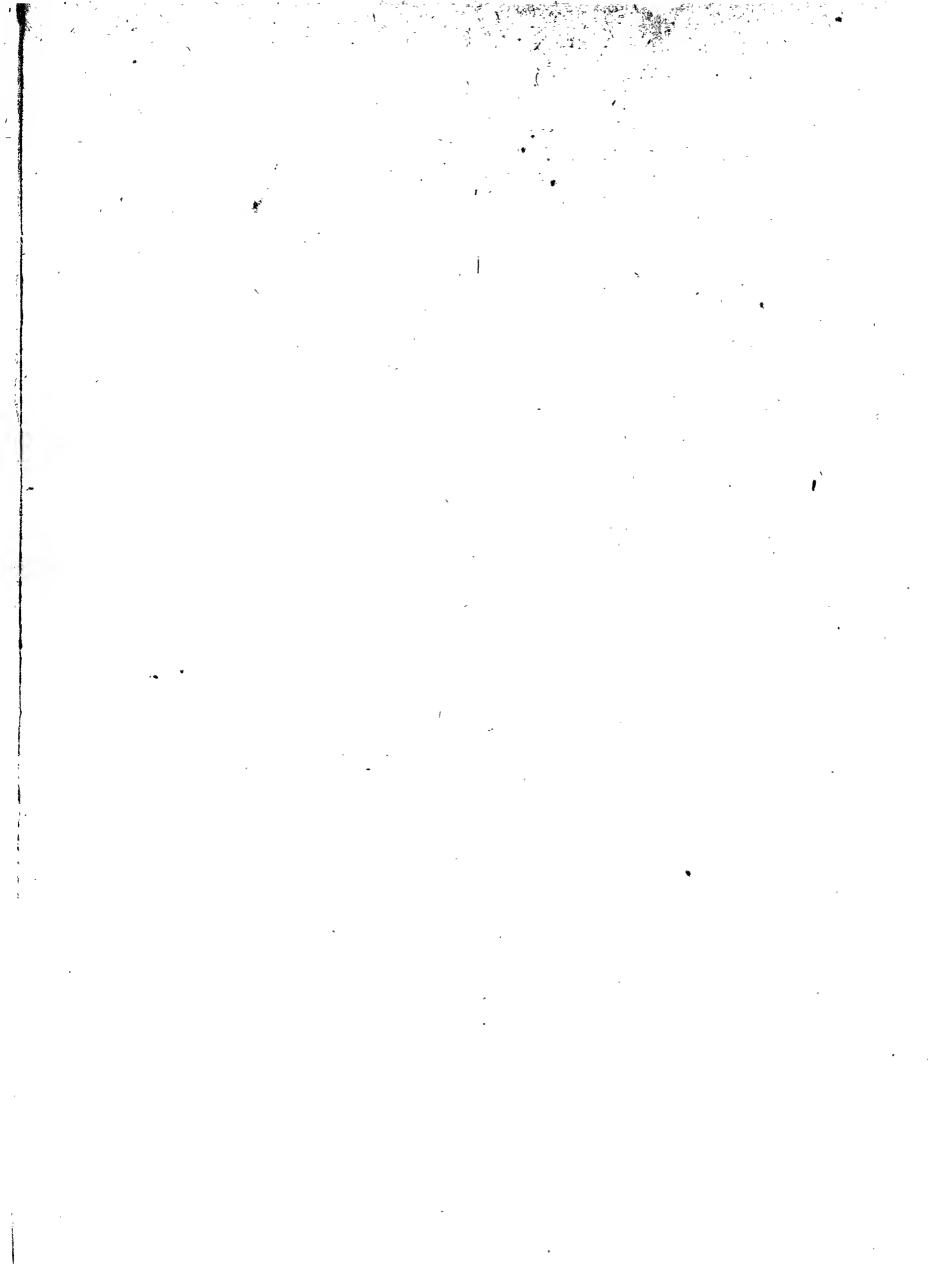

These illustrations have been taken from the Dehwari spoken in and round Mastung. At least two other dialects are ordinarily recognised, the Dehwari spoken by the Dehwar of Kalat, and that spoken by the Sayyids of Kiraui near Quetta. But there are a few local varieties besides. Thus there is a sufficient differ-

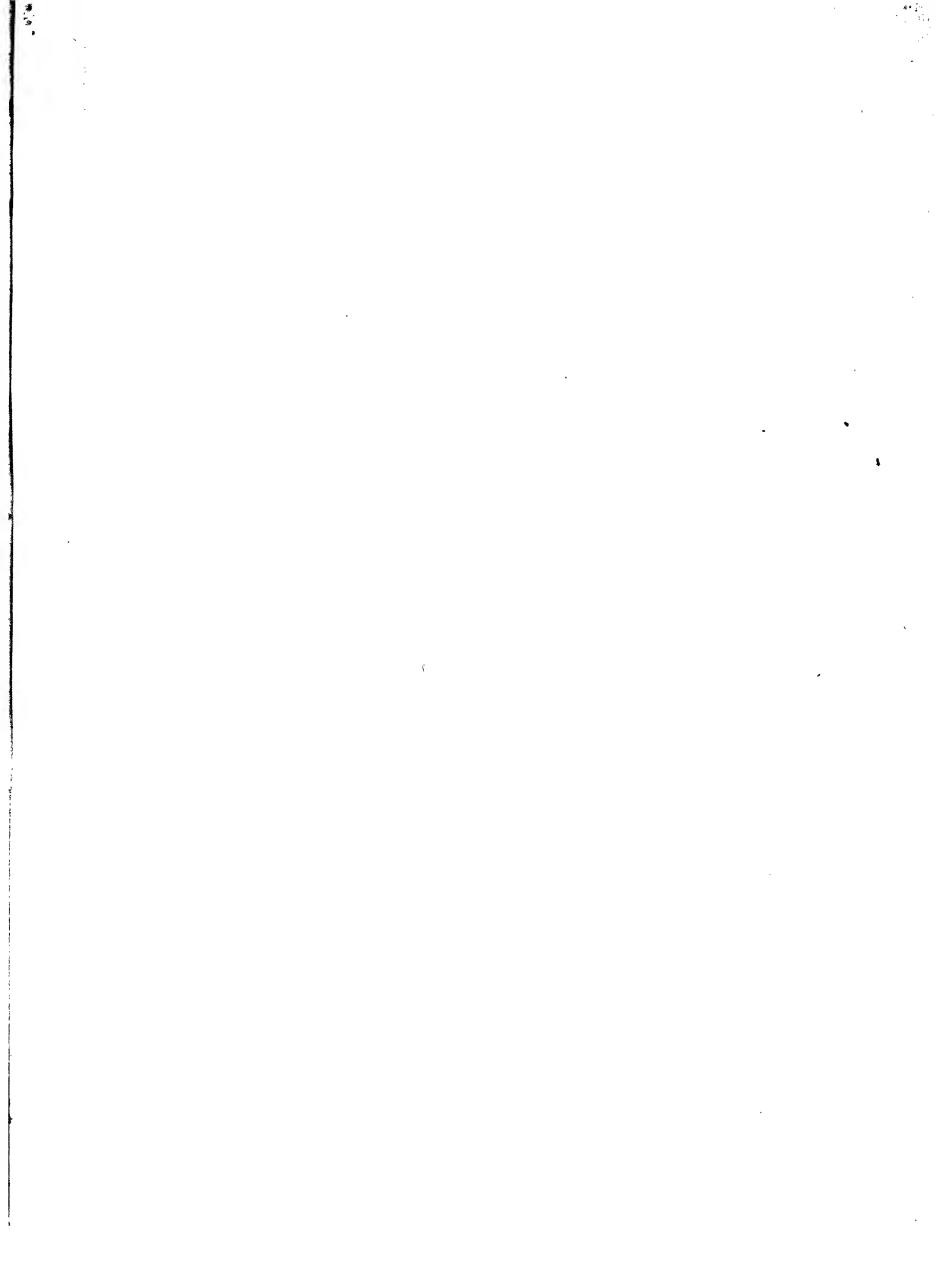

DĒHWĀRĪ. 453

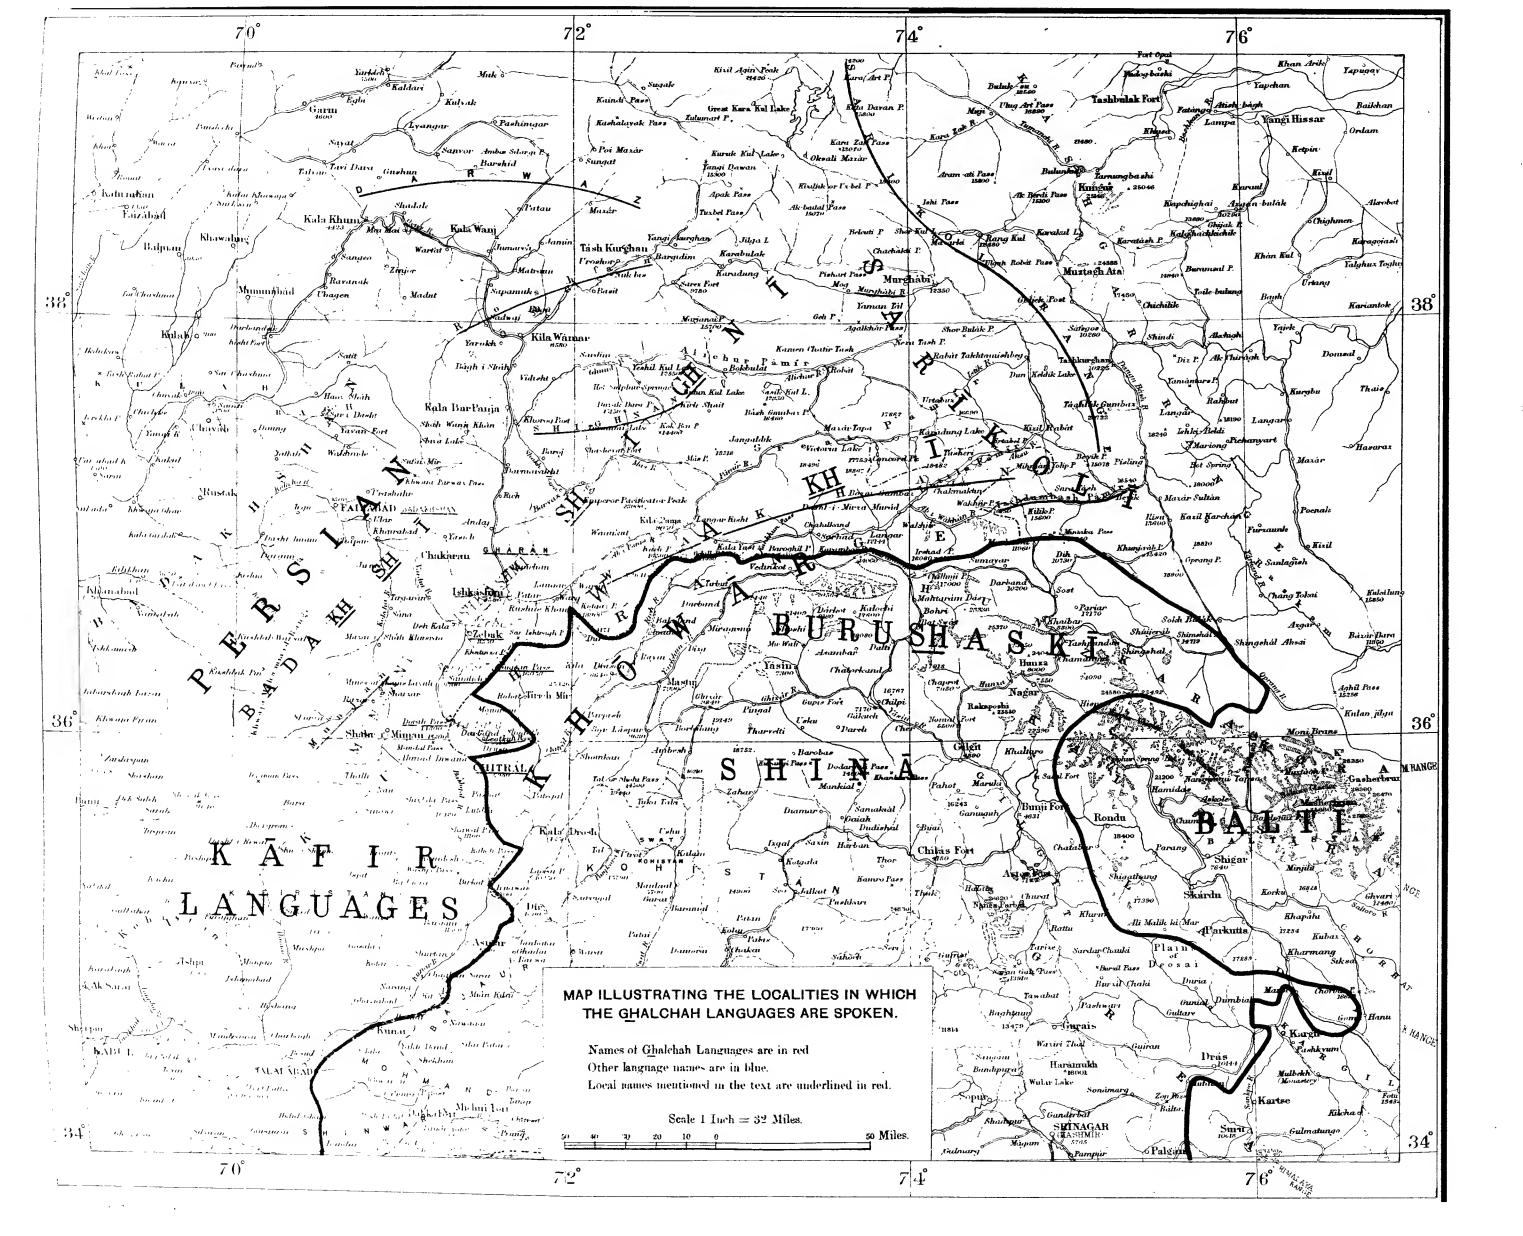

ence between the Dēhwārī of Mastung and the Dēhwārī of Prīngābād, which is only six miles off, to supply the people of Mastung with a stock of anecdotes at the expense of their neighbours. If they want to give you an idea of the Prīngābād jargon in a nut-shell, they will mimic it in the story: sag haba kard, gau daba kard, tāte-um talangāv shud, pā-ēsh var-dāshtum, tah-i-khurchā kardum, "the dog barked, the bullock shied, my sant took a toss, so I hauled np her legs and put them in the saddle-bag," the chief point of the jest lying in the use of the weird words daba, talangāv, khurchā. But their favourite jibe is at Prīngābād hospitality. The story goes that a Brāhāī once put up in a Dēhwār's house in Prīngābād. "Get half a dozen gaṭōr ready," cried the host, "and let's give him a feast!" Now as gaṭōr means a lamb in Brāhāī, the Brāhāī remarked deprecatingly that one would be quite enough for him. But gaṭōr means something very different in the Prīngābād jargon, as he learnt to his disgust when he found that he was expected to make a feast off a single onion. And Prīngāvātnā gaṭōr has passed into a proverb.'

In 1911 the number of speakers of this form of Persian was 7,579.

VOL. X.

THE GHALCHAH LANGUAGES.

Like Paṣḥtō, with which they are closely connected, the Ghalchah languages belong to the Eastern group of the Eranian languages. Only one of them, Yüdghā, lies to the south of the Hindukush, which forms the natural northern boundary of the inquiries included in this Survey. Little good, however, can be derived from publishing specimens of one isolated dialect, and hence I have endeavoured to complete the conspectus of Eastern Eranian languages, so far as is possible, by giving also specimens of the languages spoken in the Pamirs and to their east.

The following are the names of the Ghalchah languages, so far as information is at present available:

- I. Wakhi.
- Shighnī.
- Sarīkoli.

- 4. Zēbakī, Sanglichī, or Ishkāshmī.
- 5. Munjānī.6. Yüdghā.

7. Yaghnöbī.

Regarding most of these languages, further particulars will be found in the subsequent pages. It will be sufficient to say here that Wakhi is the language of Wakhān, and is also spoken near Zēbak. Shighnī is spoken in Shighnān and Roshān, and also in Gharan, a small district on the right bank of the Oxus, and in Zebak. It is locally known as Khugni or Khugnan. Sarikoli is spoken in the Taghdumbash Pamir, and to the east, in the country of Sarikol. It is a dialect of Shighni, and is the most eastern of all the Ghalchah forms of speech. Ishkashmi, Zebaki, and Sanglichi are all closely connected dialects of one language spoken round Ishkashm and to its south.

Further to the west, approached from Chitral by the Dorah Pass, lies the District of Munjān, famous for its lapis lazuli mines, in which, and in a portion of Wakhān, Munjānī is spoken. All that we have hitherto known about this language has been derived from a short vocabulary compiled by Shaw, and published in 1876. Yüdghā is a dialect of Munjani which has crossed the Hindu Kush by the Dorah Pass, and is spoken in the Ludkoh (properly Leotkuh) Valley leading from that pass to Chitral. Regarding the speakers, Biddulph says:2—

'They are a portion of the race which occupies Munjan on the northern side of the Hindoo Koosh, and they speak the same language, with slight variations in dialect. They claim to have migrated from Munjan seven generations ago [this was published in 1880], in consequence of an invasion of that district by the ruler of Badakhshan in which the Meer of Munjan was slain. They number about a thousand families, and like the Munjanis, belong to the Maulai sect. In Ludkho, they call themselves Yidghâh, and give the name of Yidkho to the whole valley with all the branches from the Hindoo Koosh to the Chitral River.'

The correct spelling of their name is probably Yüdghā, and the valley in which they dwell is named by the Chitralis 'Leotkuh,' commonly spelt Ludkho or Ludkoh. Biddulph has given us a short grammar and vocabulary of their dialect.

About Yaghnöbī little is known. Ujfalvy (Le Kohistan, p. 26) has given us a few sentences, and Geiger, in the work mentioned below, has devoted a few pages to it. It is spoken in the valley of the Yaghnob, at the head waters of the Zarafshān River, a tract of country considerably to the north of the Pamirs, and separated from them by the hill

¹ The language is called 'Sarīkoli,' not 'Sarīqoli,' as the word is usually spelt.

² Tribes of the Hinduo Koosh, p. 64.

states subordinate to Bokhara. Yaghnöbī does not fall within the limits of the accompanying map. Some authorities deny that it belongs to the Ghalchah group, and prefer to class it with Ossetic.

It will have been seen that the members of this group of languages are mainly spoken in the Pāmīr country, about the head waters of the Oxus, and are bounded on the west by Badakhshān. Not improbably, the Badakhshās also in former times spoke a similar form of speech, for they have only adopted Persian during the last few centuries. The population speaking the Ghalchah languages is mostly bilingual, nearly every man speaking Persian in addition to his own dialect,—the state of affairs presenting a close resemblance to that which I have described when dealing with the languages of the Swat Köhistān (Vol. VIII, Pt. ii, pp. 507ff.). Such evidence as we have ascribes a Tājik (i.e. an Eranian) origin to the speakers.

The meaning of the name Ghalchah is uncertain. The most probable conjecture associates it with the Pāmīr word ghar, a mountain.

Geiger, W., Grundriss der iranischen Philologie. Kleinere Dialekte und Dialektgruppen. I. Die Pāmir Dialekte. In Vol. I, Pt. II, pp. 287 and ff. Strassburg, 1898.

We shall now proceed to deal with each of the Ghalchah languages separately. Yaghnöbī lies altogether beyond the limits of the present Survey. All the information given about Zēbakī, Sanglīchī, Ishkāshmī, and Munjānī, and most of that about Yüdghā is entirely new. For Wakhī, Shighnī, and Sarīkolī, I have given the merest sketches of their respective grammars, as full information regarding them is available in the works of Shaw; but for the other less known languages I have given all the details that I have been able to collect.

WAKHI.

Wakhī is the language spoken in Wakhān, a country lying between the Hindū Kush and the southern branch of the Oxus. It is also spoken in the country near Zebak.

The following sketch of Wakhi Grammar is condensed from that given in Mr. Shaw's article:—

I.—PRONUNCIATION.—The letter & represents the Central Asian broad sound, resembling the aw in pawn. The letter à is pronounced as in the Italian fars. Unaccented e is pronounced as in then, and o as in hot. The letters o and w are pronounced as in German. The diphthong ai is pronounced as in mitraille; ei as in réveille. The compound the represents the th in the English word thing. The compound the represents the soft th of the. The rough German ch, as in machen, is represented by th. The softer German sound (as in ich) by the There is another sound intermediate between these and sh; the tongue being placed considerably further back than in the case of the latter, and the sibilation consequently coming from the back of the palate instead of from the front. It seems to correspond to the Sanskrit cerebral sh. It will be represented by sh.

II.—NOUNS.

(a) Gender-

There is no distinction of gender.

(b) Number-

The Plural is formed by adding isht for the nominative, and av for the oblique cases.

(c) Declension-

	Sing.	Plur.
Nom.	<u>kh</u> ūn, the house	khūn-iskt
Gen.	<u>kh</u> ūn, of the house	<u>k h</u> ūnav
Dat.	khūn-ar, to the house	<u>kh</u> ūnav-ar
Acc.	khūn or khūn-a, the house	khūnav
Loc. 1	da-khūn, at or in the hopse	da- <u>kh</u> ūnav
,, 2	sak-khūn, or the house	sak-khūnav
Instr.	da-khūn-an, by or with the house	da-khūnavan
Abl.	tsa-khūn-an, from the house	tsa- <u>kh</u> ūnavan

The noun in the genitive is merely placed before the governing noun, without any sign; e.g. <u>khūn bār</u>, the door of the house.

The signs of the Dat. and Acc. (ar and a) sometimes precede instead of following; as ar-bāzār, to the market.

The word 7, one, is used as an Indefinite Article.

(d) The Adjective is uninflected, and precedes the substantive.

III.—PRONOUNS.

The language of the following translation of the Parable of the Prodigal Son and of the List of Words and Sentences on pp. 532ff. closely resembles that in Shaw's grammar. As might be expected in a language which has no written literature, there are dialectic variations, consisting mainly in the representation of the vowel sounds. Thus, $\log \bar{a}$ and $\bar{\imath}$ are often shortened, as in hat, eight, bist, twenty, while, on the other hand, Shaw's khun, a house, is represented by khūn. We often have e for Shaw's a and \bar{a} . Thus, Shaw's vadhak, a path, is wedhek in Sentence 224, and Shaw's pötr, a son, is pötr in the Parable, but petr in No. 55 of the List. With the help of these remarks there will be no difficulty in identifying the following forms:—

NOUNS.-

The sign of the plural is often omitted.

Dative Singular,—We have, tat-r, tat-rek, or tat-rek, to a father; $j\bar{a}e$ -r, to a place: naukar-er, to the servants: $\underline{kh}\bar{u}n$ -er, to the house.

Locative Singular,— $d-\bar{i}$, with one; $ha-da-wa\underline{kh}t$, at that very time.

Instrumental Singular,—di- $\underline{kh}u$ - $y\bar{a}r$ -en, with own friends; de-kanchaniy-en, with prostitutes; de- $ma\underline{zh}$ -en, with me. Also $d\bar{a}$ -en, of a man.

Ablative Singular,—<u>tsa-pötr-wen</u>, from the sons; <u>tsem-māl-en</u>, from this property; tsem safk-en, from these leavings; <u>tse-dīr-en</u>, from a distance; <u>tsem-en</u>, from this, from now. In the case of daulat-en, from wealth, the preposition <u>tsa</u> has been omitted.

PRONOUNS.-

First Person,—We have wuz, am, I; mazh, me; zhu, my; zhun, mine; ma-r, to me, also mā-rek; de-mazhen, with me; sahk-er, to us.

Second Person,—tu, thou; $t\bar{\imath}$, thy; tin, thine; $t\bar{\imath}$ -prut, before thee; also ta-r or $t\bar{a}$ -rek, to thee.

Third Person,—Base yao,—yao, ha-yau, he; yau, his; ya-r, to him; ha-yawe, him; $y\bar{a}w$ -isht, they.

Base yem,—yem, this; ha-rem, ter, tram, tam, to or for his; yem-ar, to him; derem, to this, here; tsem-en, from this, from these.

Base ya,—ha-ya, he, that; ha-dra, there; ha-da, in that; ha-tsan-en, from that; dab milong, them among, among them.

Reflexive Pronoun,— $\underline{kh}u$, own; \underline{ter} - $\underline{kh}u$, to his own: $d\overline{i}$ - $\underline{kh}u$ - $y\overline{ar}$ -en, with my own friends.

Indefinite Pronoun,—kūi, anyone.

VERBS.-

Auxiliary,—tei or $t\bar{e}$, thou art, he is, or they are; tu, was.

Present-Future,—The first person singular ends in am or em. Thus, setk-am, I will satisfy; gīzam, I will arise: meriem, I die; recham, I will go; khānam, I will say; yāwam, I will eat; tsārem, I will make.

3rd person singular, rig-at, falleth.

1st person plural, yāw-an, we will eat; tsār-en, we will do.

The syllable <u>sha</u> is often prefixed to the present, as in sak <u>sha</u>-dinen, we strike; saisht sha-dit, you strike; wuz sha-dimam, I am striking; tu <u>sha-rech</u>, thou goest; ya sha-resht, he goes.

WA<u>KH</u>Ī. 46Ī

The form nast, I am not, is probably a corruption of the Persian, nestam. If it is an independent form, it is not noticed by Shaw.

Imperative. Singular,—rand, give; putrum, keep (me); digid, look: Plural,—wuzum-et, bring; pemtsuv, put on; dit, put on. The last two are irregular.

Past. 1st person singular,—am kertai, I did; am gokhtai, I did; the syllable am is sometimes omitted; and when it follows u, it becomes um, as in wuz-um.

2nd person singular,—rattai, thou gavest. Here at is omitted.

3rd person singular,—<u>kh</u>attai, he said; <u>gh</u>orttai, he collected; regdai, he went; **kertai**, he did; nōstai, he lost; witai, it became; rēmatai, he sent; rattai, he gave; **ittai**, he ate; gezdai, he rose; dīgiddai, he saw; wezdai, he came; <u>tsettai</u>, he burnt; gefstai, he ran; gottai, he was found (by-me); perstai, he enquired; nieshtai, he came out; <u>shenjdai</u>, he entreated.

Perfect,—am witk, I have become; tūwetk, they were.

MISCELLANEOUS FORMS :-

Infinitive,—wezaen, coming; rechin, to go.

Present Infinitive,—go, making.

Past Infinitive, or Conjunctive Participle,—kert, having done; wudurt, having embraced; perwet, having reached.

Past Participle Passive,—qti, joined; mertk, dead; neshitk, lost.

Gerunds,—pūi-en, for grazing; pötrīgher, for being a son.

Mr. Shaw gives the numerals as follows. They differ somewhat from the above, viz.:—

iv or ī būi or bū hüb hât trūi tsabür pânz <u>sh</u>âdh nau dhas twothreefour five sixseven eight nine ten dhas-iv wist sī chil panja altmish (Turkī) sad hazùr eleven twenty thirty forty sixtya hundred a thousand fifty -chōt or chōti.

a half.

SHIGHNT.

This language is spoken in Shighnan and Rōshan, north of Wakhan. They lie in the valley of the Oxus (Murghab) just south of the country of Darwaz in Bokhara, and between that river and the Panjah. It is also spoken in Gharan, a small district on the right bank of the Oxus, and near Zēbak. It is locally known as Khugna or Khugnan.

Vienna, Sitzungsberichte der philosophisch-historischen Classe der kaiserlichen Akademie der Wissenschaften, Vol. xevi, 1880, pp. 735 and ff. The article contains an analysis of the Shighni language, based on Shaw's materials.
- Salemann, K. G., —Shugnanskij slovar D. L. Ivanova (Shighni Vocabulary by D. L. Ivanoff). Vostochnyja Zametki, St. Petersburg, 1895, pp. 269-320.
- Geiger, W.,—Grundriss der iranischen Philologie, Vol. I, Pt. II, pp. 287 and ff. Kleinere Dialekte und Dialektgruppen. Strassburg, 1898.

The following skeleton Grammar is taken from that of Shaw, but has been checked, and slightly altered, after comparison with a Shighni-speaking man. As in the case of Wakhi, the spelling of the two specimens which follow differs slightly from that of Shaw. The principal points which may be noticed are that o and u, and a and e and i are frequently interchanged.

Salemann has pointed out (see Geiger, p. 313) that Shighni distinguishes between the Masculine and Feminine Genders,—a fact which has not hitherto been noted with regard to the other Ghalchah dialects. Examples are, puch, a son; pich, a daughter; $r\bar{e}$ -wusht, he flew; $r\bar{e}$ -washt, she flew; wud, he was; wad, she was. Many others will be found in Geiger, loc. laud.

As in the case of Wakhi, I am indebted to the late Sir Harold Deane, K.C.S.I., for the specimens of Shighni.

SKELETON SHIGHNĪ GRAMMAR.

I.—PRONUNCIATION,—as in Wakhi. There is an additional sound, represented by skh, which is that of the German. Thin 'ich' sibilated so as almost to resemble an English sh.

SARTKOLT.

This is the only one of the Ghalchah languages whose home is to the east of the Pāmīrs proper. It is spoken in the Taghdumbāsh Pāmīr and in the country of Sarīkol, which is situated, north of Hunza, on one of the affluents of the Yarkand River. It is closely connected with Shighnī, the Sarīkolīs deriving their origin from Shighnān. Indeed they may both be considered as dialects of a common language. The name is said to be derived from 'Sarīq-qōl' which means the yellow (sarīq) valley (qōl), but this is doubtful.

AUTHORITIES-

- Bellew, H. W.,—Report of a Mission to Yarkand in 1873, under command of Sir T. D. Forsyth. Calcutta, 1875. Chapter 15 contains a Vocabulary of Sārigh Cūli, by Bellew.
- BIDDULPH, Col. J.,—The same Report. The same chapter contains a Vocabulary of Sirikolee, by Biddulph.
- Shaw, R. B.,—On the Ghalchah Languages Wakhi and Sarikoli; Journal of the Asiatic Society of Bengal, Vol. xlv, 1876, Pt. I, pp. 139 and ff. This contains a Sariq-qoli Grammar and Vocabulary.
- Tomaschek, Prof. W.,—Centralasiatische Studien. II. Die Pamir-Dialekte; Vienna, Sitzungsberichte der philosophisch-historischen Classe der kaiserlichen Akademie der Wissenschaften. Vol. xcvi, 1889, pp. 735 and ff. The article contains an analysis of the Sariq-qöll Language.
- DUNMORE, THE EARL OF,-The Pamirs, ii, 24. London, 1893.
- Geiger, W.,—Grundriss der iranischen Philologie, Vol. I, Pt. ii, pp. 287 and ff., Kleinere Dialekte und Dialektgruppen.

The following brief Grammar of the Sarīkolī language is based on that of Shaw, above quoted. The following stories, translated from the Persian, are taken from his essay.

I.-PRONUNCIATION.-As in Wakhi.

II.-NOUNS-

(a) Gender.—There is no distinction of gender.

(b) Number.—The Plural is formed by adding the word khol, a troop, for the Nominative, and av or iv for the oblique cases.

(c) Declension-.

	Sing.	Plur.
Nom	. chēd, the house.	chēd or chēd- <u>kh</u> ēl.
Gen.	chēd, of the house.	chēdiv.
Dat.	ar-chēd or chēd-ir, to the house.	chēdiv-ir.
Acc.	a-ched or ar-ched, the house.	a-chēdiv, chēdiv.
Loc.	pa-chēd, in or at the house.	pa-chēdiv.
	chū-chēd, on the house.	chū-chēdio.
	par-chēd, towards the house.	par-chēdiv.
Abl.	az-chēd, from the house.	az-chēdiv.
	chēd-katti, with the house.	chēdiv-katti.
	chēd-ifs, by means of, or up to the house.	ckēdiv-i <u>ts</u> .

The Dat. sometimes adds i. Thus, mulk-ir-i, to a country.

The noun in the Genitive is placed before the governing noun, without any sign; e.g. chêd divîr, the door of the house. A genitive absolute is formed by adding an or yan, e.g. pâdkhâh-an î radain, a daughter of the king's; ivrod mu-yan, a brother of mine.

(d) The Adjective is uninflected and usually precedes the substautive.

III.-PRONOUNS-

1st Person-

Sing. Plur.

Nom. was. mask.

Obl. mu. mask or mask-si

There is a dative mu-'r-i.

2nd Person-

	Sing.	•	Plar.
Nom.			tamàsh.
Obl	tū.		tamàsh or tomash-év-
There is	a dative	tu-ri.	

3rd Person-he, she, it-

	Sing.		Plur.
Nom.	yü.		wodk
Obl.	wi.		wief.
There is	a dative	wi-'r-i.	

Pronominal terminations-

		TTT- GULLETIN
	Sing.	Plur.
1.	am.	an.
	at.	av.
3.	-	. av.

These are used with the Imperfect, Past, Perfect, and Pluperfect tenses of verbs.

Adjective Pronouns—

This-

Sing.	Plur.
Nom. yam. Obl. mi or di.	modh or dodh.
Obl. mi or di.	mef or def.
That-	
Nom. yū. Obl. wi.	wodk.
Obl. wi.	10i —— ēf.

Other Pronouns, such as-

khū, self; tsēz, what?; chōi, who?; hāch-chōi, any one; imir, one another.

There is no Relative Pronoun. Relative sentences are formed by adding enj or yenj to the Part or Perfect Participle of a verb. Thus, mu wandj-enj ched, the house which I have seen. So ched-enj adam-khel, the people who are in the house.

The termination ichoz is similarly added to a Future Participle, thus, vigâh yĕt-ichoz àdam, the man who will arrive to-morrow, lit., the to-morrow about to arrive man.

IV.—VERBS—Every verb has four bases, viz. the Root base; the Present base; the Past base; and the Perfect base. From these are derived all other forms. Thus, from zokht, take.

From the Root base, zokht, are	Present base, zōz-	Past base, zukht-	Perfect base, zukhtj-	
formed— (1) The Verbal Noun, zökht-aö, to take, the taking.	(1) Present-Future tense, zōz- d, he takes, or will take.	(1) Past tense, zu <u>kh</u> t, he took.	(1) Perfect tense, zu <u>kh</u> tj, he has taken.	
(2) Future Part., zö <u>kh</u> t-ichöz, about to take.	(2) Present-Future Conditional, zōz-dō, I may take.	-	(2) Pluperfect tense, zu <u>kh</u> tj- it, he had taken.	
(2) Imperfect tense, zökht-ir rüd, he was taking.	(3) Imperative, zōz, take thou.		(3) Past Conditional, zukhtj- vid, he may have taken.	

GRAMMAR.

Terminations of Present Tense-

d, t. These are used with the Pres. Fut. Ind. and Cond., and with the Imperative. With all other tenses (except Past Conditional) the Pronominal terminations are used.

Auxiliary Verb,-Root base, vid;

Pres. hase, vaō;

Past hase, viid;

Perf. base, vědh j.

Sing.

Plur.

Pres.- 1. vao-am or yost-am. Fut. 2. vaš or yšst-at.

vao-an or yost-an. vaŏ-id or yŏst-av.

Past, vüd.

Pres.-Fut. Cond., vao-am-oh

Perfect, vedh j.

3. vid or yost.

vač-in or yčst-av.

Pluperfect, vědh j-it.

Past Cond., vědhj-vao-am,

etc.

Active Verb, -zokht, take.

Note.—The Pronominal Terminations am, at, etc., may either precede or follow the Verb.

Bases.-Root, zökht;

Verbal Noun, zokht-ao;

Gen. zökht;

Dat. zökht-ir.

Present, zoz;

Past, zukht;

Perfect, zukhtj.

Relative Adjective, -zukhtj-čnj, who has taken.

Future Participle, and Noun of Agency, zokht-ichoz, who is about to take, the taker.

Future Passive Participle, zökht-asuk, who is to be taken.

Tenses formed from the Present base-

Present-Fut	ure, take or	Present-F tional, I may t		- Imperative,		Tense formed from the Past base—
Sing. 1. zōz-am. 2. zōz. 3. zōz-d.	Plur. zōz-an. zōz-id. zōz-in.	Sing. zōz-am-ō. zōz-ō. zōz-d-ō.	Plur. zōz-an-ō. zōz-id-ō. zōz-in-ō.	2nd Perse Sing. zōz.	Plur. zōz-id.	Past, zukht, he took. The other persons are formed by prefixing or suffixing the Pronominal terminations. Thus— am zukht cr zukht am, I took.
			i			1

Tense formed from the Root base-

Imperfect, 3rd Sing. formed by adding viid, was, to the dative of the verbal noun. Thus, zokht-ir viid, he was (to the) taking. Other persons formed with Pronominal terminations. Thus, zokht-ir am vüd, I was taking.

The Verb set, go or become—

Pres.-Fut. 1. sō-m, sō-n or sō-yan. Imperf. sētar vid.

2. sõ. sō-id. Past.süt.

3. sau-d, sō-in.

Perf. sě<u>dh</u> j.

Verbs Irregular in Present, 3rd Sing .-

vor-am, I bring; but 3rd Sing., vir-d.

didh-am, I enter; . . . dedh-d.

zān-am, I kill; . zin-d. Tenses formed from the Perfect base.

Perfect, zukhtj, he has taken. Other persons formed with Pro-nominal terminations. Thus, zukhtj am, I have taken.

Pluperfect. Adds it to Perfect. Thus, zukhtj-it, he had taken, zukhtj-it am, I had taken.

Verb Irregular in Present,

I make-Sing.

Plur.

1. kan-am. kan-an.

2. kan.

ka-it.

3. ka<u>kh</u>-t. ka-in.

Past Conditional, formed by adding Present-Future of the Auxiliary Verb to the Perfect base. Thus, zukhtj caő-am. I may have taken.

The Negative is formed by prefixing ma to the Imperative (or to other tenses used in an Optative sense), and na to all other tenses.

The Interrogative is formed by affixing & to the Verb. when there is no other Interrogative Pronoun or Adverb in the sentence. Thus, tü qâhr-yât-â, has thy anger come?

I am indebted to the late Sir Harold Deane for the two following specimens of Sarīkolī. The first is a translation of the Parable of the Prodigal Son and the second a Folk-tale. The language closely resembles that illustrated by Mr. Shaw's Grammar. As might be expected with regard to a dialect which is not written, there are slight divergencies in the spelling, more especially in regard to the vowels. The usual List of Words and Sentences will be found on pp. 532ff.

¹ The English of the pronominal terminations is put in brackets.

SARĪKOLĪ. 475-

The following are the principal points of difference:—

The letter \bar{u} is commonly used instead of \hat{a} , as in <u>dh</u> and \bar{u} n or <u>dh</u> and \hat{a} n, a tooth; <u>dh</u> \bar{u} d or <u>dh</u> \hat{a} d, struck; $s\bar{u}$ l for $s\hat{a}$ l, a year.

The suffix -ik is sometimes added to a noun or pronoun without affecting its meaning, as in \underline{khalg} -ik, men; waz-ik, I. The genitive often ends in a, as in $ma\underline{sh}a$, of us; $at\hat{a}a$, of a father; $at\hat{a}yefa$, of fathers. We shall find the same peculiarity in Zēbakī. The Oblique Plural ends in ef, not in iv. Thus, $put\underline{s}$ -ef, $m\bar{u}l$ -ef, zemz-ef, khaug-ef, $d\bar{u}st$ -ef, and others. In the case of pronouns this suffix is written ef, with a long ef, as in $ma\underline{sh}efan$, ours.

'Thou' is tau, and its oblique form is $t\hat{a}$, not $t\bar{u}$. The word for 'self' is $\underline{kh}\hat{a}$ or $\underline{kh}e$, not $\underline{kh}\hat{u}$.

In verbs, we may note the forms yan and yāst, for yost, he is; and parsti for pörst, he asked.

ZEBAKĪ, SANGLĪCHĪ, OR ISHKĀSHMĪ.

The river Wardoj, which is formed by the junction of two streams rising in the Hindukush, approaches, but does not join the river Oxus, near where that body of water takes its great bend to the north. One of these streams comes from the Dorah and the other from the Nuqsan Pass, both of which give access to Chitral. The village of Sanglich lies in the valley leading to the Dorah Pass, and gives its name to the dialect spoken there and in the valley leading to the Nuqsan Pass, as well as in the lower course of the combined Wardoj, where it passes into the main Badakhshān Valley. Where the two head streams meet is Zēbak, and hence the dialect is also known as Zēbakī. The district of Zebak is one of the most polyglot spots in this part of Asia. Not only has it its own local dialect, but Persian, Wakhī, and Shighnī are all in use, and Turkī is probably known to many. A very similar dialect is also spoken further north, in the neighbourhood of Ishkashm, and is there known as Ishkashmi. Zebaki, Sanglichi, and Ishkashmi. have been spoken of as separate languages, but the inquiries connected with the present-Survey, which are entirely confirmed by materials lately brought by Sir Aurel Stein from Ishkashm, show that they are all slightly varying dialects of one and the samelanguage, which may be called Ishkashmi. The materials available for the study of thesethree dialects vary in amount. For Zebakī they are the fullest. I am able to print two specimens and a List of Words and Sentences which I owe to the kindness of Colonel (then Captain) B. E. M. Gurdon, C.I.E., D.S.O., and which have been prepared at Chitral by Khan Sahib Abdul Hakim Khan. For Sanglīchī, we have only a meagre vocabulary by Shaw (J. A. S. B., Vol. xlv, Pt. I (1876), pp. 272ff.). For Ishkashmi, we have a short vocabulary and a story brought home by Sir Aurel Stein from his latetravels in Central Asia, which he has been good enough to place at my disposal. I therefore confine my main attention to Zēbakī, and shall add as a supplement a few remarksregarding Ishkāshmī. No materials are available for any grammatical notes on Sanglichī, and it must suffice to state here that, so far as we know it, its vocabulary is practically the same as that of Ishkashmī.

The following account of Zebaki is based on the specimens and List of Words and Sentences annexed. These are in the dialect spoken at Bazgir, a sub-district of Zebak.

PRONUNCIATION.—If the spelling of the specimens is to be accepted as correct, the pronunciation of the vowels is extremely fluctuating. We continually meet the same form written indifferently with a, e, or u. Thus, while the List of words gives the genitive plural of tât, a father, as tâtena, the termination of the oblique case (which is identical with the genitive) appears as ana in the ka khē zātana gal, with his own sons, of the Parable. Again, we have kharam, I shall eat; murum, I die; dehem, I shall strike; ghēzhum, I will say, and so on. The separable termination of the first person singular is sometimes written am, sometimes em, and sometimes im. Thus, in the following sentence it is twice spelt am, and once in: iqu sāl tā bā-im khizmat kal, hech wakht tsa tā gap-am na shekht-am, so many years I did service for thee, at any time I did not neglect thy word. Again, in the following it is three times written im, and once em: az-im tā jā-im khudāi jā-im sharmindi-em shud, I became ashamed before thee (and) before God. Compare the words khashwakhtā and khushwakhtā, merriment, both in the Parable.

The Arabic letter q is sometimes represented by \underline{kh} , as in $ta\underline{kh}s\bar{s}m$ for $taqs\bar{s}m$, partition; $wa\underline{kh}t$ for waqt, time.

There is a tendency to shorten vowels in borrowed words, as in \underline{khub} for \underline{khub} , well; nigah for nigāh, watching, custody; $\underline{kashtgāh}$ for $\underline{k\bar{ashtg\bar{a}h}}$, a field; \underline{muzdur} for $\underline{mazd\bar{ur}}$, a servant; and others.

Zébakī shows a strong tendency to drop a final consonant. Thus, we have both $t\hat{a}$ and $t\hat{a}t$, a father; $\underline{kh}\hat{a}$ and $\underline{kh}\hat{a}n$, a house; $\underline{sh}t\hat{a}$ or $\underline{sh}t\hat{a}k$, a daughter; $w\bar{e}$ or $w\bar{e}k$, water; $m\bar{a}$ -dak, in this place, here, but $w\bar{o}$ -da, in that place, there. The separable termination -en of the first and third persons plural is more often -e than -en, and very similarly, the Parable has \underline{kh} are, for \underline{kh} aren, we will eat; and \underline{ku} ne, for \underline{kh} aren, we will make.

THE ARTICLE.—As usual, there is no definite article. When the force of a definite article is required, the demonstrative pronoun is used to supply its place.

The numeral wok, one, is commonly used as an indefinite article, as in ao ka wok verāka sar, pa ū darukhta vīsh, nalāstak, he is seated on a horse under that tree; tsa wok dōkāndār-e-qishlāk, from a shopkeeper of the village.

Sometimes the Persian suffix $-\bar{e}$ is used, under the form -e, as in $arm\bar{a}n$ -e, a longing, in an $z\bar{a}mna$ $arm\bar{a}n$ -e wod, there was a longing of that youth. So, with wok $b\bar{a}zarg\bar{a}n$ -e wod, there was a certain merchant, in which both wok and -e are used together.

DECLENSION.—Gender.—I have not noticed any changes in form due to gender. The gender of living beings is often defined by the words nar, male, and <u>sheeh</u>, female, as in nar wuz, a he-goat; <u>sheeh</u> wuz, a she-goat. At other times different words are used, as in mâlāk, a man; wujinjāk, a woman.

Number.—The plural is formed by adding either ai or en (or an) to the singular. The two terminations seem to be used with any noun. Thus, <u>khūg</u>, a pig; <u>khūgai</u>, swine; <u>muzdur</u>, a servant; <u>muzdurai</u>, servants. The plural of <u>rupya</u>, a rupee, is <u>rupai</u> or <u>rupayai</u>. <u>Chārpā</u>, a four-footed beast, makes its plural <u>chārpāhai</u>, cattle. Other examples are:—

Singular. Plural. tâtai or tâten. $t\hat{a}t$, a father; māl, property; mālai. kashtgāh, a field; kashtgāhai. naukar, a servant; naukarai. zamīn, land; zamīnai. kanchani, a harlot kanchaniai. zātan. $z\bar{a}t$, a son; shtâk, a daughter shtâken. mâlāken. mâlāk, a man; wujinjâk, a woman; wujinjâken.

Sometimes the word gan is added to form the plural, as in hamrah, a friend, plural hamrah-gan.

The singular is sometimes used instead of the plural. Thus, in the Parable, we have khē yatīma gal nigah kun, keep (me) with thy servants, in which yatīma is the oblique

singular of yatim. This is especially common when the noun is in agreement with a numeral, or with an adjective indicating plurality. Thus:—

yūnan-a dov zāt, he had two sons.

yū qīmat dō toō nīm rupya ai, the price of that is two and a half rupees.

tī tât khân tsamend zāt āst, how many sons are there in thy father's house? Here we see more clearly than in the preceding examples that even the verb is put into the singular.

fai tāziāna dēdāk-am-a, I have beaten him (with) many stripes. wok tsamend mī, a few days.

iqa sāl tō bā-im khizmat kal, for so many years I did service to thee.

Case.—The Vocative is the same as the nominative, as in *êh tât*, O father; *ēh zāt*, O son.

The Accusative-Dative is either the same as the nominative singular or plural, or else adds the letter *i*. This form with *i* also sometimes has the power of the general oblique case. Sometimes the accusative ends in *a* instead of *i*, as in zin-a ka verāk-a dam deh, put the saddle on the back of the horse. Here zīn-a is in the accusative, and verāk-a is in the genitive.

The Genitive takes the termination e or a, both in the singular and in the plural. This termination is sometimes dropped, so that the genitive is then in form the same as the nominative. Sometimes the Persian construction with $iz\bar{a}fat$ is used, as in $d\bar{o}k\bar{a}nd\bar{a}r$ - $e-qishl\bar{a}q$, a shopkeeper of the village; $\bar{a}w\bar{a}z-e-qh\bar{e}zh\bar{a}k$, the sound of singing,

Other relations of case are indicated by adding prepositions or postpositions, or both to a general oblique case. The oblique case adds e or a to the nominative singular or plural. It is thus the same in form as the genitive. This final e or a is, however, very commonly dropped, so that the oblique case is often the same as the nominative in form.

```
The most common prepositions are:—

ka, in, on, by means of.

pa, in.

pēzh, in.

tsa, from.

The most common postpositions are:—
```

te most common postpositions are:— $b\bar{a}$, to, for. $chi-pu\underline{sh}t$, behind. gal, with, together with. $j\bar{a}$, near to, before. $\underline{kh}\bar{a}tir$, for the sake of. sar, on.

The following are examples of prepositions and postpositions combined, the nounbeing placed between the two:—

```
ka . . . . chi-pusht, or <u>tsa</u> . . . . chipusht, behind, after.
ka . . . . gal, with, together with.
ka . . . . sar, on.
pa . . . . tag, within.
pa . . . . sar, on, upon.
```

If the final a of the oblique case is dropped, then the noun generally ends in a consonant, and this final consonant is, as has been explained under the head of pronunciation, very commonly dropped. Thus, the dative singular of tat, a father, is tata ba, tat ba, or ta ba, to a father. Similarly, the nominative plural may be taten or tate, and this latter form probably accounts for the alternative plural tatai.

With these explanations, the following declensions mainly taken from the List of Words will be plain:—

Singular.	Plural.
Nom. $t\hat{a}t$, a father.	tâten, tâte, tâtai.
Acc. $t\hat{a}t$.	tâteni, tâtaii.
Gen. tâte, tâta.	tâtena, tâtaie.
Dat. $t\hat{a} b\bar{a}$.	tâtaie bā.
Abl. <u>ts</u> a tât.	<u>te</u> a tâtaie.
Nom. $\underline{sh}t\hat{a}k$, a daughter.	<u>sh</u> tâken.
Acc. $\underline{sh}t\hat{a}i$.	<u>sh</u> tâkeni.
Gen. $\underline{sh}t\hat{a}ie$.	shtâkena.
Dat. $\underline{sh}t\hat{a} \ b\bar{a}$.	shtâken bā.
Abl. $tsa shtak$.	<u>ts</u> a <u>sh</u> tâkene.

It will be observed here that, in the genitive singular, the accusative singular is used as the oblique case, to which the genitive termination e (or a) is attached.

Nom.	$m\hat{a}l\bar{a}k$, a man.	$m \hat{a} l ar{a} k$ en.
Acc.	mâlāki.	mâlāken i.
Gen.	mâlāke.	mâlā kena.
Dat.	mâlāk bā.	mâlāken bā.
Abl.	<u>ts</u> a mâlāk.	<u>ts</u> a mâlākena.

In the above paradigms, the accusative is not given in the List of Words, but is inserted on the analogy of many accusatives occurring in the specimens. The final i may of course be dropped, as may be the final a or e of the genitive and of the oblique case singular and plural.

The following are examples of the use of these cases:—

SINGULAR.—Accusative.—men vutsa zāt yū ikhāi-a nadāk, the son of the uncle has married his sister.

```
y\bar{u} <u>kh</u>ātir-ē gâli (nom. gâla)-ē dūd, thou gavest food for him.
As examples of this form used as the general oblique case, we have:—
```

ka tī zāti lāyiq-ma nast, I am not worthy for (i.e. to be) thy son.

am verāk tsamend sālia āst, of how many years is this horse? Here sālia is the genitive singular of sāl. See the remarks under the head of Number regarding the use of the singular instead of the plural with tsamend, how many?

With the final i dropped, we have:—

```
am rupya yū bā dai, give this rupee to him.
tsa ghāu wē newar, draw water from the well.
khē zāt ka khē bar ned, he took his son in his arms.
wok naukar qīvd, he called a servant.
```

This is especially common in nominal compound verbe, as in takketm kal, he divided; gap ded, he struck a word, i.e. he said; bak hal, he kissed; and many others.

Sometimes the oblique form is used for the accusative, as in khagai bakhaka az kharam, I will eat the provision of the swine. Here bakhaka is the accusative of bakhaka.

Genitive.—zīn-a ka verāka dam deh, put the saddle on the horse's back.

men vutsa zāt, the son of my uncle.

ao zāmna (nom. zāman) armān-e wod, of that youth there was a longing.

shom-bi khē tâta jā bā, I will go to my father's place, i.e. near my father.

Oblique Case.—ao ka wok verāka sar, pa ā darakhta vēsh nalāstak, he has sai down (i.e. is seated) on a horse under that tree.

ka <u>kh</u>ē yatīma gal nigah kun, keep me with thy servants (singular for plural) <u>kh</u>ē <u>kh</u>âna qarīb ke <u>sh</u>ud, when he went near his house, pa <u>sh</u>uena tag, inside the cradle.

With the termination a or e dropped, we have :-

ao wakht ka hūsh āghad, at that time he came into sense.

ka verāka dam, on the horse's back.

ka war yu mal ded, her husband knocked on the door.

ka wāsh wând, bind (him) with a rope.

yū warūd tsa yū ikhā werāztar ai, his brother is taller than his sister.

tsa wok dökändär-e-qishläq, from a shopkeeper of the village.

ao āghad khē khâ (nom. khân) bā, she came to her own house.

khē tâ bā ghēd, he said to his father.

khē kūch bā pēghām kal, he sent a message to his wife.

ao chārpāhai ka alakh sar bi-charānā, he is grazing cattle on the top of the hill.

PLURAL.—Nominative.—tsamend muzdurai gâla kharen, how many servants eat food.

Accusative (termination dropped).— qāzī yū bā azār rupai dūd, the judge gave her a thousand rupees.

ao rupayai teu nast, take those rupees from him.

ao chārpāhai bi-charānā, he is grazing cattle.

mālai, properties (see the next example but one).

Genitive.—wō safākā khūgai bakhsha, (I will eat) that husk (which is) the provision of the swine. Here the termination of the genitive has been omitted.

Oblique Case.—ao ka khē zātana gal khē mālai (acc. plur.) takhsīm kal, he divided his own properties with his sons.

khē hamrah-gana gal kharam, I will eat with my friends.

Without termination.—ao mâlāk khē khūgai gal wō astūd khē kashtgāhai, that man sent him with his own swine (into) his own fields.

yū tâ khē naukarai bā ahēd, his father said to his servants.

yū kata zāt khē zamīnai sar wod, his elder son was on his lands.

ti daulat kanchaniai gal kharch kal, he spent thy wealth with harlots.

Adjectives.—When in agreement with a noun, these are immutable. Thus:—
fai zhandākī, a great famine.

fai feri wanji, the best garment.

kata zāt, the big (i.e. elder) son.

Not uncommonly we find the Persian idiom, with izāfat. Thus:—

khân-e-chut, a small house.

zāman-e-chuṭ, the younger son.

mulk-e-dīr, a far country.

The comparative and superlative may be formed by prefixing fai, much, very, as in fai $fer\bar{\imath}$, better, or very good, best. Or the Persian suffix -tar may be used, as in $fer\bar{\imath}-tar$, better, or best. The thing with which comparison is made is put in the ablative with $\underline{ts}a$. Thus, $y\bar{u}$ $war\bar{u}d$ $\underline{ts}a$ $y\bar{u}$ $i\underline{kh}\bar{a}$ $wer\bar{a}ztar$ ai, his brother is taller than his sister.

The first ten numerals, and others, are given in the List of Words and Sentences. Here we may add azār, a thousand.

As stated under the head of Number of nouns substantive, a noun in agreement with a numeral adjective usually remains in the singular.

PRONOUNS.—The **Personal Pronouns** have a Genitive Absolute, corresponding to our 'mine,' 'ours,' 'thine,' 'yours,' 'his,' 'theirs,' formed by adding *en* or *an*, or *nen* or *nan* to the simple genitive.

The Pronoun of the First Person is declined as follows:-

Nom. az, I. $m\bar{o}\underline{kh}$, we. Acc.-Dat. mak, me. $(m\bar{o}ch)$, us. Gen. men, my. $m\bar{o}ch$, our. Gen. Abs. men-en, mine. $m\bar{o}ch$ -en, ours. Oblique men. $m\bar{o}ch$.

We shall subsequently see that the separable pronominal suffixes of the first person are -im for the singular, and -en or -e for the plural. These are very commonly added to the corresponding full pronominal nominatives, so that we frequently come across forms such as az-im, I (lit. I-1), and $m\bar{o}\underline{kh}$ -e, we (lit. we-we). I have no authority for the form $m\bar{o}ch$ given for the accusative-dative plural. I have inserted it on the analogy of other forms.

The following are examples of the use of this pronoun:—

az kharam, sēr shom, I will eat (and) become satisfied.

az tsa zhandākī murum, az khezum bi, I die of hunger, I will arise.

az fershun īsum bi, I will come at night.

az-im yū zāt ka fai tāziāna dēdāk-am-a, I have beaten his son with many stripes.

az-im ka tī zāti lāyiq-ma nast, I am not fit (to be) thy son.

az-im tī jā-im Khudāi jā-im sharmindi-em shud, I became ashamed before thee (and) before God.

mak ka khē yatīma gal nigah kun, keep me among thy servants.

men rutsa zāt yū ikhāi-a nadāk, the son of my uncle is married to his sister.

wok azār rupai men bā dai, give to me a thousand rupees.

to mudam men gal ast-ai, thou art ever with me.

tsa men wulâ shu, walk before me.

tsīzē-ke menen āst, tīnen āst, whatever is mine, is thine.

ka mōch khushwakh tā kanāk munāsib wod, it was proper for us to make merriment.

The Pronoun of the Second Person is thus declined:

	Sing.	Plur.
Nom.	tō, tōmas, thou.	<i>tōmō<u>kh</u>,</i> ye.
Gen.	$t\bar{\imath}$, thy.	tomo <u>kh,</u> your.
Gen. Abs.	tī-nen, thine.	tōmō <u>kh</u> -en, yours.
Oblique	$tar{o}, tar{\imath}.$	tōmō <u>kh</u> .

The separable pronominal suffixes of the second person are $-\bar{e}$, $-\bar{i}$, or -ai, for the singular, and -ev or -av, for the plural. The termination -mas of the nominative singular occurs also in the third person, and in both cases I am unable to explain it. It is found only in the List of Words, in $t\bar{o}mas\ \bar{a}st$, thou art; $t\bar{o}mas\ wod$, thou wast; $t\bar{o}mas\ deh$, thou beatest. A possible conjecture is that it is the singular form of the equally obscure termination $-m\bar{o}kh$ of the plural $t\bar{o}m\bar{o}kh$.

The following are examples of the use of this pronoun:—

to men ba kudam wakht wok shatanak nas dud-i, thou never gavest to me one kid.

tō yū khātir-ē gâli-ē dūd, thou gavest food for him.

to mudam men gal ast ai, thou art ever with me.

tī nēm-a tsīz, what is thy name?

tỉ tát khán tsamend zāt āst, how many sons are there in thy father's house.

az-im tsī-em chi-pusht tī zāti-em lāyiq nast, from this I am not worthy (to be) thy son.

tī warūd āghad; tī tât gâla dūdāk, thy brother came; thy father has given food. hech-wakht tsa tī gap-am na shekht-am, at any time I did not pass over from (i.e. neglect) thy word.

wakhtē-ke tī am zāt āghad, ke tī daulat kanchaniai gal kharch kal, when this thy son came, who expended thy wealth with harlots.

tī warūd mul-a wod, thy brother was dead.

az fershun īsum bi tī khá bā, I will come at night to thy house.

ghēd, 'tī zāt,' she said, 'thy son.'

teīzē-ke menen āst, tīnen āst, whatever is mine is thine.

iga sāl tō bā-im khizmat kal, for so many years I did thy service.

tì jā Khudāi jā sharmindi-em shud, I became ashamed before thee (and) before God.

az-im ka tī zāti lāyiq-ma nast, I am not worthy of (being) a son to thee. kāi zāmn-a ka tī chi-pusht īsū, whose boy has come (i.e. walks) behind thee?

No examples are available for the plural.

For the Pronoun of the Third Person, the Demonstrative Pronouns are employed.

Demonstrative Pronouns.—There are two Demonstrative Pronouns, a Remote and a Proximate. Both, but especially the former, are also used as pronouns of the third person. The Remote Demonstrative Pronoun is declined as follows:—

	Sing.	Plur.
Nom.	ao, aomas, that, he, she, it.	āwend, they.
Acc.	$y\bar{u}$, $w\bar{u}$, $w\bar{o}$, that, him, her, it.	\bar{a} wend, them.
Gen.	$y\bar{u}$, that's, his, her, its.	\bar{a} wenda, their.
Gen. Abs.	$y\bar{u}$ -nen, $y\bar{u}$ -nan, his.	āwend-en, theirs.
Oblique	$yar{u},war{u},war{o}.$	āwenda, āwend.

Regarding the nominative singular aomas, see the remarks on tomas, under the pronoun of the second person.

When the preposition \underline{tsa} , from, is prefixed to $y\bar{u}$, it often coalesces with it into one word. Thus, \underline{tsa} $y\bar{u}$ or $\underline{ts\bar{u}}$, from him. Similarly we have \underline{tsa} $\bar{a}wend$ or $\underline{ts\bar{a}wend}$, from them.

The separable pronominal suffixes of the third person are -a for the singular, and -en for the plural. When -en, as frequently happens, is suffixed to $\bar{a}wend$, the final n is often dropped, so that we get $\bar{a}wend-e$, instead of $\bar{a}wend-en$.

The following are examples of this pronoun used substantively:-

ao ka <u>kh</u>ē zātana gal <u>kh</u>ē mālai ta<u>kh</u>sīm kal, he divided his properties with his sons.

ao <u>shilakh shud</u>; ao <u>shud</u>, he became needy; he went (to a rich man); and so many other passages in which ao means 'he.'

ao ā ahad khē khâ bā, she came to her own house.

tsa dīr yū tá yū vīnd, from a distance his father saw him.

wū khub deh, ka wāsh wand, beat him well, bind him with a rope.

yū tât tsa khân nashet, wū dilāsā kal, his father came out from the house (and) consoled him.

wū tsa kāi-ē ned, from whom didst thou buy that?

ao málāk khē khūgai gal wō astūd, that man sent him with his pigs.

wakhtē-ke wō juk kel kal, when he had consumed all that.

surkhūn-a verāk, yū zīn-a pa khán-a tag, it is a white horse, its saddle is within the house, i.e. in the house is the saddle of the white horse.

-az-im yū zāt ka fai tāziāna dēdāk-am-a, I have beaten his son with many stripes. yū chut $\underline{kh}\bar{e}$ tá $b\bar{a}$ $\underline{gh}\bar{e}d$, his younger (son) said to his father. Similarly many other places, in which yū means 'his.'

ka war yū māl dēd, her husband knocked on the door.

yū qīmat dō wō nīm rupya ai, the price of that is two and a half rupees.

wok-a ādam, yunan-a dov zāt, there is (i.e. was) a man, his are (i.e. were) two sons.

yū bā <u>ahē</u>; hum bi, I will say unto him.

kaush yū bā pumetsav, put ye shoes on to him.

 $q\bar{a}z\bar{i}\ y\bar{u}\ b\bar{a}\ az\bar{a}r\ rupai\ d\bar{u}d$, the judge gave to her a thousand rupees.

fai ferī wanjī izhemav, wū-da pumetsav, bring ye a very good garment, (and)put ye (it) on him. Similarly, wō-da nalāst, he lived in that (place), i.e.
there.

gâla-mâla gakht, yū jā nesht, she prepared food et cetera, (and) placed (it) before him.

tsa yū ferāt, he enquired from him.

tsa yū chi-pusht khare bi, after from that (i.e. after that) we will eat.

ao rupayai tsū nast, take those rupees from him.

tō yū khātir-ē gâli-ē dūd, thou gavest food for him.

āwend-e (for āwend-en) khashwakhtī-e kal, they made merriment.

tsa āwenda māben yū chuṭ khē tât bā ghēd, from among them, the younger (son) said to his father.

tsāwend ziād shūai, from them (something) remains over and above.

When this pronoun is used as an adjective, any of the forms ao, \bar{u} , or $v\bar{o}$ may be used for any number or case, but the two latter have not been met with in agreement with the nominative. Thus:—

ao málāk khē khūgai gal wō astūd, that man sent him with his swine.

ao zāmna armān-e wod, of that youth there was a longing.

ao wakht ka hūsh āghad, at that time he came into sense.

ao wakht khē zamīnai sar wod, at that time he was on his own lands.

ao rupayai tsū nast, take those rupees from him...

ao ka wok verāka sar, pa ū darakhta vīsh, nalāstak, he is seated on a horse, under that tree.

pa ū mulk fai zhandākī shud, in that country a great famine fell.

pēghām kal ke wō māl asti-a, he sent a message that she should send that property.

wō safākā khūgai bakhsha az kharam, I will eat those husks (which are) the swine's provision.

The Proximate Demonstrative Pronoun is am, this. It is also used as a pronoun of the third person. I am unable to give a complete paradigm of the declension of this pronoun. Only the following forms are available:—

Sing. Nom. am, this, he, she, it.

Abl. tsī, from this, from bim, from her, from it.

With the ablative, tsi, cf. tsu, from that.

The following are examples:—

am verāk tsamend sālia āst, of how many years is this horse?

am rupya yū bā dai, give this rupee to him.

am tsīz sāz raqqāsi-et, what is this singing and dancing?

wakhtē-ke tī am zāt āghad, when this thy son came.

az-im tsī-em chi-pusht tī zāti-em lāyiq nast, after from this (i.e. henceforth) I am not worthy (to be) thy son.

Reflexive Pronoun.—The only form of the reflexive pronoun that occurs in the specimens is $\underline{kh}\overline{e}$, own, used exactly like the Hindī $apn\overline{a}$. It is very common. A few typical examples are:—

khē zāt vīnum, I will see my son.

tsa khē māl tsīzē-ke men bā īdā bi, men bā dai, whatever will fall to me from thy property, give to me.

mak ka khē yatīma gal nigah kun, keep me with thy servants.

yū chuţ khē tâ bā ahēd, his younger (son) said to his father.

ao ka <u>kh</u>ē zātana gal <u>kh</u>ē mālai ta<u>kh</u>sīm kal, he divided his properties with his sons.

Relative Pronoun.—This is ke, as in Persian, and is not declined. An example is:—

tī am zāt āghad, ke tī daulat kanchaniai gal kharch kal, this thy son came, who spent thy wealth with harlots.

Interrogative Pronouns.—These are $k\bar{a}i$, who? and $\underline{ts\bar{\imath}z}$, what (inanimate)? Neither changes in declension. Thus:—

kāi-a ka war, who is at the door?

pa shuena kāi-a, who is in the cradle?

kāi zāmn-a ka tī chi-pusht īsū, whose boy comes behind thee?

wū tsa kāi-ē ned, from whom didst thou buy that?

tī nēm-a tsīz, what is thy name?

am tsīz sāz raqqāsi-et, what is this singing and dancing?

The dative, $\underline{ts\bar{\imath}z}$ $b\bar{a}$, for what?, is used to mean 'why,' and $\underline{ts\bar{\imath}z}$ $b\bar{a}$ ke, why that?, means 'because,' as in:—

tsīz bā ke tī warūd mul-a wod, because thy brother was dead.

I am unable to explain $\underline{tsa-na}$ in \underline{mak} $\underline{tsa-na}$ $g\underline{\tilde{a}kha}$ bi, what wilt thou prepare for \underline{me} , in the second specimen.

Other Pronominal Forms.—

tsīzē-ke, whatever.

hech, any.

hech-kā, anyone.

iqa, so many.

tsamend, how much?, how many?, a few.

zodund, so much.

Examples are :-

tsīzē-ke men bā īdā-bi, whatever will fall to me.

tsīzē-ke menen āst, tīnen āst, whatever is mine is thine.

hech wakht tsa tī gap-am na shekht-am, at any time I did not pass over from (i.e. neglect) thy word.

hech-kā yū bā n'-astūd, anyone did not send (i.e. no one sent) to him.

iqa sāl tō bā-im khizmat kal, for so many years I did service to thee.

am verāk amend sālia āst, of how many years is this horse?

tsamend muzdurai gala kharen, how many servants eat food?

wok tsamend mi, (after) a few days (the younger son went to a far country).

zodund khizmat tō bā-im kal, so much service I did for thee.

Pronominal Suffixes.—These are freely employed. They are as follows:—

Sing. Plur.

First Person, -am, -em, -im, -ma.

Second Person, -ē, -ī, -ai. -ev, -av, (-e, -a).

Third Person, -a. -en, (-e).

The vowel in the suffixes of the first and second persons singular and of the second person plural fluctuates, and I have been unable to trace any definite rule for its selection. The suffix -ma occurs only once, in az-im ka tī zāti lāyiq-ma nast, I am not worthy (to be) a son to thee. It is apparently a case of metathesis for -am; or possibly it may be a compound suffix of -(a)m (first person) and -a (third person), the a referring to zāt, a son.

The suffix of the second person plural is -ev or -av, and of the first and third persons plural is -en, but the final v or n is liable to be dropped, as explained on p. 481.

These suffixes are mainly used to indicate the subject (in the nominative case) of the past tense of a transitive verb, and may be joined either to the verb or to any other important word in the sentence. Sometimes they are repeated two or three times in the same phrase.

Under the influence of analogy, they are also occasionally used with tenses formed from the present base of a verb. Here they are quite superfluous, as such tenses indicate the person of the subject by their form.

Examples of the use of these suffixes to indicate the subject of a verb will be given under the head of verbs, and need not be further discussed here.

Not unfrequently, such a suffix has the power of a verb substantive. Examples will be found under that head.

These suffixes sometimes indicate cases other than the nominative. Thus, in apnit-a wod-am, -a indicates 'he,' the subject of the verb wod, was, and is in the nominative, and -am indicates the dative 'for me,' so that the words are literally equivalent to 'lost-he was-for-me,' i.e. 'I lost him.'

Other examples are $d\bar{e}d\bar{a}k$ -am-a, have-beaten-I-him, i.e. I have beaten him, in which -am indicates the subject, and -a the object. Similarly, <u>shudāk-am-a</u>, have-gone-I-it, i.e. I have gone it (sc. a road). Compare also the remarks about -ma, above. For further particulars, see the past and perfect tenses under the head of verbs.

conjugation.—A. Verb Substantive.—The word for 'he is' is āst, and for 'he is not' is nast. These can apparently be used for all persons of both numbers; but the separable pronominal suffixes are often added, and, then, frequently to some other word in the sentence. Thus, the List of Words gives the following conjugation:—

Sing. Plur.

1. az-im āst, I am. mōkh-e āst, we are.
2. tōmas āst, thou art. tōmōkh-e āst, you a

2. tomas ast, thou art. tomokh-e ast, you are. 3. aomas ast, he is. awend-e ast, they are.

Here, in the first person singular, the separable pronominal suffix -im is added to the subject, az, instead of to the verb. The same is the case throughout the plural, the

suffix of the first and third persons plural being -e for -en, and of the second person plural, -e for -ev (see the remarks on pp. 481 and 490). As stated on pp. 486, 487 the forms tōmas and aomas are doubtful. It is not likely that the termination -mas of these words is a pronominal suffix, as they also occur in the phrases tōmas deh, or tō dehē, thou beatest, and aomas dehai, he beats. In these two phrases the verb is in the present tense, with which it is not usual to employ such suffixes, but this is sometimes done, so that the -mas may possibly be a suffix.

With all the suffixes written fully, and attached to the verb, the conjugation may therefore be presumed to be as follows:—

Sing.

1. az āst-im, I am.

2. tō āst-ai, thou art.

3. ao $\bar{a}st$, he is.

Plur.

mōkh āst-en, we are.

tomokh ast-ev, you are.

āwend āst-en, they are.

Examples of the use of this verb occurring in the specimens are:-

az-im ka tī zāti lāyiq-ma nast, I am not worthy of (being) a son to thee. Here the suffix appears once as im, and once as -ma: but see the remarks on p. 490.

az-im tī zāti-em lāyiq nast, I am not worthy of (being) thy son. Here the suffix appears twice,—once as -im, and once as -em.

to mudam men gal ast-ai, thou art ever with me. Here the suffix is added to the verb, as in the above paradigm.

tsīzē-ke menen āst, tīnen āst, whatever is mine, is thine.

When a pronominal suffix is used, the verb substantive is often omitted, so that the suffix has practically itself the force of a verb substantive. Thus:—

kāi-a ka war, who is at the door. Here -a, the suffix of the third person singular is equivalent to āst or āst-a. Similarly:—

yū vīn-a kata, his beard is large.

wok-a ādam, yūnan-a dōv zāt, there is one man, his is two son, i.e. a certain man had two sons.

Probably connected with this -a is the word ai, which also means 'is,' as in:

yū warūd tsa yū ikhā werāztar ai, his brother is taller than his sister.

yū qīmat dō wō nīm rupya ai, the price of that is two and a half rupees.

men māl ai, it is my husband.

Another word meaning 'is' is -et or -t, as in:—

am tsīz sāz raqqāsi-et, what is this singing and dancing?

yū kūch fai ferī-t, his wife is very beautiful.

The word for 'was' is wod. To this the separable pronominal suffixes can be added, as in the case of any other verb in the jast tense. The List of Words gives the following conjugation:—

Sing.

- 1. az-im wod, I was.
- 2. tomas wod, thou wast.
- 3. aomas wod, he was.

Plur.

 $m\bar{o}\underline{kh}$ -e wod, we were.

tomokh wod, you were.

āwend-e wod, they were.

3 s

With all the suffixes written fully, and attached to the verb, the conjugation may therefore be presumed to be as follows:—

Sing.

Plur.

- 1. az wod-im, I was.
- 2. to wod-i, thou wast.
- 3. ao wod, he was.

mō<u>kh</u> wod-en, we were. tōmō<u>kh</u> wod-av, you were.

awend wod-en, they were.

Examples are available only for the third person singular, such as the following:—
ao $z\bar{a}mne \ arm\bar{a}n-e \ wod$, of that youth there was a longing.

yū kata zāt khē zamīnai sar wod, his eldest son was on his fields.

ka moch khushwukhtī kanāk munāsib wod, it was proper for us to make merriment.

wok bazargan-e wod, there was a certain merchant.

The third person singular can, of course, always take the separable pronominal suffix of the third person, -a, as in apēd-a wod, he was lost; mul-a wod, he was dead.

The verb $\underline{sh}\bar{u}\bar{a}k$, to go, is also used to mean 'to become.' Its conjugation falls under the head of Active Verbs.

B. The Active Verb.—The conjugation of the verb follows the usual Ghalchah model. There is a present base, and a past base, and also a perfect base, which is generally formed from the past base by the addition of $\tilde{a}k$.

Separable pronominal suffixes indicating the subject are used with all the tenses, although, properly speaking, they should be used only with the past and perfect bases. Under the influence of analogy, their use has been extended to the tenses formed from the present base, although the person of such tenses is indicated by the termination. There is even a tendency to treat the proper terminations of the present base tenses as separable, which they are not. Thus, the List of Words gives not only the form az dehem, but also the form az-im deh, for 'I beat.' This is much as if we were to say in English 'thou-est beat' for 'thou beatest.'

Infinitive.—The Infinitive ends in $-\bar{a}k$, as in $deh-\bar{a}k$, the act of beating, to beat; $\underline{sh}\bar{u}-\bar{a}k$, the act of going, to go; $kan-\bar{a}k$, the act of doing or making, to do, to make; $is\bar{a}k$, to come, the act of coming; $\underline{gh}\bar{e}\underline{zh}-\bar{a}k$, the act of speaking, to speak, the act of singing, to sing. Two examples occur in the specimens, viz.:—

ka moch khushwakhtī kanāk munāsib wod, it was proper for us to make merriment.

āwāz-e-ahēzhāk, the sound of singing.

We have an infinitive of purpose in ao mâlāk khē khūgai gal wō astūd khē kushtgāhai charāndani, that man sent him into his fields with his swine for grazing. Unless this infinitive of purpose has been borrowed from the Dardic languages further to the south, I am unable to explain the form.

Past Participle.—The Past Participle is the past base. It is mainly used to form the past tense. The following instances of a past participle used as a pure participle occur in the specimens:—

yū pūd keṭ kenam, I will make his feet cut, i.e. I will cut off his feet. apnit-a wod-am, he was lost for me.

apēd-a wod, he was lost.

```
wakhtē-ke wo juk kel kal, when he had made all consumed.
        mul-a wod, he was dead.
     The following is an alphabetical list of all the past participles occurring in the List
of Words and in the specimens. Most of them are used as past bases:-
        āghad, came (present base, is-).
        apēd or apnit, lost.
        astūd, sent (present base, asti-a, she may send).
       ataghd, entered.
       awāl, found (pres. base, awēr-).
       ded, struck (pres. base, deh-). Some people pronounce this participle with a
               slight h-sound. Thus, de^{i}d.
       dud, given (pres. base, dai, give thou).
       ferāt, asked.
       gakht, prepared (pres. base, gākh-).
       ghēd, said, sang (pres. base, ghēzh-).
       ghesht, returned.
       ghūzd, ran (pres. base, ghūz-).
      just, fled.
      kal, done, made (pres. base, ken-, kun-).
      kel, consumed.
       ket, cut.
      kimd, wished.
      khet, arisen (pres. base, khez-).
      mul, dead (pres. base, mur-).
      ned, taken (pres. base, nast-).
      nalāst, seated (pres. base, nīd-).
      nashet, emerged.
      nesht, placed.
      q\bar{\imath}vd, called.
      <u>shud</u>, went, became (pres. base, <u>sh</u>\bar{u}-).
      shekht, passed over.
      ted, burnt.
      t\bar{u}d, shaved.
      vind, saw (pres. base, vin-).
      wod, was, became.
      z\bar{a}\underline{a}\underline{h}d, took.
```

Present-Future.—This tense is used both as a present and as a future. We shall see that sometimes the syllable bi is added to emphasize the force of the future, but the vol. x.

tense is freely used in a future sense without this addition. It is conjugated as follows:—

'I strike' or 'I shall strike.'

Singular.

Plural.

1. az dehem or az-im deh.

mökh dehen.

2. tō dehē or tōmas deh.

tomo<u>kh</u> dehav.

3. ao, or aomas, dehai.

awend dehen.

Similarly we have :-

'I go ' or 'I shall go.'

1. az shom or az-im shū.

mökh-e shuen.

2. tō shūē or tō shū.

tomākh shūo.

3. ao shūai or shūī.

awend-e shuen.

It will be observed that the termination of the first person singular is separable, and may be attached to the subject. This evidently occurs under the influence of the analogy of the past tense. Properly speaking, the terminations of this tense are inseparable. It will also be observed that in forms such as $m\bar{o}\underline{k}\underline{h}$ -e shūen and āwend-e shūen, the pronominal suffix is added to the subject, although this is quite superfluous. They may be omitted, and, indeed, according to the derivation of the verbal form, should not be there. Regarding the forms tōmas and aomas, see pp. 486 and 487.

The termination of the first person singular may be -am, -im, or -um.

In the specimens, we have the following examples of the first and third persons singular and of the third person plural:—

az tsa zhandākī murum, I die of hunger.

<u>khē</u> hamrah-gana gal <u>kh</u>aram, <u>khush</u>wa<u>kh</u>tī kunam, I may eat with my friends, and may make merry with them. Here the tense is used where we should employ a present subjunctive.

tsāwend ziād shūai, it becomes over and above from them.

ka <u>kh</u>ē <u>kh</u>ân nas kimd ke <u>sh</u>ūai, he did not wish that he may go into his own house. Here, again, the tense is used where we should employ a present subjunctive.

men tât pa khân-e-chut nīdai, my father lives in the small house.

kāi zāmn-a ka tī chi-pusht īsū, whose boy comes behind you? The form īsū has been checked locally, and is reported to be correct. It does not agree with the above paradigms. Compare the first person singular īsum.

tsamend muzdurai gâla kharen, how many servants eat food.

For this tense used with a future meaning, we have:-

az kharam, sēr shom, I will eat, I will become satisfied.

shom, khē zāt vīnum, I will go, I will see my son.

yū pūd ket kenam, I will make his feet cut, i.e. I will cut off his feet.

Sometimes the particle bi is added, as in Persian, to emphasize the future sense. In sentence 229 this particle is used to make a present definite, with a verbal form that seems to be borrowed from the Dardic languages further to the south. The sentence is:—

ao chārpāhai ka alakh sar bi charānā, he is grazing cattle on the top of the hill.

When bi is added to form a future, there is a tendency to drop the final consonants of the verb, so that we find the following conjugation in the List of Words:—

Sing.

1. az dehem bi.

2. tō dehē (or deha) bi.

3. ao dehā bi.

Plur.

mōkh-e dehe bi.

tōmōkh dehav bi.

āwend dehe bi.

It will be observed that the third person singular is irregular. We should expect dehai or dehā.

As examples, we have:-

az <u>kh</u>ezum bi, <u>sh</u>om bi <u>kh</u>ē táta jā bā, yū <u>gh</u>ē<u>zh</u>um bi, I will arise, I will go near my father, I will say to him.

az awērum bi, I will find.

az fershun īsum bi, I will come at night.

mak tsa-na gākha bi, what wilt thou prepare for me?

tsa khē māl tsīzē-ke men bā īdā bi, from thine own property whatever share will fall to me.

gâla khare bi, khashwakhtī kune bi, we will eat food.

We have seen above that the present is used in two instances where we should employ a present subjunctive. The subjunctive force is emphasized by adding -a, as in az shom-a, I may be; $p\bar{e}gh\bar{a}m$ kal ke wō māl asti-a, he sent a message that she may send that property. In Wakhī and Sarīkolī the letter -ō is added to form a present subjunctive.

Imperative.—The second person singular of the imperative is usually the same as the present base, as in deh, strike thou; $\underline{sh}\overline{u}$, go thou, or be thou; $\underline{kh}ar$, eat thou; $n\overline{i}d$, sit thou; is, come thou; mur, die thou; dai, give thou; $gh\overline{u}z$, run thou. Other examples occur in:—

zīn-a ka verāka dam deh, put the saddle on the back of the horse.

am rupya yū bā dai, give this rupee to him.

ao rupayai tsū nast, take those rupees from him.

wū khub deh, ka wāsh wánd, beat him well (and) bind him with a rope.

tsa ghāu wē newar, draw water from the well.

men bā dai, give to me.

mak ka khē yatīma gal nigah kun, keep me with thine own servants.

khar, ke az awērum bi, eat, for I will find (it).

wok azār rupai men bā dai, give to me a thousand rupees.

The second person plural ends in v, and closely follows the second person plural of the present. Thus:—

fai ferī wanjī izhemav, wū-da pumetsav; wok chiliak ka yū dāst dēv, bring ye a very good garment, put ye (it) on him; put ye a ring on his hand.

Past.—The past tense is formed by adding the separable pronominal suffixes to the past participle. A list of past participles will be found on p. 493 ante. For ready reference, the suffixes are here repeated.

	Sing.	Plur.
1.	-am, $-em$, $-im$, $-ma$.	-en, (-e).
2.	-ē, -ī, - ai.	-ev, $-av$, $(-e$, $-a)$.
3	-4	-en. (-e).

These suffixes usually indicate the subject of the verb. They may be appended to the verb itself, but are more commonly attached to some preceding word in the sentence, and are not unfrequently repeated several times in the same phrase. For instance, in azim to jā-im Khudāi jā-im sharmindi-em shud, I became ashamed before thee (and) before God, the suffix of the first person singular appears three times as -im, and once as -em. The use of these suffixes in no way prevents the subject itself being also expressed, even when it is a pronoun. Thus, in the above sentence, the subject az, I, is also expressed. The third person singular most often takes no suffix. It sometimes, however, as we shall see in the examples, takes -a. The termination -ai of the second person occursonly once, and then in connexion with the verb substantive, in the sentence tō mudāmmen gal āst-ai, thou art ever with me, and not with the past participle.

The following is the paradigm of the past tense as given in the List of Words. It will be observed that the separable termination of the first person singular is attached to the subject. This seems to be the usual custom with this person:—

'I struck,' etc.

		- Surucia,	ouc.
	Sing.		Plur.
1.	az-im dēd.		mökh-e dēd-en.
2.	tō dēd-ī.		tomökh dēd-av.
3.	ao dēd.		äwend-e ded-en
	Lama.		

Similarly, we have :-

'I went,' etc.

	Sing.	Plur.
1.	az-im shud.	mö <u>kh</u> -e <u>sh</u> ud-en.
2.	tō shud-ī.	tömö <u>kh sk</u> ud-av.
3.	ao <u>sh</u> ud.	āwend-e shud-en.

The following examples of the past tense occur in the specimens. In order to make the separable suffixes clear, they, and the past participles, will be printed in blacker type than the rest of each sentence.

SINGULAR.—

First Person.—tī jā Khudāi jā sharmindi-em shud, or az-im tī jā-im Khudāi jā-im sharmindi-em shud, I became ashamed before thee (and) before God. psah awāl-am, now I found (him).

iqa sāl tō bā-im khizmat kal, hech wakht tsa tī gap-am na shekht-am; zodund khizmat tō bā-im kal, so many years I did service for thee, at any time I did not pass over from (i.e. neglect) thy word; so much service I did for thee.

Second Person.—wū tsa kāi-ē ned, from whom didst thou buy that?

tō men-bā kudām wakht wok shatanak nas dūd-ī, thou didst not at any time give to me a kid.

twice. gáli is the accusative singular of gála. Here we have the suffix -ē

Third Person (without suffix).—ao wakht ka hūsh āghad, at that time he came into (his) sense. Similarly we have āghad in several other places.

khē daulat apnit, he lost his wealth.

ao málāk khē khūgai gal wō astūd, that man sent him with his swine.

```
hech-kā yū bā n'-astūd.
   yū māl ataghd pa khán, her husband entered the house.
   khē āuzak gap dēd, he struck words (i.e. he said) (in) his heart.
   -āwāz-e-ghēzhāk-raqqāsī ka yū ghāl dēd, the sound of singing and dancing struck
        on his ear.
   ka war yū māl dēd, her husband struck (i.e. knocked) at the door.
   -ao ded pa shuena tag, he struck (i.e. jumped) into the cradle.
   -qāzī yū bā azār rupai dūd, the judge gave her a thousand rupees.
   tsa yū ferāt, he enquired from him.
   qāzī ferāt, the judge asked.
   gâla-mála gakht, she prepared food et cetera.
   ghēd, he said (passim).
   ghed, she said (several times in the second specimen).
   ghesht, \bar{a}ghad \underline{kh}\bar{e} \underline{kh}\hat{a} bā, he returned, he came to his own house.
   yū āuzan ted, ghūzd, shud, his heart burnt, he ran, he went.
   qāzī khet-a, just, the judge arose, he fled.
  fai badmastī kal, he did much debauchery. Similarly, kal elsewhere.
   ka khē khán nas kimd, ke shūai, he did not wish that he should go into his house.
   khet, <u>kh</u>ē tāt jā bā shud, he arose, he went to his father's place.
   ka khē bar ned, he took him into his embrace.
   yū tēgh ned, he took his razor.
   ka wok daulatdar gal nalast, he sat (i.e. took up his residence) with a rich man.
   yū tát tsa khân nashet, his father emerged from the house.
   y\bar{u} j\bar{a} neshet, she placed (the food) before him.
  khē wok naukar qīvd, he called one of his servants.
   ao shilakh shud; ao shud, he became needy, he went. Similarly shud in
       many other places means either 'he went,' or 'he became.'
  yū vīn tūd, he shaved off his beard.
  tsa dīr yū tá yū vīnd, from a distance his father saw him.
  vīnd ke yū vīn-a kata, he saw that his beard is large.
  ao zāmna armān-e wod, of that youth there was a longing. Here the -e of
       armān-e is the indefinite article.
  yū kata zāt ao wakht khē zamīnai sar wod, his big son was at that time in his
       lands.
  munāsib wod, it was proper (to rejoice).
  wok bāzargān-e wod, there was a certain merchant. Here the -e of bāzargān-e
       is the indefinite article.
  <u>kh</u>ē māl zāghd, he took his property.
With -a for the separable pronominal suffix, we bave:—
  yū kūch yū māl juk-a astūd, his wife sent all his property.
  tsa āwend-a māben yū chu! khē tât bā ghēd, from among them his younger (son)
       said to his father.
  qāzī khet-a, just, the judge arose, he fled.
  men zāt (or tī warūd) mul-a wod, my son (or thy brother) was dead.
 .apēd-a wod, he was lost.
```

There is only one instance of a plural suffix,—of the third person :—

awend-e khashwakhti-e kal, they make merriment. Here -e (for -en) is repeated twice.

Hitherto we have dealt only with these suffixes when they represent the subject of a verb. Sometimes, however, they represent the object, direct or indirect. Thus, in az-im yū zāt ka fai tāziāna dēdāk-am-a, I have beaten his son with many stripes, -im of az-im and -am of dēdāk-am-a represent the subject, 'I,' and -a of dēdāk-am-a represents the object, 'him,' i.e. 'the son,' so that dēdāk-am-a means 'I have beaten him.' Dēdāk is the perfect, not the past, participle, but is quoted here for the sake of the suffixes. Similarly, in apnit-a wod-am, the -a of apnit-a represents the subject, 'he,' while the -am of wod-am represents the dative of the first personal pronoun, 'for me,' so that the phrase literally means 'lost-he was-for-me,' i.e. 'I lost him.'

Perfect Base.—The characteristic of the Perfect base is the letter k, which is added, except in the case of a few irregular verbs, to the past participle. The perfect base itself forms the perfect participle, which, in its turn, is used as the third person singular of the perfect tense. The other persons are formed by the addition of separable pronominal suffixes, as in the past tense.

Thus, from the past participle $d\bar{e}d$, struck, is formed the perfect base, and perfect participle, $d\bar{e}d\bar{a}k$, having struck, or, as the third person singular of the perfect tense, he has struck. To this the separable pronominal suffixes are added, exactly as in the past tense, and a full paradigm is here unnecessary. The following are examples of the use of the perfect tense, the suffixes and the participle, in each case, being indicated by special type:—

men vutsa zāt yū ikhāi-a nadāk, the son of my uncle has married his sister. Here nadāk-a, he has taken, i.e. has married, is the perfect of the verb the past participle of which is ned.

ao ka wok verāka sar pa ū darakhta vīsh nalāstak, he has sat down (i.e. is seated) on a horse under that tree. Past participle, nalāst.

tī tât gâla dūdāk, thy father hath given food. Past participle, dūd.

We have already, under the head of the past tense, quoted the case of the perfect, $d\bar{e}d\bar{a}k$ -am-a, with two suffixes. Another similar example is:—

nēr-am fai rāh-im shudāk-am-a, today I went much road, i.e. I went a long way today. Here the subject (-am, -im) occurs three times as a separable suffix, and -a, indicating the object (i.e. the road), is also added to the verb.

Passive Voice.—The following examples of the passive occur in the List of Words. The analysis of the first two is not clear to me:—

mak-e dēdā āst-am, I am being beaten.

mak-e dēdā wod-am, I was beaten.

az dēdā shom bi, I shall be beaten.

In the above, $d\bar{e}d\bar{a}$ seems to be the perfect participle $d\bar{e}d\bar{a}k$, with the final consonant omitted, as occurs elsewhere (see p. 481).

Perhaps the first phrase may be analysed thus:—mak, as for me; -e, by him; $d\bar{e}d\bar{a}$ $\bar{a}st$ -am, I have been struck. Similarly for the second.

INDECLINABLES.—Prepositions and Postpositions.—A list of the more important prepositions and postpositions has been given on p. 482. The following are two others:—

<u>tsa</u> . . . māben, from among. In this māben is probably the Arabic mā-bain. <u>tsa</u> . . . wulā, before.

Thus :-

<u>tsa āwenda māben</u>, from among them (the younger said to his father). <u>tsa men wulâ sh</u>ū, walk before me.

When \underline{tsa} precedes a word beginning with a vowel, the two often coalesce, as in \underline{tsa} awenda or \underline{tsa} wenda, from them; \underline{tsa} , for \underline{tsa} \bar{u} , from him; \underline{tsi} , for \underline{tsa} \bar{i} , from this.

The word dak or da is also used as a postposition, as in $w\bar{u}$ -da pumetsav, put ye on him. So, $m\bar{a}$ -dak, on this, here; $w\bar{o}$ -da or $t\bar{a}$ -da, on that, there, as in :—

tsa mā-dak Kashmīr bā tsamend dīr āst, how far is it from here to Kashmir? wō-da nalāst, there he sat down (i.e. took up his residence).

tsa tā-da āghad ka khē khâna qarīb, from there he came to near his own house.

Adverbs.—The following adverbs have been noted:—

balē, yes.

dō-mas, again.

fershun, at night.

gūyā-ke, as though.

kudām wakht, at any time.

khub, well, thoroughly.

mādak, here; tsa mādak, from here, hence.

mudām, always.

nēr, today.

psah, again.

tā-da, there; tsa tā-da, from there, thence.

vīsh, down.

wō-da, there.

wakhtē-ke, when that, when.

wulâ, before.

werāz, up.

The negatives are na and nas. Ne and no are 'no.' Nas occurs in:

ka khē khân nas kimd ke shūai, he did not wish that he should go into his own house.

kudām wakht wok shatanak nas dūd-ī, thou didst not give to me at any time one kid.

Before the vowel a, the a of na is liable to elision, as in n'-ast $\bar{u}d$, he did not send.

Conjunctions.—The following conjunctions have been noted:—

 $\bar{\imath}$, and.

ke, that, because, for, if, when.

lēkin, but.

wō, and.

Interjections:

afsūs, alas!

 $\tilde{e}h$, O!

FREE TRANSLATION OF THE FOREGOING.

There was once upon a time a merchant who took his goods and went trading. Everything he had was lost on the sea in a storm, so he sent a message to his wife to send him some more. She sent him all the property that he had left, and it too was lost in the same way. So he returned home to his house and wept. His wife said, Do not worry, eat your food. I will find more property for you. Now his wife was very handsome, and went to the judge's house, and asked him for a thousand rupees. He gave her the thousand rupees, and she went home after the judge had promised to visit her that night.

He accordingly came, and she prepared food and placed it before him. Just then her husband knocked at the door, and the judge asked her who was there. She said that her husband was knocking at the door. Said the judge, 'What am I to do?' 'Get into the cradle,' said she. So he threw himself into the cradle, and her husband came in. He asked, 'Who is that in the cradle?' 'Your son,' said she. He said, 'Let me go and see him.' He saw that the supposed child had a long beard, so he shaved it off with a razor. Then he took a hatchet, and said, 'I am going to cut off his feet.' So the judge got up and ran away.

APPENDIX ON ISHKASHMI.

The materials available for the study of Ishkāshmī are too scanty for a complete account of the dialect, and it must suffice here to describe briefly the main points, so far as they are known, in which it differs from Zēbakī. For a more full account of Ishkāshmī, reference may be made to a book by the present writer entitled 'Iškāšmī, Zēbakī, and Yāzyulāmī' published by the Royal Asiatic Society.

The Ishkāshmī vowel system is in the main the same as that of Zēbakī. The only important difference is that the former often has u or \bar{u} , where the latter has a or \bar{a} . Thus, Ish. dust or dūst, Zb. dāst, a hand; Ish. $r\bar{u}i$, Zb. $r\bar{a}i$, three; Ish. nulustuk, Zb. nalāstak, he has sat down; Ish. frut, Zb. $fer\bar{a}t$, he asked. In Ish. the infinitive ends in -uk, but in Zb. in $-\bar{a}k$.

Ishkāshmī occasionally shows signs of a tendency to drop a final consonant, as in pu (Zb. pūd), a foot, but the number of instances is not nearly so great as in the other dialect.

As in Zēbakī, the numeral wak or wok, one, is used as an indefinite article. I have not come across any instance of the use of the Persian $y\bar{a}$ -e-wahdat, as has been noted in Zēbakī.

The declension of nouns has been considerably simplified from that of Zēbakī. The nominative plural does not end in -ai or -en, but is the same as the nominative singular. The oblique cases singular, including the genitive, are generally the same as the nominative, but, occasionally, as in Zēbakī, the accusative-dative ends in -i, as in wi dumb-i nad, he grasped its tail. The genitive is the same in form as the nominative, as in pádshá khān, the king's house.

The oblique case of the plural is generally the same as the nominative, but sometimes it takes the termination $-\hat{a}w$ or \bar{a} , as in <u>tsa wazīrāw</u> frut, he enquired from the viziers; <u>wazīrā-bā ghēzh</u>d, he said to the viziers.

The following is a list of the principal Ishkashmi prepositions and postpositions, with their Zebaki equivalents:—

(a) Prepositions:—

Ish.		Z b.
dar, in.	g	•••
pa, in.	•	pa.
tá, till.		•••
tar, into, to.		•••
tsa, from.		<u>ts</u> a.

I have not noted anything in Ishkāshmi corresponding to the Zēbakī ka, in.

(b) Postpositions:—

$I_{\underline{sh}}$.	Z b.
$b\bar{a}$, to, for.	$b ilde{a}$.
$b\bar{a}d$, after.	•••
darūn, among.	•••
dzá, near to.	$jar{a}$.
vi <u>sh</u> , below.	vī <u>sh</u> .

Adjectives call for no special remarks. The first ten numerals will be found in the List of Words and Sentences, on pp. 533ff.

The pronoun of the first person is az, as in Zebaki. In the singular, its genitive is mun, and its oblique case mun, or, in the dative, mum-bā. Mun corresponds to the Zebakī men. I have not come across any form corresponding to the Zb. mak, to me. No materials are available for the plural.

The pronoun of the second person is tu, which does not change in the singular,—corresponding alike to Zb. $t\bar{o}$ and $t\bar{i}$. The plural is tantula, corresponding to Zb. $t\bar{o}mokh$.

The remote demonstrative pronoun, also used as the pronoun of the third person, differs somewhat from that of Zh. The respective declensions, so far as materials are available, are as follows:—

I	<u>b.</u>			Zb.
Sing.				y * * * * *
Nom.	wa.	See-		. ao.
Gen.	i, 10i.	-		yū.
Obl.	wan.		•	yū, wū, wā
Plur.		y.		
Nom:	1		·	awend.
Gen.	• เอฮีซ•		*	āroenda.
Obl.	7		١ -	āwenda,

I have found nothing in Ish. corresponding to Zb. comes. The Ish. singular oblique case and plural genitive are paralleled by the Munjani wan and waf, and the Yüdghā wen and wef.

Another form of the remote demonstrative is dir, that, which has analogies in Sarikoli and Shighui, but which I have not noted in Zēbaki.

The only forms of the proximate demonstrative pronoun that have been noted are the accusative singular, man, this, and the genitive plural, miv, their. Man is parallel to wan, the oblique singular of the remote demonstrative. In Zb. the corresponding pronoun is am, this (nominative).

Another form of this pronoun in Ishkāshmī is nakwa, this, which may be compared with the Sarīkolī nak-. It has not been noted in Zēbakī.

The reflexive pronoun is <u>kh</u>adak, self, which may be compared with the Persian <u>kh</u>wud. Its genitive, as in Zēbakī, is <u>kh</u>ē, own.

Ishkāshmī has also another word, fak, self, used, at the same time, like the Hindī $\bar{a}p$, to mean 'Your Honour.' It is probably borrowed from the Dardic languages to the South. Compare Gawarbati phuka, self.

As in Zēbakī, Ishkāshmī has no indigenous relative pronoun, but <u>tsē</u>, the base of the interrogative pronoun in cognate dialects, is sometimes used with this force.

The interrogative pronouns are kudum, who?, and kum or $ch\bar{\imath}z$, what? The former may be compared with the Munjāni $ked\bar{e}$, Yüdghā kedi, Zēbakī having $k\bar{a}i$. Zēbakī has $\underline{ts\bar{\imath}z}$, what?

Allowing for differences of spelling, the pronominal suffixes, so far as they are known, are very similar to those in Zēbakī. Only that of the second person singular differs. They are:—

The materials for illustrating the conjugation of the Ishkāshmī verb are scanty. The only form of the present of the verb substantive that has been noted is âst, corresponding to Zb. āst, he is. The other persons are probably formed by the addition of pronominal suffixes, as in that dialect.

The past is vud, he was, corresponding to Zb. wod. It is conjugated, as usual, by the addition of pronominal suffixes. Thus, vud-um, I was; vud-ut, thou wast, and so on. There is a perfect vuduk, he has been, and a present, $v\bar{u}n\bar{i}$, he becomes. As in Zb. we also have $\underline{sh}ud$, he became.

The infinitive of the active verb ends in -uk, corresponding to the Zb. $-\bar{a}k$. Thus, <u>khar-uk</u>, to eat, the act of eating. Compare Zb. $kan-\bar{a}k$, to do.

The following is an alphabetical list of past participles, with the corresponding Zēbakī forms, where known:—

```
Ish.
                                                           ā<u>gh</u>ad.
     āghad, came.
     apukht, listened.
                                                           ata ahd.
     atoghd, entered.
                                                           aval (pres. base, aver-).
     avul, found (pres. base, avīr-).
                                                           dēd (pres. base, deh-).
     dēd, struck.
                                                           dūd.
     dūd, gave.
     frin, remained.
     frut, asked.
                                                           ferāt.
     ghēzhd, said.
                                                           ghēd (pres. base, gh\bar{e}\underline{z}\underline{h}-).
     kift, pierced (pres. base, kif-).
                                                           kal (pres. base, ken-, kun-).
     kul, kūl, done, made (pres. base, kün-).
     kut, slaughtered.
                                                            khet.
     khut, arisen.
                                                            mul.
     mul, died.
                                                            ned (pres. base, nast).
     nad, taken (pres. base, nas-).
                                                            nalāst (pres. base, nīd-).
     nulust, seated (pres. base, nīd-).
                                                            na<u>sh</u>et.
     nusht, emerged.
      sámbud, sámd, smeared (pres. base, sâmb-).
      shukht, passed over.
                                                            shekht.
     tōahd, gone.
      wud, taken away.
                                                                                       3 v
VOL. X.
```

 $v\bar{u}st$, bound. (pres. base, $v\hat{u}nd$ -). $z\bar{o}ghd$, taken (pres. base, $z\hat{a}nz$ -). $z\bar{a}ghd$.

The terminations of the present-future in the singular are:—

	I <u>ah</u> .	Zb.
1.	-um.	-em, -im.
2.	-ī, i.	<i>-ē</i> .
3.	or z .	-ā.

There is no information as to the plural in Ishkashmi.

The use of bi to emphasize the future signification has not been noted in Ishkāshmī. In Zb. the use of bi is probably borrowed from Persian.

In Zēbakī -a is added to this tense to give the force of the present subjunctive. In $\underline{\text{Ish}}$. -u is employed in the same way. It will be remembered that in other cases also u in $\underline{\text{Ish}}$ is represented by a in Zb. See p. 505.

In Ish. the second person singular of the Imperative is, as elsewhere, the same as the present base. The plural is formed by adding -aw or -uw, corresponding to Zb. -av. Thus, avīraw, bring ye; wanuw, say ye.

The past tense is conjugated as usual,—by adding the pronominal suffixes to the past participle, exactly as in Zēbakī. Thus, <u>shud-im</u>, I went; <u>kul-ut</u>, thou madest; <u>āgh</u>ad, he came; <u>apukh</u>t-ān, they listened.

The perfect participle is formed by adding -uk to the past participle, the termination corresponding to the Zb. -ak or $\bar{a}k$. Thus, nulust-uk (Zb. $nal\bar{a}st-ak$), he has sat down; $\underline{shud-uk}$ (Zb. $\underline{shud-\bar{a}k}$), he has gone or become. Once formed, the participle is, $nutatis\ mutandis$, treated as in Zēbakī.

The negative is na or nus, not. The latter corresponds to Zb. nas.

MUNJĀNĪ OR MUNGĪ.

This is the language of Munjān, renowned for its lapis-lazuli mines. The tract is situated north of the Dōrāh Pass, on the north side of the Hindū Kush. It is nearly due north of the town of Chitrāl. According to Tomaschek, Munjānī is the one of the Ghalchah languages, which, more than any other, possesses ancient forms, and which most nearly approaches to the old language of the Avesta.

Far less is known about this language than about Wakhi, Shighni, or Sarikoli. No grammar of it is extant. The only original work dealing with it is the short vocabulary written by Shaw which is mentioned below. All subsequent investigations, up to the present Survey, have been based on this:—

AUTHORITIES -

- Shaw, R. S.,—On the Ghalchah Languages (Wakhi and Sarikoli). Journal of the Asiatic Society of Bengal, Vol. xlv, Pt. I., 1876, pp. 139 and ff. On pp. 272 and ff. there is a short Munjani Vocabnlary, compiled by Munshi Faiz Bakhsh.
- Tomascher, Prof. W.,—Centralasiatische Studien. II. Die Pamir-Dialekte. Vienna, Sitzungsberichte der philosophischen-historischen Classe der kaiserlichen Akademie der Wissenschaften. Vol. xcvi, 1880, pp. 735 and ff. The article contains a few brief remarks on the language.
- Geiger, W.,—Grundriss der iranischen Philologie, Vol. I., Pt. II., pp. 287 and ff. Strassburg, 1898. Here begins Prof. Geiger's article on 'Kleinere Dialekte und Dialektgruppen.' In this there is a little about Munjant.

The following imperfect sketch of Munjānī grammar is based on the materials afforded by the Specimens and List of Words which follow. They were prepared by Khan Sahib Abdul Hakim Khan:—

I.-NOUNS.

Tat, a father—

	Sing.	Plur.
Nom.	tāt	tāt-e.
Gen.	zhe tāt-an or tāt.	<u>zh</u> e tāt-af.
Dat.	ne tāt-an, ne tāt.	ne tāt-af.
Abl. (from)	zhe tāt.	<u>£h</u> e tāt-af.

THE CHALCHAH LANGUAGES.

OTHER NOUNS.

Masculine.			Frathina.	
	Singular.	Plural.	Singular.	Plural.
pūr,	a son.	pūr-e.	leghda, a daughter	leghd-e.
mēra,	a man.	mērak-e.	zhinka, a woman.	zhink-e.
yāsp,	a horse.	yāsp-e.	māyaga, a mare.	māyag-e
kūa,	a bull.	kūag-e.	ghāva, a cow.	ghāv-e.
g <u>h</u> ālf,	a dog.	għālv-e.	machia, a bitch.	machi-e.
wuza,	a goat.	wuzak-e.	wuz, a she-goat	. vouz-e.

Adjectives do not seem to change for gender.

II.—PRONOUNS.

First Person_

Sing.

ze, I.
(zhe) men, of me.
mo-kān, mine.

nā-men, to me.

to, thou.

<u>zhe</u> to, of thee.

to-kān, thine.

nā-to, thee.

Third Person-

Second Person-

wo, he.

<u>zha</u> wan, of him.

a-wan-kān, his.

nā-wan, to him.

Plur.

mā<u>kh</u>, we. <u>zh</u>e mā<u>kh</u>, of us. a-mā<u>kh</u>-kān, ours. nā-mā<u>kh</u>, to us.

māf, ye.

<u>zhe</u> māf, of you.

a-māf-kān, yours.

nā-māf, to you.

wai, waf, they.

<u>zha</u> waf, of them.

a-waf-kān, theirs.

nā-wan, to him.

nā-waf, to them.

wem, to him, him (proximate), wao (remote).

'This' is ma or mo; dem, in this; zhemaf, from these.

Adjectives are, dau, in that (country); <u>zh</u>au, from those (husks); <u>zh</u>em, of these (four).

'Who' is kedē; 'What?' is shtē; 'Own' is khai; 'Any one' is kedēvā.

Pronouns are suffixed as in Persian. Examples are, wera-it, thy brother; $t\bar{a}t$ -it, thy father; $p\bar{u}r$ - $i\underline{s}h$, his son; $t\bar{a}t$ - $i\underline{s}h$, his father.

MUNJĀNĪ. 511

Separable Pronominal terminations, used with the Past tenses, exist as in other Ghalchah languages.

They seem to be-

	Sing.	
1.	em, am.	am.
2.	et (? Transitive), ai (? Intransitive).	af.
3.	ai, a.	at.

III.—VERBS.

a. Auxiliary Verbs and Verbs Substantive-

Imperative, bāi.

	Sing.	Plur.
1.	hast-am, I am.	hast-am, we are.
2.	hast-ai, ast-ai, thou art.	hast-af, you are.
3.	hast, ast, he is.	hast-at, they are.
	sham appears in ze lāyiq ch	he-sham, I am not worthy.

The verb shia, to go, has its Present Tense as follows:-

ay-im, I go.	ay-am, we go, we are.
ay-i, thou goest.	ay-af, you go, you are.
$y\bar{i}$, he goes.	ay-at, they go, they are.

vi-am, I was.	vi-am, we were.	
vi-ai, thou wast.	vi-af, you were.	
vi-a, he was.	vi-at, they were.	

 \underline{shi} -am, I went, I became. \underline{shi} -a \underline{shi} -ai, thou wentest, thou becamest. \underline{shi} -a \underline{sho} -i, he went, he became. \underline{shi} -a

<u>sh</u>i-am, we went, we became. <u>sh</u>i-af, you went, you became. <u>sh</u>i-at, they went, they became.

b. The Active Verb-

The Ghalchah system of conjugation with different bases is clearly seen.

Present-Future-

Sing.	Plur.
 duh-um, I beat, I shall beat. deh-i, thou beatest, thou wilt beat. deh-i, he beats, he will beat. 	deh-am, we beat, we shall beat. deh-af, you beat, you will beat. deh-at, they beat, they will beat.
Other examples are,—	

First Person Singular,—wushk-im, I will arise; ay-im, I will go; zhā-im, I will say; gherv-em, I will take.

First Person Plural, - khar-am, we will eat; yi-kenam, we will do.

Third Person Singular,—dīl, he gives.

Third Person Plural, - khar-at, they eat.

If it is wished to emphasize the future signification, <u>khāmakhā</u> is prefixed. Thus, ze <u>khāmakhā</u> duhum.

Imperative.—The following examples occur:—

2nd Singular,—deh, beat; āi, go, be; khor, eat; niltha, sit; as, come; werema, stand; murra, die; dal, give; ghāza, run; avar, bring; yi-ken, make.

2nd Plural,—avare, bring; aghdave, put on; derae, put on.

The Imperfect is formed by prefixing or suffixing via to an Imperfect base. Thus, ze via dal-am or ze dal-am via means 'I was giving.'

The Past Tense is formed from a past base as in other Ghalchah dialects.

Moreover, as in them, separable pronominal terminations can be added. When the subject of a transitive verb is a pronoun it is either in the nominative case, or in the oblique form.

Examples of this tense are as follows:-

First Person Singular,—ze or men zhi-em, I did beat; yi-ker-um, I did; aver-em, I brought; shi-am, I went, I became.

First Person Plural, -mākh zhi-am, we did beat.

Second Person Singular,—to <u>zhi-et</u>, thou didst beat; <u>aghay-ai</u>, thou camest; aver-et, thou didst bring; <u>sht-et</u>, thou saidst; <u>li-et</u>, thou gavest.

Second Person Plural, - māf zhi-af, you did beat.

Third Person Singular,—shoï, he went, he became; shta, he said; boghd, he divided; yi-ker or ker, he made; guvd, he burnt; ushevd, he called; lishk, he saw; negher, he emerged; aver, he brought.

Other forms are:-

- (1) wa zhi-a, he did beat; li-a, he gave; pist-a, he asked; jeft-a, he ordered.
- (2) khuzd-ai, he sent; wushk-ai, he arose; agh-ai, he came.
- (3) fkhat-e, he agreed.

Third Person Plural,—wai or waf <u>zh</u>i-at, they did beat; <u>gh</u>erevd-at, they commenced or took.

There is no trace of any example of a special Perfect Base in the specimens. I am informed that the Perfect Tense is not used in Munjani, the Past being used instead.

The only example of a Pluperfect is ze zhi-em via or ze via zhi-em, I had beaten.

Past Conditionals appear to be <u>kh</u>ūri-am-wa, we would have eaten; and yi-keri-am-wa, we would have made (merriment).

NUMERALS.

Yu lu or le sherai chfur pānj ākhshe avde āshkie nau dah wist. One two three four five six seven eight nine ten twenty. The rest of the numerals are the same as in Persian.

YÜDGHĀ OR LEOŢKUH-I-WĀR.

This language is said to be called Yidghā or Yudghā by those who speak it, and Leoţ-kuh-i-wār (sometimes mis-written Lutkho-i-wār) by Chitrālīs. It is spoken in the upper part of the Lutkho (correctly Leoṭkuh) Valley. Its true name is probably Yūdghā.

Regarding it, Biddulph (*Tribes of the Hindoo Koosh*, p. 155), says: 'The Yidghāh language spoker in the upper part of the Ludkhō Valley, is simply a dialect of the Munjan language, which, I believe, has never yet been published. Its grammatical construction is identical with that of the Ghalchah languages . . . Like those, the Yidghāh differs from the Dard languages in its frequent use of the letter v, and in having only one tense to express both the present and the future.'

The following sentences are given by Biddulph:-

(1) What is your name?

(2) This is my brother.

(3) My-brother has two good horses.

(4) His sword is better than mine.

(5) I want to go to my home.

(6) How far is it from here?

(7) It is twenty days' journey.

(8) I told him that I could not come to-day.

(9) What do you want?

(10) Why do you ask me this?

(11) I can run faster than he can.

Tok nam ches min

Moh man vrai min.

Man vraiy-en loh ghashe yasp-i ästet.

Eyen kugor-en man kugor ghashe ästet.

Na kyē-en kshiyah mans khiyāl astet.

Ze moloh chemin lüroh ästet?

Muntroh padoh wistoh mikh.

Man nowan ishtam zok dür agoyak chowizidam.

Natoh koyi raist1?

Tū moh va-man chī pīstet.

Zoh eyen tiz ghazam.

The following specimens will be found to agree very fairly with the brief Grammar given above. The language is not a written one, and hence there are varieties of spelling, e.g. e is often substituted for a, as in men, my, for man. Again, in meah, a day, & issubstituted for i.

The following are the principal grammatical forms found in the Specimens and Listof Words:

I.—NOUNS.

Tat.	a	father,-
------	---	----------

	Sing.	Plur.
Nom.	tat.	tat-e.
	tat.	
Gen.	wa tat.	wa tat.
	zhe tat-n (wa).	zhe tat-ef (wa).
Dat.	ne tat-n.	no tat-ef.
Abl. (from)	zhe tat-n.	zhe tat-ef.
	Sing.	Plur.
	17.1.	loghd-e.
	lo <u>gh</u> da.	
3	-1 - 17 d - ()	who looked of lean
Nom. Gen.	zhe loghda (wa).	zhe loghd-ef (wa).
3	<u>zh</u> e lo <u>gh</u> da (wa). na lo <u>gh</u> da. <u>zh</u> e lo <u>gh</u> da.	$\frac{zh}{no} \log_h d - ef (wa).$ $no \log_h d - ef.$ $\frac{zh}{no} \log_h d - ef.$

Nom.

mara, a man. kemder, younger. mulk, a country.

marak-en. kemder-en. mulk-en.

¹ A corruption of rai astet.

Nom.

māl, property.pūr, a son.derakht, a tree.

dokandar, a shopkeeper.

mer, a man. yasp, a horse.

māl-en. pūr-en.

dera<u>kh</u>t-en.

dokandar-en, and others.

meṛ-an. yasp-an.

Other instances of the Nominative Plural are,—

Nom. Sing.

mer, a man.

ādam, a man.

pūr, a son.

pela, a foot.

<u>zhinko</u>, a woman.

zakhmo, a field.

Nom. Plur.

mer.

ādam.

pūr-e.

pal-e.

<u>zh</u>ink-e.

zakhm-e.

Other instances of the Oblique Plural, which sometimes seems to be used in the sense of the Nominative, are,—

Nom. Sing.
ādam, a man.
yasp, a horse.
mayegho, a mare.
keṛagh, a bull.
ghavo, a cow.
ghalf, a dog.
matsia, a bitch.
khūk, a pig.
zakhmo, a field.
kanchanī, a harlot.

Obl. Plur.

ādam-ef.

yasp-ef.

mayegh-ef.

keṛagh-ef.

ghav-ef.

ghalv-ef.

matsi-ef.

khūk-ef.

zakhm-ef.

kanchanī-ef.

The following plural oblique forms also occur, besides those mentioned below; segh-af, stripes; rupaia-gh-af, rupees (accusative plural); peles-ef, ropes.

The **Nominative** sometimes ends in en. In every such instance, it precedes a transitive verb in the past tense. It is therefore, in these instances, really the case of the Agent. Thus, kemder-en, the younger (son collected); wo marak-en, that man (sent); tat-n, the father (saw, said); in one instance, e is added, in $p\bar{u}r$ -e ne tat-n $\underline{sh}to$, the son said to the father.

The **Genitive** is, correctly, the same as the nominative, e.g. men tat daulat, (of) my father's wealth. The preposition de governs the Genitive. Thus, de fakhm, in sense; de man tat daulat, in my father's wealth; de wakht, at the time; de khwē zakhmo, in his own field; de kcho, outside.

The following are examples of the **Dative**; marak-en, to a man (dative of possession); ne ta-n, to the father; no lūr mulk-en, to a far country; no laway-an, for keeping; na <u>Kh</u>uday-en, to God; no dram-en, to inside.

In the plural we have no $\underline{kh}\underline{uk}$ -ef, for swine.

BADAKHSHI.

The following specimens are given in order to round off the account of the Ghalchah languages. They are in Badakhshī, or the language of Badakhshān. The inhabitants of Badakhshān are by nationality Ghalchahs. They live immediately to the west of Wakhān and Shighnān. They have, however, abandoned their own Ghalchah language, and now speak, and have done so for the last few centuries, a form of Persian, differing merely in pronunciation and in a few local peculiarities from the speech of Erān. This will be observed from the two following specimens. As Persian is so well known, it is unnecessary to give a detailed account of the language used in them, which is that used by the Fārsī-wān tribe. It may be mentioned that the Persian spoken in Afghanistan closely resembles Badakhshī.
